Foreword

THE EUROPA YEAR BOOK was first published in 1926. Since 1960 it has appeared in annual two-volume editions, and has become established as an authoritative reference work, providing a wealth of detailed information on the political, economic and commercial institutions of the world.

Volume I deals with international organizations and the countries of Europe, as well as providing the first part of the alphabetical survey of the rest of the world. This third section, which lists countries from Afghanistan to Brazil, has been moved to Volume I for the 1978 edition so that the two volumes are of a uniform and manageable size. Volume II now lists the rest of the countries of the world from the British Dependent Territories to Zambia.

Readers are referred to our regional books THE MIDDLE EAST AND NORTH AFRICA, AFRICA SOUTH OF THE SAHARA and THE FAR EAST and AUSTRALASIA for additional information on the geography, history and economics of these areas as well as a Who's Who of influential personalities.

The information is revised annually by a variety of methods, including direct mailing to the institutions listed. Many other sources are used, such as national statistical offices, government departments and diplomatic missions. The editor thanks the innumerable individuals and organizations throughout the world whose generous co-operation in providing current information for this edition is invaluable in presenting the most accurate and up-to-date material available. Particular indebtedness is acknowledged for material from the following publications: the United Nations' *Demographic Yearbook*, *Statistical Yearbook* and *Yearbook of Industrial Statistics*; the Food and Agriculture Organization of the United Nations' *Production Yearbook*; and *The Military Balance 1977-1978*, published by the International Institute for Strategic Studies, 18 Adam Street, London, WC2N 6AL.

March 1978.

RHODESIA

On March 3rd, 1978, it was announced that a transitional government would be formed, comprising an upper-tier Executive Council and a lower-tier Ministerial Council to administer the country and to prepare a new constitution to provide for election by universal adult suffrage leading to independence on December 31st, 1978.

The Executive Council will consist of the Prime Minister (Ian Smith), Bishop Abel Muzorewa, the Rev. Ndabaningi Sithole and Chief Jeremiah Chirau, acting in rotation as Chairman. The Council will take policy decisions by con-

sensus, dealing with constitutional and electoral matters, the restructuring of security forces, the arrangement of a ceasefire with the Patriotic Front, the release of detainees and the reviewing of sentences of political prisoners.

The Ministerial Council will comprise an equal number of black and white ministers nominated by the Executive Council. A black and a white minister will share responsibility for each portfolio and the Chairmanship will alternate between black and white ministers.

The present Legislative Assembly will continue to function until independence elections are held and will enact legislation introduced by the transitional government.

BELIZE INTRODUCTORY SURVEY

Location, Climate, Capital

Belize lies on the Caribbean coast of Central America with Mexico to the north-west and Guatemala to the south-west. The climate is sub-tropical, tempered by trade winds. The capital is Belmopan.

Recent History

Belize, known as British Honduras until 1973, was first colonized by British settlers in the seventeenth century. The frontier with Guatemala was agreed by a convention in 1859 but this was declared invalid by Guatemala in 1940. Guatemalan claims to sovereignty of Belize date back to the mid-nineteenth century and were written into Guatemala's constitution in 1945. George Price, leader of the People's United Party, became First Minister in 1961 and Premier in 1965. In January 1972 the capital of the territory was moved from Belize City to the newly built town of Belmopan. The colony was renamed Belize in June 1973. In November 1975 and July 1977 British troops and aircraft were sent to protect Belize from the threat of Guatemalan invasion. Although the United Kingdom supports Belize's wish for full independence, it is not prepared to assume sole responsibility for its defence. Talks between Guatemala and the United Kingdom were held in 1976 and 1977, but the issue remained unresolved

but the cultivation of sugar and citrus fruits which represent about two-thirds of the total value of exports, is now more important. The fishing and livestock industries are also being developed. Development assistance from the United Kingdom, Canada and various international organizations is being used to improve infrastructure and public utilities and on projects such as a rice mill and a meat-packing plant. A consortium of oil companies has undertaken exploratory drilling in the southern region. Tourism is being promoted but has suffered from unfavourable publicity over the Guatemalan dispute. Belize joined the Caribbean Community in 1974.

Transport and Communications

There are about 500 miles of good roads and 21 airstrips as well as the Belize international airport at Stanley Field. Belize City is the main port, there is a second port at Stann Creek to the south of Belize.

Education

Primary education is principally carried on through subsidized denominational schools under government control. There are also 21 secondary schools, 3 technical colleges, 4 vocational schools and a teacher-training college. Education is compulsory between the ages of 6 and fourteen years.

STATISTICAL SURVEY

Area and Population: Area 8,867 sq. miles (22,965 sq. km.); Population (census of April 7th, 1970): 120,936; Belize City 39,050, Belmopan c. 3,500. Estimated population 140,000 (1977).

B\$100 = £27.30 = U.S. \$50.00.

Note: The British Honduras (now Belizean) dollar was at par with the U.S. dollar until December 1949, when it was devalued to 70 U.S. cents (U.S. \$1 = BH\$1.429). At the same time the currency was linked to the pound sterling (at the rate of £1 = BH\$4.00). This valuation in terms of sterling remained in effect until May 1976. When the pound was devalued in November 1967 the BH dollar's value fell to 60 U.S. cents (U.S. \$1 = BH\$1.667). Since June 1972 sterling has been allowed to "float". The average value of the Belizean dollar was 57.74 U.S. cents in 1972; 60.61 U.S. cents in 1973; and 60.00 U.S. cents in 1974. In May 1976 the Belizean dollar's link with sterling was broken and the currency was pegged to the U.S. dollar at the rate of U.S. \$1 = B\$2.00 (B\$1 = 50 U.S. cents.).

THE CONSTITUTION

A constitution providing for internal self-government came into force on January 1st, 1964. It provides for a Governor, a Cabinet of Ministers and a bi-cameral Legislature.

The powers of the Governor are complete only in respect of defence, external affairs and internal security, and for the first two of these there are consultative bodies designed to familiarize Ministers with matters for which they will ultimately have responsibility. There are also advisory commissions for the public service and the subordinate judiciary.

The Legislature consists of (1) A Senate of eight members, five appointed on the advice of the Premier, two on the advice of the Leader of the Opposition, and one after consultation with such persons as the Governor considers appropriate; (2) A House of Representatives consisting of eighteen members elected by universal adult suffrage for a five-year period.

BERMUDA

INTRODUCTORY SURVEY

Location, Climate, Capital

The Bermudas or Somers Islands are an isolated group of small Atlantic islands about 570 miles off the coast of South Carolina, U.S.A. They have a mild climate. The capital is Hamilton.

Recent History

The Constitution introduced in June 1968 provided for internal self-government, although the British Government retained responsibility in certain areas. Various amendments were made in 1973, the most important being the establishment of the Governor's Council to deal with the Governor's powers over external affairs, defence, internal security and the police. In 1974 the Government leader was restyled Premier and the Executive Council became the Cabinet.

Although Bermuda is considered to be a model of good race relations, shooting incidents in 1972 and 1973, which resulted in the deaths of five people (including the Commissioner of Police and the Governor), show underlying tensions. In the general election of May 1976 the United Bermuda Party (UBP), whose policies are based on racial co-operation, was returned to power with a decreased majority.

In August 1977 Sir John H. Sharpe resigned as Premier and leader of the UBP, following dissent within the party. He was replaced by John David Gibbons. The execution in December of two convicted murderers (including the Governor's assassin) led to a further outbreak of rioting and arson; a state of emergency was declared, and British troops were flown in from Britain and Belize.

Government

Bermuda is a Crown Colony with a wide measure of internal self-government. The Queen is represented by an appointed Governor, responsible for external affairs, defence and internal security. The bicameral legislature comprises a Legislative Council (11 nominated members) and the House of Assembly, with 40 members elected for five years by universal adult suffrage. The Governor appoints the majority leader in the House as Premier and the latter nominates other Ministers. The Cabinet is responsible to the legislature.

Defence

The local defence force is the Bermuda Regiment with a strength of some 350 men.

Economic Affairs

The principal economic activity and leading source of foreign exchange is the tourist industry. Tourist expenditure in Bermuda in 1976 was estimated to be B\$191 million. There is also a significant commercial sector where exempted companies enjoy a freedom from most local taxes and constitute an important offshore financial centre, most notably in the field of insurance.

The chief source of government revenue is customs duties. There is no income tax but there are payroll taxes,

a land tax, a minor tax on the value of estates and various tourist-related taxes.

Local industries include the manufacture of paint and pharmaceuticals, printing and ship repairing.

While the dominant economic influence is now the U.S.A. there is still considerable British capital invested in Bermudan enterprises.

Transport and Communications

There are good roads and bus and ferry services, while international lines provide regular sea and air services.

Social Welfare

A wide range of welfare work is undertaken by the Department of Health and the Department of Social Services, as well as by a number of voluntary organizations.

The 1967 Contributory Pensions Act enlarged the number of those eligible for pensions, and the 1970 Hospital Insurance Act made hospital insurance available for all. It also provided for free hospital care for children and subsidized rates for the elderly.

Education

There is free compulsory education between the ages of 5 and 16, and a number of scholarships are awarded for higher education and teacher training. The Bermuda College was founded in 1972 and accepts students over the age of 16. Extramural courses are available through Queen's University, Canada, and Maryland University, U.S.A.

Tourism

The great attractions of the islands are the climate, scenery, and facilities for outdoor entertainment of all types.

Visas are not required by visitors from non-Communist countries.

Public Holidays

1978: May 24th (Commonwealth Day), June 10th (Queen's Official Birthday), August 3rd (Cup Match), August 4th (Somers' Day), November 11th (Remembrance Day), December 25th and 26th (Christmas and Boxing Day).

1979: January 1st (New Year's Day), April 13th (Good Friday).

Weights and Measures

The metric system has been widely adopted but imperial and U.S. weights and measures are both used in certain fields.

Currency

100 cents = 1 Bermuda dollar (B\$).

Exchange rates (December 1977):

£1 sterling = B\$1.83;

U.S. \$1 = B\$1.00.

TRADE AND INDUSTRY

Bermuda Chamber of Commerce: Hamilton; f. 1905; 530 mems.; Pres. WM. S. MASTERS, Jr.; Exec. Dir. AUDREY BRACKSTONE.

Union of Government Industrial Employees: P.W.D. Quarry, Hamilton Parish; f. 1967; 120 mems.; Pres. C. C. SNAITH; Sec. CHARLES EDMEAD.

TRANSPORT**ROADS**

There are about 150 miles (240 km.) of well-surfaced roads.

SHIPPING

The chief port of Bermuda is Hamilton with a secondary port at St. George's. Both are used by freight and cruise ships. An administrative board, the Ports Authority, co-ordinates the capital development of all ports in Bermuda and regulates the berthing, anchoring and mooring of all ships and boats within the ports.

There is a Freeport which is administered by the Public Works Department of the Bermuda Government, but the management of the Freeport commercial docks is conducted on its behalf by the Marine and Ports Services Department. The docks in Hamilton and St. George's are operated by the municipal authorities.

CIVIL AVIATION

Department of Civil Aviation: responsible to the Member of Executive Council for Marine and Air Services for carrying out civil aviation policy. The Director of Civil Aviation is responsible to the Governor on matters concerning the Colonial Air Navigation Order.

The only airfield is the U.S. Naval Air Station, Bermuda. All civil aircraft are handled under the jurisdiction of the Department of Civil Aviation.

The following airlines operate services to Bermuda: Air Canada, British Airways, Delta, Eastern Airlines and American Airlines.

TOURISM

Department of Tourism: Old Town Hall, Front St., Hamilton; f. 1913; tourism is the principal industry of Bermuda and is government sponsored; in 1976 558,874 tourists, including 108,837 cruise ship passengers, visited Bermuda; Dir. D. COLIN SELLEY.

BRITISH ANTARCTIC TERRITORY

The British Antarctic Territory lies within the Antarctic Treaty Area (i.e. south of latitude 60° S.). The Territory consists of all lands and islands south of latitude 60° S., between longitudes 20° and 80° W., and includes the South Orkney Islands, the South Shetlands and the Antarctic Peninsula (Graham Land).

Area: 2,095,000 sq. miles (5,425,000 sq. km.), of which land covers about 660,000 sq. miles (1,710,000 sq. km.).

Population: There is no permanent population.

High Commissioner: J. R. W. PARKER, O.B.E. (Stanley, Falkland Islands).

Director of the British Antarctic Survey: Dr. RICHARD M. LAWS, British Antarctic Survey, Madingley Rd., Cambridge, CB3 0ET, England.

BRITISH INDIAN OCEAN TERRITORY

The Colony consists of the Chagos Archipelago (or Oil Islands), about 1,180 miles (1,900 km.) north-east of Mauritius. The Territory was constituted in November 1965 to provide defence facilities for the British and United States Governments. The Chagos Archipelago, which includes the coral atoll Diego Garcia, was formerly administered by the Government of Mauritius. The islands of Aldabra, Farquhar and Desroches, formerly part of the British colony of Seychelles, became part of the Territory in 1965. These were returned to Seychelles when the latter became independent in 1976.

According to the British Ministry of Defence all the islands of the Territory are available for both British and U.S. bases. In 1974 the U.S.A. announced a proposal, subsequently approved by the British Government, to extend its naval facilities on Diego Garcia in response to the expansion of Soviet naval power in the Indian Ocean. Under a 50-year agreement with the United Kingdom, con-

cluded in 1972, the U.S.A. has a communications centre, airstrip and anchorage on the island. In 1970 a further agreement between the two Governments provided for an expansion of the facilities to allow for the construction of a harbour, a 12,000 ft. runway, refuelling facilities for a carrier task force and an increase of U.S. military personnel from 430 to more than 600 men.

Area: about 20 square miles (52 sq. km.).

Population: There are no permanent inhabitants but the islands have a floating population of contract labourers.

Currency: Seychelles rupee (q.v.).

Commissioner: P. R. A. MANSFIELD, C.M.G., Assistant Under-Secretary, Foreign Office, London.

Administrator: A. G. MUNRO, Head of East Africa Dept., Foreign Office, London.

THE BRITISH VIRGIN ISLANDS

INTRODUCTION

The British Virgin Islands consist of more than 40 islands, of which some 16 are inhabited, lying at the northern end of the Leeward Islands, 60 miles to the east of Puerto Rico and adjoining the United States Virgin Islands. The capital, Road Town, stands on the island of Tortola.

The bulk of the islands' export trade is in fresh fish, gravel and sand, and to a lesser extent, fruit and livestock. Tourism is the major industry, contributing \$12.2 million to the economy in 1975. Efforts are also being made to expand fishing and there are plans to promote the islands as a tax relief centre.

A land reclamation and development scheme involving 70 acres at Wickham's Cay, Road Town, is in progress and a large holiday development at Prospect Reef near Road Town was expected to be completed in 1977.

Governor: JAMES ROLAND WALTER PARKER, O.B.E. (Stanley, Falkland Islands).

THE GILBERT ISLANDS

The Gilbert Islands consist of 33 coral atolls and islands totalling 861 sq. km. scattered over about 5,000,000 sq. km. of ocean. There are 16 Gilbert Islands, 8 Phoenix Islands, 8 Line Islands, and Ocean Island (Banaba) lying off the Gilberts. Gilbert Islanders are Micronesians. The capital is on Tarawa Atoll in the Gilbert group.

Recent History

The Gilbert and Ellice Islands Colony was established in 1915 following the proclamation of a British protectorate over the Gilbert Islands in 1892. The Colony was governed from the Solomon Islands until January 1972 when a separate government, directly responsible to the United Kingdom, was appointed. On October 1st, 1975, the Ellice Islands were allowed to break away from the Colony to form the Territory of Tuvalu with its capital on Funafuti Atoll.

In 1975 the British Government refused to recognize as legitimate an independence move by the people of Ocean Island (Banaba) who have been in litigation with the British Government since 1971 over revenues derived from exports of phosphate. The discovery of the guano deposits on the 600 hectare Ocean Island was a prime motive in Britain's annexation of the island. Since 1920 the British Phosphate Commissioners, a consortium of the British, Australian and New Zealand Governments, have been mining phosphate for use as a fertilizer in Australia

and New Zealand. Open-cast mining so adversely affected the island's environment that the Banabans, who were removed from the island during the Second World War, were resettled on Rabi Island, 2,600 km. away in the Fiji group, and became citizens of Fiji in 1970. They remain the landowners on Ocean Island.

The Banabans rejected the British Government's argument that phosphate revenues should be spread over the whole Gilbert Islands group and in 1973, despite winning 50 per cent of the revenues, continued with litigation. They claimed unpaid royalties from the British Government and damages for the destruction of the island's environment against both the Government and the British Phosphate Commissioners. In December 1976 a judgment in the British High Court dismissed the claim for royalties on the grounds that the Government's obligations were not enforceable in law, but upheld the claim for damages. In May 1977 Australia, Britain and New Zealand offered the Banabans an *ex gratia* payment of \$A10 million without admitting liability for damages and on condition that no further appeal would be made to the courts; in July the British Phosphate Commissioners offered them \$A1.5 million in compensation. The Banabans did not accept, and took their claim to the High Court in London, which ruled that they should be paid about \$A14,000, but that they should also pay legal costs. The Banabans are expected to appeal against the High Court's decision.

CO-OPERATIVE SOCIETY

Stanley Co-operative Society: Stanley; f. 1952; open to all members of the public; Man. Mrs. K. BERNTSEN.

TRANSPORT

ROADS

There are 13 miles of made-up road in and around Stanley. Elsewhere tracks link the settlements which are passable by land rover or motor cycle in all but the worst weather.

SHIPPING AND CIVIL AVIATION

There is communication between the Islands and the mainland of South America by air. A weekly air service is provided with Fokker F-27 aircraft by the Argentine development line LADE, linking Stanley with Comodoro Rivadavia in southern Argentina. There is a ship on charter to the Falkland Islands Company which makes the round trip to the United Kingdom four or five times a year, carrying mail and cargo. In 1974 the transport service of the Argentine navy began a passenger and freight service between the Argentine mainland and Stanley.

Falkland Islands Government Air Service: f. 1948; maintains Beaver float-plane services between the settlements and Stanley.

BRITISH DEPENDENT TERRITORIES

Gilbert Islands

Following protests by the Banabans, the date for Gilbert Islands self-government was postponed until January 1st, 1977, while new safeguards for their interests were drawn up. In November 1977 Gilbertese representatives and leaders of Fiji's Banaban community agreed to hold a referendum in mid-1978, supervised by the UN, to decide whether Ocean Island should be separated from the Gilbert Islands. The Gilbert Islands were expected to attain full independence after a general election in June 1978.

Economy

Some 450,000 metric tons of phosphate are exported annually from Ocean Island by the British Phosphate Commissioners. Copra is the only other export. Most islanders are fully engaged in subsistence activities.

STATISTICAL SURVEY

Area: Land area: 861 sq. km.

Population (1973 census): 51,932; Tarawa (capital) 17,188.

Agriculture (1976): Copra 6,505 long tons.

There is an irregular service from Tarawa to Suva, Fiji by Government vessels. Ships owned by the Daiwa Line operate a six-weekly service from Japan and Australia, and tankers bring fuel from Fiji and occasionally from Nouméa in New Caledonia.

CIVIL AVIATION

Air Nauru operates a twice-weekly service from Nauru which connects with services to Hong Kong, Melbourne, Fiji, Nouméa, Vila and Honiara. There is a fortnightly service operated by Air Pacific between Fiji, Tuvalu and Tarawa. The internal air service flies twice weekly between Tarawa and seven other islands. There are seven airfields in the Islands and two more were under construction in 1977.

HONG KONG

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Capital

The Colony of Hong Kong lies off the south coast of China and consists of the island of Hong Kong, Stonecutters Island, the Kowloon Peninsula and the New Territories, which are partly on the mainland. The climate is sunny and dry in winter, and hot and humid in summer. The official language is English, but Cantonese is universally spoken and Mandarin is widely understood. The main religion is Buddhism; Confucianism, Islam, Hinduism and Taoism are also practised and there are more than a quarter of a million Christians. The capital is Victoria.

History

Hong Kong Island was ceded to Britain under the terms of the Treaty of Nanking in 1842. The Kowloon Peninsula was acquired in 1860. The New Territories were leased from China in 1898 for a period of 99 years. However, since 1949 China has asserted that the above treaties are no longer valid.

Hong Kong was temporarily occupied by Japan during the Second World War, but British government was re-established in 1945.

Government

The Colony is administered by the Governor, the Executive Council of five *ex officio* members and nine others and the Legislative Council consisting of four of the *ex officio* Executive Council members, 15 other official members and 22 unofficial members.

Defence

Defence forces in the Colony number about 8,630; 7,800 in the army, 550 in the navy and 280 in the air force. Additionally, there are auxiliary defence units. Proposed defence expenditure for 1977/78 was HK \$346.8 million.

Economic Affairs

Hong Kong is a free trade area and one of the principal entrepôt ports of the world. Manufactured goods, particularly textiles and electrical goods, provide three-quarters of total export earnings. Commerce plays an important part in the economy and Hong Kong banking and mercantile houses have branches all over the Far East. In 1964 legislation was enacted to limit the activities of unincorporated banks.

In 1974 and 1975 there was effectively no growth in the Hong Kong economy due to prolonged recession in the major industrial nations, particularly the U.S.A. and the EEC countries which together account for over 60 per cent of the colony's exports. However, in 1976 the economy made a rapid recovery, achieving an increase of 16 per cent in the G.D.P. for the year. Total exports rose by 39 per cent. A more modest rate of growth was forecast for 1977, due partly to restrictions imposed by Hong Kong's traditional markets.

Transport

Transport facilities include buses, trams, and ferries and a railway runs north from Kowloon to the Chinese

BRITISH DEPENDENT TERRITORIES

Hong Kong

border. An underground railway is under construction and scheduled for completion in 1980.

Social Welfare

Social welfare is administered by the Social Welfare Department which initiated a scheme of five-year development programmes in 1973. It is not a comprehensive system; for instance, there is no unemployment benefit. Resettlement of refugees from mainland China is also undertaken by the Government. In 1977 there were 19,270 hospital beds in Hong Kong, representing 4.4 beds per thousand population.

Education

Since 1965, with the doubling of free places in primary schools and the introduction of a system of subsidized places in primary schools, every child is ensured a primary education. There are five types of secondary school: Anglo-Chinese grammar schools, Chinese middle schools, secondary technical schools, secondary modern schools and pre-vocational schools. There are three government-run teacher-training colleges. The two universities have a combined enrolment of over 8,000 students.

Tourism

Hong Kong is one of the main tourist centres of the Far East, and tourism is the second largest source of foreign exchange.

Visas are not required to visit Hong Kong by nationals of the following countries: Andorra, Belgium, Brazil, Chile, Colombia, Denmark, Ecuador, France, Ireland, Israel, Italy, Liechtenstein, Luxembourg, Monaco, Nauru, the Netherlands, the New Hebrides, Norway, Portugal, San Marino, Spain, Sweden, Switzerland, Turkey, the United

Kingdom, dependent territories and Commonwealth countries (for a visit of not more than 3 months); Argentina, Austria, Bolivia, Costa Rica, the Dominican Republic, El Salvador, Finland, the Federal Republic of Germany, Greece, Guatemala, Honduras, Iceland, Iran, Maldives, Mexico, Morocco, Nepal, Nicaragua, Pakistan, Panama, Paraguay, Peru, Tunisia, the U.S.A., Uruguay and Venezuela (for a visit of not more than 1 month); nationals of all other countries (for a visit of not more than 7 days).

Public Holidays

1978: June 10th (Tuen Ng, Dragon Boat Festival), July 1st (first weekday in July), August 7th (first Monday in August), August 28th (Liberation Day), September 18th (day following Chinese Mid-Autumn Festival), October 10th (day following Chung Yeung Festival), December 25th (Christmas Day), December 26th (first weekday after Christmas Day).

1979: January 1st (first weekday in January), January-February* (Chinese New Year), April 5th (Ching Ming), April 13th-16th (Easter), April 21st (The Queen's Birthday).

* From the first to the third day of the first moon of the lunar calendar.

Weights and Measures

The metric system is in force. Chinese units include tsün (37.147 mm.), chek or ch'ih (37.147 cm.); kan or catty (604.8 grammes), tam or picul (60.479 kg.).

Currency and Exchange Rates:

100 cents = 1 Hong Kong dollar (HK \$).

Exchange rates (December 1977):

£1 sterling = HK \$8.49;

U.S. \$1 = HK \$4.65.

FINANCE

100 cents = 1 Hong Kong dollar (HK \$).

Coins: 5, 10, 20 and 50 cents; 1, 2 and 5 dollars.

Notes: 1 cent; 5, 10, 50, 100 and 500 dollars.

Exchange rates (December 1977): £1 sterling = HK \$8.49; U.S. \$1 = HK \$4.65.

HK \$100 = £11.775 = U.S. \$21.52.

Note: From September 1949 to November 1967 the Hong Kong dollar was officially valued at 1s. 3d. sterling (£1 = HK \$16.00) or 17.5 U.S. cents (U.S. \$1 = HK \$5.714). On November 20th, 1967, the Hong Kong dollar was devalued, in line with sterling, to 15 U.S. cents (U.S. \$1 = HK \$6.667) but, three days later, it was revalued at 1s. 4½d. or 6.875p (£1 = HK \$14.545), worth 16.5 U.S. cents (U.S. \$1 = HK \$6.061) until August 1971. The relationship to sterling remained unchanged and a rate of U.S. \$1 = HK \$5.582 (HK \$1 = 17.91 U.S. cents) came into operation in December 1971. After sterling was allowed to "float" in June 1972, the Hong Kong dollar was devalued in July 1972, when the central exchange rate became U.S. \$1 = HK \$5.65 (HK \$1 = 17.70 U.S. cents). This was retained until February 1973, after which the central rate was U.S. \$1 = HK \$5.085 (HK \$1 = 19.666 U.S. cents) until November 1974, since when the Hong Kong dollar has been "floating". For calculating the value of foreign trade transactions, the average value of the Hong Kong dollar was 19.5 U.S. cents in 1973; 19.8 U.S. cents in 1974; 20.2 U.S. cents in 1975; 20.5 U.S. cents in 1976.

THE CONSTITUTION

The Government of Hong Kong, which consists of the Governor, the Executive Council and the Legislative Council, is constituted under the authority of Letters Patent and Royal Instructions.

The Executive Council is consulted by the Governor on all important administrative questions. In addition to five *ex officio* members, there are eight unofficial members and one nominated official member.

The Legislative Council, which advises on and approves the enactment of the Colony's laws and approves all expenditure from public funds, consists of four of the *ex officio* members who sit on the Executive Council, 15 other official members and 22 unofficial members. A finance committee comprising all the unofficial members meets in private to scrutinize all government expenditure proposals; two subcommittees deal with public works capital expenditure, and with government staff increases.

MONTSERRAT

Montserrat is one of the Leeward Islands which stretch in an arc south-east from Puerto Rico. It elected not to become part of the West Indies Associated States in January 1967.

STATISTICS

Area: 39.5 sq. miles (102 sq. km.).

Population: (1970 census): 11,458, Dec. 1976 est. 12,162; Plymouth (capital) c. 3,000.

Births and Deaths (1975): 206 live births (birth rate 16.9 per 1,000); 128 deaths (death rate 10.5 per 1,000).

Agriculture: About one-quarter of the land is under cultivation, the principal crops being cotton, limes, mangoes, avocados, coconuts and vegetables. A further one-half of the island's 25,000 acres is potential agricultural land. The Government is actively pursuing a resettlement programme for small-scale farmers. Though there is only a limited area suitable for arable farming, the prospects for livestock are becoming encouraging.

Forestry: An area of 5,000 acres is covered by forests. Trial plots of pine, eucalyptus and mahogany have been established.

FINANCE

100 cents = 1 East Caribbean dollar (EC\$).

Coins: 1, 2, 5, 10, 25 and 50 cents.

Notes: 1, 5, 20 and 100 dollars.

Exchange rates (December 1977): £1 sterling = EC \$4.95;

U.S. \$1 = EC \$2.70.

EC \$100 = £20.20 = U.S. \$37.00.

Note: The East Caribbean dollar (EC\$) was introduced in October 1965, replacing (at par) the West Indian dollar (WIS), linked to sterling at the rate of £1 = WIS \$4.80. The exchange rate was U.S. \$1 = EC\$2.00 (EC\$1 = 50 U.S. cents) from November 1967 to August 1971, and U.S. \$1 = EC\$1.842 (EC\$1 = 54.29 U.S. cents) from December 1971 to June 1972. The pound was allowed to "float" in June 1972 but the East Caribbean dollar remained linked to sterling until July 1976, when the exchange rate was pegged at a mid-point of U.S. \$1 = EC\$2.70 (EC\$1 = 37.04 U.S. cents). The average exchange rate was U.S. \$1 = EC\$1.959 in 1973; U.S. \$1 = EC\$2.053 in 1974.

SOLOMON ISLANDS

The Solomon Islands comprises the major islands of Choiseul, Santa Isabel, New Georgia, Malaita, Guadalcanal and San Cristobal, plus numerous small islands, totalling 29,785 square kilometres in area. Much of the Solomon Islands remains under dense tropical rainforest; extensive tracts of native and introduced grassland cover the northern plains of Guadalcanal. The total population in 1976 was 196,823 which included 1,359 Europeans, 452 Chinese, 12,753 Micronesians resettled from the Gilbert Islands and 7,821 Polynesians from the Polynesian "outliers" in the western Pacific near the Solomons. The rate of population growth is very high. The capital is Honiara on the island of Guadalcanal.

Recent History and Government

The British Solomon Islands Protectorate became the Solomon Islands on January 2nd, 1976. In 1960 a Legislative Council and Executive Council were set up with an appointed membership. These bodies were revised in 1964 to provide for a council of three *ex officio*, eight official, eight elected and two nominated members. Further revisions in 1967 and 1970 increased the number of elected members to 14 and then 17. After general elections in 1973, a new Governing Council of 24 elected members was constituted and a ministerial system introduced. Solomon Mamaloni, leader of the People's Progress Party (PPP), was elected Chief Minister in August 1974. Following the announcement of self-government in January 1976, arrangements for independence in July or August 1977 were tentatively proposed and the Legislative Assembly was increased to 38 members. Immediately before the announcement the Chief Minister resigned, the Cabinet was radically re-organized and Solomon Mamaloni was re-elected. The new Cabinet contained five members of the PPP's former opposition, the United Solomon Islands Party. After a general election in June 1976, a new Chief Minister, Peter Kenilorea, was chosen by the Assembly.

In 1977 constitutional talks were held between British

negotiators, led by Lord Goronwy-Roberts, and a delegation led by Peter Kenilorea. It was agreed that the Solomon Islands should become an independent state in July 1978. The Solomon Islands will be a constitutional monarchy, with Queen Elizabeth II (represented locally by a Governor-General who must be a Solomon Islands citizen) as Head of State. There will be a unicameral parliamentary system and a Cabinet headed by a Prime Minister; emphasis is to be laid on the devolution of power to provincial governments. The British Government intends to give development and budgetary aid totalling £28 million during the first four years of independence.

Economic Affairs

In an attempt to diversify the economy away from the single export crop copra, a number of resource surveys were carried out during the 1950s and 1960s. By 1977 copra's traditional dominance as an export crop had been reduced to about 20 per cent by value through diversification into fish, timber and palm oil, while there was a medium-term export potential in beef, cattle and rice.

A heavily mineralized area at Betilonga and in the Suta-kiki Valley, on Guadalcanal, has been investigated for gold, silver and copper, and an asbestos deposit at Kumboro on Choiseul has been surveyed. After seven years' research into the prospects of mining the bauxite deposits on Rennell Island, the companies involved (one Australian and one Japanese) withdrew from the project in 1977. This was partly because of the continuing slackness in the Japanese aluminium trade, and partly because of the difficulties of raising finance. On Bellona Island an estimated 10 million metric tons of phosphate rock is under investigation. The other main resources in the Solomons are fish and timber. Rice and cattle farming are being developed on the grasslands, the latter largely in association with investment from Australia and the Asian Development Bank. The export of skipjack tuna began in 1972 and cocoa and chillies are exported on a smaller scale.

THE CONSTITUTION

The present constitution, conferring internal self-government, was introduced on January 2nd, 1976. There is a Governor and a Council of Ministers. The appointed Governor must act in accordance with the advice of the Council of Ministers except in his reserved subjects of defence, external affairs and internal security. The Council of Ministers comprises eight Ministers who are collectively

responsible to the Legislative Assembly for advice given to the Governor in the exercise of their functions under the Constitution. The Legislative Assembly is composed of 38 elected members who choose the Chief Minister.

Internal self-government was introduced on the understanding that, subject to the approval of Parliament, independence should follow within 12 to 18 months.

In 1977 the political parties reorganized into three new parties, the Independent Party (IP), the Opposition Coalition Party (OCP) and the Solomon Islands Rural Party (SIRP).

JUDICIAL SYSTEM

The High Court is a Superior Court of Record with jurisdiction and powers as prescribed by the Solomon Islands Constitution or by any law for the time being in force in the Solomon Islands. The Judges of the High Court are the Chief Justice, resident in the Solomon Islands and employed by their government, and Puisne Judges, who are non-resident and visit the territory as and when necessary, as prescribed by the Governor. Appeals from this Court go to the Fiji Court of Appeal and ultimately, in certain cases, to Her Majesty in Council.

In addition there are Magistrates' Courts staffed by lay magistrates exercising limited jurisdiction in both civil and criminal matters. There are also Native Courts staffed by elders of the native communities which have jurisdiction in the areas of established native custom, petty crime and local government by-laws. In 1975 a Customary Lands Appeals Court was established to hear land appeals from local courts.

Chief Justice of the High Court: R. B. DAVIS, O.B.E.**RELIGION**

Most of the people are Christian, and the remainder still follow their traditional animism.

There is no local independent commercial newspaper, although efforts have been made to establish one.

RADIO

Solomon Islands Broadcasting Corporation: f. 1976; daily transmission (on VQO-1030 KHz, VQO5-5020 KHz and VQO9-9545 KHz) are mainly in Pidgin with a certain amount of simple English. Broadcasts total 134 hours a week, including 14 hours of school programmes. Almost 50 per cent of the programming is produced from locally recorded material. Audience figures for 1975 were estimated at 100,000 rural and 20,000 urban.

In 1976 there were 233 primary co-operative societies working mostly outside the capital.

TRANSPORT**ROADS**

There were 455 kilometres of main road in 1976. Road construction and maintenance is difficult because of the nature of the country, and what roads there are serve as feeder roads to the main town of an island. Honiara now has a main road running about 65 kilometres each side of it along the north coast of Guadalcanal, and Malaita has a road 157 kilometres long running north from Auki and around the northern end of the island to the Lau Lagoon, where canoe transport takes over; and one running south for 27 kilometres to Bina. On Makira a road has been built linking Kira Kira and Kakoranga, a distance of 54 kilometres. Before it abandoned mining investigations in 1977, the Mitsui Mining and Smelting Company built 40 kilometres of road on Rennell Island.

SHIPPING

Regular shipping services (mainly for freight) exist between the Solomons and Australia (Sydney and Brisbane), New Zealand, Bougainville (Kieta), Hong Kong, Japan and European ports. In 1976 internal shipping

BRITISH DEPENDENT TERRITORIES

was provided by 32 ships of the government marine fleet and about 106 commercial vessels. Gross tonnage is 4,354. The two main ports are at Honiara and Gizo. The ports are controlled by the Solomon Islands Port Authority.

TUVALU

The former Gilbert and Ellice Islands Colony, situated in the South-West Pacific around the point where the International Date Line cuts across the Equator, was divided on October 1st, 1975, into the two territories of the Gilbert Islands and Tuvalu (the former Ellice Islands), after a referendum held in August 1974 in the Ellice Islands resulting in a clear majority in favour of separate status as Tuvalu.

Tuvalu comprises nine islands south of the Gilbert Islands. It was administered by the existing Gilbert and Ellice Islands Council of Ministers until January 1st, 1976, but on October 1st, 1975, formed its own Cabinet and legislative assembly based at the capital, Funafuti. The former Deputy Governor of the Gilbert and Ellice Islands is now Her Majesty's Commissioner in Tuvalu. The United Kingdom will finance capital projects and help to meet the recurrent costs of government.

Elections were held in August 1977 and most of the former members and all the Ministers were returned for a further term of office.

STATISTICS

BRUNEI

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The State of Brunei lies on the north-west coast of the island of Borneo. It is surrounded on the landward side by Sarawak, one of the two eastern states of Malaysia. The climate is tropical, characterized by consistent temperature and humidity. Annual rainfall ranges from about 110 inches (280 cm.) in lowland areas to over 150 inches (380 cm.) in the interior. Temperatures are high, the annual extreme range being 23°C (73°F) to 35.8°C (96.4°F). The principal language is Malay though Chinese is also spoken and English widely used. The Malay population (65 per cent) is Muslim. Most Chinese are Buddhist, Confucian or Taoist. Europeans and Eurasians are largely Christian. The flag (proportions two by one) comprises two diagonal stripes of black and white on a yellow background, with the state emblem centred in red. The capital is Bandar Seri Begawan, formerly called Brunei Town.

Recent History

In 1888, when North Borneo became a British protectorate, Brunei became a British-protected state. Between 1906 and 1941, a form of government emerged which included a state council. In 1959 a new constitution was adopted.

A revolt led by A. M. Azahari and the Brunei People's Party broke out in December 1962, prompted by dissatisfaction with the prospect of Brunei's joining the proposed Malaysian Federation. The disorders were suppressed, the People's Party banned and Azahari was given asylum in Malaya. In the event, in 1963 the Sultan decided against joining the Federation. From 1962 he ruled by decree, and the state of emergency declared in that year has remained in force. Sir Muda Hassanal Bolkiah succeeded his father as Sultan in 1967.

In December 1975 the UN General Assembly passed a resolution calling for British withdrawal from Brunei, the return of political exiles and for elections to be held. However, the Brunei Government remained reluctant to renegotiate the terms of its agreement with the United Kingdom and talks held in June 1977 between the two Governments were inconclusive.

A number of people prominent in the 1962 rebellion were still in detention in 1977 and relations with Malaysia remained strained because of its support for the exiled former members of the People's Party.

Government

Under an agreement signed in November 1971 Brunei was granted full internal self-government and ceased to be a protected state. The United Kingdom continues to conduct Brunei's external relations. Internal security is the responsibility of the Brunei Government. The constitution confers supreme executive authority in the State on the Sultan. He is assisted and advised by five Constitutional Councils: the Religious Council, the Privy Council, the Council of Ministers, the Legislative Council and the Council of Succession.

Since the rebellion of 1962 certain provisions of the constitution have been suspended and the Sultan has ruled by decree.

Defence

Under the 1959 Constitution as amended in November 1971, Brunei and Britain share responsibility for the State's defence and security. The Royal Brunei Malay Regiment numbered 2,600 men in 1977. Defence expenditure in 1977 was estimated at B\$303 million. The British Government is represented on the Brunei Defence Council and a Gurkha battalion of the British army is stationed in Brunei.

Economic Affairs

Brunei's economy depends almost entirely on its petroleum and natural gas resources. Crude petroleum is the essential source of revenue and principal export, with daily production at about 230,000 barrels in late 1977. Export earnings from oil, B\$762 million in 1973, rose to B\$2,428 million in 1976. Earnings from natural gas, B\$46.5 million in 1973, increased to B\$685 million in 1976. Sales of oil and natural gas are largely responsible for Brunei's favourable trade balance. In 1976 there was a surplus of B\$2,650.7 million.

Revenues from oil and gas are being used to finance ambitious development projects aimed at improving infrastructure, increasing public and private investment, diversifying the economy and improving social welfare. Projects already completed include an international airport, a deep-water port at Muara and a natural gas liquefaction plant, the largest in the world, at Lumut. The Five-Year Plan (1975-79) stresses the importance of diversification and aims at creating 10,000 new jobs by 1978. In 1973 the G.D.P. reached B\$997.3 million. It more than doubled in 1974 to B\$2,406 million, but dropped by 5.7 per cent in 1975 to B\$2,268 million, largely as a result of a decline in the demand for oil. Other sectors of the economy expanded, notably manufacturing, which grew by 55 per cent in 1975. The rate of inflation was 21.4 per cent in 1974 but only 3.9 per cent in 1975. Highly favourable tax concessions were introduced in 1975 with the aim of encouraging investment in new industries. The areas most suitable for industrial development are timber, paper, fertilizers, petro-chemicals and glass. In 1976 government investment in development projects totalled B\$82 million, well below the Plan target of \$126 million.

With the expansion of the oil and gas industries the relative importance of agriculture has declined, and Brunei imports around 80 per cent of its food requirements. However, much potential agricultural land lies undeveloped and the Five-Year Plan aims at achieving self-sufficiency in those crops, such as rice, that Brunei can produce itself.

Transport

There are five ports in Brunei. Most sea traffic is handled by a deep-water port at Muara. Brunei International airport was opened in 1974. There are some 370 kilometres of roads and 720 kilometres of district tracks.

BRUNEI

Introductory Survey, Statistical Survey.

Social Welfare

Free medical services are provided by the state. In 1973 there was one hospital bed for each 166 of the population. There is a flying doctor service as well as various clinics, travelling dispensaries and dental clinics. A non-contributory state pensions scheme for the old and disabled came into operation in 1955.

Education

Education is free. Schools are classified according to the language of instruction, i.e. Malay, English or Chinese (Mandarin). Total enrolment in primary schools was 30,912 in 1976, while in secondary schools the enrolment was 14,989. There are two teachers' training colleges.

Tourism

Tourism is relatively underdeveloped though there are the beginnings of a tourist industry. The Five-Year Plan (1975-79) emphasizes the expansion of tourism.

Visas are not required by British visitors for stays of up to 14 days. Holders of other passports normally require an entry permit.

Public Holidays

1978: May 31st (Anniversary of the Royal Brunei Malay Regiment), July 3rd (Meraj, Ascension of the Prophet),

July 15th (Sultan's Birthday), August 5th (First day of Ramadan), August 10th (Anniversary of the Revelation of the Koran), September 4th and 5th (End of Ramadan), September 29th (Constitution Day), November 11th and 12th (Hari Raya Haji), December 2nd (Muslim New Year), December 25th (Christmas Day), December 26th (Boxing Day).

1979: January 1st (New Year's Day), January-February (Chinese New Year)*, February 10th (Mouloud, Birth of the Prophet).

* From the first to the third day of the first moon of the lunar calendar.

Note: Dates are subject to alteration.

Weights and Measures

The imperial system is in operation but local measures of weight and capacity are used. These include the Gantang (1 gallon), the Tahil (1½ oz.) and Kati (1½ lb.).

Currency and Exchange Rate

100 cents = 1 Brunei dollar (B\$).

Exchange rates (December 1977):

£1 sterling = B\$4.305;

U.S. \$1 = B\$2.356.

FINANCE

100 sen (cents) = 1 Brunei dollar (B\$).

Coins: 1, 5, 10, 20 and 50 cents.

Notes: 1, 5, 10, 50 and 100 dollars.

Exchange rates (December 1977): B\$1 = 1 Singapore dollar; £1 sterling = B\$4.305; U.S. \$1 = B\$2.356.

B\$100 = £23.23 = U.S. \$42.44.

Note: The Brunei dollar (B\$) was introduced in June 1967, replacing (at par) the Malayan dollar (M\$). From September 1949 the Malayan dollar was valued at 2s. 4d. sterling (£1 = M\$8.5714) or 32.667 U.S. cents (U.S. \$1 = M\$3.0612). This valuation in terms of U.S. currency remained in effect until August 1971. Between December 1971 and February 1973 the Brunei dollar was valued at 35.467 U.S. cents (U.S. \$1 = B\$2.8195). From February to June 1973 the Brunei dollar's value was 39.407 U.S. cents (U.S. \$1 = B\$2.5376). In terms of sterling, the exchange rate was £1 = B\$7.347 from November 1967 to June 1972. The formal link with the Malaysian dollar, begun in June 1967, ended in May 1973 but the Brunei dollar remained tied to the Singapore dollar. Since June 1973 the Singapore dollar has been allowed to "float". The average market exchange rate (B\$ per U.S. \$) was: 2.809 in 1972; 2.444 in 1973; 2.437 in 1974; 2.371 in 1975; 2.471 in 1976.

THE CONSTITUTION

Note: Parts of the constitution have been in abeyance since 1962.

A new constitution was promulgated in September 1959. Under it sovereign authority is vested in the Sultan, who is to be assisted and advised by five Councils:

The Religious Council: In his capacity as head of the Islamic Faith, the Sultan is advised in all Islamic matters by the Religious Council, whose members are appointed by the Sultan.

The Privy Council: This Council, presided over by the Sultan, is to advise the Sultan on matters concerning the Royal prerogative of mercy, the amendment of the constitution and the conferment of ranks, titles and honours.

The Council of Ministers: Presided over by the Sultan, the Council of Ministers considers all executive matters as well as those raised by the Legislative Council. It is composed of 11 members.

The Legislative Council: This council is presided over by a Speaker appointed by the Sultan. The Council introduces Bills, passes laws, exercises financial controls and scrutinizes government policies.

The Council of Succession: Subject to the Constitution this Council is to determine the succession to the throne should the need arise.

A Menteri Besar (Chief Minister) is responsible to the Sultan for the exercise of all executive authority. He is assisted by a State Secretary, an Attorney-General and a State Financial Officer.

The State is divided into four administrative districts, in each of which is a District Officer (Malay) responsible to the Menteri Besar.

THE GOVERNMENT

(December 1977)

The Sultan: H.H. MUDA SIR HASSANAL BOLKIAH MU'IZZAD-DIN WADDAULAH (succeeded October 5th, 1967; crowned August 1st, 1968).

General Adviser to H.H. The Sultan: Pehin Dato Isa.

Menteri Besar: Pengiran DIPA NEGARA LAILA DI-RAJA
Pengiran ABDUL MOMIN BIN Pengiran Haji ISMAIL.

State Secretary: Pehin Dato ABDUL AZIZ Alhaj.

State Financial Officer: Pehin Dato J. LEE.

Attorney-General: Pengiran BAHRAIN BIN Pengiran Haji ABAS (acting).

Head of Religious Affairs: Pehin Dato MOHD. ZAIN.

DIPLOMATIC REPRESENTATION

Brunei's external relations are conducted by the United Kingdom.

Barisan Kemerdeka'an Rakyat—BAKER (*Brunei People's Independence Front*): f. 1966; an amalgamation of all the former parties; Pres. ZAINAL ABIDIN PUTEH.

JUDICIAL SYSTEM

The Supreme Court consists of the High Court and the Court of Appeal. There are also Magistrates' Courts of First, Second and Third Class.

The Supreme Court: Consists of the Chief Justice and Commissioners of the Supreme Court appointed by the Sultan. The High Court has unlimited original jurisdiction in most civil matters and unlimited criminal jurisdiction.

Courts of Magistrates: There are Courts of Magistrates of the First, Second and Third Class. They have original jurisdiction in minor civil and criminal cases.

Courts of Kadhis: Deal solely with questions concerning Muslim religion, marriage and divorce. Appeals lie from these Courts to the Sultan in the Religious Council.

Chief Justice: Dato Sir GEOFFREY GOULD BRIGGS.

Chief Kadhi: Pehin Dato IMAM Dato PADUKA Seri SETIA Awang Haji ABDUL HAMID BIN BAKAL (acting).

RELIGION

The official religion of Brunei is Islam, and the Sultan is head of the Islamic population. Muslims number about 60,000, most of them Malays. The Chinese population is either Buddhist, Confucianist, Taoist or Christian. Large numbers of the indigenous races are animists of various types. The remainder of the population are Roman Catholics, Anglicans or members of the American Methodist Church of Southern Asia.

BURMA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Socialist Republic of the Union of Burma lies in the uppermost region of South-East Asia between the Tibetan plateau and the Malayan peninsula. It is bordered by Bangladesh and India to the north-west, China and Laos to the north-east and Thailand to the south-east. The climate is tropical, with an average temperature of 27°C (80°F) and monsoon rains from May to October. The official language is Burmese and there are also a number of tribal languages. About 80 per cent of the population are Buddhists. There are Christian, Hindu and Muslim minorities, and there is a Chinese community of some 350,000. The national flag is red with a blue canton bearing two ears of rice within a cogwheel and a ring of 14 stars, all in white. The capital is Rangoon.

Recent History

Burma was annexed to British India during the nineteenth century. It was separated from India in 1937 with a limited measure of self-government. Japanese forces occupied the country in 1942 and granted nominal independence under a government of anti-British nationalists. The Burmese nationalists later turned against Japan and aided Allied forces to retake the country. They formed a resistance movement, the Anti-Fascist People's Freedom League led by Gen. Aung San, which became the main political force after the defeat of Japan. Aung San was assassinated in July 1947 and was succeeded by U Nu. In January 1948 the Union of Burma became independent, outside the Commonwealth, with U Nu as the first Prime Minister.

During the first decade of independence Burma was a parliamentary democracy and resisted revolts by communist and other insurgent groups. In 1958 the ruling AFPFL split, precipitating a political crisis. U Nu invited the Army Chief of Staff, Gen. Ne Win, to head a caretaker government and restore order. Elections in February 1960 gave an overwhelming majority to U Nu, leading the Union Party, and he resumed office in April. Despite its popularity, the U Nu administration proved ineffective in dealing with internal security and economic development, while the Union Party was split by factional dissension. In March 1962 Gen. Ne Win intervened again, this time by staging a coup to depose U Nu. The new Revolutionary Government suspended the constitution and instituted authoritarian control through the Government-sponsored Burma Socialist Programme Party (BSPP). All other political parties were outlawed in March 1964.

The next decade saw the creation of a more centralized system of government, representing an attempt to win popular support and nationalize the economy. In 1971 it was announced that a new constitution would be drafted with the aim of transforming Burma into a democratic socialist state and a final draft was approved in a national referendum in December 1973. Under this constitution new governmental organizations were created, the BSPP became the sole authorized political party and the country's name was changed to the Socialist Republic of the

Union of Burma. In March 1974 Ne Win (who, together with other senior army officers, became a civilian in 1972) was elected President by the new Council of State.

During 1974 and early 1975 government security forces achieved some success in suppressing various insurgent minority groups but in May 1975 five of these organizations agreed to unite in the Federal National Democratic Front (FNDF) with the aim of overthrowing the Government and establishing a federal union based on national self-determination. In June 1976 the FNDF was extended to include four more minority groups. During 1976 and 1977 operations against the insurgent groups continued and, following increased rebel activity in mid-1977, in October the Burmese army launched a major attack on communist guerrilla strongholds near the Chinese border.

Between 1962 and 1977 there were relatively few changes in Burma's ruling group. However, the BSPP congress held in February 1977, following a purge of party members in November 1976, resulted in the adoption by the Government of new economic policies and during the year several ministerial changes took place, including the replacement of the Prime Minister, U Sein Win, by the former Minister for Mines and Labour, U Maung Maung Kha. In November 1977 there were further changes in the composition of the BSPP. General elections held in January 1978 gave Ne Win a mandate to rule for a further four years.

Government

Under the constitution which came into force in January 1974, the highest organ of state is the 450-member People's Assembly, a legislative body elected by the people. From among its members the Assembly elects a Council of State, which, in turn, elects its own Chairman, who is President of the Republic. The Council is the chief decision-making organ of government and co-ordinates the work of central and local governmental organs. The Assembly also elects the Council of Ministers, which is responsible for the public administration of the state, the Council of People's Justices, the Council of People's Attorneys and the Council of People's Inspectors. As for local government, the state, formerly a federation, is now unitary, and is divided into States or Divisions. These in turn are divided into townships, and townships into wards or village-tracts. People's Councils exist for every subdivision at each of these levels.

Defence

Burma maintains neutrality and has no external defence treaties. The armed forces are largely engaged in internal security duties. In 1977 the armed forces totalled 169,500 men, of whom 153,000 were in the army, 9,000 in the navy and 7,500 in the air force. Para-military forces comprise a People's Police Force of 38,000 men and a People's Militia of 35,000 men. Defence expenditure for 1976/77 was 1,008 million kyats.

Economic Affairs

Burma is relatively rich in agricultural, fishery, timber, mineral and water resources. In 1976/77 agriculture produced about 27 per cent of the G.D.P. and employed 68

per cent of the labour force. Rice, timber and other agricultural products have traditionally been the main export items, though rice exports have declined drastically since 1964 when they accounted for about 60 per cent of export earnings, compared with 46 per cent in 1976/77.

Industry accounts for about 50 per cent of the G.N.P. Mining of tin, petroleum and coal is important; the expanding petroleum industry is expected to supply all Burma's requirements for petroleum products by the late 1970s. By 1976, 517 on-shore wells were producing 21,000 barrels of crude oil per day. There are small deposits of tungsten, lead, zinc, antimony, silver and gold, and a number of other minerals are known to exist. Burma's principal trading partner is Japan, which supplied 33 per cent of imports and took 8 per cent of exports in 1976.

Industry, transport, internal and external trade, communications and finance have been nationalized since the 1962 revolution. Economic growth has been slow, with production rising only slightly faster than the population. From 1966 to 1976 the G.D.P. grew at an annual rate of 2.3 per cent, while the population increased at a rate of 2.2 per cent. In 1973 the Government began to relax its opposition to foreign investment and aid and joined the Asian Development Bank (ADB). A World Bank Aid Burma Consultative Group was set up in 1976 to encourage increased foreign aid. Between 1973 and 1976 Burma received development aid from Federal Germany, Japan and the People's Republic of China.

A new four-year plan was launched in 1974 with the aim of raising the G.N.P. and export earnings and increasing the level of foreign and domestic investment. While the overall growth rate of 2.8 per cent in 1974/75 was well below the planned level of 6.3 per cent, in 1975/76 a rate of 6.1 per cent was achieved. In 1976/77 the growth target was put at 6.9 per cent, with the highest rate of 17.7 per cent planned for the mining sector. However, by the end of 1977 it seemed unlikely that this target would be met. In order to finance this development, the 1976/77 budget had a planned deficit of 640.3 million kyats. In 1976 a five-year programme was announced which aims to increase the overall investment ratio from 8 to 15 per cent of the G.N.P. by 1981/82 and to achieve an annual growth rate of 8.4 per cent in exports. It is planned to invest U.S. \$3,364 million in development projects in agriculture and industry during this period.

Transport and Communications

The chief artery of traffic is the river Irrawaddy, which is navigable as far as Bhamo, 900 miles (1,450 km.) inland. The Irrawaddy delta has nearly 2,000 miles (3,200 km.) of navigable waters and some parts of the Salween and the Chindwin are navigable. Railways have been modernized by the introduction of diesel engines and in 1974 comprised

2,690 track miles (4,329 km.). Burma Airways Corporation provides internal and international air services. All the railways, domestic air services and the other major inland water facilities are owned and operated by the State. All passenger and freight road transport services are to be nationalized. In 1974 there were 13,512 miles (21,745 km.) of motorable roads.

Social Welfare

Burma has fairly well-developed health facilities but they are not comprehensive. Health treatment is free. About 500,000 workers are covered by social security insurance and all workers are entitled to state pensions.

Education

Education is free, where available. Schools are divided into primary, middle and high schools. There were over 23,000 schools, colleges and professional institutes in 1974/75 with a total enrolment of 4.8 million pupils. Emphasis is placed on vocational and technical training. There are two universities.

Tourism

Tourism is undeveloped. Burma is one of the centres of Buddhism and has many temples and shrines, including the famous Shwe Dagon Pagoda in Rangoon. Mandalay and Pagan also possess outstanding temples and palaces. In 1976 18,281 tourists visited Burma.

Visas are required by all visitors.

Sport

There is little organized sport, but football, basketball, volleyball and tennis are played.

Public Holidays

1978: May 1st (World Workers' Day), July 19th (Martyrs' Day), November 14th (National Day), December 25th (Christmas).

1979: January 4th (Independence Day), February 12th (Union Day), March 2nd (Peasants' Day, anniversary of 1962 coup), March 27th (Resistance Day).

In addition to the above holidays the usual Buddhist holidays are observed.

Weights and Measures

The imperial system is in force.

Currency and Exchange Rates

100 pyas = 1 kyat.

Exchange rates (December 1977):

£1 sterling = 13.00 kyats;

U.S. \$1 = 7.10 kyats.

Coins: 1, 5, 10, 25 and 50 pyas; 1 kyat.

Notes: 1, 5, 10, 20, 25 and 100 kyats.

Exchange rates (December 1977): £1 sterling=13.00 kyats; U.S. \$1=7.10 kyats.

100 kyats=£7.69=\$14.09.

Note: Between September 1949 and August 1971 the kyat (known as the Burmese rupee before 1952) had a par value of 21 U.S. cents (U.S. \$1=4.7619 kyats). From December 1971 to February 1973 the central exchange rate was \$1=5.3487 kyats (1 kyat=18.696 U.S. cents). Between February 1973 and August 1974 the rate was \$1=4.8138 kyats (1 kyat=20.773 U.S. cents). From August 1974 to January 1975 the currency was subject to "controlled floating". In January 1975 the kyat was linked to the IMF Special Drawing Right, initially at a mid-point of 1 SDR=7.7429 kyats. In May 1977 a new rate of 1 SDR=8.54 kyats was established. The exchange rate against the U.S. dollar is adjusted from month to month. The average market rate (kyats per \$) was: 5.454 in 1972; 4.907 in 1973; 4.858 in 1974; 6.454 in 1975; 6.770 in 1976. In terms of sterling, the value of the kyat between November 1967 and August 1971 was 1s. 9d. (8.75p), the exchange rate being £1=11.4286 kyats; from December 1971 to June 1972 the rate was £1=13.937 kyats.

THE CONSTITUTION

The constitution came into force on January 3rd, 1974, following a national referendum held in December 1973. It is the basic law of the State. A summary of the main provisions follows:

General Principles

The Socialist Republic of the Union of Burma is a sovereign, independent, socialist state. There shall be only one political party, the Burma Socialist Programme Party. Sovereign power rests with the people as represented by the People's Assembly. The State is the ultimate owner of all natural resources and shall exploit them in the interests of the people. The means of production shall be nationalized. National groups shall have the right to practise their religion and culture freely within the law and the national interest. The State shall follow an independent and peaceful foreign policy.

State Organs

The structure of the State is based on a system of local autonomy under central leadership. Government operates at four levels of administration: wards or village tracts, townships, states or divisions and at national level.

People's Assembly

A unicameral legislature, the highest organ of State power, it exercises sovereign power on behalf of the people. It is elected directly by secret ballot for a term of four years. Regular sessions take place twice a year, the intervening period being no more than eight months. The People's Assembly may be dissolved if three-quarters of its members agree to it. It may delegate executive and judicial power to central and local state organs. It has the power to enact economic legislation, declare war and peace and the right to call referenda. It may constitute committees and commissions and invest them with powers and duties. Under certain circumstances the People's Assembly may dissolve the People's Councils.

Council of State

The Council of State is composed of 28 members including one representative from each of the 14 states and divisions, elected by the People's Assembly from its members. The Council of State elects a chairman from its members who is President of the Union and represents the State. The term of office of the Council and the President is the same as that of the People's Assembly. The Council of State is vested with executive power to carry out the Constitution. It has the power to convene the People's Assembly in consultation with the panel of Chairmen of the Assembly. It interprets and promulgates legislation, makes decisions concerning diplomatic relations, international treaties and agreements. It is responsible for the appointment of the heads of the bodies of the public services. The Council of State has the power to grant pardons and amnesties. It may make orders with the force of law between sessions of the People's Assembly, and may order military action in defence of the State, declare a state of emergency and martial law subject to the subsequent approval of the People's Assembly.

Council of Ministers

The highest organ of public administration, elected by the People's Assembly from a list of candidates submitted by the Council of State. Its term of office is the same as

that of the People's Assembly. The Prime Minister is elected by the Council of Ministers from among its members. It is responsible for the management of public administration and drafting economic measures and submitting them to the People's Assembly for enactment.

Council of People's Justices

The highest judicial organ. Elected by the People's Assembly from a list of its members submitted by the Council of State. Its term of office is the same as that of the People's Assembly. The People's Councils form judges' committees at local levels.

Council of People's Attorneys

Elected by the People's Assembly from a list of members submitted by the Council of State. Its term of office is the same as that of the People's Assembly. It is responsible to the People's Assembly for directing state, divisional and township law officers, protecting the rights of the people and supervising the central and local organs of state power.

Council of People's Inspectors

Elected by the People's Assembly from a list of candidates submitted by the Council of State. Its term of office is the same as that of the People's Assembly. It is responsible to the People's Assembly for the inspection of the activities of the local organs of state power, ministries and public bodies. There are also local inspectorates at each administrative level, responsible to the People's Council concerned.

People's Councils

The term of office of the People's Councils is the same as that of the People's Assembly. They are elected at different levels according to law. They are responsible for local economic and social affairs and public administration, the administration of local justice, local security, defence and the maintenance of law and order. Each of the People's Councils elects an executive committee to implement its decisions. The Executive Committees each elect a Chairman and a Secretary from among themselves who are also the Chairman and Secretary of the People's Council concerned.

Fundamental Rights and Duties of Citizens

All citizens are equal before the law irrespective of race, religion, sex or other distinction. Every citizen has the right to enjoy the benefits derived from labour, to inherit, to settle anywhere in the State according to law, to medical treatment, education and rest and recreation. Freedom of thought, conscience and expression are upheld subject to the law and the interests of state security. All citizens are bound to abstain from undermining the sovereignty and security of the State and the socialist system.

Electoral System

All citizens over 18 years are entitled to vote. Those whose parents are both citizens may stand for election to office having attained the age of 20 years (Village and Township Councils), 24 years (State and Divisional Councils), 28 years (People's Assembly). Members of religious orders and others disqualified by law are prohibited from voting or standing for election.

BURUNDI

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Burundi lies on Lake Tanganyika in central Africa, a little south of the Equator. Rwanda is to the north, Tanzania to the south and east and Zaire to the west. The climate is tropical with an irregular rainfall. The official languages are French and Kirundi; and Swahili is used in addition to French in commercial circles. Religious beliefs are African and animistic but missions have converted more than half the population to Roman Catholicism. The national flag (proportions 3 by 2) consists of a white diagonal cross on a background of red and green, with a white circle containing three green-edged red stars in the centre. The capital is Bujumbura.

Recent History

Before independence Burundi formed part of the Belgian-administered UN Trust Territory of Ruanda-Urundi, which was itself formerly part of German East Africa. Internal self-government was granted in January 1962, following elections to a new National Assembly in September 1961, and full independence in July 1962, when the two parts of the Trust Territory became separate states. Burundi continued to be linked to Rwanda in a customs and monetary union, until the agreements were terminated in January 1964. In July 1966 Mwambutsa IV, King since 1915, was deposed by his son Charles, with the help of a group of army officers, and the constitution suspended. In November 1966, Charles, now Mwami (King) Ntare V, was himself deposed by his Prime Minister, Captain (later Lieut.-Gen.) Michel Micombero, who declared Burundi a republic. Agreement on a settlement of the long dispute with Rwanda, during which armed refugees from both countries had clashed, was reached in March 1967 with the mediation of President Mobutu of Congo-Kinshasa (now Zaire).

Micombero's rule confirmed the long established dominance of the Tutsi tribe élite over the Hutu tribe who form the majority of the population. Several alleged plots against the Government in 1969 and 1971 were followed in 1972 by an abortive coup during which Ntare V was killed. The Hutus were held responsible for the attempted coup and this served as an excuse for the Tutsis to conduct a series of large-scale massacres of the rival tribe. Many Hutus fled to neighbouring countries and repression of the tribe continued.

In 1972 Micombero began a prolonged restructuring of the executive which resulted in 1973 in an appointed seven-man Presidential Bureau, with Micombero holding the dual office of President and Prime Minister. A new republican constitution was introduced in July 1974 which vested sovereignty in UPRONA (Unity and National Progress), the sole legal political party in Burundi. The President was elected Secretary General of the party and re-elected for a seven-year presidential term.

On November 1st, 1976, an army coup deposed Micombero. Lieut.-Col. (from 1977 Col.) Jean-Baptiste Bagaza was appointed President by the Supreme Revolutionary

Council (composed of army officers), and a new Council of Ministers formed.

The Prime Minister, Lieut.-Col Edouard (Ndugu) Nzambimana, announced in mid-1977 the military rulers' intention to hand over power to a civilian government in 1981.

Government

Executive power is ostensibly in the hands of a Council of Ministers, which, according to the Constitution, is directly responsible for its policy to UPRONA, the sole legal political party. Policy issues are also under the direction of the Supreme Council of the Republic (Supreme Revolutionary Council) which is entirely composed of army officers. There are eight provinces, administered by military governors, each of which is divided into districts and further sub-divided into communes.

Defence

The army was merged with the police force in 1967 and total armed strength in 1977 was about 7,000 men. Defence expenditure in 1975 amounted to 23 per cent of the national budget, compared with 13.2 per cent in 1971.

Economic Affairs

The economy is based almost entirely on agriculture, the main subsistence crops being cassava and sweet potatoes and the main cash crops coffee and cotton. Coffee is Burundi's principal export and accounted for 89.4 per cent of earnings in 1976, the main customer being the U.S.A. Tea is being developed and the Government planned to raise output to around 7,000 tons by 1978, by which time six to eight tea processing factories were to be built. The EEC countries, in particular Belgium, Luxembourg, France and Federal Germany, are among the main trading partners, but continue to provide more imports than they take exports. Inflation seriously affected the economy in 1975. Imports rose substantially whilst coffee production was disappointing and exports fell. In May 1976 the Burundi franc was devalued by 12.5 per cent.

The mining industry is based on the production of small amounts of gold, bastnaesite and cassiterite (a tin-bearing mineral). Tungsten and tantalum are also mined. Important deposits of nickel and uranium are being surveyed, and oil has been detected in the Ruzizi valley. Manufacturing industry is, however, still in its infancy, accounting for less than one-tenth of Gross Domestic Product, and many industrial and consumer goods have to be imported. In September 1976 Burundi established, with Zaire and Rwanda, the Economic Community of the Great Lakes Countries (CEPGL) and in 1974 trade agreements with EEC, through the ACP (African, Caribbean and Pacific) countries, were reached.

Most foreign aid to Burundi comes from Belgium, France and Federal Germany and through the EEC's European Development Fund. In 1974 the African Development Fund and Development Bank both made

substantial development loans to Burundi, and in 1977 Burundi signed a \$4 million loan agreement with the Arab Bank for Economic Development to finance a sewerage and drainage project in Bujumbura.

Transport and Communications

There are no railways in Burundi. Roads extend for about 3,000 km., of which 570 km. are national highways. With the help of loans from the People's Republic of China and the African Development Bank, improvements are progressing on the main roads linking Bujumbura and Gitega, and Bujumbura and Kayanza. It is also planned to extend the Bujumbura-Mutambara highway south to the Tanzania border, and to build a highway west from the capital to Rwanda and Zaire via Cibitoke and Changuu. There is passenger and freight traffic on Lake Tanganyika with Bujumbura as the main port handling about 130,000 metric tons of goods yearly and an international airport at Bujumbura equipped to take large jet aircraft.

Social Welfare

Wage-earners are protected by insurance against accidents and occupational diseases and can draw on a pension fund. Medical facilities are, however, very limited. In 1972 Burundi had 4,221 hospital beds (one for every 800 inhabitants) and in 1973 there were only 74 physicians in the whole country.

Education

Education is free but since 1972 its budget allocation has been severely reduced. Burundi receives educational aid from UNDP, UNICEF and France. French is the language of instruction in the secondary schools and Kirundi in primary schools. In 1974 there were 127,176

pupils in primary schools, 4,517 in secondary, and 4,385 student teachers. There is a university with three faculties at Bujumbura.

Tourism

Tourism is relatively undeveloped but the Government plans to encourage visitors, and in 1977 a hotel complex was built on the shores of Lake Tanganyika.

Visas are not required to visit Burundi by citizens of Tanzania and Uganda.

Sport

Sport is very popular, the chief sport being football.

Public Holidays

1978: May 1st (Labour Day), May 4th (Ascension), May 15th (Whit Monday), July 1st (Independence Day), August 15th (Assumption), September 18th (Victory of UPRONA Party), October 13th (Murder of Hero of the State Rwagasore), November 1st (All Saints'), November 28th (Republic Day), December 25th (Christmas).

1979: January 1st (New Year's Day), April 16th (Easter Monday).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 centimes = 1 Burundi franc.

Exchange rates (December 1977).

£1 sterling = 164.8 francs;

U.S. \$1 = 90.0 francs.

THE CONSTITUTION

The new republican constitution was introduced on July 11th, 1974, nearly eight years after the declaration of the republic.

The Party: UPRONA (*Parti de l'Unité et du Progrès National de Burundi*) is the sole legal political party. It determines national political orientation and state policy and supervises the actions of the Government and the judiciary. The Secretary-General is elected every seven years by an absolute majority in the national congress of the party. He is proposed by the Central Committee. The Secretary-General automatically becomes President of the Republic and Head of Government.

The President: His term of office is for seven years and is renewable. He draws up legislation and is responsible for executive action. He may proclaim a state of emergency and a state of siege.

The nation's status is defined as unitary, indivisible, laicist and democratic. The preamble proclaims Burundi's adherence to the UN Charter and to the Universal Declaration of Human Rights, and separate articles outlaw all forms of racial or ethnic discrimination.

THE GOVERNMENT

President: Col. JEAN-BAPTISTE BAGAZA.

COUNCIL OF MINISTERS

(January 1978)

CAMBODIA

(KAMPUCHEA)

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Cambodia, officially known as Democratic Kampuchea, occupies part of the Indo-Chinese peninsula in South-East Asia. It is bounded by Thailand and Laos to the north, Viet-Nam to the east and by the Gulf of Siam to the south. The climate is tropical. The heaviest rainfall occurs in September. The temperature ranges from 20° to 36°C (68° to 97°F), the average at Phnom-Penh being 27°C (81°F). The Khmer language is the official language spoken by all except the Vietnamese and Chinese minorities. The principal religion was Theravada Buddhism but reports indicate that it has been discouraged since 1975. The national flag is red with the national "Angkor" symbol in yellow in the centre. The capital is Phnom-Penh.

Recent History

Cambodia, formerly a monarchy, became a French protectorate in the 19th century and was incorporated in French Indo-China. In April 1941 Norodom Sihanouk, then aged 18, succeeded his grandfather as King. In May 1947 he promulgated a constitution providing for a bicameral Parliament, including an elected National Assembly. Cambodia became an Associate State of the French Union in November 1949 and fully independent on November 9th, 1953. In order to become a political leader, King Sihanouk abdicated in March 1955 in favour of his father, Norodom Suramarit. Prince Sihanouk, as he became, founded a mass movement, the *Sangkum Reastr Niyum* (Popular Socialist Community), which won all the seats in Assembly elections in 1955, 1958, 1962 and 1966. King Suramarit died in April 1960 and Parliament elected Prince Sihanouk to become Head of State (without taking the title of King) in June 1960.

Prince Sihanouk governed with the assistance of an appointed Council of Ministers but also made frequent direct appeals to the electorate to bolster his personal authority. His government maintained an official policy of neutrality, but during the 1960s developed good relations with the People's Republic of China and North Viet-Nam, while being highly critical of the United States' role in Asia. From 1964, however, the Prince's government was faced with a pro-Communist insurgency movement, the *Khmers Rouges*, which was joined in 1967 by left-wing elements from the *Sangkum*. Also, it became increasingly difficult to isolate Cambodia from the war in Viet-Nam. Large numbers of North Vietnamese and National Liberation Front (NLF) troops were on Cambodian soil, and Cambodian territory was violated by Saigon and U.S. air and ground forces.

In March 1970 a coup led by the Prime Minister, Lieut.-Gen. (later Marshal) Lon Nol, deposed Sihanouk. The new government pledged itself to the removal of foreign Communist forces and appealed to the U.S.A. for military aid. Sihanouk went into exile and formed a Royal Government of National Union of Cambodia (GRUNC), supported by the *Khmers Rouges* Sihanoukists and the *Khmers Rouges* formed the National United Front of Cambodia

(FUNC). Their combined forces, aided by the NLF and North Vietnamese troops, quickly put the new regime in jeopardy. In April 1970 a large-scale incursion of South Vietnamese and U.S. forces was required to defend Phnom-Penh. Two months later U.S. troops withdrew, but bombing raids continued until 1973 and U.S. military assistance remained essential to the survival of the Lon Nol regime.

In October 1970 Marshal Lon Nol proclaimed the Khmer Republic and in June 1972, after the promulgation of a new constitution, was elected the first President. His regime never controlled more than a small fraction of rural areas and its hold on the towns was precarious.

Corruption was rife in both the army and government. An American-inspired attempt to broaden the base of Lon Nol's government led to the appointment of opposition politicians to high positions in early 1973, but the experiment collapsed in December when Gen. In Tam, a leading opposition figure, resigned as Prime Minister.

During 1973 an increasing number of foreign states recognized GRUNC as the rightful government of Cambodia. However, attempts during 1973 and 1974 to challenge the credentials of the Khmer Republic delegation to the UN narrowly failed.

In 1974 the republican regime's control was limited to a few urban enclaves, besieged by GRUNC forces, mainly *Khmers Rouges*. Following a new offensive launched in January 1975, Phnom-Penh was completely isolated and, though briefly sustained by American airlifts, fell to the *Khmers Rouges* in April. The GRUNC victory was followed by an almost total blackout on information but it became clear that the first act of the new government was to depopulate the overcrowded cities, including Phnom-Penh, and return peasants to the countryside to forestall the danger of famine. Prince Sihanouk became Head of State again but did not return to Cambodia until September.

In December 1975 a congress of FUNC approved a new constitution, promulgated in January 1976, which renamed the country Democratic Kampuchea. The constitution established a republican form of government and a 250-member People's Representative Assembly. Elections for the Assembly were held in March 1976 and in April Prince Sihanouk resigned as Head of State and GRUNC was dissolved. The Assembly elected Khieu Samphan, formerly Deputy Prime Minister, to be President of the State Presidium (Head of State). A new Council of Ministers was formed in which the Prime Minister was the little-known Pol Pot. In September 1976 Pol Pot stepped down temporarily as Prime Minister on grounds of ill-health and Nuon Chea, the President of the Assembly, took over the post.

During early 1977 there were rumours that a power struggle was taking place amongst the Cambodian leadership. The disappearance of Hu Nim, the Information Minister, and Toch Phorum, the Minister of Public Works, indicated that they may have been involved in an attempt-

ted coup in April 1977. However, in September 1977 it became clear that Pol Pot was firmly re-established in power when he resumed the premiership and went on a state visit to Peking. It was revealed that the political organization known as *Anka* was the Communist Party of Kampuchea and that Pol Pot was Secretary of its Central Committee.

The defeat of the Lon Nol government led to a total transformation of Cambodia's foreign relations. By April 1975 most foreign diplomatic missions had withdrawn their staff from Cambodia and after the fall of Phnom-Penh diplomatic activity was conducted with very few nations. By December 1977 84 countries had established diplomatic relations with Democratic Kampuchea. Reports of mass killings to eliminate opposition since April 1975 led to widespread condemnation of the new regime by non-communist countries. Although the constitution emphasizes a non-aligned foreign policy, very close relations with the People's Republic of China have developed. The major preoccupation of Cambodian foreign policy during 1977 was the defence of its borders, which led to clashes with its neighbours, Thailand and Viet-Nam. In November 1977 it was announced that Thailand and Cambodia would hold talks to resolve their differences. However, the dispute with Viet-Nam became more heated by December, when heavy fighting was reported in the border region.

Government

Legislative authority lies with the People's Representative Assembly of 250 members elected by direct universal suffrage for a five-year term. The Assembly directs both domestic and foreign policy, elects the three-member State Presidium and the Council of Ministers, and appoints members to a Popular Tribunal, which administers justice.

Defence

The situation of the "Liberation Army", which was organized into four divisions and three independent regiments, equipped with a mixture of Soviet, Chinese and American arms and totalled some 80,000 men, is unclear.

Economic Affairs

The essentially agricultural Cambodian economy was totally disrupted by the perpetual military conflict between 1970 and 1975. Before 1970 rice was Cambodia's principal export but by 1974 the country was a net importer of rice. It is estimated that the area of rice under cultivation fell from 2,428,000 hectares in 1969 to 782,000 hectares in 1973. Rubber production fell similarly. In addition, the extent of military activity and the American bombing severely disrupted road and rail communications.

With much of the country's productive capacity and infrastructure destroyed, the economy of those areas controlled by the Khmer Republic became entirely dependent on U.S. aid, which totalled \$668 million in 1974. By 1975 there was no economy, save for the rice, arms and other aid provided by the U.S.A.

With GRUNC's assumption of control in April 1975, a vigorous agricultural programme was put into effect to overcome severe food shortages. Partly to this end, the overcrowded urban areas were cleared of their inhabitants,

who were driven into the countryside to work on the land and in other tasks of economic reconstruction. All sectors of the economy were nationalized and agriculture collectivized. The new government declared its principal objective to be the production of as much rice, other strategic crops and livestock as possible. Currency dealings largely ceased.

According to Radio Phnom-Penh, the Government had an extensive programme to restore the country's infrastructure (see below under *Transport and Communications*) and industry during 1975. By May 1976 more than 100 factories were reported to be back in production. However, government plans, announced in mid-1976, did not provide for any expansion in the industrial sector, but emphasized the rehabilitation of existing factories and the restoration of agricultural production. Cambodia's main exportable commodities are rice, rubber and black pepper. In 1976 it was estimated that Cambodia had exported 13,000 metric tons of rubber to the People's Republic of China and the Democratic People's Republic of Korea. Rice exports in 1977 were estimated to amount to 100,000 tons. With its problems of transport, supply and communications, the bulk of Cambodia's imports consist of fuel, machinery and spare parts. Quantities of insecticides, rubber processing chemicals and pharmaceuticals were also imported in 1976 and 1977.

A new economic agreement was concluded with the People's Republic of China in August 1975 and a further agreement signed in March 1976. In October 1976 a trading point was opened on the Thai border. However, most of Cambodia's trade is conducted through a trading mission, set up in 1976 in Hong Kong, which bought goods valued at U.S. \$7.6 million with Chinese aid in the first half of 1977 and sold goods worth \$154,000 in the first five months of the year. With serious food shortages reported, it was clear at the end of 1977 that the Government still faced a daunting task in reviving the national economy and that all sectors of the economy would remain under tight state control.

Transport and Communications

Much of the country's transport system was destroyed or disrupted during the war but, according to Radio Phnom-Penh, an extensive programme of reconstruction was undertaken after April 1975. The port of Kompong Som was reopened to shipping in July 1975. In May 1977 Radio Phnom-Penh announced that the two main railway lines had resumed operations. Extensive repair work was also said to have been undertaken along Route 5, which links the capital with the rice-growing areas of the north-west. By late 1977 air links had been established between Phnom-Penh and Peking, Vientiane and Hanoi.

Education

Reports indicate that schools have been closed for formal education since April 1975 but some may have reopened for revolutionary teaching. The Government aims to eradicate adult illiteracy, which averaged 59 per cent (males 30 per cent, females 87 per cent) in 1962.

Tourism

Principal attractions are the many monuments of the great Khmer Empire (ninth to fourteenth century A.D.).

CAMBODIA (KAMPUCHEA)

Introductory Survey, Statistical Survey

Until 1970 tourism was an important section of the economy, but ceased after that date owing to military activity and the change of regime.

Visas are required by all visitors.

The metric system is in force.

Currency and Exchange Rates

100 sen = 1 riel.

Exchange rates (April 1975):

£1 sterling = 3,945 riels;

U.S. \$1 = 1,675 riels.

There appears to be no currency in use at the present time.

STATISTICAL SURVEY

Note: Some of the statistics below represent only sectors of the economy controlled by the government of the former Khmer Republic. During the years 1970-75 no figures were available for areas controlled by the *Khmers Rouges*. Almost no official figures are available for the period since April 1975.

FINANCE

100 sen = 1 riel.

Coins: 10, 20 and 50 sen.

Notes: 1, 5, 10, 20, 50, 100 and 500 riels.

Exchange rates (April 1975): £1 sterling = 3,945 riels; U.S. \$1 = 1,675 riels.

10,000 riels = £2.535 = \$5.970.

Note: The riel was introduced in January 1955, replacing (at par) the Indo-Chinese piastre. From May 1953 the piastre's value was 10 old French francs. The initial exchange rate was thus U.S. \$1 = 35 riels (1 riel = 2.857 U.S. cents). Except for exchange transactions in U.S. dollars and sterling, the riel was linked to French currency, with a value of 10 French centimes after the introduction of the new French franc in January 1960. In August 1969 the multiple exchange rate system ended when the riel was devalued (in line with the French franc) to 16 milligrammes of gold, worth 1,8004 U.S. cents (\$1 = 55.542 riels) until August 1971. In October 1971 the official rate became inoperative except for specified official transfers and a flexible "floating" rate was established, initially at \$1 = 140 riels. Thus the riel's link to the French franc was effectively broken and the currency devalued. The "floating" rate was later adjusted upwards, reaching \$1 = 120 riels in January 1972, but thereafter the currency was frequently devalued. The exchange rate was \$1 = 187 riels at the end of 1972; and \$1 = 275 riels at the end of 1973. In September 1974 the currency was devalued by 65 per cent, with the exchange rate altered from \$1 = 420 riels to \$1 = 1,200 riels. By the end of 1974 the rate was \$1 = 1,650 riels. In terms of sterling, the exchange rate was £1 = 98 riels before November 1967; £1 = 84 riels from November 1967 to August 1969; and £1 = 133.30 riels from August 1969 to October 1971. Since April 1975 almost no information about the exchange rate has been available. However, a rate of \$1 = 1,200 riels was quoted in 1977 and it has also been reported that a floating exchange rate (\$1 = 1,610 riels in 1977) is available for foreign visitors.

THE CONSTITUTION

A new constitution was approved on December 11th, 1975, by the third national congress of the National United Front of Cambodia. It was approved by the Royal Government of National Union on January 3rd, 1976, and promulgated two days later. The main provisions are summarized below.

Democratic Kampuchea is an independent, united, peaceful and non-aligned democratic state. The constitution prohibits the establishment of foreign bases in Cambodia, and the state has the duty to protect the people from foreign aggression. Cambodia must struggle against all forms of aggression: intellectual, economic, military, social and diplomatic. It is a nation of workers and peasants and the means of production belong to the state and people.

Legislative authority rests with the People's Representative Assembly, with 250 members elected by direct, universal suffrage for a five-year term. Seats are allocated on the following basis: 150 members represent peasants, 50 represent other working people and another 50 represent the armed forces. The Assembly elects the State Presidium (a President and two Vice-Presidents) and the Government. It also elects a Popular Tribunal to administer justice. The Assembly directs both domestic and foreign policy.

Unemployment does not exist and the standard of living of the people is guaranteed. The workers control the factories. Men and women have equal rights and are free to practise any religion which does not contribute to the destruction of the state.

JUDICIAL SYSTEM

Under the constitution of January 1976 justice is to be administered by a Popular Tribunal, elected by the People's Representative Assembly.

RELIGION

BUDDHISM

Before April 1975 the principal religion of Cambodia was Theravada Buddhism (Buddhism of the Little Vehicle), the sacred language of which is Pali. There were more than 2,500 monasteries throughout the land and

nearly 20,000 Bonzes (Buddhist priests). However, reports indicate that since the change of regime religious practices are being discouraged.

THE PRESS

Pakdevoat (*Revolution*): Official journal.

RADIO

Radio Phnom-Penh: Phnom-Penh; f. 1975; official service.

FINANCE

No official information had been made available on financial organizations in Cambodia at the time of publication. However, it is reported that no currency is in circulation and that a system of barter is in operation although in theory the Government distributes all necessities.

TRADE AND INDUSTRY

Under the constitution of January 1976 all means of production were nationalized but no detailed information on the organization of trade and industry has been announced.

TRANSPORT

Note: The following information applies to the situation before April 1975 unless otherwise stated.

Railways: Gare Centrale de Phnom-Penh, Moha Vithei Pracheathippatay, Phnom-Penh. Before April 1975 the total length of railway track was 1,370 km. Lines linked Phnom-Penh with the Thai border via Battambang and with Kompong-Som. By the end of 1975 it was reported that repairs had been completed on the Phnom-Penh-Battambang and the Phnom-Penh-Kompong-Som lines and in May 1977 these resumed operations.

Roads: There are nearly 11,000 km. of motorable roads and tracks, of which about 2,000 km. are asphalted.

Waterways: The major routes are along the Mekong River, and up the Tonlé-Sap River into the Tonlé-Sap (Great Lake) covering in all about 1,400 km.

Civil Aviation: By November 1976 air links had been established with Peking, Vientiane and with Hanoi via Ho Chi Minh City (Saigon). In November 1977 an agreement to establish air links with the Democratic People's Republic of Korea was concluded.

Shipping: The main port is Kompong-Som on the Gulf of Siam, which handles vessels up to 10,000 tons; the total of berths was raised to 10 in 1970 at a cost of U.S. \$50m. Phnom-Penh, which lies some distance inland, can take steamers of up to 4,000 tons.

CAMEROON

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The United Republic of Cameroon lies on the west coast of Africa, with Nigeria to the west, Chad and the Central African Empire to the east and the Congo, Equatorial Guinea and Gabon to the south. The climate is hot and humid in the south and west, with average temperatures of 26°C (80°F). The north is drier, with more extreme temperatures. The official languages are French and English. Approximately half of all Cameroonians follow traditional religious beliefs. About 35 per cent are Christians, roughly divided between Roman Catholics and Protestants, and about 20 per cent, mostly in the north, are Muslims. The national flag (proportions 3 by 2) consists of a vertical tricolour of green, red and yellow with one gold star in the red stripe. The capital is Yaoundé.

Recent History

East Cameroon, once a League of Nations Mandate and later a United Nations Trusteeship Territory, was under French administration until it became independent as the Republic of Cameroon in January 1960. Ahmadou Ahidjo was elected its first President. West Cameroon, then part of the British-administered Trust Territory of Southern Cameroon, opted to join the Republic in February 1961, and a Federal Republic was created in October 1961. Under Ahidjo's leadership the two states became increasingly integrated. In 1966 the two governing parties and several opposition groups combined to form a single party, the *Union nationale camerounaise* (UNC). The party has grown to embrace almost all the country's political, cultural, professional and social organizations. The only significant opposition party, the *Union des Populations de Cameroun* (UPC), which had waged sporadic guerrilla warfare against the authorities from 1955 onwards, was finally crushed in 1971 when the last of its leaders were arrested and executed.

In June 1972, after approval by referendum of a new Constitution, the Federal Republic of Cameroon became the United Republic of Cameroon. A fully centralized political and administrative system was quickly introduced, and in May 1973 a new National Assembly was elected. After the re-election of Ahidjo as president in April 1975 the constitution was revised and a Prime Minister appointed. The United Republic has pursued an independent foreign policy. It withdrew from OCAM in July 1973, and negotiated a revision of its co-operation agreements with France in 1974.

Government

Cameroon is governed by a President and a unicameral 120 member National Assembly, each elected for five years by universal adult suffrage. The age of majority is 21. The Prime Minister, Ministers and Vice-Ministers are appointed by the President who also appoints a Governor to each of the seven provinces.

Defence

Cameroon has an army of 5,500 and 7,000 men in paramilitary forces. The navy numbers 200, and the air force

300. France has a bilateral defence agreement with Cameroon. The defence budget for 1976/77 was estimated at 12,207 million francs CFA.

Economic Affairs

Cameroon has one of the highest incomes per head in tropical Africa, though the basis of its economy is still essentially agricultural. Cocoa, coffee and timber are the main exports, though palm products, bananas, rubber and cotton are also produced in quantity and help protect the economy against fluctuating commodity prices.

The major industries are aluminium smelting and the processing of agricultural raw materials. The aluminium smelters use imported bauxite and hydro-electric power from the Edca Dam. Industrial production grew by about 15 per cent annually in the first decade of independence, but the rate of growth has declined since 1970.

In 1973 oil was discovered off Rio del Rey, and production was expected to start in 1978. Further exploration is taking place. A refinery is being built at Pointe-Limboh.

In 1973/74 Cameroon's Gross Domestic Product was more than \$1,850 million, of which about 35 per cent was derived from agriculture, forestry and fishing, while industry accounted for about 10 per cent. The annual economic growth rate fell from 8 per cent in 1970 to 3 per cent in 1972, but the economy has since regained its momentum.

Despite its economic growth since independence, Cameroon remains dependent on foreign investment and the export of primary commodities. In 1973 the government initiated a "Green Revolution" designed to halt the drift of population from backward rural areas to the towns but this had only limited success. The transport system is being developed to permit exploitation of natural resources in remote parts of the country. The fourth Five-Year Plan, for 1976-81, concentrates resources on agricultural development, but includes plans for a television network, hydro-electric schemes and a state import agency for necessities.

Transport and Communications

Routes in former East Cameroon are linked with those of the ex-French Equatorial states while former West Cameroon is linked to Nigeria. The main rail links are between Douala and Yaoundé, and Yaoundé and Ngaoundéré. A major road also links the two regions. British and French shipping lines call at Douala and Victoria. There are internal and international air services.

Social Welfare

The Government and Christian Missions maintain hospitals and medical centres but there are no welfare services covering the whole population. In 1970 Cameroon had 80 hospitals with 19,141 beds.

Education

Education is provided by the government, missionary societies and private concerns. Education in state schools is free, and the government provides financial assistance

for other schools. In 1978 a programme of standardization of curricula was undertaken. In 1974 about 80 per cent of school-age children attended school. The Federal University, founded in 1962, is to be decentralized by the establishment of five regional campuses.

Tourism

Tourists are attracted by the cultural diversity of local customs, and by the national parks, game reserves and sandy beaches. The tourist trade is being expanded and in 1974 there were about 80,000 visitors. A visa is required by all foreigners.

Public Holidays

1978: May 1st (Labour Day), May 4th (Ascension), May 20th (National Day), August 15th (Assumption), September 1st (Union Nationale Camerounaise Day), September 4th (Djoulde Soumae, End of Ramadan),

November 11th (Festival of Sheep), December 25th (Christmas).

1979: January 1st (New Year), February 11th (Youth Day), April 13th (Good Friday), April 16th (Easter Monday).

THE CONSTITUTION

(Constitution of June 2nd, 1972, revised May 9th, 1975)

The People of Cameroon

Declares that the human being, without distinction as to race, religion, sex or belief, possesses inalienable and sacred rights.

Affirms its attachment to the fundamental freedoms embodied in the Universal Declaration of Human Rights and the United Nations Charter and in particular to the following principles:

Equal rights and obligations for all, and freedom and security for the individual subject to the rights of others; and the higher interests of the State. The home and the privacy of all correspondence are inviolate. Freedom of movement. Freedom within the law. Assurance of a fair hearing and that the law may not act retrospectively.

Freedom of belief. Freedom to practise a religion. The State is secular. Freedom of expression, freedom of the press, freedom of assembly, freedom of association, freedom of trade unions under conditions fixed by law.

Protection of the family as the natural basis of society. The right to education, the provision and control of which is the duty of the State, the right of ownership unless in violation of public interests, and the right and duty to work. The duty of all to share the burden of public expenditure according to his means.

The State guarantees to all citizens of either sex the rights and freedoms set out in the preamble of the Constitution.

I Sovereignty

1. The Federal Republic of Cameroon, constituted from the State of East Cameroon and the State of West Cameroon, shall become a unitary State to be styled the United Republic of Cameroon with effect from the date of entry into force of this Constitution. The Republic shall be one and indivisible, democratic, secular and dedicated to social service. It shall ensure the equality before the law of all its citizens. Provisions that the official languages be French and English, for the motto, flag, national anthem and seal, that the capital be Yaoundé.

2-3. Sovereignty shall be vested in the people who shall exercise it either through the President of the Republic and the members returned by it to the National Assembly or by means of referendum. Elections are by universal suffrage, direct or indirect, by every citizen aged 21 or over in a secret ballot. Political parties or groups may take part in elections subject to the law and the principles of democracy and of national sovereignty and unity.

4. State authority shall be exercised by the President of the Republic and the National Assembly.

II The President of the Republic

5. The President of the Republic, as Head of State and Head of the Government, shall be responsible for the conduct of the affairs of the Republic. He shall define national policy and may charge the Prime Minister with the implementation of this policy in certain spheres. The President may delegate to the Prime Minister his powers to direct, co-ordinate and control governmental activity in such spheres. Certain powers may also be delegated to other members of government.

6-7. Candidates for the office of President must hold civic and political rights and be at least 35 years old, and may not hold any other elective office or professional activity. Election is by a majority of votes cast by the people. The President is elected for five years and may be

re-elected. Provisions are made for the continuity of office in the case of the President's resignation and for the President of the National Assembly or, failing him, the Prime Minister to act as interim President should the President die or be permanently incapacitated.

8-9. The Prime Minister, Ministers and Vice-Ministers are appointed by the President to whom they are responsible, and they may hold no other appointment. The President is also head of the armed forces, he negotiates and ratifies treaties, may exercise clemency after consultation with the Higher Judicial Council, promulgates and is responsible for the enforcement of laws, is responsible for internal and external security, makes civil and military appointments, provides for necessary administrative services.

10. The President, by reference to the Supreme Court, ensures that all laws passed are constitutional.

11. Provisions whereby the President may declare a State of Emergency or State of Siege.

III The National Assembly

12. The National Assembly shall be renewed every five years, though it may at the instance of the President of the Republic legislate to extend or shorten its term of office. It shall be composed of 120 members elected by universal suffrage.

13-14. Laws shall normally be passed by a simple majority of those present, but if a bill is read a second time at the request of the President of the Republic a majority of the National Assembly as a whole is required.

15-16. The National Assembly shall meet twice a year, each session to last not more than 30 days; in one session it shall approve the budget. It may be recalled to an extraordinary session of not more than 15 days.

17-18. Elections and suitability of candidates and sitting members shall be governed by law.

IV Relations between the Executive and the Legislature

19. Bills may be introduced either by the President of the Republic or by any member of the National Assembly.

20. Reserved to the legislature are: the fundamental rights and duties of the citizen; the law of persons and property; the political, administrative and judicial system in respect of elections to the National Assembly, general regulation of national defence, authorization of penalties and criminal and civil procedure etc., and the organization of the local authorities; currency, the budget, dues and taxes, legislation on public property; economic and social policy; the education system.

21. The National Assembly may empower the President of the Republic to legislate by way of Ordinance for a limited period and for given purposes.

22-26. Other matters of procedure, including the right of the President of the Republic to address the Assembly and of the Prime Minister, Ministers and Vice-Ministers to take part in debates.

27-29. The composition and conduct of the Assembly's programme of business. Provisions whereby the Assembly may inquire into governmental activity. The obligation of the President of the Republic to promulgate laws, which shall be published in both languages of the Republic.

30. Provisions whereby the President of the Republic, after consultation with the National Assembly, may submit to referendum certain reform bills liable to have profound repercussions on the future of the Nation and National Institutions.

CAMEROON

V The Judiciary

31. Justice is administered in the name of the people. The President of the Republic shall ensure the independence of the judiciary and shall make appointments with the assistance of the Higher Judicial Council.

VI The Supreme Court

32-33. The Supreme Court has powers to uphold the Constitution in such cases as the death or incapacity of the President and the admissibility of laws, to give final judgements on appeals on the judgement of the Court of Appeal and to decide complaints against administrative acts. It may be assisted by experts appointed by the President of the Republic.

VII Impeachment

34. There shall be a Court of Impeachment with juris-

The Constitution, The Government, National Assembly

diction to try the President of the Republic for high treason and the Prime Minister, Ministers and Vice-Ministers for conspiracy against the security of the State.

VIII The Economic and Social Council

35. There shall be an Economic and Social Council, regulated by the law.

IX Amendment of the Constitution

36-37. Bills to amend the Constitution may be introduced either by the President of the Republic or the National Assembly. The President may decide to submit any amendment to the people by way of a referendum. No procedure to amend the Constitution may be accepted if it tends to impair the republican character, unity or territorial integrity of the State, or the democratic principles by which the Republic is governed.

ECONOMIC AND SOCIAL COUNCIL

The Economic and Social Council is a national body set up under the unitary constitution to advise the Govern-

ment on economic and social problems arising. It replaces the regional organizations which carried out similar functions on a smaller scale. The Council consists of 85 members, who meet several times a year, a permanent secretariat and a president appointed by Presidential decree. The members are nominated for a five-year term, whilst the secretariat is elected annually. Pres. FÉLIX SABAL LECCO; Sec.-Gen. Dr JOSEPH SIMON ÉPALE.

POLITICAL PARTY

Union nationale camerounaise (UNC): Yaoundé; f. 1966 by merger of the governing party of each state of the Federation (*Union camerounaise* and the *Kamerun National Democratic Party*), and four opposition parties; its bodies are: Congress which meets every five years, a 12-member Political Bureau and a 48-member Central Committee; there are two subsidiary organizations, *Organisation des femmes de l'UNC* (OFUNC) and *Jeunesse de l'UNC* (JUNC); Pres. AHMADOÛ AHIDJO; publ. *l'Unité* (weekly).

The UNC Charter, outlining the party's internal and external policies, was published in April, 1969. It supports efforts towards the liberation and unification of Africa; it supports a democratic system of government within Cameroon; and it lays down that economic and social development should be achieved in Cameroon through encouraging private initiative while reserving for the state a determining and organizing role.

TRANSPORT

RAILWAYS

There are 1,172 km. of track, the West Line running from Douala to N'Kongsamba (172 km.) with a branch line leading south-west from Mbanga to Kumba (29 km.), and the Transcameroon railway which runs from Douala to Ngaoundéré (925 km.), with a branch line leading south-west from Otélé to Mbalmayo (37 km.). The second stage runs from Belabo to Ngaoundéré (325 km.). An extension of its western branch is projected from Mbalmayo to Bangui, capital of the Central African Empire. Improvements to the line between Douala and Yaoundé were begun in 1974. Narrow gauge railways totalling 147 km. are used in former West Cameroon between the plantations and the ports.

Régie Nationale des Chemins de Fer du Cameroun—REGIFERCAM: B.P. 304, Douala; Pres. Dir.-Gen. GILBERT NTANG.

Office du Chemin de Fer Transcamerounais: B.P. 625, Yaoundé; supervises the laying of new railway lines and improvements to existing lines and undertakes relevant research; Dir.-Gen. JACQUES HOUDET.

ROADS

In 1975 there were 43,500 km. of roads of which 26,866 km. were main roads; of these 2,155 km. were bitumen-surfaced.

Under the 1976-80 Plan 79,482 million francs CPA were allocated to the development of the road network.

SHIPPING

CANADA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Dominion of Canada occupies the northern part of North America (except Alaska and Greenland) and is the second largest country in the world. The border with the U.S.A. follows the upper St. Lawrence Seaway and the Great Lakes, continuing west along the 49th parallel. The climate is an extreme one, particularly inland. Winter temperatures drop well below freezing but summers are generally mild. Rainfall varies from moderate to light and there are heavy falls of snow. The two official languages are English and French, the mother tongues of 60.2 per cent and 26.9 per cent, respectively, in 1971. More than 98 per cent of Canadians can speak English or French. Forty-six per cent of the people are Roman Catholics. The largest Protestant churches are the United Church of Canada (17.5 per cent) and the Anglican Church (11.8 per cent) but almost every Christian denomination is represented. The national flag (proportions 2 by 1) consists of a red maple leaf on a white field, flanked by red panels. The capital is Ottawa.

Recent History

In 1963, a six-year Conservative government was succeeded by a minority Liberal Government under Lester Pearson. Mr. Pearson retired in April 1968 and his successor, Pierre Trudeau, won an electoral majority for the Liberals in June 1968. Mr. Trudeau's party was returned to power in the 1972 general election, but with a reduced majority over the Progressive Conservatives. Foreign relations have altered significantly under the Trudeau government, with less emphasis on traditional links with Western Europe and the U.S.A. and a fostering of relations with Far East countries. Canada established diplomatic relations with the People's Republic of China in 1970 and the Prime Minister paid a successful state visit to China in October 1973. Relations with the U.S.S.R. are good and in the mid-1970s Japan ranked as Canada's second largest trading partner.

Trudeau was returned with a 46-seat majority in the July 1974 elections. In 1975 Canada experienced the effects, belatedly and not so severely as most countries, of the international economic recession. This led in October to the introduction of unpopular mandatory wage and price controls by the Liberal Government. The Government's popularity was eroded during 1975 and 1976, as indicated by the success of opposition parties in provincial and by-elections, even in formerly safe seats. However, support for the Liberal Government began to revive during 1977, as shown by the results of local elections in May.

Politically, separatism in Quebec, where four-fifths of the population speak French as a first language and which maintains its own cultural and educational links with France, remained the dominant issue. The Liberals came into power there with a large majority in 1970 and the Quebec Liberation Front was outlawed after violent terrorist activities. The continuing conflict over language erupted again in September 1975 over the controversial new stipulation, particularly resented by immigrants, that

French should be the language of instruction for all children whose mother tongue was not English. In June 1975 conflict over the use of English for air traffic control in Quebec led to an extended strike of pilots and air traffic controllers and during 1975 two Federal Cabinet ministers resigned over issues concerning bilingualism. At provincial elections in Quebec in November 1976 the separatist Parti Québécois, led by René Lévesque, which had been formed only three years earlier, defeated the incumbent Liberals, winning 69 seats to the Liberals' 28, compared with 6 and 102 seats respectively in the 1973 elections. During 1977 Lévesque's Government reiterated its aim of sovereignty for Quebec; a referendum on the subject is planned for 1979. Bill 101, the French Language Charter, was passed in the autumn, making French the official language of education, business and government in Quebec.

Government

Canada is a federal parliamentary state. Executive power is vested in the British monarch, as Head of State, and exercisable by her representative, the Governor-General, whom she appoints on the advice of the Canadian Prime Minister. The Federal Parliament comprises the Queen, a nominated Senate (104 members, appointed on a regional basis) and a House of Commons (264 members elected by universal adult suffrage). A Parliament may last no longer than five years. The Governor-General appoints the Prime Minister and, on the latter's recommendation, other Ministers to form the Cabinet. The Prime Minister should have majority support in Parliament, to which the Cabinet is responsible. Canada contains 10 provinces (each with a Lieutenant-Governor and a legislature from which a Premier is chosen) and two centrally administered territories.

Defence

Canada co-operates with the U.S.A. in the defence of North America, sends forces to NATO's Atlantic and European sectors, and takes part in UN peace-keeping in the Middle East. Unification of the all-volunteer services as the Canadian Armed Forces was completed in 1968. The total strength of the Canadian Armed Forces has been reduced from 120,000 in 1964 to 80,000 in 1977: army 28,500, navy 13,400, air force 36,600. The defence budget for 1977/78 is C\$3,790 million. In 1977 the Government authorized C\$10,000 million to be set aside for the re-equipment of its armed forces over the following five years.

Economic Affairs

The Canadian economy is linked very closely with that of the U.S.A. About 68 per cent of total trade is with the U.S.A. and industry is heavily dependent on foreign investment, 80 per cent of it from the U.S.A. It is estimated that 65 per cent of Canada's largest companies are wholly-owned or effectively controlled by foreign corporations. Efforts to develop other markets, notably Japan, China and the U.S.S.R., and measures such as the Foreign Investments Review Act, which allows for assessment of the benefits to Canada of foreign investors' intentions, are being taken to lessen dependence on the U.S.A. Canada is

one of the world's leading industrial countries, although farming still accounts for about 4 per cent of the country's gross domestic product and is the leading primary industry in terms of employment. Canada is the world's fourth largest exporter of agricultural products. The main exports in 1976 were motor vehicles and parts, wood pulp, newsprint, petroleum and wheat. Canada is the world's largest producer of asbestos, silver, nickel and zinc and is rich in many other minerals, notably iron, copper, uranium, cobalt, elemental sulphur, lead and gold. There are considerable oil and gas resources in Alberta and the Canadian Arctic islands. In 1977 Canada and the U.S.A. reached agreement on a proposal to bring natural gas by pipeline from Alaska to the U.S.A. at an estimated cost of U.S. \$10,000 million. Other valuable primary industries are forestry, fishing and fur production.

In 1974 the economy enjoyed one of the highest expansion rates of an industrialized country while suffering a slightly lower rate of inflation than that of comparable economies. However, in 1975 the economy began to be affected by the international slump: a trade deficit of C\$534 million, the first deficit since 1960, was recorded, inflation throughout the year ran at about 11 per cent and unemployment reached over 7 per cent. In October statutory controls on wages and on prices were introduced which successfully reduced the rate of inflation to 8 per cent by the end of 1976. During 1976 the economy seemed to recover from the partial recession: the growth rate increased from 0.6 per cent in 1975 to just over 4 per cent in 1976.

The 1977 budget was designed to stimulate the economy, alleviating unemployment which was running at a post-war record level of over 8 per cent, while keeping control over inflation. It included job creation programmes, regional incentives and selective tax benefits. During the 12 months to November 1977 the Canadian dollar depreciated 13 per cent against the U.S. dollar and fell to its lowest level for 45 years.

Transport and Communications

Owing to the size of the country, Canada's economy is particularly dependent upon an efficient system of transport and communications by both land and water. The St. Lawrence Seaway allows ocean-going ships to reach the Great Lakes and in 1969 the North West Passage was negotiated for the first time. As a result, the Arctic Waters Bill was passed in April 1971, giving Canada effective control of the passage and extending territorial waters offshore to twelve nautical miles (22 km.). There are nearly 60,000 miles (96,500 km.) of railway track and Canada's rail, river and canal system is being increasingly supplemented by roads, air services and pipelines. The Trans-Canadian Highway is one of the major features of a network of over 500,000 miles (800,000 km.) of roads, while in 1970 work started on a new airport near Montreal.

Social Welfare

About 27 per cent of the federal budget is devoted to health and welfare. The Federal Government administers

family allowances, unemployment insurance and war veterans' and old age pensions. Other services are provided by the provinces, the range varying from province to province. The Canada Pension Plan, introduced in 1969, and its Quebec counterpart provide contributory retirement, disability and survivors' pensions for the majority of workers, based on past earnings. A Federal Medicare insurance programme in which all ten provinces participate covers all Canadians against medical expenses. The federal-provincial hospital insurance programme covers over 99 per cent of the insurable population of Canada.

Education

Education is a provincial matter and the period of compulsory education varies. French-speaking students are entitled by law to instruction in French. Primary education is from 6-7 years to 13-14, followed by 3-5 years at secondary or high school. There are 67 degree-awarding institutions and 192 other institutions of higher education.

Tourism

Canada offers a wide range of outdoor tourist attractions: fishing, hunting, riding, canoeing, etc., in the great National Parks. Winter sports carnivals are held in many centres and Indian and Prairie gatherings are popular, a famous one being the Calgary Stampede. Most visitors are from the U.S.A. (over 32 million in 1976). Tourist spending in 1976 amounted to C\$1,940 million.

Visas are not required to visit Canada by nationals of Austria, Belgium, Denmark, Finland, France, the Federal Republic of Germany, Greece, Iceland, Ireland, Italy, Japan, Liechtenstein, Luxembourg, Monaco, the Netherlands, Norway, Portugal, San Marino, South Africa, Spain, Sweden, Switzerland, Turkey, the United Kingdom and Commonwealth and the U.S.A.

Sport

The national sports are Canadian football and ice hockey. Baseball, tennis, athletics and winter and water sports are all popular and soccer is increasingly played, particularly in southern Ontario.

Public Holidays

1978: May 24th (Victoria Day), June 24th (St. Jean Baptiste, Quebec only), July 1st (Canada Day), September 4th (Labour Day), October 9th (Thanksgiving), November 11th (Remembrance Day), December 25th-26th (Christmas).

1979: January 1st (New Year), April 13th (Good Friday), April 16th (Easter Monday).

Weights and Measures

The imperial system is in general use with the exception of the 2,000 lb. American ton; the metric system is being implemented gradually.

Currency and Exchange Rates

100 cents = 1 Canadian dollar (C\$).

Exchange rates (December 1977):

£1 sterling = C\$2.006;

U.S. \$1 = C\$1.097.

FINANCE

100 cents = 1 Canadian dollar (C\$).

Coins: 1, 5, 10, 25 and 50 cents; 1 dollar.

Notes: 1, 2, 5, 10, 20, 50, 100, 500 and 1,000 dollars.

Exchange rates (December 1977): £1 sterling = C\$2.006; U.S. \$1 = C\$1.097.

C\$100 = £49.85 = U.S. \$91.13.

Note: Between May 1962 and May 1970 the par value of the Canadian dollar was 92.5 U.S. cents, giving an exchange rate of U.S. \$1 = C\$1.081. In terms of sterling, the rate between November 1967 and May 1970 was C\$1 = 7s. 8½d. (38.54 new pence) or £1 = C\$2.5946. Since May 1970 the Canadian dollar has been allowed to "float" on foreign exchange markets. The average exchange rates (Canadian cents per U.S. dollar) were: 100.98 in 1971; 99.08 in 1972; 100.02 in 1973; 97.79 in 1974; 101.72 in 1975; 98.60 in 1976.

THE CONSTITUTION

Constitutional development has been based mainly upon four important acts of the British Parliament: the Quebec Act of 1774, the Constitutional Act of 1791, the Act of Union of 1840, and the British North America Act of 1867. The first is chiefly important as it established the French civil law throughout the then province of Quebec and guaranteed the free exercise of Roman Catholicism. The second is noteworthy for the division of the province into the French-speaking province of Lower Canada and the English-speaking province of Upper Canada, and for the concession of representative government through an elective Legislative Assembly which, however, had no control over the executive government except in so far as it could refuse to vote taxes (the non-tax revenue of the province was outside of its control). The Act of Union (Section 45) mentions the appointment by Her Majesty of the Executive Council, but does not refer to the responsibility of the Council. It can be stated that responsible government has existed in Canada by constitutional practice and precedent. It was recognized in the instructions which the Colonial Secretary of State transmitted to the Governors.

The fourth act separated the two Canadas from their existing legislative union to make them provinces, each administering its own local affairs, in a wider confederation, which within a comparatively short period so extended its boundaries as to take in the whole of British North America, except Newfoundland and Labrador.

The British North America Act 1867 provides that the Constitution of the Dominion shall be "similar in principle to that of the United Kingdom"; that the executive authority shall be vested in the Sovereign of Great Britain and Ireland, and carried on in his name by a Governor-General and Privy Council; and that the legislative power shall be exercised by a Parliament of two Houses, called the "Senate", and the "House of Commons".

The Statute of Westminster received the Royal Assent in December 1931. In its application to Canada the Statute emancipates the Legislatures of the provinces as well as the Dominion Parliament from the operation of the Colonial Laws Validity Act. A special section was, however, included providing that the Statute should not apply to the repeal, amendment or alteration of the British North America Acts of 1867 to 1930, and also preventing the Dominions and provinces, in the exercise of their enlarged legislative powers, from trenching upon provincial and Dominion fields of legislative power respectively. Numerous attempts to devise amendment procedures within Canada without reference to Westminster have been made without success, and Amendment of the British North America Acts 1867 to 1962 still remains a procedural problem awaiting solution.

The Government

The national government works itself out through three main agencies. There is **Parliament** (consisting of the Queen as represented by the Governor-General, the Senate and the House of Commons) which makes the laws; the **Executive** (the Cabinet or Ministry) which applies the laws; and the **Judiciary** which interprets the laws.

Particular features of the British system of government are the close relation which exists between the Executive and Legislative branches, and the doctrine of Cabinet responsibility which has become crystallized in the course of time. The members of the Cabinet, or executive committee, are chosen from the political party com-

manding a majority in the House of Commons. Each Minister or member of the Cabinet is usually responsible for the administration of a department, although there may be Ministers without portfolio whose experience and counsel are drawn upon to strengthen the Cabinet, but who are not at the head of departments.

Meetings of the Cabinet are presided over by the President of the Privy Council, but all Ministers, including the Prime Minister and the President of the Privy Council, meet as equals and there is no precedence in Council. From the Cabinet signed orders and recommendations go to the Governor-General for his approval, and it is in this way that the Crown acts only on the advice of its responsible Ministers. The Cabinet takes the responsibility for its advice being in accordance with the will of Parliament and is held strictly accountable.

The Federal Parliament

Parliament must meet at least once a year, so that twelve months do not elapse between the last meeting in one session and the first meeting in the next. The duration of Parliament may not be longer than five years. Senators (a maximum of 104 in number) are appointed until age 75 by the Governor-General in Council. They must be at least 30 years of age, British subjects, residents of the province they represent, and in possession of \$4,000 over and above their liabilities. Members of the House of Commons are elected by universal adult suffrage for the duration of Parliament.

Under the British North America Act, which is the basis of the Constitution, the Federal Parliament has exclusive legislative authority in all matters relating to public debt and property; regulation of trade and commerce; raising of money by any mode of taxation; borrowing of money on the public credit; postal service; census and statistics; militia, military and naval service and defence; fixing and providing for salaries and allowances of the officers of the Government; beacons, buoys and lighthouses; navigation and shipping; quarantine and the establishment and maintenance of marine hospitals; sea-coast and inland fisheries; ferries on an international or interprovincial frontier; currency and coinage; banking, incorporation of banks, and issue of paper money; savings banks; weights and measures; bills of exchange and promissory notes; interest; legal tender; bankruptcy and insolvency; patents of invention and discovery; copyrights; Indians and lands reserved for Indians; naturalization and aliens; marriage and divorce; the criminal laws, except the constitution of courts of criminal jurisdiction but including the procedure in criminal matters; the establishment, maintenance and management of penitentiaries; such classes of subjects as are expressly excepted in the enumeration of the classes of subjects exclusively assigned to the Legislatures of the provinces by the Act. Judicial interpretation and later amendment have, in certain cases, modified or clearly defined the respective powers of the Federal and Provincial Governments.

Provincial Government

In each of the ten Provinces (Newfoundland joined with Canada as the tenth province on April 1st, 1949) the Queen is represented by a Lieutenant-Governor, appointed by the Governor-General in Council, and governing with the advice and assistance of the Ministry or Executive Council, which is responsible to the Legislature and resigns office when it ceases to enjoy the confidence of that body. The

Legislatures are unicameral, consisting of an elected Legislative Assembly.

The Legislature in each province may exclusively make laws in relation to: amendment of the constitution of the province, except as regards the Lieutenant-Governor; direct taxation within the province; borrowing of money on the credit of the province; establishment and tenure of provincial offices and appointment and payment of provincial officers; the management and sale of public lands belonging to the province and of the timber and wood thereon; the establishment, maintenance and management of public and reformatory prisons in and for the province; the establishment, maintenance and management of hospitals, asylums, charities and charitable institutions in and for the province, other than marine hospitals; municipal institutions in the province; shop, saloon, tavern, auctioneer and other licences issued for the raising of provincial or municipal revenue; local works and undertakings other than interprovincial or international lines of ships, railways, canals, telegraphs, etc., or works, which, though wholly situated within the province are declared by the Federal Parliament to be for the general advantage

either of Canada or of two or more provinces; the incorporation of companies with provincial objects; the solemnization of marriage in the province; property and civil rights in the province; the administration of justice in the province, including the constitution, maintenance and organization of provincial courts both in civil and criminal jurisdiction, and including procedure in civil matters in these courts; the imposition of punishment by fine, penalty or imprisonment for enforcing any law of the province relating to any of the aforesaid subjects; generally all matters of a merely local or private nature in the province. Further, provincial Legislatures may exclusively make laws in relation to education, subject to the protection of religious minorities, who are to retain the privileges and rights enjoyed before Confederation.

Municipal Government

Under the British North America Act, the municipalities are the creations of the Provincial Governments. Their bases of organization and the extent of their authority vary in different provinces, but almost everywhere they have very considerable powers of local self-government.

THE PRESS

The vastness of the country hampers distribution and the establishment of a strong national press, so the daily press in Canada is essentially local in coverage, influence and distribution. However, a considerable proportion of the contents of the smaller Canadian papers is from syndicated sources in the U.S.A. or the United Kingdom, and news which is not local has a strong U.S. flavour. In mid-1976 there were 118 daily newspapers with a combined circulation of over five million, representing three-quarters of the country's households and covering the major centres of population.

There is an increasing trend towards group ownership: over a third of daily newspapers are owned by three major groups: Thomson Newspapers Ltd., Southam Press and F. P. Publications, accounting for 10 per cent, 21 per cent and 20 per cent of total circulation respectively.

In 1973 about 900 weekly and twice-weekly newspapers with a total circulation of more than 3,000,000 served the more remote areas of the country and a significant feature of the Canadian press is the publishing of newspapers catering for ethnic groups: there are over 80 of these (mainly weekly) publications appearing in over 20 languages, with a total circulation of about 3,000,000.

There are numerous periodicals for business, trade, professional, recreational and special interest readership, although periodical publishing, particularly, suffers from substantial competition from publications originating in the U.S.A. Among periodicals, the only one which can claim to be national in its attitudes and readership is the fortnightly *Maclean's Canada's Magazine*.

RADIO AND TELEVISION

The 1968 Broadcasting Act set out the broadcasting policy of Canada, established the Canadian Broadcasting Corporation (CBC) as the national, publicly owned, broadcasting service and created the Canadian Radio-television and Telecommunications Commission (CRTC) as the agency regulating all broadcasting on radio and television. It is financed mainly by public funds supplemented by revenue from advertising. Broadcasters are responsible for content, but freedom of expression is guaranteed; programmes are to use predominantly Canadian creative and other resources; and Canadians are entitled to CBC services in English and French as public funds become available.

Canadian broadcasting is a combination of public and private enterprise which provides radio and television

service to 98 per cent of the population. Many privately-owned television and radio stations have affiliation agreements with the CBC and help to distribute the national services. The major private networks are CTV, TVA (which serves the province of Quebec) and Global, as well as the educational networks. Cable television services in Canada are part of the broadcasting system, and reach over half the Canadian population.

Canadian Radio-television and Telecommunications Commission (CRTC): 100 Metcalfe St., Ottawa, Ont. K1A 0N2; f. 1968; regional offices in Montreal and Vancouver; Chair. HARRY J. BOYLE; Vice-Chair. CHARLES DALFEN, JEAN FORTIER.

Canadian Broadcasting Corporation (CBC): 1500 Bronson Ave., P.O.B. 8478, Ottawa, Ont. K1G 3J5; f. 1936;

financed mainly by public funds, supplementary revenue from commercial advertising on CBC television; CBC radio is almost completely non-commercial; Pres. A. W. JOHNSON; Exec. Vice-Pres. PIERRE DESROCHES.

RADIO

The CBC operates two AM networks, in English and in French, and FM stereo networks in English and French. In the north, the CBC's northern radio service provides both national network programming in English and French, and special local and shortwave programmes, some of which are broadcast in the languages of the Indian and Inuit peoples. In March 1977 there were 513 outlets for CBC radio (50 CBC-owned stations, 352 CBC-owned relay transmitters, 111 private affiliates and rebroadcasters). CBC radio service is within reach of 99.2 per cent of the population. Radio Canada International, the CBC's overseas shortwave service, has its headquarters in Montreal and its transmitters near Sackville, New Brunswick. It broadcasts daily in 11 languages and distributes recorded programmes free for use by broadcasters throughout the world.

TELEVISION

The CBC operates two television networks, in English and in French. Northern television does not yet have the capacity for local production but it supplements the national programmes it carries with English and French

programmes from other regions of Canada and with service broadcasting and film documentaries in the Inuktitut language. As of March 1977, CBC television was carried on 541 outlets (26 CBC-owned stations, 270 CBC-owned rebroadcasters, 245 private affiliates and rebroadcasters). CBC television is available to 98.1 per cent of the population. Most television programming is in colour, and as of January 1977, 63 per cent of Canadian households had colour sets. CBC transmission methods include leased channels on the Canadian space satellite Anik 1 started operation in 1973 and was the world's first synchronous domestic communications satellite.

COYLE; 171 privately-owned affiliated stations from coast to coast; 95 per cent coverage of English-language households.

Global Television Network: 81 Barber Green Rd., Don Mills, Toronto, Ont. M3C 2A2; Pres. PAUL G. MORTON; six transmitters serving Ontario covering the urban and rural markets in the province.

TVA: 1600 East Blvd. Maisonneuve, P.O.B. 170, Station C, Montreal, P.Q. H2L 4P2; Network Co-ord. CLAUDE BLAIN; French-language network, with 6 stations in Quebec covering 94 per cent of the Province.

There are two educational services: one in Ontario and one covering Alberta.

CAPE VERDE

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Capital

The Republic of Cape Verde is an archipelago of ten islands and five islets in the North Atlantic, about 500 km. west of Dakar, Senegal. All but three of the islands are mountainous and lie in a semi-arid belt, with little rain and high temperatures (yearly average 24°C (76°F)). The spoken language is Crioulo but Portuguese is the official language. The majority of the population is Roman Catholic. The capital is Cidade de Praia.

Recent History

The Cape Verde Islands were colonized by the Portuguese in the 15th century. From the 1950s liberation movements in the Portuguese Overseas Territories were working for independence and, in this context, the archipelago was linked with the mainland territory of Guinea-Bissau. However, the African Party for the Independence of Guinea and Cape Verde (PAIGC) made little progress in the islands, although regarding them as an integral part of their territory. When Guinea-Bissau was granted independence in 1974 the Cape Verde Islands elected to become independent rather than enter into an immediate federation with Guinea-Bissau. In December 1974 a transitional government was formed, comprising representatives of the Portuguese government and the PAIGC; members of other political parties were excluded. A National People's Assembly was elected in June 1975 with a majority voting for the PAIGC platform of ultimate union with Guinea-Bissau. Independence was granted on July 5th, 1975, and Aristides Pereira, Secretary-General of the PAIGC, became the country's first President.

Although Cape Verde and Guinea-Bissau are constitutionally separate, the PAIGC supervises the activities of both states. In 1976 a joint committee was elected to consider the form of unification which will eventually be decided by popular vote in both countries. President Pereira announced in November 1977 at the Third PAIGC Congress that the creation of a unified state was not envisaged in the near future, but that the two countries would continue to pursue common goals and policies.

Cape Verde is a member of the UN, the OAU and ECOWAS, and is one of the ACP countries associated with the EEC under the Lomé Convention.

Government

Executive power is held by a President elected by the National People's Assembly. Legislative power is vested in the Assembly, with 56 deputies elected by universal adult suffrage. The age of majority is 18.

Defence

The Popular Revolutionary Armed Forces have been formed from ex-combatants in the liberation wars. There is also a police force and paramilitary People's Militia.

Economic Affairs

The agricultural subsistence economy of the islands has suffered in recent years due to drought, which was in its ninth consecutive year in 1977. Maize and beans are the staple crops but production has fallen dramatically.

Coffee is grown but the plantations are very inefficient and are plagued with disease. Other crops grown include bananas, sugar cane, cassava, castor beans and groundnuts. Almost all the country's food is imported.

Remittances from workers abroad help to alleviate the economic problems, and Cape Verde receives foreign assistance. In 1977 \$2.5 million in food aid was offered by the EEC, and \$1.1 million by the United Kingdom. Foreign-aided irrigation projects are underway, including the tapping of underground water-tables, and there are plans to set up an agricultural development programme. The U.S.A. had previously offered an agricultural loan of \$3 million and gifts of \$2 million. The Government has requested a loan of \$20 million from the UN but only \$10 million had been received at the end of 1975. Fishing forms a large part of the islands' development potential.

There is little industry except for a few small food-processing and canning factories but with UN help the Government hopes to exploit the islands' resources of volcanic trass on Santo Antão, cement on Maio and salt on Sal, and to develop cement, salt, fertilizer, fish processing and porcelain industries.

Transport and Communications

There were 1,287 km. of roads in 1976. There are four airports, the principal one being at Espargos on Sal Island, and four airfields. The principal port is at Mindelo on São Vicente.

Education

Compulsory education is divided into *Instrução Primária* (for children aged 7-12 years) and *Escola Preparatória* (12-14 years). From the age of 14, children may attend one of the two *liceus* which provide a three-year general course or a two-year pre-university course. There is also one industrial and commercial school and three teacher training colleges.

Priority is being given to the building of schools, teacher training and the reduction of the 70 per cent illiteracy rate.

Tourism

The Government hopes to develop tourism on Sal Island. A large hotel already exists at Santa Maria beach. The islands of Santo Antão, São Tiago, Fogo and Brava offer combination of mountain scenery and vast beaches.

Public Holidays

1978: May 1st (Labour Day), June 1st (Children's Day), July 5th (Independence Day), September 12th (Day of the Nation), December 25th (Christmas Day).

1979: January 1st (New Year), January 20th (National Heroes' Day), March 8th (Women's Day).

THE CENTRAL AFRICAN EMPIRE

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Central African Empire lies in the heart of equatorial Africa and is bounded by Chad to the north, Sudan to the east, the Congo and Zaïre to the south and Cameroon to the west. Climate is tropical with an average temperature of 26°C (79°F) and heavy rains in the south-western forest areas. The national language is Sangho, but French is the official language. Many of the population hold animist beliefs, but about one-third are Christians. The national flag (proportions 5 by 3) consists of horizontal bands of blue, white, green and yellow, divided vertically by a red band, with a yellow star and crescent in the top left-hand corner. The capital is Bangui.

Recent History

The former territory of Oubangui-Chari, within French Equatorial Africa, became the Central African Republic on achieving self-government in December 1958. Full independence was attained in August 1960. The leading figure in the campaign for self-government and the first President, Bartholémy Boganda, died in 1959. His successor, David Dacko, led the country to independence and in 1962 established a one-party state under the *Mouvement d'évolution sociale de l'Afrique noire* (MESAN). President Dacko was overthrown at the end of 1965 by a military *coup d'état* which brought to power Col. (later Marshal) Jean Bédel Bokassa.

At the beginning of January 1966 Colonel Bokassa formed a new government, rescinded the Constitution and dissolved the National Assembly. Bokassa, who became Life President in March 1972 and Marshal of the Republic in May 1974, has forestalled several alleged coups. Conspiracy charges led to the execution in 1969 of Lt.-Col. Alexandre Banza, the Minister of Health, the arrest in 1973 of another Minister, Auguste M'Bongo, and the detention in 1974 of leading trade unionists. Eight conspirators were executed after an attempt on the President's life in February 1976.

In 1976 the Council of Ministers was replaced by the Council for the Central African Revolution, and ex-President Dacko was named personal adviser to the President. In December 1976 the Republic was renamed the Central African Empire (C.A.E.) and a new Constitution was instituted. Bokassa was proclaimed as the first Emperor and Dacko was named Personal Counsellor to the Emperor.

During 1977 there were elaborate preparations for Bokassa's coronation, which took place in December 1977 and was estimated to have consumed a quarter of the country's income and included gifts of 75 million francs CFA from the three largest C.A.E. diamond companies. Relations with the U.S.A. deteriorated during 1977 following the imprisonment of two journalists, one American and one British, on charges of espionage. The U.S.A. recalled its ambassador for consultations in August 1977 and announced in December that it was phasing out its aid plan from 1978.

Government

Under the Constitution of December 1976, the C.A.E. is defined as a parliamentary monarchy. Executive power is vested in the Emperor, who rules with the assistance of an appointed Council of Ministers, responsible to him. The Constitution also provides for a National Assembly, whose members serve for five years and are nominated by the ruling party, MESAN. The Assembly may dismiss the Council of Ministers but the Emperor may dissolve the Assembly.

Defence

The armed forces number about 2,600 men, including 1,400 in the paramilitary forces. Military service is compulsory for adult males and for male and female civil servants.

Economic Affairs

About 90 per cent of the population is engaged in agriculture, which accounted for 33 per cent of gross domestic product in 1970. The most important cash crops are cotton and coffee, but subsistence farming predominates. Industrial production is minimal. Diamonds were the major export earner from the mid-1960s until 1973. Coffee became the main export commodity in 1974 and cotton also surpassed diamonds in 1975; a record 45,000 metric tons of cottonseed was exported in 1977. Timber has recently increased in importance, and a road improvement programme should improve removals efficiency. Despite rising production in 1975, the future of the diamond industry is uncertain following the revocation of the Central African Diamond Prospecting Company's mining licence in April 1976. A feasibility study for a state uranium mining company, with French and Swiss participation, was being undertaken in 1977.

The C.A.E. is a member of UDEAC and has close economic links with France. In 1977 the C.A.E. received a long-term loan of U.S. \$1.75 million from OPEC.

Transport and Communications

Bangui is about 1,450 km. from the sea but roads radiate east, north and west to the Sudan, Chad and Cameroon respectively. There are no railways, and the chief artery of transport is the Oubangui river which flows into the Congo and thereby provides an outlet from Bangui to Brazzaville, from where a railway runs to the port of Pointe-Noire. There is an international airport at Mpoko, near Bangui, and numerous airfields allow for extensive internal services.

Social Welfare

An Employment Code guarantees a minimum wage for 60,000 employees and provides for employment accident benefits. There are 36 prefectorial hospitals, 36 maternity hospitals, 108 welfare centres and 200 first aid centres.

Education

About half of children in the appropriate age-group receive primary education. Secondary education is very

CENTRAL AFRICAN EMPIRE

limited. In 1974 there were 19,320 students in secondary and teacher-training schools.

Tourism

The main tourist attractions are the waterfalls, the forests and many varieties of wild animals. There is excellent hunting and also opportunities for fishing. In 1974 there were about 4,000 visitors.

THE CONSTITUTION

The Constitution of February 16th, 1959, was modified five times up until 1964, and was abrogated on January 4th, 1966, when a constitutional act was adopted giving the President full competence to act in all affairs of state. The Imperial Constitution of December 4th, 1976, was approved by an extraordinary congress of MESAN (*Mouvement d'évolution sociale de l'Afrique noire*). It defines a type of parliamentary monarchy, with a National Assembly. Emperor Bokassa may dissolve the Assembly, but the Assembly may dismiss the Government by a motion of censure. The Emperor defines the Empire's

policy, is supreme chief of the armed forces and chairman of MESAN's National Political Bureau. He also controls the imperial succession, is chairman of the Higher Council of the Magistrature, signs decrees adopted by the Council of Ministers, issues laws and may make appointments in the armed forces and civil service.

The Government is responsible to the Emperor and to Parliament. The Supreme Court arbitrates in disputes between the Government and Parliament, ensures that laws are constitutional and that the Constitution is respected.

TRANSPORT

RAILWAYS

There are no railways at present but there is a long-term project to connect Bangui to the Trans-Cameroon railway.

A railway is also due to be constructed from Sudan's Darfur province into the C.A.E.'s Vakaga province. An agreement between the two Governments was signed in December 1971.

ROADS

Compagnie Nationale des Transports Routiers: B.P. 330, Bangui; f. 1971; Dir.-Gen. IBRAHIM TINOR; state-controlled.

In 1976 there were about 21,950 km. of roads, 6,000 km. of which were passable at all seasons by heavy vehicles. The total includes 4,350 km. of *routes nationales*, 6,300 km. of regional roads and 13,655 km. of rural roads. Both the total road length and the condition of the roads is inadequate for the traffic that uses the road system and very few roads have a tarmac surface. Seven main routes leave Bangui, and those that are surfaced have been toll roads since 1971. In 1977 it was decided to spend 500 million francs CFA over the next four years on improving roads for the transport of timber.

INLAND WATERWAYS

Agence Centrafricaine des Communications Fluviales (ACCF): B.P. 822, Bangui; f. 1969; state-owned.

There are two navigable waterways. The first is open all the year, except in the dry season, and is formed by the Congo and Oubangui rivers; convoys of barges (of up to 800 tons load) ply between Bangui and Brazzaville. The second is the river Sangha, a tributary of the Oubangui, on which traffic is seasonal. There are two ports, at Bangui and Salo, on the rivers Oubangui and Sangha respectively. Efforts are being made to develop the stretch of river upstream from Salo to increase the transportation of timber from this area, and Nola will be developed as a timber port.

CIVIL AVIATION

There is an international airport at Bangui and several small airports for internal services.

Air Centrafrique: B.P. 1432, Rue du Président Boganda, Bangui; f. 1966 as Air Bangui, reorganized in 1971 when the Government planned to withdraw from Air Afrique; extensive internal services; fleet of one Caravelle and one DC-4; Dir.-Gen. JOSEPH DOUAËLE.

Air Afrique: B.P. 875, Bangui; the C.A.E. Government has a 7 per cent share in Air Afrique.

The C.A.E. is also served by the following foreign airlines: Aeroflot, Air Zaire, Cameroon Airlines and UTA.

TOURISM

Direction Générale du Tourisme: P.O.B. 655, Bangui.

CHAD

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Chad is a landlocked state in north central Africa, bordered to the north by Libya, to the south by the Central African Empire, to the west by Niger and Cameroon and to the east by Sudan. The climate is hot and arid in the desert north but very wet (annual rainfall 500 mm.) in the south. The official language is French, but Arabic and various African languages are widely spoken. About half the population are Muslims living in the north; most others follow animistic beliefs. About 5 per cent are Christians. The national flag (proportions 3 by 2) consists of vertical blue, yellow and red stripes. The capital is N'Djamena (formerly Fort-Lamy).

Recent History

Formerly a province of French Equatorial Africa, Chad became independent in 1960 under the leadership of François (later N'Garta) Tombalbaye and the Chad Progressive Party (PPT). In 1962 President Tombalbaye banned all opposition parties and Chad became a single-party state. Civil disturbances began in 1963 with riots in the capital and a full-scale rebellion broke out in 1965, concentrated mainly in the north, which had until that year remained under French military control. The Muslims of northern Chad have traditionally opposed their black southern compatriots who are animists or Christians. The banned National Liberation Front (FROLINAT) assumed leadership of the revolt. In 1968 Tombalbaye called in French military forces and with their help the rebellion was contained. Most of the French forces were withdrawn in 1971. By reaching an agreement with Libya in 1972, Tombalbaye deprived the rebels of their major foreign support.

In 1973 several leading figures of the regime, including the Army Chief of Staff, Gen. Félix Malloum, were imprisoned on conspiracy charges. The PPT was replaced by a new political party, the *Mouvement National pour la Révolution Culturelle et Sociale* (MNRCS), whose objective was a return to African authenticity and which, with the worsening economic situation, caused widespread disaffection. On April 13th, 1975, Tombalbaye was killed in an army coup led by the Acting Chief of Staff, Gen. Mbailau Odingar.

General Malloum was released from detention and became President at the head of a Supreme Military Council. In May a provisional government was formed, with army officers holding the key posts. The new Government launched appeals for national reconciliation, aimed at the rebel groups which still controlled large areas of Chad. Some rebel leaders rallied to the regime, but FROLINAT remained unmoved.

Relations with France became severely strained from September 1975 to March 1976, when France negotiated with a splinter rebel group for the release of French civilian hostages. In April 1976 Gen. Malloum survived an assassination attempt, for which several FROLINAT members were tried and sentenced to death or imprisonment. A coup attempt by disaffected members of the

Nomad Guard was repulsed by palace guards in April 1977. During the battle the Chief of Staff of the army, Al Dabio, was killed. In June rebels took the town of Bardai and claimed to be occupying 40 per cent of the northern province of Tibesti.

Relations with Libya deteriorated in 1977. Libyans living in Chad were placed under economic restrictions and the border was closed in October. In February 1978 diplomatic relations between the two countries were suspended. Chad appealed to the West for military assistance. The U.S.S.R. had given military aid in 1976 but Chad had been alienated by Soviet support for Libya and a lack of spare parts supplies. Chad referred her dispute over the Aozou strip to a special OAU committee, but at the end of 1977 the conflict was still continuing.

Government

According to the provisional constitution announced in August 1975, executive and legislative power is exercised by a President elected by the Supreme Military Council. The President presides over the Council of Ministers. The country is divided for administrative purposes into 13 Prefectures.

Defence

Chad's army numbers about 5,000 men. There are also some 200 men in the air force and 6,000 men in the National Guard and other para-military forces. Following the co-operation agreement with France concluded in March 1976, the number of French military technical advisers, then numbering 260, was increased.

Economic Affairs

Chad's economy is essentially one of subsistence, based on agriculture, stock-breeding and fishing, which together employ 89 per cent of the working population. The only significant cash crop is cotton, which provides the basis for Chad's major industry and some two-thirds of all export earnings. Groundnuts are grown, but not in sufficient quantities to meet local demand or to allow Chad's oil-mills to work at full capacity. Animal resources are under-exploited, despite government efforts to improve cattle stock and the construction of modern abattoirs. Lake Chad and the Lagone-Chari basin are well-stocked with fish, producing more than 100,000 tons a year. A project for irrigation using water from the Chad basin was expected to improve crop yields in 1977/78. However, crops were threatened by the reappearance of the drought which had seriously affected the Sahel region in the early 1970s, when the rains failed in 1977.

Industry is almost entirely based on agriculture. Textile production is the most important sector, followed by food and tobacco. There is little mining at present but deposits of petroleum and other minerals have been discovered near Lake Chad, and a petroleum refinery was expected to start production in 1978 in N'Djamena. There are also hopes of discovering substantial deposits of uranium in the disputed northern territory. Chad's foreign trade is principally with France and shows a considerable deficit. French financial

and technical aid is necessary to meet this deficit. The Club des Amis du Sahel gave aid for development projects in 1975/76 of over U.S. \$23 million, and the balance of payments in 1976 showed a surplus of 5,500 million francs CFA. Gen. Malloum introduced austerity budgets in 1976 and 1977, freezing salaries, in spite of price rises, and reducing the size of the civil service.

Chad is a member of the French Community, the OAU, the Chad Basin Commission, the Niger River Commission and is an associate member of the EEC.

Transport and Communications

There are no railways in Chad. The river Chari is navigable from N'Djamena to Sarh in the far south. Roads are inadequate and only short stretches have been surfaced. There is an international airport at N'Djamena and over 40 aerodromes.

Social Welfare

An Employment Code guarantees a minimum wage and other rights for employees. There are 4 hospitals, 28 medical centres, several hundred dispensaries and 40 qualified doctors.

Education

In 1977 about 43 per cent of children of 10 years old attended school and only 14 per cent of the population were literate. A National University was opened in 1971 with 300 students and in addition the Republic sends students to foreign universities.

Tourism

Chad provides a variety of scenery from the dense

forests of the south to the deserts of the north. Wild animals abound, especially in the two national parks and five game reserves; there is excellent hunting, mainly around Sarh.

Visas are not required to visit Chad by nationals of the following countries: Andorra, Benin, the Central African Empire, the Congo People's Republic, France, Gabon, Federal Republic of Germany, Guinea, Ivory Coast, Madagascar, Mali, Mauritania, Mauritius, Monaco, Niger, Rwanda, Senegal, Togo, Upper Volta and Zaire.

The National Assembly and the Economic and Social Council were both dissolved after the coup of April 13th,

1975. The Supreme Military Council is advised by four technical commissions.

POLITICAL PARTIES

Chad's ruling party, the MNRCS, was disbanded after the coup of April 1975. All other political parties remain prohibited but large areas of the country are controlled by opposition groups. FROLINAT (the National Liberation Front), led by Dr. Abba Siddick, dominates much of the east of Chad. It is supported by Algeria and its leaders live in Algiers. A breakaway group from FROLINAT is under the command of Goukouni Oueddei, son of the Derdei

who is the spiritual and temporal chief of the Toubou tribe. The FLT (Chad Liberation Front) was active in the Eastern Wadai area. Its leader, Hassan Ahmed Moussa, rallied to the new government. Another former opposition party, the MDRT (Democratic Movement for the Renovation of Chad), established by exiles in Paris, welcomed the military coup.

TRANSPORT

RAILWAYS

In 1962 Chad signed an agreement with Cameroon to extend the Trans-Cameroon railway from N'Gaoundéré to Sarh, a distance of 500 km. Although the Trans-Cameroon reached N'Gaoundéré in 1974, the proposed extension into Chad has been postponed indefinitely. Other possibilities are being explored of extending Sudanese and Nigerian lines into Chad.

ROADS

Coopérative des Transportateurs Tchadiens (COPORTCHAD): B.P. 336, N'Djamena; road haulage; Pres. AHMED DOUGA.

In 1976 there were 30,725 km. of roads, of which 4,628 km. were national roads and 3,512 km. were secondary roads. There are also some 20,000 km. of tracks suitable for motor traffic during the dry season from October to July. A 4,840 km. motor track leads from Rouiba, in Algeria, to Chad. There are projects for road links between N'Djamena and Tripoli, and between Moundou and N'Gaoundéré.

INLAND WATERWAYS

There is a certain amount of traffic on the Chari and Logone rivers which meet just south of N'Djamena. Both routes, from Sarh to N'Djamena on the Chari and from Bongor and Moundou to N'Djamena on the Logone, are open only during the wet season, August-December, and provide a convenient alternative when roads become impassable.

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Chile is a long, narrow country stretching for 4,480 km. along the Pacific coast of South America from Peru and Bolivia in the north to Cape Horn in the far south. It is separated from Argentina to the east by the high Andes mountains. Both the mountains and the cold Humboldt Current influence the climate; between Arica in the north and Punta Arenas in the extreme south, some 4,000 km., the average maximum temperature varies by no more than 13°C. The language is Spanish. There is no state religion but Roman Catholics represent over 85 per cent of the population. The national flag (proportions 3 by 2) is divided horizontally, the lower half red, the upper half with a white star on a blue square at the hoist and the remainder white. The capital is Santiago.

Recent History

In September 1970 Dr. Salvador Allende Gossens, the Marxist candidate of Unidad Popular, a coalition of five left-wing parties including the Communist Party, was elected to succeed Eduardo Frei as President. He promised to transform Chilean society by constitutional means and among proposed measures were a nationalization programme of government control over foreign trade. The Government failed to obtain a Congressional majority in the elections of March 1973 and was confronted with a deteriorating economic situation as well as an intensification of violent opposition to its policies. Accelerated inflation led to food shortages and there were repeated clashes between pro- and anti-Government activists. The armed forces finally intervened in September 1973 because of the increasingly anarchic situation and economic breakdown. President Allende died during the coup.

Congress was dissolved, all political activity banned and strict censorship introduced. The military junta dedicated itself to the eradication of Marxism and the reconstruction of Chile, and its leader, Gen. Augusto Pinochet Ugarte, became Supreme Chief of State in June and President in December 1974. The junta has been widely criticized abroad for its repressive policies and violations of human rights. Throughout 1976 and early 1977 the junta made efforts to improve its image abroad but in late 1977 it again arrested and exiled leading trade unionists and human rights activists. In November 1977 the first strike since the coup took place at the El Teniente copper mine, and anti-government demonstrations and protests were becoming more widespread. The banned Christian Democrats were calling for the restoration of true democracy. Following a UN General Assembly resolution in December 1977 condemning the Government for violating human rights, Gen. Pinochet called a referendum in January 1978 to endorse the regime's policies. In an 88 per cent poll, despite calls to vote against the Government by the Church and banned left-wing parties, 79.6 per cent voted in favour of the President "in his defence of Chile in the face of international aggression".

In September 1976 three constitutional acts were promulgated with the aim of creating an "authoritarian

democracy". All political parties were banned in early 1977 when the state of siege, in operation since 1973, was extended and broadened to provide for censorship of mail and new restrictions on the press. In mid-1977 President Pinochet announced that there would be partial return to civilian rule in the 1980s and that a legislative body would be established in 1985, but he later said that there would be no elections for ten years.

Government

Chile is a republic, divided into 12 regions and a metropolitan area. Since the coup in September 1973 the country has been under military rule. The bicameral National Congress (a Senate and a Chamber of Deputies) was dissolved and constitutional rule suspended. Constitutional and legislative powers are exercised by the Government Junta and executive and administrative powers are vested in the President. In January 1976 an 18-member consultative Council of State was established and a new constitution, to be submitted to referendum in 1980, was being prepared in 1977.

Defence

Military service is compulsory for one year at 19 years of age. In 1977 the army had a strength of 50,000, the air force 11,000 and the navy 24,000. Para-military security forces number about 30,000. Defence expenditure for 1977 amounted to 10,930 million pesos.

Economic Affairs

About a quarter of the population lives on the land, particularly in the fertile central region. Although the country has great agricultural potential, inefficient use of land resources has made it necessary to import a large amount of food. Major crops include wheat, sugar beet, potatoes and maize, and the wine industry is growing rapidly.

Chile is one of the world's largest producers and exporters of copper. Its total reserves are estimated to represent 25 per cent of the world's known reserves and are concentrated in the Chuquibambilla and El Teniente mines. In 1974 it benefited from the dramatic rise in world copper prices but subsequent falls led to a 15 per cent export cutback in 1975. Prices rose again in 1976 and copper earned U.S. \$1,246 million in foreign exchange. In order to reduce the economy's vulnerability to world copper price fluctuations, recent government policy has been one of diversification. Copper accounted for only 59 per cent of exports by value in 1976, compared with 80 per cent in 1973. Fruit and forest products are growing in importance and the Government is to promote the dairy industry. Chile produces only a third of its petroleum needs so the Government has intensified exploration, especially in the Magellan Straits, by national and foreign companies.

In 1973 the junta inherited an economy with high inflation, low reserves and investment had a declining G.D.P. The Allende Government had introduced wide-ranging state control but the Pinochet Government is establishing a market-oriented economy: 439 out of the

494 firms controlled by the state in 1973 have been sold back to the private sector, thus helping to reorganize public finances and control the traditional treasury deficits. The junta's policies had unequal results in 1974 and its austerity measures resulted in a recession in 1975. However, revenues increased and the Government was able to introduce measures to reactivate the economy and stimulate domestic demand. In 1976 the G.D.P. grew by 5 per cent overall, industrial production rose by 12.2 per cent, although agricultural output fell because of insufficient use of fertilizers, adverse weather conditions and pest damage. Unemployment fell from 18 per cent in 1975 to 13.6 per cent in December 1976 and inflation from 340.7 per cent in 1975 to 174.3 per cent in 1976. The balance of payments position improved and there was a trade surplus of \$439 million, compared with a deficit of \$278 million in 1975.

In 1977 the Government announced further measures to reactivate the economy including a 10 per cent revaluation of the peso, with gradual devaluations thereafter. To achieve the average 6.6 per cent growth rate envisaged in the 1976-81 Development Plan, which lays emphasis on import substitution, transport, mining, petrochemicals, cattle farming and forestry, annual investment must double. Therefore the Government is actively seeking foreign investment and has introduced a new foreign investment law in which there is no limit on profit and capital remittances. Important new projects established as a result include the proposal to mine the Quebrada Blanca copper deposits by an American consortium. The estimated output will be 100,000 tons of refined copper each year.

In the first half of 1977 industrial production rose by 11.2 per cent during the year ending September 1977 inflation was 73.4 per cent, compared with 195 per cent over the previous year. In late 1976 the World Bank authorized a loan of \$60 million, and a loan of \$125 million over three years was agreed with a consortium of North American banks in 1977.

Chile is a member of the OAS, LAFTA and SELA (Latin American Economic System). In 1969 it formed the Andean Group with five other countries, but withdrew in October 1976, unable to accept the extent of the Group's proposed restrictions on the export of profits by foreign-owned corporations.

Transport and Communications

The difficult topography of Chile, including mountains, forest and desert, make communications a formidable problem. The traditional means of communication is the sea. The chief ports are Valparaíso, Talcahuano, Antofagasta, San Antonio and Punta Arenas. In 1976 there were about 10,000 km. of railways and 75,197 km. of roads, of which 9,992 km. were paved. There are international airports at Pudahuel outside Santiago, Arica, Antofagasta,

Puerto Montt and Punta Arenas. Plans are going ahead to extend the provincial airport network.

Social Welfare

Employees, including agricultural workers, receive benefits for sickness, unemployment and retirement and there are dependents' allowances. There is a National Health Service which was established in 1952. Government spending on health in 1975 was only 55 per cent in real terms of that in 1972 resulting in an increase in health problems including malnutrition.

Education

Education is compulsory between the ages of six and fourteen. Primary education is free. Over 90 per cent of the population are literate (95 per cent in the towns). Primary school education has been extended from six to eight years and new academic and technical syllabuses have been drawn up for the secondary school course. There are eight universities with over 100,000 students. Government spending on education fell by 41 per cent between 1972 and 1975.

Tourism

Chile has a wide variety of attractions for the tourist, including fine beaches, ski resorts in the Andes, lakes and rivers. There are many opportunities for hunting and fishing in the southern archipelago, where there are plans to make an integrated tourist area with Argentine, requiring investment of \$120 million. In 1976 235,371 tourists visited Chile.

Visas are required by nationals of Guyana, Haiti, Kuwait, Suriname and African and Communist countries.

Sport

Football, skiing, horse racing, fishing and basketball are the most popular sports.

FINANCE

100 centavos=1 Chilean peso.

Coins: 1, 5, 10 and 50 centavos; 1 peso.

Notes: 1, 5, 10, 50 and 100 pesos.

Exchange rates (December 1977): £1 sterling=50.27 pesos; U.S. \$1=27.45 pesos.

1,000 Chilean pesos=£19.89=\$36.43.

Note: The new Chilean peso was introduced in September 1975, replacing the escudo at the rate of 1 peso=1,000 escudos. The Chilean escudo had been introduced in January 1960, replacing the old peso at the rate of 1 escudo=1,000 pesos. In October 1953 the basic exchange rate was altered from U.S. \$1=31 pesos to \$1=110 pesos. However, a system of multiple exchange rates was in force until April 1956 and thereafter the free rate, which applied to external trade, fluctuated considerably, reaching 1,120 old pesos per U.S. dollar by the end of 1958. At the end of 1959 the rate was \$1=1,053 pesos, so the initial value of the escudo was 95 U.S. cents (\$1=1.05 escudos). Chile's currency, however, continued to depreciate. After mid-1970 the principal rate of exchange for overseas trade transactions fluctuated as follows: U.S. \$1=12.225 escudos from July 1970 to December 1971; \$1=15.80 escudos from December 1971 to August 1972; \$1=25.00 escudos from August 1972 to September 1973. In terms of sterling, the principal trading rate was £1=29.34 escudos from July 1970 to August 1971; and £1=41.17 escudos from December 1971 to June 1972. A number of other exchange rates were in force for specific transactions, e.g. imports of non-essential goods, and for non-trade purposes such as tourism. For converting the value of foreign trade the average rates of escudos per U.S. dollar were: 6.9 in 1968; 8.6 in 1969; 11.3 in 1970; 12.2 in 1971; and 20.8 in 1972. For July–September 1973 the average rate was \$1=42.0 escudos. On October 1st, 1973, the new military junta introduced a two-tier system with a single trading rate of \$1=280 escudos, representing a 91 per cent devaluation from the previous basic rate. By the end of 1973 the rate was \$1=360 escudos. The average rates (escudos per U.S. dollar) were 71.6 in 1973 and 593 in 1974. Many more devaluations subsequently occurred until by September 1975 the exchange rate was \$1=6,400 escudos. The initial rate for the new currency was thus \$1=6.40 pesos. The average exchange rate (new pesos per U.S. \$) was: 5.19 in 1975; 13.34 in 1976. Some figures in this Statistical Survey are still expressed in terms of escudos.

THE CONSTITUTION

In September 1976 the Government published three new Constitutional Acts which lay down the bases of Chile's new institutions. Chile is to have a new democratic structure with community participation. The basic aims of the State is the general well-being of the Nation in as much as each and every member of the community shall be helped to achieve material and spiritual fulfilment. The concept of a society based on class struggle is rejected. The family shall be the base of society.

The third Act deals with constitutional rights and guarantees. The following rights are guaranteed: the right to life and personal integrity; to a defence, to personal liberty and individual security; the right to reside in, cross or leave the country; the right of assembly, petition, association and free expression and the right to work. The

Act differs from the 1925 Constitution in so far as men and women are accorded equal rights; no-one shall be obliged to join any association; any group considered to be contrary to morality, public order or state security shall be prohibited; the courts shall be able to prohibit any publication or broadcast considered to be contrary to public morality, order, national security or individual privacy; civil servants are denied the right to strike as are any other organization or service which is deemed to be vital to the nation. Also any person or group which disseminates doctrines which may harm the family, incite violence or be considered as contrary to the regime or the integrity or functioning of the law, shall be illegal and deemed to be contrary to the institutions of the Republic.

A new constitution was being prepared in 1977.

THE PEOPLE'S REPUBLIC OF CHINA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The People's Republic of China covers a vast area of eastern Asia, with Mongolia to the north, the Soviet Union to the north and west, Pakistan to the west and India, Nepal and South-East Asia to the south. The climate ranges from sub-tropical in the far south to an annual average temperature of below 10°C (50°F) in the north and from the monsoon climate of East China to the aridity of the north-west. The principal language is Northern Chinese (Mandarin); in the south and south-east local dialects are spoken. The Tibetans, Uighurs, Mongols and other groups have their own languages. The traditional religions and philosophies of life are Confucianism, Buddhism and Taoism. There are also small Muslim and Christian minorities. The national flag (proportions 3 by 2) is plain red with one large and four small five-pointed gold stars in the top left-hand corner. The capital is Peking.

Recent History

The People's Republic of China was proclaimed in October 1949, following the defeat by Communist forces of the Kuomintang government led by Gen. Chiang Kai-shek, which then fled to the island province of Taiwan. In October 1971 the People's Republic was admitted to the United Nations in place of the Kuomintang regime as the representative of China. Several countries still withhold recognition of the People's Republic.

The early years of Communist rule saw the restoration of order and the beginnings of economic progress. After the Korean War, a considerable measure of success was achieved, allowing China to withstand the effects of the industrialization programmes of the late 1950s called the "Great Leap Forward", the drought of 1960-62 and the withdrawal of Soviet assistance in 1960. To prevent the establishment of a privileged ruling class, Chairman Mao Tse-tung launched the Great Proletarian Cultural Revolution in 1966. The excesses of the Red Guards caused the army to intervene but not before Liu Shao-chi, the Head of State, and Teng Hsiao-ping, General Secretary of the Party, had been disgraced.

Factional disputes culminated in the attempted coup by the Defence Minister, Marshal Lin Biao, and several military leaders, who disappeared in 1971. However, by 1973 it was apparent that Chairman Mao Tse-tung and Premier Chou En-lai had retained their dominant positions.

At the Fourth National People's Congress in January 1975, Teng Hsiao-ping re-emerged as first Vice-Premier and also Chief of the General Staff, next only to Mao and Chou. A new constitution was also approved.

Chou En-lai died in January 1976, and Teng Hsiao-ping was expected to succeed him. Instead, Hua Kuo-feng, Minister of Public Security since January 1975, was officially appointed Premier in April, and Teng Hsiao-ping was dismissed from all posts, after a campaign denouncing him as a "capitalist roader". Counter-demonstrations followed, and serious rioting took place in Peking.

On September 9th, 1976, Mao died. His widow, Chiang Ching, who had begun to exert an increasing influence in the political sphere, then tried to seize power, with the help of three members of the Party Politburo, Chang Chun-chiao, Wang Hung-wen and Yao Wen-yuan. However, their attempt was unsuccessful, they were arrested, and a vigorous campaign against them was mounted, in which they were branded as the "gang of four", and accused of plotting to assassinate Hua Kuo-feng, and of forging Mao's will. In October Hua Kuo-feng was appointed successor to Mao as Party Chairman and Commander-in-Chief of the People's Liberation Army.

The months following Hua's appointment were troubled by displays of civil unrest. Troops were dispatched to deal with violent clashes in several provinces, and strikes and industrial sabotage were rife. Opposition to the new leadership continued, and a major purge of provincial administration was carried out. There were reports of mass trials and official executions.

The Eleventh Party Congress, held in August 1977, restored Teng Hsiao-ping to his former posts and adopted a new party constitution. The Fifth National People's Congress was scheduled for the spring of 1978.

Government

China is a unitary state. Directly under the Central Government there are 21 provinces, five autonomous regions (including Tibet) and three municipalities (Peking, Shanghai, Tientsin). The highest organ of state power is the National People's Congress, under the leadership of the Chinese Communist Party. The Congress consists of over 2,800 deputies indirectly elected for five years by the provinces, autonomous regions, municipalities directly under the central government, and the People's Liberation Army. The Congress elects a Standing Committee to be its permanent organ. China has no Head of State but the equivalent functions are exercised by this Committee.

The State Council is the executive and is composed of the premier, the vice-premiers and the ministers heading ministries and commissions. The State Council is appointed by and accountable to the National People's Congress.

Local people's congresses are the local organs of state power, and local revolutionary committees are the permanent organs of local people's congresses.

The Chinese Communist Party was given an even more important role under the 1975 Constitution, being defined as "the core of leadership of the whole Chinese people". This was reaffirmed in the party constitution of 1977.

Defence

China is divided into 11 major military regions. Total regular forces numbered 3,950,000 in 1977. The People's Liberation Army numbered 3,250,000. The navy of 300,000 has three fleets, including 66 submarines, one of which has ballistic missile tubes. The air force has 5,200 combat aircraft and personnel totalling 400,000. In addition China has 30-40 IRBM and 30-40 MRBM. There are also 300,000

security and border guards. All males are conscripted and military service lasts for 2-4 years in the army, 4 years in the air force and 5 years in the navy. China has exploded 22 nuclear devices.

Economic Affairs

Agriculture represents about one-quarter of China's total national output. Of the chief grains, rice is grown mainly south of the Yangtze and wheat and millets to the north. China, with one-fifth of the world's population, accounts for 15 per cent of the world's cereal and ground-nut production, 20 per cent of the world's soya and tea output and almost 40 per cent of the world's pig numbers. The gross value of China's farm output increased by about 50 per cent in the decade up to 1974.

China has large deposits of natural resources, such as coal and iron ore, which serve the iron and steel works at Anshan, Shanghai, Paotow and Wuhan. Other important minerals include tungsten, molybdenum, antimony, tin, lead, bauxite and manganese. The gross value of China's industrial output increased by 190 per cent between 1964 and 1974.

The petroleum industry is gaining steadily in importance, though four-fifths of the country's fuel and power requirements are still supplied by the coal industry, which produces one-fifth of the world's coal, while China's petroleum production does not yet account for more than 2 per cent of the world's output. The energy consumption per capita in 1974 was estimated at less than 650 kilogrammes of coal equivalent, compared to a world average of 2,050 kilogrammes per capita. Since 1973 China has been self-sufficient in petroleum and its products, and in 1975 exported over 8 million tons of oil, whilst producing, in the view of the Joint Economic Committee of the U.S. Congress, 80 million tons of crude petroleum. China is in the process of developing its own petro-chemical industries, including fibres and plastics, and is now a major producer and consumer of nitrogenous fertilizers.

The development of the economy since 1952 has been within the framework of four five-year plans, but recessions occurred in the wake of the Great Leap Forward (1958-60) and during the Cultural Revolution (1966-68). The Fourth Plan was successfully fulfilled in 1975, but the Fifth Plan (1976-80) seems to be delayed. From 1955 to 1957 collective farms were set up and these were amalgamated in 1958 in communes. Industry, trade and banking are in the hands of the State. Foreign trade, running at about U.S. \$7,000 million in each direction in the mid-1970s, accounts for about 1 per cent of world trade. China has no serious balance of payments problems, but a trade deficit of over \$400 million in 1975 had to be met by deferred payments in Japan and Western Europe. In 1976 China had an export surplus of \$600 million.

Transport and Communications

Since 1949 an ambitious programme of railway construction has been undertaken, especially in the west and north-west. In 1949 railways were responsible for nearly 80 per cent of the freight turnover by modern means of transport. The total length of railway lines exceeded 36,000 km. in 1965. Roads are unevenly developed; national and provincial highways total 200,000 km. About 48,000 km. of inland waterways are navigable by steamships and civil air routes total 25,600 km. Coastal shipping is also important

and the Chinese merchant fleet is expanding rapidly, with an estimated displacement of 2,900,000 gross tons in 1975. Since 1964 a number of foreign airlines have been permitted to set up regular services to Chinese cities.

Social Welfare

Western and traditional Chinese medical attention is available in the cities, and to a lesser degree in rural areas. Since the Cultural Revolution, some 330,000 medical workers have settled in the countryside and an additional 400,000 doctors and nurses have been recruited into mobile teams to tour the villages, according to the New China News Agency. About 1 million "barefoot doctors" or semi-professional peasant physicians assist with simple cures and treatment. Large factories and other enterprises provide social services for their employees. Industrial wage-earners qualify for pensions. Average industrial wages amount to about 65 yŭan per month; some three-fifths of the family budget is devoted to buying food.

Education

A great expansion has occurred since 1949 in numbers receiving education at all levels, and education is almost universal. Kindergartens are considered an important part of pre-school education. Primary schooling covers five years and middle school six years. In 1960 it was claimed that 67 per cent of the population was literate. Following the closing of many schools and universities during the Cultural Revolution, PLA-worker teams took over their administration, entrance examinations were abolished and selection for admission was based on political assessment. In 1975 some 150 million pupils received primary education, 45 million secondary, and 1 million higher education. A return to more conventional standards was indicated in 1977, with the reintroduction of entrance examinations.

Tourism

Tourism is still of limited extent. Tours are organized for party groups visiting China and foreign visitors still require a visa. Western-style hotels exist in Peking, Shanghai, Canton and other large centres.

Sport

Football and basketball are popular in schools and other institutions. Athletics and swimming are encouraged. Chinese table-tennis players are among the world's best.

FINANCE

Renminbi (RMB or "People's Currency"):

100 fen (cents) = 10 chiao (jiao) = 1 Jen Min Piao (People's Bank Dollar), usually called a yūan.

Coins: 1, 2 and 5 fen.

Notes: 10, 20 and 50 fen; 1, 2, 5 and 10 yūan.

Exchange rates (December 1977): £1 sterling = 3.255 yūan; U.S. \$1 = 1.777 yūan.

100 yūan = £30.12 = \$56.26.

Note: The new yūan, equal to 10,000 old yūan, was introduced in March 1955. The initial exchange rate was U.S. \$1 = 2.46 new yūan (1 yūan = 40.65 U.S. cents) and this remained in effect until August 1971. Between December 1971 and February 1973 the official rate was \$1 = 2.27 yūan, though an effective rate of \$1 = 2.20 yūan was in force from January 1973. Since February 1973 the official basic rate has been \$1 = 2.04 yūan but the market rate has been adjusted frequently. The latter (at December 31st) was: \$1 = 2.02 yūan in 1973; \$1 = 1.84 yūan in 1974; \$1 = 1.97 yūan in 1975; 1.90 yūan in 1976. In terms of sterling, the exchange rate between November 1967 and June 1972 was £1 = 5.904 yūan.

PLANNING

FIRST FIVE-YEAR PLAN 1953-57

The First Five-Year Plan aimed at raising basic industrial and agricultural production. The Government claim that most targets were fulfilled.

SECOND FIVE-YEAR PLAN 1958-62

This plan was prematurely terminated and for a number of years, there were only annual, if any, plans in existence.

THIRD FIVE-YEAR PLAN 1966-70

The Third Plan, delayed by economic and political difficulties, was put into operation in January 1966. No details have been issued.

FOURTH FIVE-YEAR PLAN 1971-75

It was announced that a Fourth Five-Year Plan started in January 1971. No details have yet been issued but a few output data were released at the end of 1971.

FIFTH FIVE-YEAR PLAN 1976-80

No details were available in mid-1977. Agriculture continues to rank high in economic priorities. The exploitation of China's petroleum resources is rapidly changing the country's fuel and power basis and its industrial economy.

A Twenty-Five Year Plan was proposed for 1976-2000.

THE CONSTITUTION

The 1954 Constitution of the People's Republic of China was revised by the Tenth National Congress of the Communist Party of China, and a new constitution was adopted by the Fourth National People's Congress on January 17th, 1975. The 106 articles of the 1954 Constitution were reduced to 30, and a number of significant changes in the theory and structure of government were made. The provisions of the 1975 Constitution are as follows:

Preamble

(Summary)

Socialist society extends over a fairly long historical period. Throughout this period classes, class contradictions and class struggle exist, as well as the struggle between the socialist and capitalist roads, the danger of a restoration of capitalism and the threat of subversion and aggression by imperialism and social-imperialism. China will never be a super-power. We must strengthen our unity with the socialist countries and with all oppressed peoples and nations, and work for peaceful co-existence with countries having different social systems.

Chapter 1. General Principles

Article 1—The People's Republic of China is a socialist state of the dictatorship of the proletariat led by the working class and based on the alliance of workers and peasants.

Article 2: Communist Party—The Communist Party of China is the core of leadership of the whole Chinese people. The working class exercises leadership over the state through its vanguard, the Communist Party of China.

Marxism-Leninism-Mao Tse-tung thought is the theoretical basis guiding the thinking of our nation.

Article 3: People's Congresses—All power in the People's Republic of China belongs to the people. The organs through which the people exercise power are the people's congresses at all levels, with deputies of workers, peasants and soldiers as their main body.

The people's congresses at all levels and all other organs of state practise democratic centralism.

Deputies to the people's congresses at all levels are elected through democratic consultation. The electoral units and electors have the power to supervise the deputies they elect and to replace them at any time according to provisions of law.

Article 4—The People's Republic of China is a unitary multi-national state. The areas where regional national autonomy is exercised are all inalienable parts of the People's Republic of China.

All the nationalities are equal. Great power chauvinism and local national chauvinism must be opposed.

All the nationalities have the freedom to use their own spoken and written languages.

Article 5—In the People's Republic of China, there are mainly two kinds of ownership of the means of production at the present stage: socialist ownership by the whole people and socialist collective ownership by working people.

The state may allow non-agricultural individual labourers to engage in individual labour involving no exploitation of others, within the limits permitted by law and under unified arrangement by neighbourhood organizations in cities and towns or by production teams in rural people's communes. At the same time, these individual

labourers should be guided on to the road of socialist collectivization step by step.

Article 6: The Economy—The state sector of the economy is the leading force in the national economy.

All mineral resources and waters as well as the forests, undeveloped land and other resources owned by the state are the property of the whole people.

The state may requisition by purchase, take over for use, or nationalize urban and rural land as well as other means of production under conditions prescribed by law.

Article 7—The rural people's commune is an organization which integrates government administration and economic management.

The economic system of collective ownership in the rural people's communes at the present stage generally takes the form of three-level ownership with the production team at the basic level, that is, ownership by the commune, the production brigade and the production team, with the last as the basic accounting unit.

Provided that the development and absolute predominance of the collective economy of the people's commune are ensured, people's commune members may farm small plots for their personal needs, engage in limited household sideline production, and in pastoral areas keep a small number of livestock for their personal needs.

Article 8—Socialist public property shall be inviolable. The state shall ensure the consolidation and development of the socialist economy and prohibit any person from undermining the socialist economy and the public interest in any way whatsoever.

Article 9—The state applies the socialist principle: "He who does not work, neither shall he eat" and "From each according to his ability, to each according to his work".

The state protects the citizens' right of ownership to their incomes from work, their savings, their houses, and other means of livelihood.

Article 10—The state applies the principle of taking hold of revolution, promoting production and other work and preparedness against war; promotes the planned and proportionate development of the socialist economy, taking agriculture as the foundation and industry as the leading factor and bringing the initiative of both the central and the local authorities into full play; and improve the people's material and cultural life step by step on the basis of the constant growth of social production and consolidates the independence and security of the country.

Article 11—State organizations and state personnel must earnestly study Marxism-Leninism-Mao Tse-tung thought, firmly put proletarian politics in command, combat bureaucracy, maintain close ties with the masses and whole-heartedly serve the people. Cadres at all levels must participate in collective productive labour.

Every organ of state must apply the principle of efficient and simple administration. Its leading body must be a three-in-one combination of the old, the middle-aged and the young.

Article 12—The proletariat must exercise all-round dictatorship over the bourgeoisie in public life, including all spheres of culture. Culture and education, literature and art, physical education, health work and scientific research work must all serve proletarian politics, serve the workers, peasants and soldiers, and be combined with productive labour.

Article 13—Speaking out freely, airing views fully, holding debates and writing big-character posters are new forms of carrying on socialist revolution created by the masses of the people. The state shall ensure to the masses the right to use these forms to create a political situation in which there are both centralism and democracy, both discipline and freedom, both unity of will and personal ease of mind and liveliness, and so help consolidate the leadership of the Communist Party of China over the state and consolidate the dictatorship of the proletariat.

Article 14—The state safeguards the socialist system, suppresses all treasonable and counter-revolutionary activities and punishes all traitors and counter-revolutionaries.

The state deprives the landlords, rich peasants, reactionary capitalists and other bad elements of political rights for specified periods of time according to law, and at the same time provides them with the opportunity to earn a living so that they may be reformed through labour and become law-abiding citizens supporting themselves by their own labour.

Article 15: Armed Forces—The Chinese People's Liberation Army and the people's militia are the workers' and peasants' own armed forces led by the Communist Party of China; they are the armed forces of the people of all nationalities.

The chairman of the Central Committee of the Communist Party of China commands the country's armed forces.

The Chinese People's Liberation Army is at all times a fighting force, and simultaneously a working force and a production force.

The task of the armed forces of the People's Republic of China is to safeguard the achievements of the socialist revolution and socialist construction, to defend the sovereignty, territorial integrity and security of the state, and to guard against subversion and aggression by imperialism, social-imperialism and their lackeys.

Chapter 2. The Structure of the State

SECTION I. THE NATIONAL PEOPLE'S CONGRESS

Article 16—The National People's Congress is the highest organ of state power under the leadership of the Communist Party of China.

The National People's Congress is composed of deputies elected by the provinces, autonomous regions, municipalities directly under the central government, and the People's Liberation Army. When necessary, a certain number of patriotic personages may be specially invited to take part as deputies.

The National People's Congress is elected for a term of five years. Its term of office may be extended under special circumstances.

The National People's Congress holds one session each year. When necessary, the session may be advanced or postponed.

Article 17: Functions—The functions and powers of the National People's Congress are: to amend the constitution, make laws, appoint and remove the premier of the State Council and the members of the State Council on the proposal of the Central Committee of the Communist Party of China, approve the national economic plan, the state budget and the final state accounts, and exercise such other functions and powers as the National People's Congress deems necessary.

Article 18: Standing Committee—The Standing Committee of the National People's Congress is the permanent

organ of the National People's Congress. Its functions and powers are: to convene the sessions of the National People's Congress, interpret laws, enact decrees, dispatch and recall plenipotentiary representatives abroad, receive foreign diplomatic envoys, ratify and denounce treaties concluded with foreign states, and exercise such other functions and powers as are vested in it by the National People's Congress.

The Standing Committee of the National People's Congress is composed of the chairman, the vice-chairman and other members, all of whom are elected and subject to recall by the National People's Congress.

SECTION II. THE STATE COUNCIL

Article 19—The State Council is the central people's government. The State Council is responsible and accountable to the National People's Congress and its Standing Committee.

The State Council is composed of the premier, the vice-premiers, the ministers, and the ministers heading commissions.

Article 20: Functions—The functions and powers of the State Council are: to formulate administrative measures and issue decisions and orders in accordance with the Constitution, laws and decrees; exercise unified leadership over the work of ministries and commissions and local organs of state at various levels throughout the country; draft and implement the national economic plan and the state budget; direct state administrative affairs; and exercise such other functions and powers as are vested in it by the National People's Congress or its Standing Committee.

SECTION III. THE LOCAL PEOPLE'S CONGRESSES AND THE LOCAL REVOLUTIONARY COMMITTEES AT VARIOUS LEVELS

Article 21: Local People's Congresses—The local people's congresses at various levels are the local organs of state power.

The people's congresses of provinces and municipalities directly under the central government are elected for a term of five years. The people's congresses of prefectures, cities and counties are elected for a term of three years. The people's congresses of rural people's communes and towns are elected for a term of two years.

Article 22: Local Revolutionary Committees—The local revolutionary committees at various levels are the permanent organs of the local people's congresses and at the same time the local people's governments at various levels.

Local revolutionary committees are composed of a chairman, vice-chairmen and other members, who are elected and subject to recall by the people's congress at the corresponding level. Their election or recall shall be submitted for examination and approval to the organ of state at the next higher level.

Local revolutionary committees are responsible and accountable to the people's congress at the corresponding level and to the organ of state at the next higher level.

Article 23: Functions—The local people's congresses at various levels and the local revolutionary committees elected by them ensure the execution of laws and decrees in their respective areas; lead the socialist revolution and socialist construction in their respective areas; examine and approve local economic plans, budgets and final accounts; maintain revolutionary order; and safeguard the rights of citizens.

THE PEOPLE'S REPUBLIC OF CHINA

SECTION IV. THE ORGANS OF SELF-GOVERNMENT OF NATIONAL AUTONOMOUS AREAS

Article 24—The autonomous regions, autonomous prefectures and autonomous counties are all national autonomous areas; their organs of self-government are people's congresses and revolutionary committees.

The organs of self-government of national autonomous areas, apart from exercising the functions and powers of local organs of state as specified in Chapter 2, Section III of the Constitution, may exercise autonomy within the limits of their authority as prescribed by law.

The higher organs of state fully safeguard the exercise of autonomy by the organs of self-government of national autonomous areas and actively support the minority nationalities in carrying out the socialist revolution and socialist construction.

SECTION V. THE JUDICIAL ORGANS AND THE PROCURATORIAL ORGANS

Article 25—The Supreme People's Court, local people's courts at various levels and special people's courts exercise judicial authority. The people's courts are responsible and accountable to the people's congresses and their permanent organs at the corresponding levels. The presidents of the people's courts are appointed and subject to removal by the permanent organs of the people's congresses at the corresponding levels.

The functions and powers of procuratorial organs are exercised by the organs of public security at various levels.

The mass line must be applied in procuratorial work and in trying cases. In major counter-revolutionary criminal cases the masses should be mobilized for discussion and criticism.

Chapter 3. The Fundamental Rights and Duties of Citizens

Article 26—The fundamental rights and duties of citizens are to support the leadership of the Communist Party of China, support the socialist system and abide by the Constitution and the laws of the People's Republic of China.

It is the exalted duty of every citizen to defend the motherland and resist aggression. It is the honourable

The Constitution, The Government

obligation of citizens to perform military service according to law.

Article 27—All citizens who have reached the age of eighteen have the right to vote and stand for election, with the exception of persons deprived of these rights by law.

Citizens have the right to work and the right to education. Working people have the right to rest and the right to material assistance in old age and in case of illness or disability.

Citizens have the right to lodge to organs of state at any level written or oral complaints of transgression of law or neglect of duty on the part of any person working in an organ of state. No one shall attempt to hinder or obstruct the making of such complaints or retaliate.

Women enjoy equal rights with men in all respects.

The state protects marriage, the family, and the mother and child.

The state protects the just rights and interests of Overseas Chinese.

Article 28—Citizens enjoy freedom of speech, correspondence, the press, assembly, association, procession, demonstration and the freedom to strike, and enjoy freedom to believe in religion and freedom not to believe in religion and to propagate atheism.

The citizens' freedom of person and their homes shall be inviolable. No citizen may be arrested except by decision of a people's court or with the sanction of a public security organ.

Article 29—The People's Republic of China grants the right of residence to any foreign national persecuted for supporting a just cause, for taking part in revolutionary movements or for engaging in scientific activities.

Chapter 4. The National Flag, the National Emblem and the Capital

Article 30—The national flag has five stars on a field of red.

The national emblem: Tien An Men in the centre, illuminated by five stars and encircled by ears of grain and a cogwheel.

The capital is Peking.

THE GOVERNMENT

HEAD OF STATE

The functions of Head of State are exercised by the Standing Committee of the National People's Congress.

JUDICIAL SYSTEM

The general principles of the Chinese judicial system are laid down in Article 25 of the January 1975 constitution.

PEOPLE'S COURTS

Supreme People's Court: Peking; f. 1949; the highest judicial organ of the State. Directs and supervises work of lower courts.

President of the Supreme People's Court: CHIANG HUA; term of office four years.

Vice-Presidents: HO LAN-CHIEH, HSING YI-MIN, TSENG HAN-CHOU, WANG-TEH-MAO, CHANG CHIH-JANG, CH'EN CHI-HAN, WANG WEI-KANG, WU TE-FENG, T'AN KUAN-SAN.

Special People's Courts.

Local People's Courts.

PEOPLE'S PROCURATORATES

Supreme People's Procuratorate: Peking; acts for the National People's Congress in examining government departments, civil servants and citizens, to ensure observance of the law; prosecutes in criminal cases.

Chief Procurator: CHANG TING-CHENG elected by N.P.C. for four years.

Deputy Chief Procurators: HUANG HUO-HSING, CHANG SU.

Local People's Procuratorates: undertake the same duties at the local level. Ensure that the judicial activities of the people's courts, the execution of sentences in criminal cases, and the activities of departments in charge of reform through labour, conform to the law; institutes, or intervenes in, important civil cases which affect the interest of the State and the people.

RELIGION

The practice of religious belief is not encouraged, although in 1977 there were indications of a new religious tolerance. Below are listed the dominant religions which prevailed before 1949.

ANCESTOR WORSHIP

Ancestor worship is believed to have originated with the deification and worship of all important natural phenomena. The divine and human were not clearly defined; all the dead became gods and were worshipped by their descendants. The practice has no code or dogma and the ritual is limited to sacrifices made during festivals and on birth and death anniversaries.

CONFUCIANISM

Confucianism is a philosophy and a system of ethics, without ritual or priesthood. The respects accorded Confucius are not paid to a prophet or god, but to a great sage whose teachings promote peace and good order in society and whose philosophy encourages moral living. The teachings of Confucius were officially criticized at the Fourth National People's Congress in January 1975.

TAOISM

China Taoist Association: Peking; Chair. CH'EN YINGNING.

Taoism originated as a philosophy expounded by Lao Tse, born 604 B.C. The establishment of a religion was contrary to his doctrines, but seven centuries after his death his teachings were embodied into a ritual.

BUDDHISM

Chinese Buddhist Association: f. 1953; Pres. SHIROBJALTSO; Sec.-Gen. CHAO P'U-CH'U.

Buddhism was introduced in China from India in A.D. 61, and now bears little resemblance to the religion in its original form, a number of native Chinese legends, traditions, rites and deities having been added. The "secularization" of Buddhist monasteries has resulted in the evacuation of many, particularly in Tibet.

ISLAM

China Islamic Association: Peking; f. 1953; Chair. BURHAN SHAHIDI.

According to Muslim history, Islam was introduced into China in A.D. 651. Its number of adherents in China is estimated at about 10 million, chiefly among the Uighur and Hui people.

CHRISTIANITY

During the 19th century and the first half of the 20th large numbers of foreign Christian missionaries worked in China. The Chinese People's Republic has steadily discouraged all foreign influences in Chinese religious affairs.

Roman Catholic Church: Catholic Mission, Si-She-Ku, Peiping, Hopeh.

The railway network has been extended to all provinces and regions except Tibet, where construction is in progress, and totalled over 36,000 km. in 1965, in addition to special railways serving factories and mines. Some of the major routes are Peking-Canton, Tientsin-Shanghai, Manchouli-Vladivostok, Chiaocho-Chihcheng and Lanchow-Patao.

Note: An underground system for Peking is under construction which will run for 24 km. One route and 16 stations have been completed.

ROADS

There are about 500,000 km. of paved and unsurfaced roads of which 200,000 km. are national and provincial highways. Four major highways have recently been com-

pleted linking Lhasa with Szechwan, Sinkiang, Kokonor and Katmandu. Further construction of mountain roads is under way.

INLAND WATERWAYS

General Inland Navigation Bureau: Controls river and canal traffic. There are 160,000 km. of inland waterways in China, 48,000 of which are open to steam navigation. The main rivers are the Yellow, Yangtze and Pearl. The Yangtze is navigable by vessels of 10,000 tons as far as Wuhan, over 1,000 km. from the coast. Smaller vessels can continue to Chungking. Over one-third of internal freight traffic is carried by water.

SHIPPING

Ministry of Communications: Peking.

The greater part of China's shipping is handled in nine major ports: Dairen (Talien), Chinhuangtao, Hsinking,

CHINA (TAIWAN)

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Chinese province of Taiwan comprises the island of Taiwan (Formosa), the nearby Pescadores islets, and the islands of Quemoy and Matsu near the mainland. Taiwan itself lies 200 miles from the coast of south-eastern China. The average temperature is 23°C (73°F) and the average annual rainfall 101 inches. The official language is Mandarin Chinese. The predominant religion is Buddhism and there are Muslims, Catholics and Protestants. Confucianism has a large following. The national flag (proportions 3 by 2) is crimson, with a dark blue rectangular canton containing a white sun. The capital is Taipei.

Recent History

China's Kuomintang government, led by Gen. Chiang Kai-shek, was overthrown by the Communist revolution of 1949. Chiang and many of his supporters left the mainland and established themselves on Taiwan. In 1954 a mutual security pact was signed by which the U.S.A. pledged the protection of Taiwan and the Pescadores; in 1955 the offshore islands of Quemoy and Matsu were included in the protected area. The Taiwan régime, which still claims to be the legal government of all China, was recognized by only 23 countries in 1977, having lost its seat at the United Nations to the Government of the People's Republic of China in October 1971. Elections were held in December 1972 for the first time in 24 years, to increase popular representation in local affairs. In 1973 the Government rejected a Peking offer to hold secret talks on the reunification of China.

Following the death of Chiang Kai-shek in April 1975, his son, General Chiang Ching-kuo, was elected leader of the ruling Kuomintang. No remarkable change of policy has ensued; détente with mainland China still seems remote, and economic and political stability continues to be the main priority. The Kuomintang's eleventh party congress was held in November 1976.

Government

The Head of State is the President, who is elected for terms of six years by the National Assembly. There are five Yuans (governing bodies), the highest legislative organ being the Legislative Yuan, to which the Executive Yuan (the Council of Ministers) is responsible. In 1977 the Legislative Yuan had 411 life members and 52 elected members serving a three-year term. There are also Control, Judicial and Examination Yuans. The Legislative Yuan submits proposals to the National Assembly. Elections are by universal adult suffrage, but the great majority of Assembly seats are held by life members who formerly represented mainland constituencies. In 1977 the Assembly had 1,295 life members and 53 members elected for six years.

Economic Affairs

The economy is progressing towards self-sufficiency, and Taiwan has become one of the leading exporters in Asia. A large trade surplus in the years 1971-73 was transformed into a considerable deficit in 1974 as import costs rose.

However, a favourable balance of U.S. \$490 million was achieved in 1976. Trade is chiefly with the U.S.A., Japan and South-East Asia, the most important exports being clothing, television and radio sets, plastic articles, plywood and cotton fabrics. The production of electrical goods is the main industry. Mineral resources include coal, marble, oil and natural gas. In 1975 Gross National Product per capita was about U.S. \$890.

Defence

The armed forces totalled 460,000 men in 1977: army 320,000, air force 70,000, navy 35,000 with a marine corps of 35,000. Military service lasts for two years. Much of the equipment and some training staff are provided by the U.S.A.

Defence expenditure for 1976/77 was estimated at NT\$48,000 million.

Transport and Communications

There are over 3,700 km. of railway and over 17,000 km. of roads. The ports of Keelung, Hualien, Kaohsiung and Taichung handled nearly 60 million metric tons of cargo in 1976. There are international airports at Taipei and Kaohsiung.

Social Welfare

The Labour Security Programme covers over 1.7 million workers and provides benefits for injury, disability, birth, death and old age. In October 1977, 370,000 government employees were covered by a separate scheme.

Education

Pre-school education is optional, though attendance at kindergartens is showing a marked increase. Primary and junior high school education is free and compulsory between the ages of six and fifteen. Secondary schools consist of junior and senior middle schools, normal schools for teacher-training and vocational schools. There are also a number of private schools. Higher education comprises universities, colleges, junior colleges and graduate schools. In 1976/77 there were over 2.3 million pupils enrolled in state primary schools and over 1.5 million in secondary schools. There are 11 universities and 16 independent colleges.

Tourism

Festivals, ancient art treasures and the island scenery are the principal attractions; 1,008,126 tourists visited Taiwan in 1976.

Visas are required by all visitors.

Sport

The most popular sports are basketball, baseball and swimming. About 20 national sports associations belong to the China National Amateur Athletic Federation.

Note: Multiple exchange rate systems were in operation from 1951 to August 1959. From March 1956 the certificate rate (used for foreign trade transactions) was U.S. \$1=NT\$24.78 (NT\$1=4.04 U.S. cents). In 1958 the rate became U.S. \$1=NT\$36.38 (NT\$1=2.75 U.S. cents). In August 1959 the currency was devalued and the exchange rate fluctuated close to U.S. \$1=NT\$40.00 (NT\$1=2.50 U.S. cents), which became the par value in September 1970. Foreign trade was valued at this rate from January 1961 and it became the official basic rate in June 1961, though from October 1963 a selling rate of U.S. \$1=NT\$40.10 came into force. These rates remained in effect until February 1973. Since February 1973 the exchange rate (par value) has been U.S. \$1=NT\$38.00 (NT\$1=2.63 U.S. cents). In terms of sterling, the exchange rate was £1=NT\$96.00 from November 1967 to August 1971; and £1=NT\$104.23 from December 1971 to June 1972.

THE CONSTITUTION

The form of government incorporated in the Constitution, adopted in December 1946, follows the five-power system envisaged by Dr. Sun Yat-sen, which has the major features of both cabinet and presidential government. The following are the chief organs of government:

National Assembly: Composed of elected delegates; meets to elect or recall the President and Vice-President, to amend the Constitution, or to vote on proposed Constitutional amendments submitted by the Legislative Yuan.

President: Elected by the National Assembly for a term of 6 years, and may be re-elected for a second term (the two-term restriction is at present suspended). Represents country at all state functions, including foreign relations; commands land, sea, and air forces, promulgates laws, issues mandates, concludes treaties, declares war, makes peace, declares martial law, grants amnesties, appoints and removes civil and military officers, and confers honours and decorations. He also convenes the National Assembly, and subject to certain limitations, may issue emergency orders to deal with national calamities and ensure national security.

Executive Yuan: Is the highest administrative organ of the nation and is responsible to the Legislative Yuan; has five categories of subordinate organization:

Executive Yuan Council
Ministries and Commissions
Secretariat
Government Information Office and Personnel Administration Bureau
Directorate-General of Budgets, Accounts and Statistics.

Legislative Yuan: Is the highest legislative organ of the state, composed of elected members; holds two sessions per year; is empowered to hear administrative reports of the Executive Yuan, and to change Government policy.

Judicial Yuan: Is the highest judicial organ of state and has charge of civil, criminal, and administrative cases, and of cases concerning disciplinary measures against public functionaries (*see* Judicial System).

Examination Yuan: Supervises examinations for entry into public offices, and deals with personal questions of the civil service.

Control Yuan: Is a body elected by local councils to impeach or investigate the work of the Executive Yuan and the Ministries and Executives; meets once a month, and has a subordinate body, the Ministry of Audit.

COLOMBIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Colombia lies in the north-west of South America with the Caribbean Sea to the north and the Pacific to the west. Its continental neighbours are Venezuela, Brazil, Peru and Ecuador, while Panama connects it with Central America. The coastal areas have a tropical rain forest climate, the plateaux are temperate and in the Andes there are areas of permanent snow. The language is Spanish. Ninety-five per cent of the population adhere to Roman Catholicism. There are small Protestant and Jewish minorities. The national flag (proportions 3 by 2) has horizontal stripes of yellow (half the depth), dark blue and red. The capital is Bogotá.

Recent History

Between 1948 and 1957, Colombia was torn by civil war between Conservative and Liberal factions which led to the dictatorship of Gen. Gustavo Rojas Pinilla (1953-57), who was overthrown by a military junta in May 1957. Democratic government was re-established in 1958 with an agreement to form a National Front, by which the two principal parties, Liberal and Conservative, would alternate in power for four-year periods. In 1966 Dr. Carlos Lleras Restrepo was elected Liberal President for a four-year term. Despite much political unrest and continuing guerrilla warfare, Dr. Lleras was able to bring about economic recovery after the crisis left by Gen. Rojas. Presidential elections were held in April 1970 and Dr. Misael Pastrana Borrero of the Conservative Party was elected by a very small majority over Gen. Rojas. The presidential elections of April 1974 were won by the Liberal Party, and their candidate, Dr. Alfonso López Michelsen, took office in August 1974. He promised wide-ranging reforms and a more equitable distribution of income. After one year of government his failure to carry out these policies led to strikes, rioting and increased violent guerrilla activity. A state of siege was announced in June 1975 with political meetings banned and the right to *habeas corpus* rescinded. Throughout 1976 there was serious civil unrest and intensified guerrilla activity. The state of siege was lifted in June but reimposed in October during a nation-wide strike by medical workers. In the April municipal elections the Government coalition received 77 per cent of the votes but only 20 per cent of the electorate voted despite a presidential call for support for the Government against the left.

In September 1977 the four major trade unions called a 24-hour general strike to protest against government policies and the high rate of inflation, and to demand a 50 per cent wage rise. The strike led to the worst violence since the civil war. Severe criticism of the Government followed, leading to ministerial resignations and a subsequent Cabinet reshuffle. Presidential elections scheduled for June 1978 were to be the first since 1958 not to be covered by the National Front agreement. The campaign became increasingly acrimonious in late 1977 and major campaign issues included the state of the economy, corruption, immorality and guerrilla activity. A 50-member constituent assembly was also due to be elected in June.

Government

Executive power is exercised by the President (assisted by a Cabinet) who is elected for a four-year term by universal adult suffrage.

Legislation is carried out by Congress, consisting of the Senate (112 members elected for four years) and the House of Representatives (199 members elected for four years). The country is divided into 22 Departments, five Intendencias and four Commissaries.

Defence

At the age of 18 every male (with the exception of students) must present himself as a candidate for two years' military service. In 1977 the strength of the army was 42,000, the navy 8,000 and the air force 6,500. The para-military police force numbers about 5,000 men. Defence expenditure for 1977 was 5,120 million pesos.

Economic Affairs

The economy depends principally on coffee, of which Colombia is the world's second largest producer and which accounted for 56 per cent of export earnings in 1976. In 1976 6.3 million bags (60 kg. each) were exported and foreign exchange earnings increased over 1975 by 45 per cent to U.S. \$918 million. Other major cash crops are sugar and cotton and there have been considerable gains in the value of tobacco, bananas and cut-flower exports. The principal food crops are rice, sorghum, maize, wheat and barley. In 1976 agricultural production rose by only 2.1 per cent, compared with 4 per cent in 1975, due to unfavourable weather conditions. The Government is giving priority to increasing agricultural production but up to 1978 little progress had been made in agrarian reform.

Industrial growth slowed in the mid-1970s and the world recession affected textile exports which are the country's second major currency earner. However, industrial production rose by 9 per cent in 1976, compared with 2.7 per cent in 1975, due to increased domestic demand for consumer goods. Although Colombia was a net exporter of crude petroleum in 1970, exports were banned in 1974 because of increased domestic consumption and lower production. By 1976 production was only 53.4 million barrels, 6.8 per cent down on 1975, and 9.4 million barrels were imported, over 7 million barrels more than in 1975. There are proven reserves of 3,500 million cubic feet of natural gas and 12,000 million tons of coal and priority is being given to their development. The exploitation of the Cerromatoso nickel resources is to begin in 1979; reserves are estimated at 70 million tons and annual output is planned at 850,000 tons. Colombia also accounts for 95 per cent of the world's emerald production and is a substantial producer of platinum and gold. The 380-km. gas pipeline on the Guajira peninsula was opened in 1977 with an initial daily capacity of 200 million cubic feet. When the fields are operating fully daily output will reach 900 million cubic feet, with 630 million taken by the Palomino liquefied-gas and petrochemical complex.

In recent years Colombia's economic development has been more favourable than in most Latin American countries. The rate of expansion in G.D.P. averaged 6.4 per cent between 1966 and 1976 and reached 7 per cent in 1976, compared with 4 per cent in 1975. The volume of exports doubled between 1971 and 1977. Through special export promotion measures, sales abroad of industrial products, such as textiles and chemicals, have risen rapidly. The massive earnings from coffee exports in 1976 helped bring about an overall balance of payments surplus of \$603 million, compared with only \$117 million in 1975. International reserves reached a record \$1,165 million but this caused a 35 per cent expansion in the money supply which in turn caused inflation to increase from 17.9 per cent in 1975 to 25.9 per cent in 1976 and over 30 per cent in 1977.

The Government's 1977-79 plan provides for investment of \$6,700 million, of which \$3,900 million is to be financed externally. Almost half the total is to be invested in the energy sector in an effort to develop alternative sources of energy. Other major investments are intended to improve the situation of the poor.

Colombia is a member of the Andean Group, LAFTA, the IDB, SELA and the OAS.

Transport and Communications

The high mountains make transport difficult. In 1976 there were 56,667 km. of roads and 3,088 km. of railways. There are plans to construct a new Jungle Edge highway to provide direct access to the interior. Much freight and cattle as well as passenger traffic is carried on the River Magdalena, which is navigable for 1,440 km. from Barranquilla on the Atlantic coast to Puerto Berrio. A new port at Urabá is due to be completed in 1978. Four national airlines provide internal and international services. There are international airports at Bogotá, Barranquilla, Medellín, Cali and the San Andrés islands.

Social Welfare

There is compulsory social security paid for by the Government, employers and employees, and administered by the Institute of Social Security. It provides benefits for disability, old age, death, sickness, maternity, industrial accidents and unemployment. Large firms must provide life insurance for their employees and there is a comprehensive system of pensions.

Education

Elementary education is free and compulsory for five years. No child may be admitted to secondary school

unless these five years have been successfully completed. Secondary education is for six years. In 1975 there were 142 institutions of higher education, of which 60 were classed as universities. Of these universities, 25 were public and 35 were private. There were also 82 technical institutes (18 public and 64 private). Adult illiteracy averaged 24 per cent in 1973.

Tourism

The main tourist attractions are the Caribbean coast, the Andes mountains of up to 6,000 metres, the extensive forests and jungles and pre-Columbian relics and monuments of Colonial art. In 1976 tourism was the third biggest foreign exchange earner. The majority of the 522,300 visitors in 1976 came from the U.S.A. and Venezuela.

Visas are not required to visit Colombia for up to 90 days by nationals of Argentina, Austria, Brazil, Costa Rica, EEC countries, El Salvador, Finland, Israel, Japan, Liechtenstein, Norway, Peru, Portugal, Spain, Sweden, Switzerland and Trinidad and Tobago.

Sport

The principal sports are football, cycling, baseball, basketball, boxing, swimming, riding and bullfighting. Tejo, a kind of discus-throwing game, is also popular.

Public Holidays

1978: May 1st (Labour Day), May 4th (Ascension), May 25th (Corpus Christi), June 29th (SS. THE CONSTITUTION

The Constitution now in force was promulgated in 1886 and has been amended from time to time. The country is governed by a President and a Congress consisting of two Chambers. All citizens over the age of 18 are eligible to vote. Civil rights and social guarantees include freedom of education, the right to strike (except in the public sector), public aid to those unable to support themselves, freedom of assembly, of the press, and the right to petition. All male citizens are required to present themselves for possible military service at the age of 18.

THE PRESIDENT

Executive power is vested in the President of the Republic, who is elected by popular suffrage for a four-year term of office.

The President is assisted in the government of the country by a Cabinet which he appoints. A substitute (*designado*) is elected by Congress, subject to bi-annual re-appointment, to act in the event of a Presidential vacancy. The President appoints the governors of the twenty-two departments, the five intendencias and the four commissaries.

CONGRESS

Legislative power is exercised by Congress, which is composed of the Senate and the House of Representatives. Members of both chambers are elected by direct suffrage for a period of four years.

The Presidents in each House are elected for sixty days.

JUDICIARY

The administration of justice is in the hands of the Supreme Court, superior district tribunals, and lower courts. The magistrates of the Supreme Court of Justice

are elected by Congress from lists presented by the President. The term of office is five years and the magistrates may be re-elected indefinitely.

NATIONAL ECONOMIC COUNCIL

Direction of the nation's finances is in the hands of the Controller-General, who is appointed for two years. A National Economic Council including five ministers and also representatives of banking, industrial and agricultural interests, has functioned since 1935.

LOCAL GOVERNMENT

For administrative purposes the country is divided into twenty-two departments, five intendencias and four commissaries. The twenty-two departments of the Republic are further divided into municipalities. Governors for the departments are appointed by the President, but regional legislatures are elected by the local inhabitants and enjoy *considerable autonomy, including the management of local finances*. Mayors for the municipalities are appointed by the governors.

Various constitutional reforms were promulgated in December 1968, including the following amendments: to increase the membership of the Senate from 106 to 112, and the Chamber of Representatives from 204 to 214; to increase from two to four years the term of office of representatives; to eliminate the two-thirds majority required for matters of importance; to enable the Government to legislate by decree for a maximum period of 90 days in any one year in the event of an economic crisis, though such decrees must relate only to the matters which caused the crisis; from 1970, proportional representation to be allowed in departmental and municipal elections; the same principle to apply to congressional elections after 1974.

JUDICIAL SYSTEM

The Supreme Court of Justice (Calle 11, No. 4-41, Bogotá), is divided into four subsidiary courts of Civil Cassation, Criminal Cassation, Labour Cassation and Constitutional Procedure. The twenty-four judges of the Supreme Court are elected for life although they may be removed from office if considered to be unfit by reason of conduct or age. Vacancies are filled from within the Court by election by the members. For matters of great importance and government business, the three courts of the Supreme Court sit together as a Plenary Court.

The country is divided into judicial districts, each of which has a superior court of three or more judges. There are also other Courts of Justice for each judicial district, and judges for each province and municipality.

THE COMOROS*

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Comoro Islands lie between the East African coast and Madagascar and comprise four small islands (Grande-Comore, Mayotte, Anjouan and Mohéli) and numerous islets and coral reefs. The climate is tropical, with considerable variations in rainfall and temperature from island to island. The official language is French but the majority of the population speak Comoran, a blend of Swahili and Arabic. The Muslim religion predominates. The flag comprises two horizontal bands, an upper red band (two-thirds of the depth) bearing a white crescent moon and four five-pointed white stars in the hoist, and a lower green band. The capital is Moroni, on Grande-Comore.

Recent History

Formerly attached to Madagascar, the Comoros became a separate French Overseas Territory in 1947. The islands achieved internal self-government in December 1961, with a Chamber of Deputies and a Government Council to control local administration.

Elections held in December 1972 produced a large majority for parties advocating independence and Ahmed Abdallah became President of the Government Council. In June 1973 he was restyled President of the Government and it was agreed with France that the Comoros should become independent within five years, after a referendum. When the referendum took place, in December 1974, there was a 96 per cent vote in favour of independence, despite the opposition of the Mayotte Party, seeking the status of a French Department for the island of Mayotte.

On July 6th, 1975, after France decided that any constitutional settlement must be ratified by all the islands voting separately, the Chamber of Deputies voted for immediate independence. The Chamber elected Abdallah to be first President of the Comoros and constituted itself as the National Assembly. France made no attempt to intervene but maintained control of Mayotte. President Abdallah was deposed in August and the Assembly was abolished. A National Executive Council was established, with Prince Said Mohammed Jaffar, leader of the opposition *Front National Uni*, as its head and Ali Soilih, leader of the coup, among its members. In November the Comoros was admitted to the UN as a unified state comprising the whole archipelago but France continued to support Mayotte. In February 1976 Mayotte voted overwhelmingly to retain its links with France.

As relations with France deteriorated, all bureaucratic and technical staff were withdrawn and all development aid cut off. During 1976, Ali Soilih, elected Head of State in January to replace Prince Said, announced the discovery in Anjouan of a series of plots to overthrow him. All political activity was suspended.

In early 1977 the major immediate problem facing the

Government was that of the presence of 16,000 refugees from communal violence in Madagascar.

In February 1977 the National People's Council was inaugurated and, in April, Soilih announced that most of the ministries would be abolished and replaced by a decentralized administration in which the prefectures would be put under its authority. Extensive redistribution of land began and the voting age was lowered to 14. The civil service was dismantled and its functions taken over by secondary school pupils. In November a referendum approved the continued presidency of Soilih by 55 per cent.

Government

The Comoros are ruled by a President and a Vice-President, assisted by a Council of Ministers headed by a Prime Minister. Government is through socialist rural institutions encompassing not more than five villages.

Economic Affairs

The economy of the Comoros is in a disastrous condition. The population work almost entirely at primitive agriculture yet most of the islands' food is imported. The dominant sector, that of the colonial plantations, is geared exclusively to the cultivation of ylang-ylang, vanilla and copra for export to a world market in recession, and earnings are quite inadequate to cover the cost of imports. Subsistence farming may be improved by the plan, announced in April 1977, to give every citizen a parcel of land which he would be legally bound to farm, but the soil is over-exploited, ill-suited to arable or pasture and, in places, severely eroded.

Until 1975 French aid kept the economy afloat but made no effort to develop the bases for an independent economy, such as an adequate transport system, capital investment or equipment. In July 1975 France cut off all aid, leaving the islands virtually bankrupt. In 1976 the budget deficit was 6,000 million francs CFA. In April 1977 a volcanic eruption added 20,000 homeless to the 16,000 refugees from Madagascar. During 1976-77 financial aid was obtained from Muslim states and international aid agencies. This, however, will only alleviate some of the extreme consequences of French withdrawal while leaving unaltered the basic problems of underdevelopment: overpopulation (the annual rate of increase is 2.5 per cent), severe unemployment (there are only 14,000 paid jobs), poor harvests, landlessness, lack of natural resources and the absence of an educated class.

Transport and Communications

Transport facilities are very limited, even between the islands themselves and most inland traffic is carried on by sailing boats. There are air and sea links with the outside world via Madagascar and East Africa.

* Most of the information contained in this chapter refers to the whole Comoros Archipelago, which the independent Comoran state claims as its national territory. However, the island of Mayotte is, in fact, administered by France. Separate information on Mayotte may be found in the chapter on French Overseas Possessions (p. 380).

THE COMOROS

Introductory Survey, Statistical Survey

Social Welfare

In 1975 there were three hospitals and a number of general welfare centres and maternity units. Since France withdrew all medical staff, Canada has provided substitutes.

Education

Under French rule teaching facilities were grossly inadequate, only 23 per cent of children receiving any formal education. In late 1975 secondary education ceased after the withdrawal of all French teaching staff, but some schools were reopened with the aid of teachers from other French-speaking countries. According to a UNICEF study there are enough Comoran teachers to provide basic education for all children through traditional Koranic schools.

Tourism

There is a developing tourist industry. The chief attractions are the beaches, underwater fishing and mountain trips.

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 centimes=1 franc de la Communauté financière africaine (CFA).

Exchange rates (December 1977):

1 franc CFA=2 French centimes;

£1 sterling=442.2 francs CFA;

STATISTICAL SURVEY

Area: 2,236 sq. km. (863 sq. miles). **Population** (1976 UN estimate): 314,000; Moroni (capital, 1973 estimate) 15,900; approximate population by islands (1973 estimates): Grande-Comore 135,000, Anjouan 105,000, Mayotte 38,000, Mohéli 12,000.

In 1973, 8,700 births and 5,284 deaths were registered. The average annual birth and death rates between 1970 and 1975 were estimated by the UN to be 46.6 and 21.7 respectively per 1,000 inhabitants.

THE CONGO

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The People's Republic of the Congo runs north from the Atlantic to Cameroon and the Central African Empire. To the east is Zaire. Gabon lies to the west. The climate is tropical with temperatures averaging 21°-27°C (70°-80°F) throughout the year with an annual rainfall of about 120 cm. The official language is French. Just over half the people follow traditional beliefs, with Roman Catholic, Protestant and Muslim minorities. The national flag is plain red with the state emblem (two green palms enclosing a crossed hammer and hoe, surmounted by a gold star) in the upper left. The capital is Brazzaville.

Recent History

Formerly part of French Equatorial Africa, the Republic of the Congo became autonomous within the French Community in 1958 and fully independent in August 1960. The country's first President, the Abbé Fulbert Youlou, was deposed in 1963, and replaced by Alphonse Massamba-Débat. Political unrest culminated in the intervention of the army in 1968; the National Assembly was replaced by the National Council of the Revolution, and in January 1969 Major Marien Ngouabi, chairman of the Council of the Revolution, took power as President.

Ngouabi set up a regime which proclaimed itself Marxist but maintained close economic ties with France. The name of the country was changed to the People's Republic of the Congo, and it was governed through a single political party, the *Parti congolais du travail* (PCT). Politically the regime was threatened by left-wing protests and attempted coups, and there were serious ethnic jealousies as Ngouabi tried to balance tribal loyalties in his appointments. Following the successful crushing of a left-wing rebellion in 1973, Ngouabi introduced a new Constitution and a National Assembly with delegates elected from a single party list. However, Ngouabi felt increasingly insecure as the economy deteriorated. In January 1976 he dismissed the Political Bureau of the PCT, replacing it by a Special Revolutionary General Staff.

In March 1977 Ngouabi was assassinated. Ex-President Massamba-Débat was charged with organizing the attempted coup and later executed. The Archbishop of Brazzaville, Cardinal Emile Biayenda, who was thought to have known the identities of those involved in the coup, was also assassinated. The Government was taken over by an 11-man Military Committee of the PCT, and in April 1977 Col. Joachim Yhombi-Opango, a former Chief of Staff, was named as the new Head of State.

Opango's emergence was seen abroad as a victory for the moderates and relations with the U.S.A. and France improved. Opango signed a co-operation agreement with France in April. He abrogated the Constitution in April and suspended the National Assembly. In 1977 relations with other African states deteriorated as increasing numbers of foreigners living in the Congo were repatriated.

Government

There is only one political party, the *Parti congolais du travail* (PCT).

The Constitution and the National Assembly, were established in 1973 after a referendum, were abrogated in April 1977 after the assassination of President Ngouabi. The country is governed by a Council of Ministers, appointed by the Military Committee of the PCT.

Defence

The army numbered 6,500 in 1977. The navy numbered 200 in 1977 and the air force 300. There are 3,900 men in para-military forces.

Economic Affairs

The most important economic activity is forestry. The major cash crops are sugar, palm oil, cocoa and tobacco, the processing of which is the basis of industry. Cement, flour and textiles are also produced. The Congo has large reserves of potash, and offshore petroleum deposits formed the basis for considerable prospecting by foreign oil companies. A refinery was built at Pointe-Noire and by 1976 there were two commercial fields on stream. However, the geology of the area proved unexpectedly complex and production declined noticeably in 1975 and 1976. Production from a new field started up in 1977. The shortfall from oil revenues for 1976 was 19.1 million SDRs, placing the economy under considerable strain and making the country even more dependent on foreign loans and grants. In 1977 there was disastrous flooding in the potassium mine at Holle-St. Paul, and in September the joint French and Congo-owned potassium mining company and a transport firm were closed down.

The government's commitment to "scientific socialism" accords uneasily with the actual dependence of the country on foreign aid and private investment. The nationalized sector is inefficient but the threat of further state control discourages investors.

Before 1974 the Congo had a large trade deficit. An overstuffed administration puts a strain on the budget, necessitating high taxation. The close economic links with France still work largely to the advantage of France.

In January 1977 the U.S.A. withdrew tariff concessions in retaliation for non-payment of compensation for the nationalization of U.S.-owned oil companies. Unemployment increased markedly, and restrictions were increasingly placed on foreigners trading in the Congo. Several thousand foreigners were repatriated during 1977, and in October it was announced that no further trading licences would be issued to foreigners.

The Congo is a member of the OAU and UDEAC, and is a signatory to the Lomé Convention.

Transport and Communications

The River Congo and its tributary the Oubangui are the principal means of transport and Brazzaville is an important port on the River Congo. The rivers and the railway line, from Pointe-Noire on the Atlantic to Brazzaville with a branch to the manganese mines at Mouanda in Gabon, are important links between Chad, the Central

African Empire and the coast. Roads are few, with 11,000 km. usable throughout the year. The Government plans to improve the poor communications system, which inhibits economic development. The Congo has its own internal air service and the Government has a share in Air Afrique.

Social Welfare

In January 1963 a pension scheme was started by the National Social Security Board, which is also responsible for family allowances and workmen's compensation schemes. The Government also runs hospitals and health centres. In 1973 there were 6,000 infirmary and hospital beds and 162 doctors.

Education

There are not enough primary schools but there is a relatively high literacy rate—education is compulsory from 6 to 16. In 1965 all private schools were taken over by the State. A number of students go to France for technical instruction. The Marien Ngouabi University at Brazzaville was founded in 1971 and in 1976 there were 230 teachers and 4,336 students.

Tourism

There are no special facilities for tourism. All tourists, with the exception of representatives of UDEAC or nationals of Chad and Zaïre, must deposit their return fares at a bank or tourist office.

Visas: Citizens of all states, with the exception of France, require visas to visit the Congo.

Sport

Football, volleyball, basketball and athletics are the principal sports.

Public Holidays

1978: May 1st (Labour Day), August 15th (Independence Day), December 25th (Christmas).

1979: January 1st (New Year's Day), April 13th–16th (Easter).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 centimes = 1 franc de la Communauté financière africaine (CFA).

Exchange rates (December 1977):

1 franc CFA = 2 French centimes;

£1 sterling = 442.2 francs CFA;

U.S. \$1 = 241.4 francs CFA.

COSTA RICA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Costa Rica lies in the Central American isthmus with Nicaragua to the north, Panama to the south, the Caribbean to the east and the Pacific to the west. The climate is warm and damp in the lowlands—average temperature 27°C (81°F)—and cooler on the Central Plateau—average temperature 22°C (72°F)—where two-thirds of the population live. The language is Spanish. The state religion is Roman Catholicism. The national flag (proportions 3 by 2) consists of horizontal bands of blue, white, red, white and blue, the red band being twice the width of the others. The state flag, in addition, has on the red stripe (to the left of centre) a white disc enclosing the national coat of arms. The capital is San José.

Recent History

After 1948, the predominant figure in Costa Rican politics was José Figueres Ferrer. Leader of the socialist Partido de Liberación Nacional (PLN), which seized power in 1948, he was President three times (1948–49, 1953–58 and 1970–74). Under him, Costa Rica became one of the most democratic countries in Latin America. In 1948 the armed forces were abolished and banks were nationalized, and since then great social improvements have been made.

The presidential election in February 1974 resulted in victory for Daniel Oduber Quirós, the candidate of the PLN, who took office in May. He outlined his Government's policy as including the improvement of the wages and living standards of the underprivileged, the creation of new jobs to fight unemployment, and the eradication of the discrepancies of regional development. President Oduber also re-affirmed the Government's intention to continue with the establishment of friendly relations with the socialist states, a policy initiated under President Figueres. Communist and other left-wing parties were legalized in 1975. In 1976 there was a major political crisis over the issue of presidential re-election. The crisis was exacerbated by an electricity workers' strike and the discovery of an alleged plot aiming to overthrow the President. Civil unrest led to many arrests. In the February 1978 elections the Partido Unidad received 341,580 votes and the PLN received 306,120 votes. The Partido Unidad candidate, Rodrigo Carazo Odio, was elected President and was to take office in May.

Government

Under the Constitution of 1949 executive power is vested in the President assisted by two Vice-Presidents and a Cabinet. The President is elected for a four-year term and must receive 40 per cent of the votes. The legislative organ is the unicameral Legislative Assembly of 57 members elected for four years. Parliamentary and presidential elections are held by compulsory adult suffrage.

Defence

There have been no armed forces since 1948. Paramilitary forces number about 5,000 men.

Economic Affairs

The economy depends mainly on agriculture, with coffee

and bananas being the major exports. Owing to a diversification programme, livestock and meat, sugar, cocoa and fertilizers have become increasingly important. In 1976 a 137 million colones development plan was launched to encourage the recultivation of cocoa and the development of new products such as tobacco, groundnuts and maize, and cattle-raising. Some U.S. \$19 million is to be invested in a fisheries development programme for the Pacific coast. There are limestone deposits, and a cement plant with a capacity of 600,000 tons a year is to be built at Colorado de Abangares. The Government hopes to develop the estimated 150 million tons of bauxite discovered in the Boruca region. Due to government incentives in recent years, manufactured goods totalled 40 per cent of exports in 1976, the main products being textiles, chemicals and leather goods. Hydro-electric power is being developed in the highlands. The 135 MW Arenal plant is due for completion in 1978 and two other plants at Santa Rosa and Angostura will begin production in 1982 and 1985.

In 1974 Costa Rica suffered from high world oil prices and the general world recession. Prices rose and real income dropped in 1974 and stagnated in 1975. However, the Governments' strict monetary policies brought the inflation rate down from 20.5 per cent in 1975 to 4.3 per cent in 1976. Real wages rose again and unemployment fell from 7.3 per cent in 1973 to 5.2 per cent in March 1977. These deflationary measures reduced the growth rate to 2.1 per cent in 1975 but, with the coffee boom and increased industrial output, the economy grew by 4.3 per cent in 1976 and is projected to rise by an average 6.4 per cent annually until 1982. Although foreign exchange reserves reached a record \$206.6 million in June 1977, due to increased export earnings and the inflow of direct foreign investment, the current account remained in deficit as imports continued to rise.

Costa Rica is a member of the Union of Banana Exporting Countries, the OAS, ODECA, the Central American Common Market and SELA.

Transport and Communications

Excluding 665 km. of the Pan-American Highway, there were 24,674 km. of roads in 1976. Three railway companies operate 1,389 km. of track. The main ports handling external trade are Limón on the Caribbean coast and Puntarenas and Golfito on the Pacific coast, and there are local shipping services to Panama. The main towns are connected by internal air services and international air transport is provided by the national airline Líneas Aéreas Costarricenses and ten foreign companies.

Social Welfare

A Labour Code provides benefits for employees and there are insurance schemes covering sickness, old age and death. Under a law established in 1971, all salaried workers began paying social security contributions. There is no centralized health service, but there are various independent organizations, some of them state-subsidized, governing hospitals, clinics and all medical services.

Education

All education is free and elementary education is compulsory between the ages of 6 and 13. Official secondary education is free and consists of a three-year basic course followed by a more highly specialized course of two years. At 90 per cent, Costa Rica has the highest literacy rate in Central America. Attendance figures are very high: 97 per cent of children between the ages of 6 and 13 years attend school. There are two universities, at San José and Heredia.

Tourism

The main tourist features are the Irazú and Poas volcanoes, the Orosi waterfalls and relics of Spanish colonial civilization. Tourists also visit San José, the capital, and the Pacific beaches of Puntarenas. A tourist complex is to be built in the Santa Ana valley. In 1975 296,762 tourists visited Costa Rica.

Visas are required by all visitors.

Sport

Football is the national sport and basketball, boxing, baseball, golf, tennis, fishing and swimming are also popular.

Public Holidays

1978: May 1st (Labour Day), May 25th (Corpus Christi), June 29th (SS. Peter and Paul), July 25th (Anniversary of the Annexation of Guanacaste Province), August 2nd (Our Lady of the Angels), August 15th (Assumption), September 15th (Independence Day), October 12th (Columbus Day), December 8th (Immaculate Conception), December 25th (Christmas Day), December 28th-31st (Bank Holidays in San José).

1979: January 1st (New Year's Day), March 19th (Feast of St. Joseph), April 11th (Anniversary of the Battle of Rivas), April 12th (Maundy Thursday), April 13th (Good Friday).

Exchange rates (December 1977): £1 sterling=15.70 colones; U.S. \$1=8.57 colones.

100 Costa Rican colones=£6.37=\$11.67.

Note: Prior to September 1961 the par value of the colón was based on an exchange rate of U.S. \$1=5.60 colones. This rate was used for calculating the value of foreign trade transactions. The official buying rate corresponded to the par value and the official selling rate from 1951 was \$1=5.67 colones. At the same time there was a free market for currency in which the selling rate from 1952 was \$1=6.65 colones. In September 1961 the free market ended and a new par value was fixed at the rate of \$1=6.625 colones, which also became the trading rate. The official buying rate was \$1=6.62 colones and the official selling rate \$1=6.65 colones (i.e. the same as the old free market rate). The free market was reintroduced in 1967 and by the end of 1971 the free selling rate was \$1=8.60 colones. In April 1974 a new par value was fixed at \$1=8.57 colones. The Central American peso, used for transactions within the Central American Common Market, is at par with the U.S. dollar.

THE CONSTITUTION

The present Constitution of Costa Rica was promulgated in November 1949. A committee of lawyers was set up in mid-1967 to study the possibility of reforming the Constitution.

GOVERNMENT

The government is unitary: provincial and local bodies derive their authority from the national government. The country is divided into seven provinces administered by a governor who is appointed by the President. The provinces are divided into cantons, and each canton into districts. There is an elected municipal council in the chief city of each canton, the number of its members being related to the population of the canton. The municipal council supervises the affairs of the canton. Municipal government is closely regulated by national law, particularly in matters of finance.

LEGISLATURE

The government consists of three branches: legislative, executive and judicial. Legislative power is vested in a single chamber, the Legislative Assembly, which meets in regular session twice a year—from May 1st to July 31st, and from September 1st to November 30th. Special sessions may be convoked by the President to consider specified business. The Assembly is composed of 57 deputies elected for four years. The chief powers of the Assembly are to enact laws, levy taxes, authorize declarations of war and, by a two-thirds vote, suspend, in cases of civil disorder, certain civil liberties guaranteed in the Constitution.

Bills may be initiated by the Assembly or by the Executive and must have three readings, in at least two different legislative periods, before they become law. The Assembly may override the presidential vote by a two-thirds vote.

EXECUTIVE

The executive branch is headed by the President, who is assisted by his Cabinet. The President may not serve two successive periods of office, but may be re-elected after eight years. If he should resign or be incapacitated, the executive power is entrusted to the First Vice-President, and from him to the Second Vice-President, and finally to the President of the Legislative Assembly.

The President sees that the laws and the provisions of the Constitution are carried out, and maintains order. He has power to appoint and remove his ministers and diplomatic representatives; and to negotiate treaties with foreign nations (which are, however, subject to ratification by the Legislative Assembly). He is assisted in his duties by a Cabinet, each member of which is head of an executive department.

ELECTORATE

Suffrage is universal, compulsory and secret for persons over the age of 18 years.

DEFENCE

A novel feature of the Costa Rican Constitution is the clause outlawing a national army. Only by a continental convention or for the purpose of national defence may a military force be organized.

ROADS

In 1976 there were 24,674 km. of roads, of which 5,197
km. were all-weather roads, excluding 665 km. of the Pan-
American Highway. Between 1976 and 1978 the Govern-
ment was to invest 2,000 million colones in an extensive
road-building programme.

SHIPPING

Local services operate between the Costa Rican ports of
Puntarenas and Limón and those of Colón and Cristóbal
in Panamá. The port of Limón was to be expanded between
1976 and 1978 at a cost of 251 million colones.

International services are operated by various foreign
shipping lines.

CIVIL AVIATION

Costa Rica's main international airport is the Juan
Santamaría Airport. Additional airports, capable of
accommodating modern jet aircraft, are under construction
at Puntarenas, Limón and Liberia at a cost of 77 million
colones.

CUBA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Cuba is an archipelago of two main islands, Cuba and Isla de Pinos, and about 1,600 keys and islets. It lies in the Caribbean, 145 km. south of Florida, U.S.A. Its other neighbours are Mexico, Jamaica and Haiti. The climate is tropical with the annual rainy season from May to October. The average annual temperature is 25°C (77°F) and hurricanes are frequent. The language is Spanish. The population is predominantly Roman Catholic. The national flag (proportions 2 by 1) has five horizontal bands, alternating blue, white, blue, white, blue, with a red triangle close to the staff, charged with a silver star. Havana (La Habana) is the capital.

Recent History

Cuba was ceded by Spain to the U.S.A. after the Spanish-American War of 1898. It became independent in 1902, although the U.S.A. retained its naval bases and reserved the right to intervene in Cuba's domestic affairs until 1934. General Fulgencio Batista's dictatorship (1933-59) was ended by a revolutionary movement, led by Dr. Fidel Castro, after many years of guerrilla war. Fidel Castro gradually established a communist system of government and nationalized all American property and goods in Cuba. In 1961 Cuban exiles, with some United States support, attempted unsuccessfully to invade the island. The installation of Soviet rockets in Cuba precipitated a crisis with the United States in 1962. The U.S.A. broke off all relations and links with Cuba and began a total economic and political blockade of Cuba. Cuba was also suspended from the Organization of American States (OAS). In 1975 a majority in the OAS voted in favour of allowing countries to normalize relations with Cuba, although this does not mean the end of Cuba's exclusion from the OAS or of economic sanctions. Several Latin American countries have established diplomatic relations with Cuba and the U.S.A. eased trade restrictions but relations became strained again in 1976 due to Cuban involvement in the Angolan war. However, in September 1977 the U.S.A. and Cuba opened up "interests sections" in Havana (under the Swiss flag) and in Washington (under the Czechoslovak flag) respectively. Also in 1977 a U.S.-Cuba fishing agreement was signed and the U.S.A. lifted all restrictions on travel to Cuba.

In 1974 the country's first elections under Castro were held for municipal offices in one province. Cuba's first socialist constitution was submitted to the First Congress of the Cuban Communist Party in December 1975 and came into force in February 1976 after being approved by popular referendum. The Congress also elected a new Central Committee Secretariat and an enlarged Politburo. In addition, the existing six provinces were reorganized to form fourteen and the Congress also approved the 1976-80 Five-Year Plan. Municipal elections were held in October 1976 and the municipal assemblies later elected delegates to provincial assemblies and deputies to the National Assembly of People's Power. In December Fidel Castro was elected President of the newly created Council of State, thus becoming both Head of State and Head of

Government. Much of the general administration of the country was changed and various new ministries and committees established.

Government

In February 1976 Cuba's first socialist constitution came into force. Legislative power is vested in the National Assembly of People's Power, with 481 deputies elected for five years by municipal assemblies. The National Assembly elects from its number the Council of State, with 31 members, to be its permanent organ. The Council of State is the highest representative of the State and its President is both Head of State and Head of Government. Executive and administrative authority is vested in the Council of Ministers, appointed by the National Assembly on the proposal of the Head of State. Municipal, regional and provincial assemblies have also been established. The Communist Party of Cuba, the only authorized political party, is "the leading force of society and the state".

Defence

Cuba receives considerable aid from Communist countries. In 1977 the army numbered 160,000, the navy 9,000 and the air force 20,000. Army reserves numbered a further 90,000. Most fit men and women belong to the militia. Estimated defence expenditure for 1971 was 290 million pesos. Conscription is for a three-year period at the age of 17. Conscripts also work on the land.

Economic Affairs

The state-controlled Cuban economy is basically agricultural and is heavily dependent upon the sugar crop which provides the country with 80-85 per cent of its export revenue. The Government aimed to produce 10 million tons of raw sugar annually by 1970 but crops have been consistently low; in 1975 about 6.4 million tons were produced. Abnormally high sugar prices in 1974/75 compensated in part for the low production rate but the equally sharp fall in 1975/76 resulted in drastically reduced earnings. However, this was cushioned by Cuba's ability to sell over half its sugar crop to other CMEA countries at pegged prices. To increase efficiency it is hoped to mechanize 60 per cent of cane-cutting by 1980. Tobacco is the second largest export crop although meat production is the second most important agricultural activity. Dairy cattle are being introduced on a large scale and citrus fruits are increasingly important. Priority is being given to agricultural development. Heavy government investment in the fishing industry has resulted in catches that have risen from 27,100 tons in 1959 to 165,000 tons in 1975.

Cuba possesses about a quarter of the world's known nickel reserves. Production in 1975 was over 37,000 tons and nickel is Cuba's second largest export. New deposits of 350 million tons were discovered in 1975 and a new nickel plant, capable of producing 30,000 tons of nickel sinter and oxide annually, should be in production by 1980. There are also deposits of copper, chromite, manganese, cobalt and iron ore. Cuba is dependent on the U.S.S.R. for 95 per cent of its petroleum requirements but an important programme of oil exploration is being undertaken.

A Five-Year Development Plan (1976-80), co-ordinated closely with the plans of other CMEA members, provides for an expenditure of about 12,000 million pesos, of which a third is to be spent on industrialization. Fast-growing industries include metallurgy, construction, textiles, fishing and consumer goods. Rationing of some consumer goods has been eased or ended. Glass, newsprint and chemical industries have been established since 1973. The Plan aims at increased production of sugar, energy, paper, food, car parts and minerals. The Plan specified an average annual growth rate of 9 per cent but the fall in world sugar prices since 1975 and the rising cost of imports forced a review of the plan. In late 1975 the planned annual growth rate was revised downwards to 6 per cent and the investment programme cut to \$12,000-15,000 million. With the continuation through 1977 of the fall in sugar prices much of the Five-Year Plan has had to be shelved. In September 1976 Dr. Castro announced a series of emergency measures to conserve Cuba's diminishing hard currency earnings.

Forty per cent of Cuba's trade is with the U.S.S.R., on which it depends to a large extent for economic aid. Cuba's debt to the U.S.S.R. was estimated at between U.S. \$3,000 and \$4,000 million in 1975. It was estimated to have increased substantially in 1976. In 1976 Cuba signed a five-year trade agreement with the U.S.S.R. which will double the volume of trade between the two countries. A five-year economic and scientific-technical co-operation agreement was also signed which includes provisions for the construction of a metallurgical complex and of a nuclear power-station, as well as for co-operation in the fields of electric power engineering, oil refining, construction materials and sugar. The U.S.S.R. also provides credits to finance imports of Soviet goods and loans to develop the sugar and nickel industries. Cuba has recently indicated a willingness to undertake joint ventures with Western countries. Tourism and mining are likely to be the pilot sectors for this type of co-operation. Cuba is a member of the CMEA and SELA.

Transport and Communications

In 1977 there were 14,729 km. of railways and in 1974 there were 27,013 km. of roads. The merchant marine is being developed and in 1977 Cuba had 58 cargo ships. There are international airports at La Habana, Santiago de Cuba and Camaguey.

Social Welfare

Through the State Social Security System employees receive benefits for sickness, accidents, maternity, disability, retirement and unemployment. Health services are free. Health care is the second largest item in the budget, amounting to 400 million pesos in 1975. Total expenditure on social security in 1976 was 609.4 million pesos.

Education

Education is a very large item in the budget, accounting for over 800 million pesos in 1975, and in recent years illiteracy has been greatly reduced. Education is universal

and free up to university level. Education is based on Marxist-Leninist principles and combines study with manual work at secondary level.

Pre-school national schools are run by the State for children of five years of age, and day nurseries are available for all children after their forty-fifth day. Primary education, from six to twelve years of age, is compulsory and secondary education lasts from thirteen to sixteen years of age. University students rely on the national scholarship plans, and those with family responsibilities are assisted by the Students Loans Plan. In 1976 there were 103,000 students in 26 universities or institutes of higher education. Workers undergoing university courses receive a state subsidy to provide for their dependants. Courses at intermediate and higher levels are created in accordance with the needs of the country, with emphasis on technology, agriculture and teacher training. Adult education centres gave basic education to over 400,000 people in 1975. In 1975 107 new schools were inaugurated.

Tourism

Cuba has much to attract the tourist—forests, mountains, and a coastline with many bays and inlets and excellent bathing. Tourism has only recently begun to be developed. In 1975 an estimated 50,000 tourists visited Cuba, compared with 15,000 in 1974. Following the lifting of travel restrictions from the U.S.A. to Cuba, the first American visitors for over sixteen years arrived in 1977. The 1976-80 Development Plan provides for several new hotels.

Visas: Tourists from the following countries do not require a visa for visits of up to thirty days: Austria, Canada, France, Denmark, Italy, Norway, Sweden, Switzerland, Yugoslavia and most East European countries.

All travellers require permission to leave Cuba.

Sport

Sports and recreations are organized at national level by the National Institute of Sports, Physical Education and Recreation (INDER). The national sport is baseball, and boxing and athletics are very popular.

Public Holidays

1978: May 1st (Labour Day), July 26th (Revolution Day), October 10th (Wars of Independence Day).

1979: January 1st (Liberation Day).

Weights and Measures

Officially the metric system is in force but the U.S. system is still widely used.

THE CONSTITUTION

Following the assumption of power of the Castro regime on January 1st, 1959, the Constitution was suspended and a Fundamental Law of the Republic was instituted with effect from February 7th, 1959. In February 1976 Cuba's first socialist Constitution came into force after being submitted to the First Congress of the Communist Party in December 1975 and to popular referendum in February 1976.

POLITICAL, SOCIAL AND ECONOMIC PRINCIPLES

The Republic of Cuba is a socialist state in which all power belongs to the working people. The Communist Party of Cuba is the leading force of society and the state. The socialist state carries out the will of the working people and guarantees work, medical care, education, food, clothing and housing. The Republic of Cuba is part of the world socialist community. It bases its relations with the Union of Soviet Socialist Republics and with other socialist countries on socialist internationalism, friendship, co-operation and mutual assistance. It hopes to establish one large community of nations within Latin America and the Caribbean.

The State organizes and directs the economic life of the nation in accordance with a central social and economic development plan. Foreign trade is the exclusive function of the State. The State recognizes the right of small farmers to own their lands and other means of production and to sell that land. The State guarantees the right of citizens to ownership of personal property in the form of earnings, savings, place of residence and other possessions and objects which serve to satisfy their material and cultural needs. The State also guarantees the right of inheritance.

Cuban citizenship is acquired by birth or through naturalization.

The State protects the family, motherhood and matrimony.

The State directs and encourages all aspects of education, culture and science.

All citizens have equal rights and are subject to equal duties.

The State guarantees the right to medical care, education, freedom of speech and press, assembly, demonstration, association and privacy. In the socialist society work is the right and duty, and a source of pride for every citizen.

GOVERNMENT

National Assembly of People's Power

The National Assembly of People's Power is the supreme organ of the State and is the only organ with constituent and legislative authority. It is composed of deputies over the age of eighteen elected by the Municipal Assemblies of People's Power, for a period of five years. All Cuban citizens over the age of sixteen, except those who are mentally incapacitated or who have committed a crime, are eligible to vote. The National Assembly of People's Power holds two ordinary sessions a year and a special session when requested by one third of the deputies or by the Council of State. More than half the total number of deputies must be present for a session to be held.

All decisions made by the Assembly, except those relating to constitutional reforms, are adopted by a simple majority of votes. The deputies may be recalled by their electors at any time.

The National Assembly of People's Power has the following functions:

- to reform the constitution;
- to approve, modify and annul laws;

to supervise all organs of the State and government;
 to decide on the constitutionality of laws and decrees;
 to revoke decree-laws issued by the Council of State;
 to discuss and approve economic and social development plans, the state budget, monetary and credit systems;
 to approve the general outlines of foreign and domestic policy, to ratify and annul international treaties, to declare war and approve peace treaties;
 to approve the administrative division of the country;
 to elect the President, First Vice-President, the Vice-Presidents and other members of the Council of State;
 to elect the President, Vice-President and Secretary of the National Assembly;
 to appoint the members of the Council of Ministers on the proposal of the President of the Council of State;
 to elect the President, Vice-President and other judges of the People's Supreme Court;
 to elect the attorney-general and the deputy attorney-generals;
 to grant amnesty;
 to call referendums;

The President of the National Assembly presides over sessions of the Assembly, calls ordinary sessions, proposes the draft agenda, signs the Official Gazette, organizes the work of the commissions appointed by the Assembly and attends the meetings of the Council of State.

Council of State

The Council of State is elected from the members of the National Assembly and represents that Assembly in the period between sessions. It comprises a President, one First Vice-President, five Vice-Presidents, one Secretary and twenty-three other members. Its mandate ends when a new Assembly meets. All decisions are adopted by a simple majority of votes. It is accountable for its actions to the National Assembly.

The Council of State has the following functions:

- to call special sessions of the National Assembly;
- to set the date for the elections of a new Assembly;
- to issue decree-laws in the period between the sessions of the National Assembly;
- to decree mobilization in the event of war and to approve peace treaties when the Assembly is in recess;
- to issue instructions to the courts and the Office of the Attorney General of the Republic;
- to appoint and remove ambassadors of Cuba abroad on the proposal of its President, to grant or refuse recognition to diplomatic representatives of other countries to Cuba;
- to suspend those provisions of the Council of Ministers that are not in accordance with the Constitution;
- to revoke the resolutions of the Executive Committee of the local organs of People's Power which are contrary to the Constitution or laws and decrees formulated by other higher organs.

The President of the Council of State is Head of State and Head of Government and for all purposes the Council of State is the highest representative of the Cuban state.

Head of State

The President of the Council of State is the Head of State and the Head of Government and has the following powers:

- to represent the State and Government and conduct general policy;
- to call and preside over the sessions of the Council of State and the Council of Ministers;
- to supervise the ministries and other administrative bodies;

- to propose the members of the Council of Ministers to the National Assembly of People's Power;
- to receive the credentials of the heads of foreign diplomatic missions;
- to sign the decree-laws and other resolutions of the Council of State;
- to assume command of the Revolutionary Armed Forces.

In the case of absence, illness or death of the President of the Council of State, the First Vice-President assumes the President's duties.

The Council of Ministers

The Council of Ministers is the highest-ranking executive and administrative organ. It is composed of the Head of State and Government, as its President, the First Vice-President, the Vice-Presidents, the Ministers and the President of the Central Planning Board. Its Executive Committee is composed of the President, the First Vice-President and the Vice-Presidents of the Council of Ministers.

The Council of Ministers has the following powers:

- to conduct political, economic, cultural, scientific, social and defence policy as outlined by the National Assembly;
- to approve international treaties;
- to propose projects for the general development plan and if they are approved by the National Assembly, to supervise their implementation;
- to conduct foreign policy and trade;
- to draw up bills and submit them to the National Assembly;
- to draw up the draft state budget;
- to conduct general administration, implement laws, issue decrees and supervise defence and national security.

The Council of Ministers is accountable to the National Assembly of People's Power.

LOCAL GOVERNMENT

The country is divided into fourteen provinces and 169 municipalities. The provinces are: Pinar del Río, Habana, Ciudad de la Habana, Matanzas, Villa Clara, Cienfuegos, Sancti Spiritus, Ciego de Avila, Camagüey, Las Tunas, Holguín, Granma, Santiago de Cuba and Guantánamo.

Voting for delegates to the municipal assemblies is direct, secret and voluntary. All citizens over sixteen years of age are eligible to vote. The number of delegates to each assembly is proportionate to the number of people living in that area. A delegate must obtain more than half the number of votes cast in the constituency in order to be elected. The Municipal Assemblies are elected for a period of two and a half years and are headed by Executive Committees elected from the members of the Municipal Assemblies. The members of the Executive Committees will form five Regional Assemblies and the members of the Regional Assemblies will in turn form Provincial Assemblies also headed by an Executive Committee. Membership of regional and provincial executive committees is proposed by a commission of Communist Party members and youth and trade union representatives. The President and Secretary of each of the regional and the provincial assemblies are the only full-time members, the other delegates carrying out their functions in addition to their normal employment.

The regular and extraordinary sessions of the local Assemblies of People's Power are public. More than half the total number of members must be present in order for agreements made to be valid. Agreements are adopted by simple majority.

JUDICIARY

Judicial power is exercised by the People's Supreme Court and all other competent tribunals and courts. The People's Supreme Court is the supreme judicial authority and is accountable only to the National Assembly of People's Power. It can propose laws and issue regulations through its Council of Government. Judges are independent but the courts must inform the electorate of its activities

at least once a year. Every accused person has the right to a defence and can be tried only by a tribunal.

The Office of the Attorney-General is subordinate only to the National Assembly and The Council of State and is responsible for ensuring that the law is properly obeyed.

The Constitution may be modified only by a two-thirds majority vote in the National Assembly of People's Power.

DJIBOUTI

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Djibouti, formerly the French Territory of the Afars and the Issas, is in the Horn of Africa at the southern entrance to the Red Sea. It is bounded on the north, west and south-west by Ethiopia and on the south-east by Somalia. The land is volcanic desert and the climate hot and arid. There are two main ethnic groups, the Issa, who are of Somali origin and comprise 50 per cent of the population, and the Afar, who comprise 40 per cent of the population and are of Ethiopian origin. Both are Muslims and speak related Cushitic languages. The flag is divided into three parts: a white isosceles triangle enclosing a red five-pointed star and two equal horizontal bands of blue and green. The capital is Djibouti.

Recent History

French involvement in Djibouti began in 1859 and centred on the port of Djibouti, whose position at the entrance to the Red Sea invests the country with its strategic importance and economic potential. In 1945 the area (then known as French Somaliland) was proclaimed an overseas territory and in 1967 was renamed the French Territory of the Afars and the Issas. The Afars and the Issas have strong connections with Ethiopia and Somalia respectively.

In the late 1950s divisions between the two communities were not marked, the Issas dominating local politics through their greater numbers in the port, but in the 1960s conflicting interests in the Horn and the French policy of favouring the minority Afar community combined to reveal tensions in the Territory. The French increased their presence and Ali Aref Bourhan, the Vice-President of the Council of Ministers, consolidated his power by adjusting constituencies in favour of the Afars. Demands for independence were growing, however, and the violence which had been sporadic since 1967 brought matters to a head in 1975, when Ali Aref lost the support of 13 of his deputies. At the same time international assurances to respect the rights of a free Djibouti ushered in negotiations for its independence.

At the first of four conferences, Ali Aref arranged that the French would retain their military presence in an independent Djibouti. This was denounced by the opposition and further violence ensued that made clear the support for the pro-independence *Ligue Populaire Africaine pour l'Indépendance*. At a second conference, all parties agreed on the procedure towards independence. Ali Aref refused to recognize this agreement and was forced to resign in July 1976. The third conference resulted in agreement that a referendum on independence and elections to a new Chamber of Deputies would be held simultaneously in May and that independence would follow in June. At a fourth conference, organized by the Organization of African Unity, all parties pledged to unite before independence and formed the *Rassemblement populaire pour l'indépendance*.

The Territory voted overwhelmingly for independence in the referendum and in the parallel elections to the

Chamber of Deputies 77 per cent of votes cast were in support of a single list of candidates. Hassan Gouled Aptidon was elected President and on June 27th Djibouti became independent. In July President Gouled appointed Ahmed Dini Ahmed to be Prime Minister.

The most important task facing the new state is that of resolving the difference between Afar and Issa. The first administration carefully balanced all ethnic and political interests but there have already been signs of Afar disaffection and, following the arrest of 600 Afars in December 1977, Ahmed Dini and four other Afar Ministers resigned. A special Commission of Afars was created to meet the crisis and the Chamber of Deputies temporarily suspended. President Gouled established rule by decree.

Government

The Government is formed from the Chamber of Deputies, consisting of 65 members elected by universal adult franchise. It comprises a Council of Ministers presided over by a Prime Minister and an elected President to whom it is responsible. The Republic forms a single electoral district.

Defence

Until independence France was responsible for defence. Since French withdrawal a large portion of the annual budget has been set aside for military expenditure.

Economic Affairs

There is little arable farming. The land is volcanic desert, one of the least hospitable and productive terrains in Africa. Most of the population are pastoral nomads, herding goats, sheep and camels.

Industry is limited to a few small-scale concerns. Political uncertainty has discouraged the creation of new industries, despite the existence of a free zone. By the end of 1977, some sectors had substantially reduced activity. Of a population of 220,000 in 1976, only 18,000 were wage earners. Further unemployment has been the result of economic difficulty.

The economy of the country is based upon the port of Djibouti. Until 1976, Djibouti handled 60 per cent of Ethiopia's imports and 40 per cent of its exports. Having suffered badly during the closure of the Suez Canal (1967-75), the port has never recovered and cannot compete with the rising Arab ports nearby. The war between Ethiopia and Somalia threatens the closure of the railway that carries the Ethiopian trade and therefore the country's economic viability. Moreover, the Zim Israel Navigation Company, which operated some 30 per cent of the port's traffic, withdrew its equipment as a result of Djibouti's decision to join the Arab League. Afar-Issa rivalry further complicates the problems. The Afar handle the Ethiopian trade and dominate employment in the port but most of its population is Issa and they have demanded an end to tribal employment.

Transport and Communications

There are approximately 1,650 km. of roads linking Djibouti to the coastal towns from Loyada in the south to Moulhoulé in the north and to the inland towns of Ali-Sabieh, Dikhil, Yoboki and Dorra. Only 75 km. are bitumen surfaced. Of the remainder, 800 km. are serviceable only during the dry season. The only railway in the Horn of Africa links the international port of Djibouti with Addis Ababa; of this, 107 km. lies in Djibouti. However, in December 1977 railway services were said to be "completely paralysed". Djibouti has an international airport and there are six internal airports.

Education

Since independence, the Government has assumed over-

all responsibility for education. In 1976 there were 27 primary schools with 6,120 pupils, 4 secondary schools with 750 pupils and 8 centres for vocational training with 250 trainees.

Tourism

Tourism remains undeveloped.

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 centimes = 1 Djibouti franc.

Exchange rates (December 1977):

£1 sterling = 341.8 Djibouti francs.

U.S. \$1 = 186.6 Djibouti francs.

STATISTICAL SURVEY

Area: 21,783 sq. km. **Population** (1976 estimate): 220,000; including Afars 70,000, Issas and other Somali 80,000, Arabs 12,000, Europeans 15,000, other foreigners 40,000. Djibouti (main town) 102,000; other main towns are Dikhil, Ali-Sabieh, Tadjourah and Obock.

THE DOMINICAN REPUBLIC

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Dominican Republic occupies the eastern part of the island of Hispaniola which lies between Cuba and Puerto Rico in the Caribbean Sea. Its only border is with Haiti. The climate is sub-tropical with an average temperature of 27°C (80°F). The island lies in the path of tropical cyclones. The official language is Spanish. Over 90 per cent of the population are Roman Catholics. There are small Protestant and Jewish communities. The national flag (proportions 23 by 15) is red and blue, quartered by a white cross, at the centre of which is the coat of arms. The capital is Santo Domingo.

Recent History

The Dominican Republic was ruled from 1930 to 1961 by Generalísimo Rafael Trujillo. After his assassination, a transitional government composed of a seven-man Council of State was set up. Elections were held in December 1962 and Prof. Juan Bosch of the Partido Revolucionario Dominicano (PRD) was elected President. This administration was overthrown by a military coup in September 1963. Six right-wing parties endorsed the appointment of a civilian triumvirate led by Emilio de los Santos. After a further coup in April 1965, forces of the Organization of American States, including 23,000 U.S. troops, were called in to restore order. Dr. Héctor García Godoy became provisional President and elections held in June 1966 resulted in victory for Dr. Joaquín Balaguer. In May 1970, Dr. Balaguer was re-elected for a further four years. In February 1973 a state of emergency was declared when guerrilla forces landed on the coast. Captain Francisco Caamaño Deñó, the leader of the 1965 revolt, and his followers were killed. Prof. Bosch and other opposition figures went into hiding. Prof. Bosch later resigned as leader of the PRD, undermining hopes of a united opposition in the May 1974 elections, when Dr. Balaguer was returned with a large majority. In June 1975 guerrilla forces of Dominican émigrés from Cuba landed on the island with the intention of overthrowing Balaguer. Several hundred people, including prominent opposition leaders, were arrested in the resulting political activity. In 1976 six political groups formed a coalition front to oppose Balaguer in the 1978 elections if he stood for a fourth term, notwithstanding the limitation placed on more than two consecutive terms as announced by the President in 1974. The main opposition party, the PRD, is to participate in elections for the first time since 1966.

Government

The Dominican Republic comprises 26 provinces, each administered by an appointed governor, and a *Distrito Nacional* (DN) containing the capital. Under the 1966 Constitution, legislative power is exercised by the bicameral National Congress, with a Senate of 27 members (one for each province and one for the DN) and a Chamber of Deputies (91 members). Members of both houses are elected for four years by universal adult suffrage. Executive power lies with the President, elected by direct

popular vote for four years. He is assisted by a Vice-President and a Cabinet containing Secretaries of State.

Defence

Military service is voluntary and lasts for four years. In 1977 armed forces totalled 18,500 men: army 11,000, air force 3,500 and navy 4,000. Para-military forces number 10,000. Defence expenditure for 1977 was 43.2 million pesos.

Economic Affairs

Over fifty per cent of the population live on the land and 75 per cent of exports are agricultural. Sugar is the principal cash crop and accounts for about fifty per cent of all exports by value. Other major cash crops are coffee, cocoa, tobacco and bananas. Only two-fifths of the cultivable land is in use.

Efforts have been made to diversify the economy and to encourage mining and light industry. Manufacturing on a small scale covers a wide range of consumer goods. There are estimated bauxite reserves of 18 million tons at Cabo Rojo. The leading mineral export is ferro-nickel from the Canadian plant at Bonao. Ferro-nickel provided about 16 per cent of government revenue in 1976. Foreign oil companies are undertaking extensive prospecting and an oil refinery jointly owned by the Government and Shell, the Refinería Dominicana de Petróleo, began supplying the home market in 1973. The Rosario gold and silver mine began production in 1975. In 1976 deposits of copper were discovered in the centre of the country.

Since 1969 great economic progress has been made, due mainly to massive U.S. aid, the sugar boom, high public and private investment and increased foreign participation. The Government is investing heavily in agriculture, tourism and hydroelectricity. Tourism has priority because it is labour intensive and unemployment is endemic in the Dominican Republic. In 1975 and 1976 the growth rate was 5 per cent, compared with 8.9 per cent in 1974. In 1976 the sharp fall in sugar prices had a detrimental effect on the economy. The balance of payments deteriorated and, despite lower imports and increased earnings from exports other than sugar, the current account deficit widened by about \$180 million. The IMF allocated 15 million SDRs to restrict the overall 1977 balance of payments deficit to a maximum of \$20 million.

The Dominican Republic is a member of the OAS, the International Bauxite Association and SELA.

Transport and Communications

Transport facilities are limited and about 80 per cent of the railways are used solely to carry sugar from the plantations. Some 11,844 km. of roads (1975) are the main means of communication and the network includes some modern motorways. There is no inland waterway system and very little coastal shipping. A number of shipping lines link the island with the United States and other Caribbean islands. There are internal and international air services, the

DOMINICAN REPUBLIC

international airport being at Punta Caucedo. A second international airport is to be built at Puerto Plata.

Social Welfare

A voluntary national contributory scheme, introduced in 1947, provides cover for sickness, unemployment, accidental injury, maternity, old age and death. It is not yet universal.

Education

Primary education is free and, where possible, compulsory from the ages of seven to fourteen. In 1976 primary school enrolment totalled 867,592. There are four universities with over 45,000 students. In 1970 adult illiteracy stood at 32.8 per cent (males 31.2 per cent, females 34.3 per cent).

Tourism

Strenuous efforts are being made to develop the tourist industry. Hotels, casinos and seaside resorts are being built and tours have been organized to the old Spanish colonial settlements. The Government plans to spend 150 million pesos on a tourism development programme to be completed in 1985. Tourist complexes are under construction at Puerto Plata, Boca Chica and Santiago de los Caballeros. In 1976 361,069 tourists visited the Republic, a 30 per cent increase over the previous year.

THE CONSTITUTION

The present constitution of the Dominican Republic was promulgated on November 28th, 1966. Its main points are:

The Dominican Republic is a sovereign, free, independent State; no organizations set up by the State can bring about any act which might cause direct or indirect intervention in the internal or foreign affairs of the State or which might threaten the integrity of the State. The Dominican Republic recognizes and applies the norms of general and American international law and is in favour of and will support any initiative towards economic integration for the countries of America. The civil, republican, democratic, representative Government is divided into three independent powers: legislative, executive and judicial.

The territory of the Dominican Republic is as laid down in the Frontier Treaty of 1929 and its Protocol of Revision of 1936.

The life and property of the individual citizen are inviolable; there can be no sentence of death, torture or any sentence which might cause physical harm to the individual. There is freedom of thought, of conscience, of religion, freedom to publish, freedom of unarmed association, provided that there is no subversion against public order, national security or decency. There is freedom of labour and trade unions; freedom to strike, except in the case of public services, according to the dispositions of the law.

The State will set about agrarian reform, dedicating the and to useful interests and gradually eliminating the *latifundios*. The State will do all in its power to support all aspects of family life. Primary education is compulsory and all education is free. Social security services will be developed. Every Dominican has the duty to give what civil and military service the State may require of him. Every legally entitled citizen must exercise his right to vote, i.e. all persons over the age of eighteen and all who are or have been married even if they are not yet eighteen.

GOVERNMENT

Legislative Power is exercised by Congress which is made up of the Senate and Chamber of Deputies, elected by direct vote. *Senators*, one for each province and one for the *Distrito Nacional*, are elected for four years; they must be Dominicans in full exercise of their citizen's rights, over 25. Their duties are to elect judges, the President and other members of the Electoral and Accounts Councils, and to approve the nomination of diplomats. *Deputies*, one for every 50,000 inhabitants or fraction over 25,000 in each province and the *Distrito Nacional*, are elected for four years and must fulfil the same conditions for election as Senators.

Decisions of Congress are taken by absolute majority of at least half the members of each house; urgent matters require a two-thirds majority. Both houses normally meet on February 27th and August 16th each year for sessions of 90 days, which can be extended for a further 60 days.

Executive Power is exercised by the President of the Republic, who is elected by direct vote for a four-year term. He and the Vice-President must be Dominican citizens by birth or origin, over 30 years of age and in full

exercise of their citizen's rights; they must not have engaged in any active military or police service for at least a year prior to their election. They take office on August 16th following their election. The *President of the Republic* is Head of the Public Administration and Supreme Chief of the armed forces and police forces. His duties include nominating Secretaries and Assistant Secretaries of State and other public officials, promulgating and publishing laws and resolutions of Congress and seeing to their faithful execution, watching over the collection and just investment of national income, nominating, with the approval of the Senate, members of the Diplomatic Corps, receiving foreign Heads of State, presiding at national functions, decreeing a State of Siege or Emergency or any other measures necessary during a public crisis. The President may not leave the country for more than 15 days without authorization from Congress. In the absence of the President, the Vice-President will assume power, or failing him the President of the Supreme Court of Justice.

LOCAL GOVERNMENT

Government in the *Distrito Nacional* and the Municipalities is in the hands of local councils, with members elected proportionally to the number of inhabitants, but numbering at least five. Each Province has a civil Governor, designated by the Executive.

JUDICIARY

Judicial Power is exercised by the Supreme Court of Justice and the other Tribunals; no judicial official may hold another public office or employment, other than honorary or teaching. The Supreme Court is made up of at least nine judges, who must be Dominican citizens by birth or origin, at least 35 years old, in full exercise of their citizen's rights, graduates in law and have practised professionally for at least 12 years. There are also five Courts of Appeal, a Lands Tribunal and a Court of the First Instance in each judicial district; in each Municipality and in the *Distrito Nacional* there are also Justices of the Peace.

Elections are directed by the Central Electoral Council. The armed forces are essentially obedient and apolitical, created for the defence of national independence and the maintenance of public order and the Constitution and Laws.

The artistic and historical riches of the country, whoever owns them, are part of the cultural heritage of the country and are under the safekeeping of the State. Mineral deposits belong to the State. There is freedom to form political parties, provided they conform to the principles laid down in the Constitution. Justice is administered without charge throughout the Republic.

This Constitution can be reformed if the proposal for reform is supported in Congress by one-third of the members of either house or by the Executive. A special session of Congress must be called and any resolutions must have a two-thirds majority. There can be no reform of the method of government, which must always be civil, republican, democratic and representative.

ECUADOR

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Ecuador lies on the west coast of South America. Its neighbours are Colombia to the north and Peru to the east and south. The Galápagos Islands, 970 km. west of the Ecuadorian coast, form part of Ecuador. The climate is affected by the Andes mountains and the topography ranges from the tropical rain forest on the coast and in the eastern region to the tropical grasslands of the central valley and the permanent snowfields of the highlands. The official language is Spanish but Indian languages are very common. About 90 per cent of the population is Roman Catholic. The national flag (proportions 2 by 1) is a horizontal tricolour of yellow, blue and red, the yellow stripe being half the total depth. The state flag also has the national emblem in the centre. The capital is Quito.

Recent History

In November 1961 labour groups, left-wing parties and the armed forces overthrew the President, Dr. José María Velasco Ibarra, who was forced into exile. His successor, Dr. Carlos Julio Arosemena Monroy, formerly Vice-President, was deposed after an army coup in July 1963. A military junta was set up, headed by Rear-Admiral Ramón Castro Jijón, but the junta was forced to resign in March 1966, and Clemente Yerovi Indaburu was installed as acting President. Following the elections of October 1966, Dr. Otto Arosemena Gómez became provisional President. Former President Velasco was elected as President in June 1968 and took office in September. In June 1970, with the aid of the army, he declared himself dictator, suspended the constitution and dismissed Congress. But in February 1972 President Velasco was deposed by the armed forces and Brig.-Gen. Guillermo Rodríguez Lara, C.-in-C. of the army, became President. In July 1974 President Rodríguez Lara announced that he would not authorize elections or other political activity for five more years. However, following an attempted right-wing coup in September 1975, led by Gen. Raúl González Alvar and supported by ex-President Velasco, President Rodríguez Lara promised substantial economic and political changes but unrest continued and in January 1976 President Rodríguez Lara resigned. A three-man military junta took power and announced its intention to lead the country to a truly representative democracy. It established committees to draft a new constitution, propose amendments to the 1945 constitution and draw up an electoral law and a law on political parties, and announced that presidential elections would be held in February 1978. However, in early 1977 the Partido Radical Liberal withdrew from the committees because of the serious restrictions on political freedoms imposed by the Government. The Government later declared that, due to delays in preparing the electoral register, the elections would be deferred until July 16th, 1978, a move regarded as a delaying tactic by the Opposition. Anti-government activity increased in 1977: a one-day general strike took place in May and demonstrations in October led to the killing of 25 strikers by the police. In the February 1978 referendum a majority voted for the newly-drafted

constitution as opposed to the revised 1945 constitution. It will come into force in late 1978, when a new President takes office.

Government

The country is divided into 20 Provinces, including the Galápagos Islands. Each Province has a Governor appointed by the President. Constitutional rule was suspended in June 1970, when the bicameral National Congress was dismissed. Ecuador has been under military rule since February 1972 and all political activity was suspended in July 1974. Since January 1976 power has been held by a three-man military junta, called the Supreme Council of Government, which rules with the assistance of the Cabinet.

Defence

Military service is selective for two years at the age of 20. In 1977 there were 23,900 men in the armed forces: army 17,500, navy 3,800 and air force 2,600. Para-military forces numbered 5,800 men. Defence expenditure for 1977 was 2,850 million sucres.

Economic Affairs

The economy is dominated by three commodities: petroleum, bananas and coffee. Ecuador is the world's leading exporter of bananas but in 1976 coffee was the second largest export by value due to abnormally high prices. Cocoa production and fishing have benefitted greatly from official development programmes. Between 1976 and 1981 U.S. \$97.9 million is to be invested in the fishing industry. The growth of agricultural production increased from 3.1 per cent in 1971 to 6 per cent in 1976 and the public investment programme (1977-81) is to provide \$400 million for agricultural development in order to increase production further. An ambitious agricultural mechanization programme has also been launched. The extensive forests yield valuable hardwoods. Ecuador is also the world's principal producer of balsawood. Gold, silver, copper, lead and zinc reserves totalling one million tons have been discovered in Azuay.

With the completion of the trans-Andean pipeline (capacity 400,000 barrels per day, b.p.d.), linking the oilfields of Oriente Province with the tanker-loading port of Esmeraldas in 1972, Ecuador became an important oil-exporting nation, and the leading oil producer in Latin America after Venezuela. Cepe, the state oil concern, bought a 25 per cent share in Texaco-Gulf's operations in Ecuador in 1974 and in 1977 bought Gulf's 37.5 per cent holding, thus ending a long-standing dispute over Gulf's debts owing from oil revenues. Since 1971 the value of oil exports has quintupled to reach \$565.2 million in 1976 (half Ecuador's total export revenue). However, production was affected in 1975 and 1977 by transport and marketing difficulties. Cepe-Texaco are to invest \$31 million to raise production potential from 210,000 b.p.d. in 1976 to 350,000 b.p.d. by the end of 1978. The 50,000 b.p.d. Esmeraldas oil refinery came fully on-stream in late 1977. Cepe also hopes to develop the substantial natural gas deposits discovered in the Gulf of Guayaquil. There are

plans to build pipelines from Esmeraldas and Shushufindi to Quito and a gas-liquefaction plant on the Shushufindi oilfield, with a daily capacity of 25 million cubic feet.

Industry has developed rapidly in recent years although it suffered from shortages of electric energy in 1976 and grew by only 11 per cent, compared with 13 per cent the previous year. The sector consists mainly of light industry although the Government plans to invest U.S. \$1,500 million for the development of heavy industry, priority being given to petrochemicals, pharmaceuticals, cement and steel. An \$800 million petrochemical complex is to be completed by 1983 and a \$180 million integrated steel mill by 1985.

With a growth rate of 13.6 per cent in 1974, Ecuador had one of Latin America's fastest growing economies due to the development of the oil sector. However, reflecting difficulties in the oil industry and the fall in world commodity prices, Ecuador's economic growth rate fell to 5.3 per cent in 1975. The economy recovered in 1976, with the G.D.P. rising by 6 per cent, reflecting larger export revenues and a marked degree of industrial development. By the use of strict fiscal and monetary measures the inflation rate in 1976 was only 11 per cent, compared with 23 per cent in 1974. The balance of payments deteriorated in 1974 and 1975 but recovered in 1976 to produce an overall surplus of \$203.3 million, partly due to the large inflows of long-term capital which contributed to the record level of international reserves (\$666.4 million in April 1977, compared with \$285.7 million at the end of 1975).

The principal goals of the 1977-81 public investment programme are diversification of the economy, decentralization of production, an expansion of the agricultural sector and the creation of jobs.

Ecuador is a member of OPEC, the OAS, LAFTA, the Andean Group, the IADB and SELA.

Transport and Communications

Communications are rendered difficult by mountains and forests. There were 965 km. of railway track in 1977. The Pan-American Highway runs for 1,392 km. through the country with branch roads to the coast. Near the coast the lower reaches of the rivers Guayas, Mira and Esmeraldas are navigable for about 190 km. There are a number of seaports of which Guayaquil and Manta are the most important. Three main Ecuadorean companies and some foreign lines operate internal and international air services.

Social Welfare

Social insurance is compulsory for all employees. Benefits are available for sickness, industrial accidents, disa-

bility, maternity, old age, widowhood and orphanhood. Hospitals and welfare institutions are run by Central Public Assistance Boards.

Education

Education is compulsory and all public schools are free. Private schools continue to play a vital role in the educational system. Primary education covers the ages of 6 to 12 and secondary education 12 to 18. University courses extend for up to six years and include programmes for teacher training. A number of adult schools and literacy centres have been built aimed at reducing the 30 per cent illiteracy rate. There are sixteen universities.

Tourism

The main tourist attractions are the magnificent mountain and forest scenery of the highlands, the tropical jungles of the Upper Amazon and the relics of Indian and Colonial Spanish cultures. There are a number of coastal resorts from which deep-sea fishing is possible.

Visas are not required to visit Ecuador by nationals of Colombia, EEC countries (except Ireland), Portugal, Spain, Sweden, Switzerland and Uruguay.

Sport

Football and basketball are the most popular sports.

THE CONSTITUTION

Note: The constitution has been suspended since June 1970.

CONGRESS

The Constitution of 1945 states that legislative power is vested in Congress, which is composed of two chambers. They assemble twice a year for a period of sixty days. Members of the Senate are elected for a four-year term, and may be re-elected. There are two senators for each province and one for the Archipelago of Colón. In addition, fifteen "functional" senators are designated by bodies representative of educational institutions, learned societies, the Press, the armed forces; and by labour, industry, agriculture and commerce, in the *sierra* and in the *litoral*.

The Chamber of Deputies has seventy-two members elected for a two-year term. Members are eligible for re-election.

In addition to its law-making duties, Congress supervises the administration and expenditure of the national revenues; ratifies treaties; elects members of the Supreme and Superior Courts; and, from panels presented by the President, the Comptroller-General, the Attorney-General and the Superintendent of Banks. It is also able to overrule the President's amendment or rejection of a bill which it has submitted to him for his approval; and may grant or refuse the allocation of extraordinary powers to the President.

PRESIDENT

The presidential term is four years. An ex-President may be re-elected only after four years have elapsed from

the date of his terminating office. The President appoints his own cabinet, the governors of provinces, diplomatic representatives and certain administrative employees, and is responsible for the direction of international relations. In the event of foreign invasion or internal disturbance, extraordinary powers may be given him by Congress, or by the Council of State if Congress is not in session.

The Constitution also provides for a Legislative Committee, consisting of nine members, to draw up bills (with the exception of those dealing with economic questions) and codify and edit laws.

As in other post-war Latin-American Constitutions, particular emphasis is laid on the functions and duties of the State, which is given wide responsibilities with regard to the protection of labour; assisting in the expansion of production; protecting the Indian and peasant communities; and organizing the distribution and development of uncultivated lands, by expropriation where necessary.

Voting is compulsory for every Ecuadorean citizen who is literate and over 18 years of age. The Constitution guarantees liberty of conscience in all its manifestations and states that the law shall not make any discrimination for religious reasons.

EGYPT

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Arab Republic of Egypt occupies the north-eastern corner of Africa, with an extension across the Gulf of Suez into the Sinai region which is usually regarded as lying in Asia. It is bounded to the north by the Mediterranean, to the north-east by Israel, to the east by the Red Sea, to the south by the Sudan, and to the west by Libya. The climate is arid, with a maximum annual rainfall of only eight inches around Alexandria. More than 90 per cent of the country is desert, and some 99 per cent of the population live in the valley and delta of the Nile. Summer temperatures reach a maximum of 43°C (110°F) and winters are mild. Arabic is the official language. Many educated Egyptians speak English or French. Over 90 per cent of the population are Muslims. The remainder are mainly Christians, over a million of whom are Copts. The national flag (proportions 3 by 2) is a horizontal tricolour of red, white, and black; the white stripe is charged with an eagle emblem in gold. The capital is Cairo.

Recent History

In July 1952 a group of young army officers, the "Free Officers", seized power in Cairo. King Farouk was forced to abdicate and Gen. Muhammed Neguib installed as head of the military junta. Egypt was declared a republic the following June, when Neguib became President and Prime Minister, and Col. Gamal Abdel Nasser, who was leader of the Free Officers, Deputy Prime Minister. In November 1954 Neguib was relieved of his posts, and Nasser took over as acting head of state.

In October 1954 Britain and Egypt reached agreement on the Suez Canal, when provision was made for the withdrawal of British troops. In June 1956 a new constitution was approved by the people and Nasser elected President. The following month, after Britain and the U.S.A. had withdrawn their offers of finance for the Aswan High Dam, Nasser announced the nationalization of the Suez Canal Company, so that Canal revenues could be used to finance the Dam. This was a cause of great concern to Israel, Britain and France, and Israel invaded Sinai on October 29th while Britain and France began operations against Egypt two days later. Strong UN and American pressure resulted in a ceasefire on November 6th and supervision by the UN of the invaders' withdrawal.

Egypt and Syria formed the United Arab Republic in February 1958, and ties with the Soviet and East European bloc strengthened. Syria withdrew from the union after the army had seized power there in September 1961, but Egypt retained the title United Arab Republic until 1971. Further attempts at federating Egypt, Syria and Iraq also came to nothing during the early 1960s and plans for union with Libya came to nothing in 1973. The Federation of Arab Republics (Egypt, Libya and Syria) came into being in 1972, but has had little practical effect.

The "Six-day War" in June 1967 between the Arabs and Israel left Israel in control of a large area of Egyptian territory, including the whole of Sinai. The Suez Canal was blocked and closed until June 1975.

An uneasy ceasefire lasted until October 1973, when Col. Muhammad Anwar Sadat, who had become President after Nasser's death in September 1970, sent troops across the Suez Canal to recover territory lost in 1967. After 18 days of fighting a ceasefire was arranged and Dr. Henry Kissinger, the U.S. Secretary of State, arranged a disengagement agreement by which Israeli forces withdrew to a line about 13 miles east of the Suez Canal and were separated from Egyptian forces by a UN buffer zone. A second disengagement agreement was arranged by Dr. Kissinger in September 1975, by which Israel evacuated further territory in Sinai, including the Mitla and Giddi passes and the Abu Rudais oilfields. In 1972 Sadat dismissed his Soviet military advisers, thus introducing a period of coolness in relations between Egypt and the Soviet Union which became more pronounced when Egypt broke off her Treaty of Friendship with the U.S.S.R. in March 1976.

Since 1974 Sadat has been introducing a more liberal political and economic regime, but inflation, overcrowding and the slow arrival of foreign investment led to sporadic unrest, culminating in severe rioting in January 1977 when the Government proposed to remove food subsidies and raise prices. In the face of the riots Sadat was forced to revoke the price rises.

Political parties (banned since 1953) were allowed to take part in the November 1976 elections for the People's Assembly, when the Arab Socialist Party, representing the views of the Government, won 280 of the 350 elected seats. In a law of June 1977 political parties were legalized.

In July 1977 open warfare took place on the border with Libya, with whom relations had been bad for some years.

In November 1977 President Sadat surprised the world by visiting Israel and addressing the Knesset. While no fresh peace proposals were put forward, the visit was recognized by the Western world as a courageous move towards peace and a recognition by Egypt of the State of Israel. Sadat also received the support of his own people, in spite of the resignations of his Foreign Minister and Deputy Foreign Minister, but many of the Arab countries opposed him, accusing him of endangering Arab unity and suspecting that Egypt might negotiate a separate peace treaty with Israel. Syria, Libya, Algeria, Iraq and Yemen P.D.R. were therefore critical of Sadat's visit to Israel when they held their own conference in Tripoli in December, and Sadat consequently broke off diplomatic relations with them. Further negotiations took place between Israeli and Egyptian delegations in December 1977 and the early weeks of 1978, but by mid-February no significant break-through had been achieved, with the status of any future Palestinian state seeming to present the largest obstacle.

Government

Under the 1971 Constitution, legislative power is held by the unicameral People's Assembly, with 360 members

EGYPT

(338 elected by universal adult suffrage, 12 representing occupied territories and 10 nominated by the President) serving for five years. Half the elected members must be workers or peasants. The Assembly nominates the President, who is elected by popular referendum for six years. The President has executive power and appoints one or more Vice-Presidents, a Prime Minister and a Council of Ministers.

Egypt comprises 25 governorates (5 cities, 16 provinces and 4 frontier districts).

Defence

In 1977 Egypt had total armed forces of 345,000 (army 300,000, navy 20,000, air force 25,000), with 515,000 reserves. There is a compulsory three-year period of National Service. The defence budget for 1977-78 is £E1,720 million.

Economic Affairs

Almost half the labour force is engaged in agriculture. The chief crops are cotton, onions, wheat, maize, millet, rice and sugar-cane. The country depends very largely on the waters of the Nile for its fertility, and the completion of the Aswan High Dam in 1970 increased the fertile land of Egypt by one-third.

Crude oil production is small by Middle East standards (390,000 barrels per day in the first half of 1977), but there are strong hopes of further commercial discoveries.

Under Nasser, and until 1973-74 under Sadat, Egypt's economy was conducted mainly on socialist lines. After the October 1973 war, while not abandoning socialism, Egypt put into practice a policy of encouraging foreign investment, both from other Arab countries and from Western sources, and embarked on a development plan which involved re-opening the Suez Canal and resettling and redeveloping the Suez area. Foreign investment has not been arriving as quickly as was hoped, and since 1976 Egypt has been experiencing severe economic difficulties, with inflation, a huge debt problem, an adverse balance of payments and a growing population. In July 1976 the Gulf Organisation for Development in Egypt, consisting of Egypt, Saudi Arabia, Kuwait and the United Arab Emirates, was set up to help the Egyptian economy. Numerous other countries, including the U.S.A., have advanced loans. By the end of 1977, with Suez Canal revenue picking up, the Suez-Mediterranean pipeline in operation, and with the prospect of both Ford and Coca-Cola setting up plants in Egypt, there was increased optimism about the economy.

Transport and Communications

The area of the Nile Delta is well served by railways. Lines also run from Cairo southward along the Nile to Aswan, and westward along the coast to Sullum. Roads link the towns. The chief ports are Alexandria and Port Said. Over 21,000 vessels used the Suez Canal, linking the Mediterranean and the Red Sea, in 1966, and almost 17,000 vessels used the canal in 1976. The Suez Canal was

Introductory Survey

closed by the June 1967 war, but was re-opened to commercial shipping in the middle of 1975. The River Nile carries much domestic freight and there are long-distance passenger services. Cairo is an important air centre and EgyptAir has branches all over the world. In August 1976 construction work on an oil pipeline from Suez to the Mediterranean was completed and the pipeline began operation in 1977.

Social Welfare

Great progress has been made in social welfare services in recent years. There are comprehensive state schemes for sickness benefits, pensions, health insurance and training. By 1975 more than 10 million people in Egypt were subject to social security and 95 per cent of all Egyptians were insured.

Education

Primary education is extended to all children between the ages of 6 and 12, and is compulsory. Almost 7 million people were receiving state education in the 1975-76 school year. There are eight universities. Education is free at all levels.

Tourism

Egypt has always been a considerable tourist centre. Historical remains of ancient civilizations include the Pyramids and the temples at Abu Simbel. The River Nile is popular for cruises. About 980,000 people visited Egypt in 1976. Tourists are entitled to a special exchange rate, about £E1.21 to £1 sterling in December 1977.

Sport

The chief recreations are football, athletics, basketball, horse-racing, tennis and swimming.

Public Holidays

1978: June 18th (Evacuation Day, proclamation of the republic), July 23rd (Revolution Day), September 1st (Libyan Revolution Day), September 4th (Id-ul-Fitr, end of Ramadan), October 6th (Armed Forces Day), October 24th (Popular Resistance Day), November 11th (Id-ul-Adha), December 2nd (Muslim New Year).

1979: January 1st (New Year), February 10th (Mouloud, birth of the Prophet), mid-April (Sham el Nessim).

Christian holidays include: Coptic Christmas (January), Palm Sunday and Easter Sunday (March-April).

Weights and Measures

The metric system is in force, but some Egyptian measurements are still in use.

Currency and Exchange Rates

1,000 millièmes = 100 piastres = 5 tallariş = 1 Egyptian pound (£E).

Exchange rates (December 1977):

£1 sterling = 716.7 millièmes;

THE CONSTITUTION

The Permanent Constitution of the Arab Republic of Egypt was approved by referendum on September 11th, 1971. There are six chapters with 193 articles, many of them based on the 1964 Interim Constitution, but chapters 3 and 4 show a considerable degree of liberalization of the former statutes.

CHAPTER I

The State

Egypt is an Arab Republic with a democratic, socialist system based on the alliance of the working people and derived from the country's historical heritage and the spirit of Islam.

The Egyptian people are part of the Arab nation, who work towards total Arab unity.

Islam is the religion of the State; Arabic is its official language and the Islamic code is a principal source of legislation. The State safeguards the freedom of worship and of performing rites for all religions.

Sovereignty is of the people alone which is the source of all powers.

The protection, consolidation and preservation of the socialist gains is a national duty: the sovereignty of law is the basis of the country's rule, and the independence of immunity of the judiciary are basic guarantees for the protection of rights and liberties.

The Arab Socialist Union is the political organization of the State which represents the alliance of the working forces of the people; the farmers, workers, soldiers, the intelligentsia and national capitalism.

CHAPTER 2

The Fundamental Elements of Society

Social solidarity is the basis of Egyptian society, and the family is its nucleus.

The State ensures the equality of men and women in both political and social rights in line with the provisions of Moslem legislation.

Work is a right, an honour and a duty which the State guarantees together with the services of social and health insurance, pensions for incapacity and unemployment.

The economic basis of the Republic is the socialist based on sufficiency and justice. It is calculated to prevent exploitation and to level up differences between classes.

The people control all means of production and regulate the national economy according to a comprehensive development plan which determines the role of Arab and foreign capital.

Property is subject to the people's control.

Property shall be expropriated only by law and against fair compensation. Nationalization shall also be by law for public interest considerations or socialist objectives.

Agricultural holding may be limited by law.

The State follows a comprehensive central planning and compulsory planning approach based on quinquennial socio-economic and cultural development plans whereby the society's resources are mobilized and put to the best use.

The public Sector assumes the leading role in the development of the national economy. The State provides

absolute protection of this Sector as well as the property of co-operative societies and trade unions against all attempts to tamper with them.

CHAPTER 3

Public Liberties, Rights and Duties

All citizens are equal before the law. Personal liberty is a natural right and no one may be arrested, searched, imprisoned or restricted in any way without a court order.

Houses have sanctity, and shall not be placed under surveillance or searched without a court order with reasons given for such action.

The law safeguards the sanctities of the private lives of all citizens; so have all postal, telegraphic telephonic and other means of communication which may not therefore be confiscated, or perused except by a court order giving the reasons, and only for a specified period.

Public rights and freedoms are also inviolate and all calls for atheism and anything that reflects adversely on divine religions is prohibited.

The freedom of opinion, the Press, printing and publications and all information media are safeguarded.

Press censorship is forbidden, so are warnings, suspensions or cancellations through administrative channels. Under exceptional circumstances as in cases of emergency or in war time, censorship may be imposed on information media for a definite period.

Egyptians have the right to permanent or provisional emigration and no Egyptian may be deported or prevented from returning to the country.

Citizens have the right to private meetings in peace provided they bear no arms. Egyptians also have the right to form societies which have no secret activities or are hostile to the government. Public meetings are also allowed within the limits of the law.

CHAPTER 4

Sovereignty of the Law

All acts of crime should be specified together with the penalties for the acts.

Recourse to justice, it says, is a right of all citizens, and those who are financially unable, will be assured of means to defend their rights.

Arrested persons may protest against their detention and their protests should be decided upon within a prescribed period otherwise they should be released.

CHAPTER 5

System of Government

The President, who must be at least 40 years old, is nominated by at least one-third of the members of the People's Assembly, approved by at least two-thirds, and elected by popular referendum. His term is for six years and he 'may be re-elected for another subsequent term.'

He may take emergency measures in the interests of the state but these measures must be approved by referendum within 60 days.

The People's Assembly, elected for five years, is the legislative body and approves general policy, the budget and the development plan. It shall have 'not less than 350' elected members, at least half of whom shall be workers or farmers, and the President may appoint up to ten additional members. In exceptional circumstances the Assembly, by a two-thirds vote, may authorize the President to rule by decree for a specified period but these decrees must be approved by the Assembly at its next meeting.

The Assembly may pass a vote of no confidence in a Deputy Prime Minister, a Minister or a Deputy Minister, provided three days' notice of the vote is given, and the minister must then resign. In the case of the Prime Minister, the Assembly may 'prescribe' his responsibility and submit a report to the President: if the President disagrees with the report but the Assembly persists, then the matter is put to a referendum: if the people support the President the Assembly is dissolved; if they support the Assembly the President must accept the resignation of the Government. The President may dissolve the Assembly prematurely, but his action must be approved by a referendum and elections must be held within 60 days.

Executive Authority is vested in the President, who may appoint one or more vice-presidents and appoints all ministers. He may also dismiss the vice-presidents and ministers. The President has 'the right to refer to the people in connection with important matters related to the country's higher interests.' The Government is described as 'the supreme executive and administrative organ of the state'. Its members, whether full ministers or deputy ministers, must be at least 35 years old. Further sections define the roles of Local Government, Specialized National Councils, the Judiciary, the Higher Constitutional Court, the Socialist Prosecutor General, the Armed Forces and National Defence Council and the Police.

CHAPTER 6

General and Transitional Provisions

No law shall normally have retroactive effect, but this may be changed, except in criminal matters, with the approval of a majority of the Assembly. Articles of the constitution may be revised, at the suggestion of the President or one-third of the Assembly, but the revision must be submitted for approval by a public referendum. The term of the present President shall date from his election as President of the United Arab Republic.

Political Parties

In June 1977 the People's Assembly adopted a new law on political parties, which, subject to certain conditions, permitted the formation of political parties for the first time since 1953 (see under Political Parties, p. 320).

JUDICIAL SYSTEM

The Courts of Law in Egypt are basically divided into four categories as follows:

1. *The Supreme Court* (called *The Court of Cassation*)
2. *The Courts of Appeal*
3. *The Primary Tribunals*
4. *The Summary Tribunals*

Each Court contains criminal and civil chambers.

1. The Supreme Court

The highest Court of Law in Egypt. Its sessions are held at Cairo and its jurisdiction covers the whole Egyptian territory.

Final judgements rendered in criminal and civil matters may be referred to the Supreme Court—by the accused or the Public Prosecution in criminal matters, and by any of the litigants in civil matters—in cases of misapplications or misinterpretations of the law as applied by the competent court in final judgement, as well as in cases of irregularity in the form of the judgement or the procedures having effect on that judgement.

The Supreme Court is composed of the Chief Justice, four Deputy-Chief Justices and thirty-six Justices.

2. Courts of Appeal

There are six Courts of Appeal situated in the more important Governorates of Egypt: Cairo, Alexandria, Asyut, Mansura, Tanta, and Beni Suef. Each of these courts contains a criminal chamber, *The Assize Court*, to try cases of felonies, and a civil chamber to hear appeals filed by any of the litigants in civil matters against a judgement rendered by the primary tribunal, where the law so permits.

President in Cairo: M. MAHMOUD ABD-EL-LATIF.

3. Primary Tribunals

In each Governorate, there is a Primary Tribunal, each of which contains several chambers. Each chamber is composed of three Judges. Some of these chambers try criminal cases, whilst others hear civil litigations.

Primary Tribunals sit as Courts of Appeal in certain cases, according to circumstances.

4. Summary Tribunals

Summary Tribunals are branches of the Primary Tribunals and are situated in the different districts of Egypt. Each of these tribunals is composed of a single Judge.

Summary Tribunals hear civil and criminal matters of minor importance according to certain details.

The Public Prosecution

The Public Prosecution is headed by the Attorney-General and consists of a large number of Attorneys, Chief Prosecutors and Prosecutors, who are distributed among the various districts of Egypt. The Public Prosecution is represented at all criminal Courts and also at litigation in certain civil matters. Furthermore, the enforcement of judgement rendered in criminal cases is controlled and supervised by the Public Prosecution.

Attorney-General: IBRAHIM KALYOUBI.

The Supreme Judicial Council

This Council exists to guarantee the independence of the judicial system from outside interference. Under the presidency of the Chief Justice, the Supreme Judicial Council contains the following members:

- the Chief Justice
- two Deputy Chief Justices
- the Under-Secretary of State for the Ministry of Justice
- the Attorney-General
- the President of the Court of Appeal in Cairo
- the President of the Primary Tribunal in Cairo.

All matters concerning the promotion, discipline or otherwise of the members of the judicial system are referred to this Council.

An Arbitration Bureau was set up in 1966 to investigate cases between state and public sector organizations.

RELIGION

Over 90 per cent of Egyptians are Muslims, and almost all of these follow Sunni tenets. There are over a million Copts in Egypt forming the largest religious minority. Besides the Copts there are other Christian minorities numbering about a quarter of a million and consisting of Greek Orthodox, Roman Catholics, Armenians and Protestants. There is also a small Jewish minority.

Grand Sheikh of Al Azhar: Dr. ABDEL-HALIM MAHMOUD.

Grand Mufti of Egypt: Sheikh KHATIR MUHAM MUHAMMAD.

Coptic Orthodox Church: Anba Ruies Building, Ramses St., Abbasiya, Cairo; f. A.D. 61; Leader Pope SHENOUDA III; about 8 million followers in Egypt, Sudan, N. America, Canada, Australia, Jordan, Lebanon, Germany, Austria, U.K., France, Libya and Israel.

Coptic Catholic Church: Patriarch Cardinal STEPHANOS I SIDAROUCS, 34 Sh. Ibn Sandar, Koubbeh Bridge, Cairo; 4 dioceses; 120,000 mems.; publs. *Al Salah*, *Sadik el Kahen*, *Al Risalat*.

Greek Catholic Patriarchate: P.O.B. 50076 Beirut, Lebanon; 16 rue Daher, Cairo; Patriarch of Antioch, of Alexandria and of Jerusalem His Beatitude MAXIMOS V. HAKIM; 500,000 mems. in the Middle East.

Greek Orthodox Church: Patriarch NIKOLAUS VI.

Armenian Apostolic Church: 179 Ramses Ave., Cairo, P.O.B. 48-Faggala; Archbishop MAMPRE SIROUNIAN.

Armenian Catholic Patriarchate: 36 Mohammed Sabri Abou Alam Street, Cairo; Archbishop RAPHAEL BAYAN.

Syrian Catholic Church: 46 rue Daher, Cairo; Bishop BASILE MOUSSA DAOUD.

Jewish Community: Office of the Chief Rabbi, Rabbi HAIM DOUEK; 13 Sebil-el-Khazindar St., Abbassia, Cairo.

THE PRESS

Despite a fairly high illiteracy rate, the Egyptian Press is well developed. Cairo is the biggest publishing centre in the Middle East.

Legally all newspapers and magazines come under the control of the Arab Socialist Union. All the important newspapers and magazines are owned by the Union, although the four big publishing houses of al-Ahram, Dar al-Hilal, Dar Akhbar al-Yom and Dar al-Gomhouriya, operate as separate entities and compete with each other commercially. Dar al-Hilal is concerned only with magazines and publishes *al-Mussawar*, *Hawa'a* and *al-Kawakeb*. Dar Akhbar al-Yom publishes the daily newspaper *al-Akhbar*, the weekly newspaper *Akhbar al-Yom* and the weekly magazine *Akher Saa*.

Dar al Gomhouriya publishes the daily *al-Gomhouriya*, the daily English language paper *Egyptian Gazette*, the daily French newspaper *Le Progrès Egyptien* and the afternoon paper *al-Misaa*.

The most authoritative daily newspaper is the very old established *al-Ahram*. Other popular large circulation magazines are *Rose al-Youssef*, *Sabah al-Kheir* and *al Izaw w'al Television*.

In February 1974 President Sadat ended press censorship, except on military matters, and foreign correspondents in Cairo were relieved of the duty of submitting their reports, except those on military matters, for censorship.

In May 1975 President Sadat set up the Supreme Press Council, under the Chairmanship of the First Secretary of the Arab Socialist Union, to develop the Press and find solutions to its problems. Extensive personnel changes were made in the Egyptian Press in March 1976.

EL SALVADOR

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of El Salvador lies on the Pacific coast of Central America. It is bounded by Guatemala to the west and Honduras to the north and east. The climate varies from the tropical coastal plain to the temperate uplands. The language is Spanish. Eighty per cent of the population are Roman Catholic. The national flag (proportions 3 by 2) consists of three horizontal stripes, blue, white and blue, the central stripe bearing the national coat of arms. The capital is San Salvador.

Recent History

In 1966 Gen. Fidel Sánchez Hernández, leader of the conservative Partido de Conciliación Nacional (PCN), a former Minister of the Interior, was elected president. There has been long-standing animosity between El Salvador and Honduras which developed into armed conflict in 1969. Although El Salvador was largely successful, the war caused it internal difficulties as Honduras expelled 50,000 illegal Salvadorian immigrants from its territory and closed its border to Salvadorian imports and exports in transit. These measures, which threaten the existence of the Central American Common Market (CACM), were circumvented by El Salvador and efforts were made to re-establish relations with Honduras in order to re-activate the CACM which is of great importance to El Salvador's long-term economic prospects. In February 1976 the Governments of El Salvador and Honduras signed a document aimed at resolving the conflict between them, and in October agreed to place the dispute in the hands of a mediator.

In the 1972 presidential elections Col. Arturo Armando Molina Barraza, candidate of the ruling PCN, emerged as the victor over his rival José Napoleón Duarte, the leader of the left-wing coalition party Unión Nacional de Oposición, amid allegations of massive fraud. An attempted coup in March 1972 by supporters of Napoleón Duarte was crushed and Col. Molina took office in July 1972. Allegations of fraud were again made in the 1977 presidential elections, when both candidates claimed victory. However, the PCN candidate, Gen. Carlos Humberto Romero, was eventually named as President, taking office in July, and the UNO candidate, Col. Ernesto Claramount Rozeville, was deported to Costa Rica. As a result, violent clashes took place between troops and opposition demonstrators; a state of siege was declared and civil liberties were severely restricted. The steady polarization of left and right since 1972 is demonstrated by the upsurge of urban guerrilla activity. In April 1977 a left-wing group kidnapped and murdered the Minister of Foreign Affairs and during the year there was a great increase in right-wing terrorism, aimed mainly against Jesuit priests who were accused of inciting the peasants to demand agrarian reform and wage rises.

El Salvador is a member of the OAS and ODECA.

Government

Executive power is vested in the President, elected by popular vote for five years, assisted by a Vice-President and

an appointed Council of Ministers. The legislative organ is the unicameral Legislative Assembly, with 52 deputies elected for two years by proportional representation. The country is divided into 14 departments.

Defence

A period of national service is compulsory between the ages of 18 and 30. The total strength of the army, navy and air force is fixed annually by the Legislative Assembly and is never less than 3,000 men. In 1977 the army totalled 6,000 men, the navy 130 and the air force 1,000. Paramilitary forces number 3,000 men. El Salvador has a military bloc alliance with Guatemala and Nicaragua.

Economic Affairs

The economy is primarily agricultural. In 1975 agriculture provided 24 per cent of the G.D.P., 60 per cent of foreign exchange earnings and 53 per cent of employment. The principal crop is coffee, accounting for one-third of the value of agricultural production. Other products are cotton, maize, rice and sugar. High priority continues to be given to agricultural development and diversification. In 1975 a Land Transformation Law was passed to regulate land ownership and to bring into cultivation any land not adequately worked but it is being implemented very slowly. Commercial fisheries have been established and fish and shellfish are the third biggest export earner. The International Development Bank is to finance 13 million of the 16 million colones fishing development programme scheduled for completion in 1982.

El Salvador is the most highly industrialized country in the CACM. Manufacturing accounts for 17 per cent of the G.D.P. and 23 per cent of total foreign exchange earnings. Food processing, textiles, clothing and other light industry account for most industrial activity. There are plans to develop the cement, chemical, textile and steel industries, and high priority has been given to the development of small industries. The Government is seeking to attract foreign investment through the establishment of free-trade zones. The first is at San Bartolo. With an annual population growth rate of 3.6 per cent, one of El Salvador's most intractable problems is to provide employment for the labour force, and the development of the industrial sector is seen as a way of doing so.

The 1973-77 Plan called for a 6.7 per cent annual average growth rate but in 1975 the G.D.P. increased by only 4.3 per cent owing to the world recession, low commodity prices and adverse weather. In 1975 the inflation rate was 15 per cent, due mainly to price increases for imports, particularly oil, and excessive liquidity, but was reduced to 10 per cent in 1976. The economy recovered in 1976, due mainly to a better performance by coffee and cotton and higher commodity prices.

The country's trade has been seriously affected by the dispute with Honduras and the latter's withdrawal from the Central American Common Market, of which El Salvador is a member. El Salvador is also a member of SELA and the IADB.

EL SALVADOR

Transport and Communications

The transport network is well developed. There are about 600 km. of railways. The Pan American Highway bisects the country and a parallel coastal highway with interconnecting roads is under construction. The chief port is Acajutla, where improvements costing 12m. colones are under way. La Unión and La Libertad also provide good port facilities. There is an international airport at Ilopango and another is to be completed at Cuscatlán by 1979 at a cost of U.S. \$46 million.

Social Welfare

The social welfare system provides for medical services and benefits for industrial injuries, sickness, maternity and old age. In 1976 10.4 million colones was allocated to health and welfare from the budget and in 1977 34 million colones was invested in constructing and expanding hospitals and health centres.

Education

There are about 3,500 public and private schools with over 600,000 pupils, a national university with over 24,000 students, and a private university with over 2,500 students. The budgetary allocation for education was 216 million colones in 1976.

Tourism

El Salvador was one of the centres of the ancient Mayan civilization and the ruined temples and cities are of great interest. The volcanoes and lakes of the uplands provide

THE CONSTITUTION

The Constitution of January 1962 provides for a republican, democratic and representative form of government, composed of three Powers—Legislative, Executive, and Judicial—which are to operate independently. Voting is a right and duty of all citizens over eighteen years of age. Presidential and congressional elections may not be held simultaneously.

The Constitution binds the country, as part of the Central American Nation, to favour the total or partial reconstruction of the Republic of Central America. The Executive may, with the approval of the Legislature, endeavour to bring this about in a federal or unitary form, without seeking the approval of a constituent assembly, provided that republican and democratic principles are respected and the basic rights of individuals and of groups fully guaranteed in the new State.

LEGISLATIVE ASSEMBLY

The Legislative Power is vested in a single Chamber, the Legislative Assembly, whose members are elected every two years and are eligible for re-election. The Assembly meets in ordinary session on June 1st and December 1st. Extraordinary sessions may be convened by the Executive or by the Permanent Commission. The Assembly's duties include the choosing of the President and Vice-President of the Republic from the two citizens who shall have gained the largest number of votes for each of these offices, if no candidate obtains an absolute majority in the election. It also selects the members of the Supreme and subsidiary courts; of the Elections Council; and the Accounts Court of the Republic. It fixes taxes; gives power to the Executive to negotiate internal and external

loans; sanctions the Budget; regulates the monetary system of the country; determines the conditions under which foreign currencies may circulate; and suspends and re-imposes constitutional guarantees. The right to initiate legislation may be exercised by the Assembly (as well as by the President through his ministers and by the Supreme Court). The Assembly may over-ride by a two-thirds majority the President's objections to a Bill which it has sent to him for approval.

PRESIDENT

The President is elected for five years, his term beginning and expiring on July 1st. The principle of alternation in the presidential office is established in the Constitution, which states the action to be taken should this principle be violated. The Executive is responsible for the preparation of the Budget and its presentation to the Assembly; the direction of foreign affairs; the organization of the armed and security forces; and the convening of extraordinary sessions of the Assembly. In the event of his death or incapacity, the Vice-President takes his place for the rest of the presidential term; and in case of necessity, the Vice-President may be replaced by one of the three Designates elected by the Legislative Assembly for a period of two years.

JUDICIARY

The Judicial Power is exercised by a Supreme Court and by other competent tribunals. The Supreme Court is composed of ten members elected by the Legislature. It alone is competent to decide whether laws, decrees and regulations are constitutional or not.

EQUATORIAL GUINEA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Equatorial Guinea consists of the islands of Macías Nguema Biyogo (formerly Fernando Póo), Corisco, Great Elobey and Small Elobey, and Pígalu (formerly Annobón) and the mainland territory of Río Muni, on the west coast of Africa. Cameroon lies to the north and Gabon to the east and south of Río Muni, while Macías Nguema Biyogo lies offshore from Cameroon and Nigeria. The small island of Pígalu lies far to the south, beyond the islands of São Tomé and Príncipe. The climate is hot and humid with average temperatures over 26°C (80°F). The official language is Spanish. In Río Muni the Fang language is spoken, as well as those of coastal tribes such as the Combe and Bujeba, while in Macías Nguema Biyogo the principal local language is Bubi, though pidgin English and Ibo are also widely understood. The main religion is Catholicism. The national flag (proportions 3 by 2) has green, white and red horizontal stripes, with a light blue triangle at the hoist. The state flag has, in addition, the national coat of arms on the white stripe. The capital is Malabo.

Recent History

After 190 years of Spanish rule independence was declared in October 1968, following a referendum on the proposed constitution. In presidential elections held in September 1968 the Prime Minister of the autonomous government, Bonifacio Ondo Edu, was defeated by Francisco Macías Nguema. Macías formed a coalition government from all the parties represented in the new National Assembly. Relations with Spain became strained early in 1969 after a series of anti-European incidents and an attempted *coup d'état* by the Foreign Minister, Atanasio Ndongo Miyone, who was killed. The President announced in July 1972 that he had been appointed Life President. Relations with Gabon deteriorated when the latter extended its territorial waters to 270 km. in August 1972. After armed incidents off Corisco Island, said to be a training camp for dissidents of Cameroon, Gabon and the Central African Republic, Gabon and Equatorial Guinea agreed to accept OAU mediation in their dispute, and a reconciliation between the two countries was effected in 1973. A new constitution, giving absolute powers to Pres. Macías and abolishing the provincial autonomy previously enjoyed by Fernando Póo (now Macías Nguema Biyogo), was adopted in July 1973. In 1974 there were reports of several attempted *coups d'état*, the leaders of which have been executed. President Macías has control of the radio and press and all citizens are forbidden to leave the country. No foreign press correspondents are allowed to enter the country. It is estimated that over 100,000 refugees have left since 1969. There are reports of official security purges of opposition leaders, educated elites and the Catholic clergy. Further arrests of leading civil servants were reported in December 1976.

There have been Nigerian immigrants working in Equatorial Guinea for about 50 years but in 1976 the Nigerian Government stopped any new recruitment of workers and began to repatriate their citizens after reports of maltreat-

ment and slavery. In March 1976 manual labour was made compulsory for all nationals over the age of 15. Equatorial Guinea's relations with its francophone neighbours in Central Africa and with Uganda are improving. In January 1975 a treaty of friendship and co-operation was signed with the Central African Republic. In September 1977 the President visited the Democratic People's Republic of Korea, Viet-Nam and the People's Republic of China. Equatorial Guinea is a member of the OAU and the UN.

Government

Under the 1973 constitution, the President has absolute power. The legislature was dissolved in 1971.

Defence

There is a small army, with a number of Cuban advisers.

Economy

The economy is based almost entirely on agriculture, the principal products being cocoa, coffee, palm oil, bananas and okoumé timber. About 90 per cent all cocoa production comes from Macías Nguema Biyogo. Coffee and timber are produced mainly in Río Muni, which is heavily forested. Since the departure of the Nigerian workers the economic situation has deteriorated. It is estimated that the 1976/77 cocoa crop reached only 16,000 metric tons, compared with 38,207 tons in 1966/67. Industry is minimal. American and Spanish companies are exploring for petroleum, both onshore and offshore. French contractors have enlarged and modernized the port of Bata. Chinese, French and Spanish missions provide technical assistance in agriculture and forestry and 50-year interest-free loans have been made by China. Spain provides budget subsidies and other forms of financial support, and a guaranteed import quota for cocoa at fixed prices. United Nations aid programmes are co-ordinated by the UN Development Programme, which maintains a bureau in Malabo. The African Assistance Fund of the Arab oil-producing states has loaned \$500,000.

Transport and Communications

Main roads link the principal centres in the two provinces with about 160 km. of road on Macías Nguema Biyogo and about 1,015 km. in Río Muni. The principal communications between the provinces are by air. The main harbour is Malabo, which has regular services to Europe. There are no railways. Letter and parcel post services exist only for incoming mail.

Social Welfare

Health services are extremely limited and diseases such as malaria and dysentery are endemic. In 1971 the country had only 25 physicians.

Education

Elementary schools provide compulsory education until the age of 12, and primary schools continue it until 14. Secondary education is provided by one centre in Malabo, another at Bata and a third in the Río Muni frontier

outpost of Ebebiyin. Bata has a technical secondary school. Malabo also has an Escuela Superior. Bata and Malabo each have a teacher-training school. The exodus of qualified teachers since 1969 has resulted in very little available schooling.

Tourism

Tourism is not encouraged. Entry of Spanish nationals is subject to an authorization from the Ministry of Foreign Affairs in Malabo.

Public Holidays

1978: May 1st (St. Joseph the Worker), May 4th (Ascension), May 25th (Corpus Christi), August 15th (Assumption), November 1st (All Saint's Day), December 25th (Christmas).

Since 1972 there has been virtually no information emerging from Equatorial Guinea, and no journalists are allowed to enter the country.

1979: January 1st (New Year), January 6th (Epiphany), March 5th (Independence, anniversary of 1969 crisis), April 13th-16th (Easter).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 céntimos = 1 ekuele.

Exchange rate (December 1977):

1 ekuele = 1 Spanish peseta;

£1 sterling = 150.5 ekuele;

U.S. \$1 = 82.2 ekuele.

STATISTICAL SURVEY

Area: 28,051 sq. km. (Río Muni 26,017 sq. km.).

Population: 245,989 (1960): Río Muni 183,377 (2,864 Europeans); Macías Nguema Byogo 62,612 (4,170 Europeans), including Pigalu 1,415; Malabo (capital) 37,237, Bata 27,024. Total estimated population 298,000 (June 30th, 1973).

The European population has decreased considerably since the March 1969 crisis, and there are now probably few Spaniards remaining.

Agriculture (1976—metric tons): Cassava 49,000, Sweet potatoes 30,000, Bananas 15,000, Cocoa beans 12,000, Coffee 5,000, Palm oil 4,500, Palm kernels 2,300 (all FAO estimates).

Livestock (1976): 4,000 cattle, 31,000 sheep, 7,000 goats.

Fishing: Annual catch 4,000 metric tons (FAO estimate for 1970-75).

Forestry (1975): Roundwood removals 934,000 cubic metres (fuel wood 384,000, industrial wood 550,000).

Electricity Production (1967): Macías Nguema Byogo 9,470,000 kWh., Río Muni 5,700,000 kWh.

Currency: 100 céntimos = 1 ekuele.

Coins: 5, 10 and 50 céntimos; 1, 2½, 5, 25, 50 and 100 ekuele.

Notes: 1, 5, 25, 50, 100, 500 and 1,000 ekuele.

Exchange rates (December 1977): 1 ekuele = 1 Spanish peseta; £1 sterling = 150.5 ekuele; U.S. \$1 = 82.2 ekuele. 1,000 ekuele = £6.64 = \$12.16.

Note: The Guinea peseta was renamed the ekuele in September 1975. It remains at par with the Spanish peseta.

Budget (1970): Recurrent revenue 709.4 million pesetas, recurrent expenditure 589.3 million pesetas; development expenditure 589.3 million pesetas.

Balance of Payments (million SDRs, 1973): Merchandise trade -1.33, Services 0.36, Transfers -0.15, Total current account -1.22; Capital account 6.66, Net errors and omissions -0.63; Increase in reserve assets 4.81.

External Trade (million pesetas, 1970): Imports c.i.f. 1,472.1; Exports f.o.b. 1,740.9.

Transport (1967): *Shipping:* ships entering 663, ships leaving 663; *Civil Aviation:* passengers arriving Santa Isabel 13,863, passengers leaving Santa Isabel 14,166; passengers arriving Bata 7,350, passengers leaving Bata 7,681.

Education: (1970) 31,600 pupils enrolled in primary schools; 6,014 enrolled in secondary schools.

THE CONSTITUTION

On July 14th, 1972, President Macías Nguema was appointed Life President by the Assembly and the Council of the Republic.

Under the provisions of the July 1973 constitution which replaced the independence constitution, no further distinction will be made between the mainland province of the former Spanish colony, Río Muni, the chief island

of Macías Nguema Byogo to the north, and various other islands which make up the state of Equatorial Guinea. This move followed certain separatist tendencies voiced on Macías Nguema Byogo which were unanimously deplored by the Congress. It was also decided to reshuffle the administration on the island, posting more mainland officials there, and more islanders to the continent, to counteract the divisions.

THE GOVERNMENT

HEAD OF STATE

Life President, Minister of Defence and Foreign Affairs: FRANCISCO MACÍAS NGUEMA.

(Elected September 29th, 1968; proclaimed Life President July 14th, 1972).

Since 1974 there has been no information available on the composition of the cabinet except for the reported deaths of several cabinet ministers.

NATIONAL ASSEMBLY

The 35-member Assembly, elected in September 1968, was dissolved in 1971.

POLITICAL PARTIES

All parties were merged in February 1970 into a Partido Unico Nacional under the President of the Republic, who has assumed most of the powers of the former rival leaders. The party was later renamed the Partido Unico Nacional de los Trabajadores (PUNT).

In 1974 the Alianza Nacional de Restauración Democrática was founded in exile and is based in Geneva, Switzerland. Its publication, *La Voz del Pueblo*, first appeared in November 1976.

United Kingdom: Yaoundé, Cameroon.

The following countries have also established diplomatic relations with Equatorial Guinea: Cameroon, the Central African Empire, Czechoslovakia, the German Democratic Republic, Ghana, Hungary, Mexico, Romania, the U.S.S.R., Yugoslavia.

The U.S.A. suspended its diplomatic relations with Equatorial Guinea in March 1976 and Spain broke off diplomatic relations in March 1977. The Cuban mission was closed in 1976 but technical and military advisers have remained in the country.

JUDICIAL SYSTEM

An independent and secure judiciary is theoretically guaranteed by the constitution. The Supreme Tribunal at Malabo is the highest court of appeal.

RELIGION

Some Africans retain traditional forms of worship.

Both Spanish bishops were expelled in 1973 as were the Spanish nuns of the Immaculate Conception, following disagreement with Government policies. Most Catholic schools have either been closed or are under the control of the PUNT. It has since been reported that all Catholic nuns and priests in Equatorial Guinea have been arrested.

All meetings, processions and religious gatherings are forbidden.

TRANSPORT

ROADS

Macías Nguema Byogo: a semi-circular tarred road serves the northern part of the island from Malabo down to Batete in the west and from Malabo to Bacake Grande in the east, with a feeder road from Luba to Moka and Bahía de la Concepción; total length about 160 km.

Río Muni: a tarred road links Bata with Río Benito in the west; another road, partly tarred, links Bata with the frontier post of Ebébiyin in the east and then continues into Gabon; other earth roads join Acurenam, Mongomo de Guadalupe and Nsork; total road network about 1,015 km.

SHIPPING

The main ports are Malabo (general cargo), Luba (bananas), Bata (general cargo), Río Benito and Puerto Iradier (timber).

Compañía Transmediterránea: serves Barcelona-Cádiz-Malabo-Luba-Bata route and the Bilbao-Cádiz-Equatorial Guinea route, sailing alternately from Barcelona and Bilbao, usually once a month.

CIVIL AVIATION

There are international airports at Bata and Malabo.

Líneas Aéreas Guinea Ecuatorial (LAGE): Avda. Independencia S/N, Malabo; f. 1970 as a subsidiary of Iberia (the Spanish airline); scheduled services from Malabo to Bata and Douala (Cameroon), formerly flown by Iberia; fleet of two Convair CV-440.

Cameroon Airlines also links Bata with Douala, and Iberia and Aeroflot also serve Equatorial Guinea.

ETHIOPIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Socialist Ethiopia extends inland from the Red Sea coast of Africa. It has a long frontier with Somalia near the Horn of Africa. Sudan lies to the west and Kenya to the south. The climate is mainly temperate because of the high plateau terrain, with an average annual temperature of 13°C (55°F), abundant rainfall and low humidity. The lower country and valley gorges are very hot. The official language is Amharic but English is widely used, and Arabic is spoken in the Eritrea province. The Ethiopian Coptic Church has a wide following in the north and on the southern plateau. In much of the south and east there are Muslims and followers of animist beliefs. The national flag (proportions 3 by 2) has three horizontal stripes of green, yellow and red. The capital is Addis Ababa.

Recent History

Ethiopia was dominated for over 50 years by Haile Selassie, who became Regent in 1916, King in 1928 and Emperor in 1930. He ruled the country, except during the Italian occupation of 1936-41, until his deposition by the armed forces in September 1974 in the wake of serious regional famine, inflation and unemployment and growing demands for democratic reform. The Emperor's rule was highly personal and autocratic, but he consolidated the expansion of Ethiopian territory and the gradual process of national modernization begun by the Emperor Menelik (1865-1913). Under Haile Selassie, the former Italian colony of Eritrea was merged with Ethiopia, in a federal arrangement, in September 1952. Eritrea's federal status was ended in November 1962, when it was annexed to Ethiopia as a province. Haile Selassie was a leading exponent of pan-Africanism and a founding member of the OAU, which has its headquarters in Addis Ababa. He died a captive of the present military regime in August 1975.

The revolution of September 1974 was engineered by an Armed Forces Co-ordinating Committee, known popularly as the Derg, which originally had 120 anonymous members, and which still controls ultimate power. The Derg established a Provisional Military Government (PMG), headed by Lt.-Gen. Aman Andom. In November, after a dispute in the military leadership, Gen. Andom was deposed and shot. The PMG was replaced by a Provisional Military Administrative Council (PMAC), led by Brig.-Gen. Teferi Benti; the monarchy was abolished in March 1975.

In December 1974 Ethiopia was declared a socialist state and a national programme called Ethiopia Tikkem (Ethiopia First) was outlined and carried out the following year. Insurance companies, banks, financial institutions, large industries, rural and urban land and schools were nationalized, while peasant co-operatives and industrial workers' councils were established. A national work campaign was launched whereby over 60,000 students were obliged to spread literacy and social reform in the provinces until September 1976.

The strains within the Derg were reflected by its reorganization in December 1976. In an attempt to reduce the powers assumed by the two Vice-Chairmen of the PMAC, Lt.-Cols. Mengistu Haile Mariam and Atnafu Abate, those of its Chairman, Brig.Gen. Teferi Benti, were increased and the functions of the various branches of the Government more clearly defined. However, in February 1977, Lt.-Col. Mengistu killed Gen. Teferi Benti and his closest associates and replaced him as chairman of the PMAC and Head of State. In November Lt.-Col. Atnafu Abate was executed on charges of "sabotaging the revolution". The Government also faces opposition from the civilian left, especially students and trade unionists, who want an immediate return to democracy and civilian rule, and from conservatives in the Ethiopian Democratic Union (EDU) who resent the imposition of socialism and radical land reform.

A state of emergency was declared late in 1975, when a general strike was called for by the Confederation of Ethiopian Labour Unions (CELU). Widespread unrest continued throughout 1976 despite some conciliatory moves by the Derg, which replaced the CELU by the All-Ethiopia Trade Union, promised a return to civilian rule at an unspecified date and released some detainees. Since September 1976 the Government and its supporters have been under attack: in urban areas by Marxist guerrillas of the clandestine Ethiopian People's Revolutionary Party and in parts of western Ethiopia by units of the EDU. These have been ruthlessly assailed by counter-insurgency forces, including armed members of the kebelles (urban dwellers' associations) and peasant associations. Until July 1977 the Derg was assisted by Me'ei Sone (the All-Ethiopia Socialist Movement) but has also formed its own party, Seded (Revolutionary Flame), and the Provisional Office for Mass Organizational Affairs to enlist civilian support.

Numerous secessionist movements, encouraged by the confusion created by the revolution, seek the destruction of the empire created by Menelik and Haile Selassie. These are strongest in Eritrea and in the Ogaden region, claimed by Somalia. By December 1977, after 16 years of intermittent struggle, the three guerrilla movements in Eritrea controlled over 80 per cent of the province, leaving a demoralized Ethiopian army in control of Asmara and a few other towns. Loss of the province would leave Ethiopia landlocked. In July 1977 Somalia reinforced the guerrillas of the Western Somali Liberation Front in the Ogaden with its regular forces. After fierce fighting Somali forces captured the strategically vital towns of Jijiga and Harar by the end of November.

Ethiopian efforts to defeat the secessionists have been hampered by its diplomatic isolation from its neighbours: only Kenya and the People's Democratic Republic of Yemen support the Derg. After Mengistu's coup in February 1977 the U.S.S.R. supplanted the U.S.A. as Ethiopia's principal arms supplier and the Derg gained diplomatic and military support from the eastern bloc, Libya and Cuba.

Government

Socialist Ethiopia has been ruled since November 1974 by a Provisional Military Administrative Council (PMAC), chaired by the Head of State. In December 1976 and February 1977 the PMAC was restructured. A General Congress comprising all members of the PMAC, or Derg (whose original 120 members were reduced to about 50), decides policy; a Central Committee of 32, elected by the Congress, has specific economic and diplomatic powers; and a Standing Committee of 16, elected from the Central Committee by the Congress, has political, legal and diplomatic powers. The powers of the largely civilian Council of Ministers, appointed by the PMAC, are closely defined. The Chairman of the PMAC presides over each of its three sections, is Chairman of the Council of Ministers, Head of State and Commander-in-Chief of the armed forces. In July 1977, in response to the worsening military situation, a National Revolutionary Operations Command, chaired by the Head of State, was formed. This has co-ordinating committees at regional, provincial and district levels. Local government is carried out by kebelles (urban dwellers' associations) and peasant associations. These have elected committees of 15 members and extensive administrative and judicial powers; in October 1976 the kebelles were empowered to appoint mayors. There are 291 kebelles in Addis Ababa and about 25,000 peasant associations throughout much of the country. Most of Eritrea, much of the Ogaden and parts of the rest of Ethiopia are no longer under government control.

Defence

Military service is compulsory. Ethiopia maintains a regular army of 50,000 men, an air force of 2,000 and a navy of 1,500. There is also a People's Militia of at least 75,000 men. Ethiopia receives arms from the U.S.S.R. and there are a number of Cuban military advisers in the country.

Economic Affairs

The economy is mainly agricultural and pastoral with agricultural products constituting almost all the country's exports, most of which are accounted for by coffee. Other important exports are hides, skins, pulses and oilseeds. Fishing and forestry are still small-scale activities. More than 40 per cent of cash crops are produced on the 118 government-controlled commercial farms and estates. A radical land reform programme to stimulate agricultural development by breaking down the feudal system of tenure was initiated in 1975 after all land had been nationalized, with the result that many farms are now run on a communal basis, with over 25,000 peasant associations covering much of the country. Nevertheless, 45 per cent of production is at subsistence level. Soil erosion, due to poor agricultural techniques, deforestation and overgrazing, is an increasing problem.

Industry contributes less than 6 per cent to the G.D.P. of Ethiopia and is mainly confined to food processing and the manufacture of textiles and goods for local consumption. Half of Ethiopia's industry is in Eritrea. Ethiopia has almost no minerals. In 1975 banks, insurance companies and many large industrial concerns were nationalized, the latter to be administered by 10 state corporations under the Ministry of National Resources Development,

and in 1976 a private enterprise decree regulated the functioning of the private sector.

Economic development is hampered by lack of adequate transport and communications, trained manpower and financial investment, and by the dislocations caused by political change. However, if the land reform programme is successful, Ethiopia will come closer to full exploitation of its great agricultural potential.

Severe food shortages persisted throughout 1977 after the failure of the 1976 autumn rains. In addition to widespread crop shortfalls, rural disruption led to U.S. \$40 million worth of crops being left to rot in the fields. Import controls imposed in 1976 continued and petrol rationing was introduced in August 1977. Heavy expenditure on defence and security created further deficit budgeting in 1976/77. Overseas economic aid included a U.S. \$20 million loan for industrial plant from the German Democratic Republic in November 1977 and famine aid totalling U.S. \$2 million in December 1977. Ethiopia is rated by the UN as one of the world's 10 poorest countries.

Transport and Communications

There is a railway from Addis Ababa to the port of Djibouti, in the neighbouring Republic of Djibouti, and a narrow-gauge track from Massawa to Akordat near the Sudan border. There are 9,048 km. of all-weather roads out of a total system of 23,520 km. of roads. The highway system is under rapid expansion, mainly financed by foreign loans. A highway links Addis Ababa with Nairobi, in Kenya. Bus services link provincial centres to the capital. There are 33 airfields. The port of Assab can handle up to a million tons of goods per year. Communications, particularly between Addis Ababa and the Red Sea, have been severely disrupted by the guerrilla campaign in Eritrea and the war in the Ogaden.

Social Welfare

The scope of modern health services has been greatly extended since 1960, but they still reach only a small part of the population. In 1972 Ethiopia had only 350 physicians (one for every 73,000 inhabitants) and 85 hospitals with a total of 8,415 beds. With foreign assistance, health centres and clinics are steadily expanding into the rural areas, but in the recent famine Ethiopian health services were totally inadequate. In May 1977 the Felege Heiwot hospital on the shores of Lake Tana was completed with assistance from the Federal Republic of Germany. In January 1977 free medical care for the needy was introduced.

Education

Education in Ethiopia is free. However, only about 11 per cent of eligible children attend schools, of which there are few in rural areas and still fewer outside the Amharic areas. Thus little progress has been made in reducing the illiteracy rate of about 95 per cent, and the shortage of educated personnel is a serious brake on economic development. The universities at Addis Ababa and Asmara have frequently been closed since 1974 and many students have been killed. Most primary and secondary schools have hardly functioned since 1972 and were nationalized in 1975. Since September 1976 they have been controlled by local peasant associations and urban dwellers' associations.

ETHIOPIA

Introductory Survey, Statistical Survey

Tourism

The chief tourist attractions are big game hunting, the early Christian monuments and churches and the ancient capitals of Gondar and Axum. The 1970 total of 53,187 visitors rose to an estimated 80,000 in 1972. Tourism has been adversely affected by political uncertainty since 1974.

Visas are required by all visitors.

Sport

Football, athletics, cycling, basketball, swimming, boxing, horse-riding and tennis are all popular sports.

Public Holidays

1978: May 1st (May Day), September 12th (New Year's Day), September 4th (Id ul Fitr, end of Ramadan), September 13th (Popular Revolution Commemoration Day), September 28th (Feast of the True Cross),* November 11th (Id ul Adha/Arafat).

1979: January 7th (Christmas),* January 19th (Epiphany),* February 10th (Mouloud, Birth of the Prophet), March 3rd (Battle of Adowa), April 6th (Victory Day), April 13th-16th (Easter).

* Coptic calendar.

(Note: Ethiopia uses its own solar calendar; the Ethiopian year 1970 began on September 11th, 1977).

Weights and Measures

The metric system is officially in use. There are many local weights and measures.

Exchange rates (December 1977): £1 sterling = 3.8196 birr; U.S.\$1 = 2.0855 birr.

100 birr = £26.18 = U.S. \$47.95.

Note: The birr was introduced in October 1976, replacing (at par) the Ethiopian dollar (E\$). Between January 1964 and August 1971 the par value of the Ethiopian dollar was 40 U.S. cents (U.S. \$1 = E\$2.50). From December 1971 to February 1973 the central exchange rate was U.S. \$1 = E\$2.3026 and the market rate U.S. \$1 = E\$2.3199. In February 1973 the central rate became U.S. \$1 = E\$2.0724 and the market rate U.S. \$1 = E\$2.0855. In terms of sterling, the central exchange rate between November 1967 and June 1972 was £1 = E\$6.00.

PARLIAMENT

(Suspended by military decree in September 1974.)

POLITICAL PARTIES

Political parties were banned by the military government in 1974 although in 1976 it announced plans to allow the formation of political parties in the near future. A Provisional Office for Mass Organization Affairs (POMOA) has been established to politicize the people and help them form a revolutionary party.

In 1977 Sedede replaced Me'ei Sone as the most important party receiving government support. These include:

Eech-At (*Revolutionary Movement for the Oppressed*).

Malerid (*Marxist-Leninist Organization*).

Sedede (*Revolutionary Flame*): Addis Ababa; f. 1977; pro-government Marxist-Leninist party with a following in the Ethiopian army; Chair. Lt.-Col. MENGISTU HAILE MARIAM.

Woz Ader (*Labour League*).

Clandestine opposition parties include the following:

Ethiopian Democratic Union (EDU): f. 1975; anti-Marxist and includes some former supporters of Haile Selassie; maintains irregular forces in Begemder, Gojam and Wollega provinces; Leader Gen. IYASSU MENGESHA; Sec.-Gen. TĒSFAI WOLDEMICHAEL.

Ethiopian People's Revolutionary Party (EPRP): Addis Ababa; f. 1972; Marxist; seeks a return to civilian government; a military wing, the Ethiopian People's Revolutionary Army, operates in some urban areas, including Addis Ababa; publs. *Democracia*, *Labader* (the Proletariat).

Me'ei Sone (AESM) (*All-Ethiopia Socialist Movement*): Addis Ababa; Marxist; supported the Derg until August 1977; Leader HAILE FIDA (under arrest).

SEPARATIST GROUPS

The following separatist groups are in armed conflict with the Ethiopian Government:

Afar Liberation Front (ALF): operates in Harar and Wollo provinces; Leader ALI MIRAH.

Eritrean Liberation Front (ELF): P.O.B. 7091, Beirut, Lebanon (Foreign Information Centre); f. 1958; largely Moslem support; maintains Eritrean Liberation Army of 10-20,000 men and women; Chair. AHMED MUHAMMAD NASSER; publ. *The Eritrean Struggle* (Tigrinya/Arabic).

Eritrean Liberation Front—Popular Liberation Forces (ELF—PLF): a breakaway from the EPLF; Sec.-Gen. OSMAN SALEH SABBE.

Eritrean People's Liberation Front (EPLF): f. 1970 as a breakaway from the ELF; Marxist; Christian and Muslim support; maintains Eritrean People's Liberation Army (EPLA) of 10-20,000 men and women; Sec.-Gen. RAMADAN MOHAMMED NUR.

Oromo Liberation Front (OLF): operates among the Oromo (or Galla) people in Shoa province.

Somali Abo Liberation Front: operates in Bale province.

Somali Fatherland Liberation Front: Mogadishu, Somalia; f. 1977 to succeed the Western Somali Liberation Front (f. 1975); aims to unite the Ogaden region with Somalia; maintains guerrilla forces of c. 3,000 men supported by regular Somali forces; Sec.-Gen. ABDULLAH HASSAN MAHMOUD; publ. *Danab* (Lightning).

Tigre People's Liberation Front (TPLF): Marxist; operates in Tigre province.

In October 1977 it was announced that the three Eritrean movements had decided to form a common military and political front.

FIJI

INTRODUCTORY SURVEY

Location, Climate, Religion, Flag, Capital

Fiji comprises over 800 islands, of which 100 are inhabited, situated about 1,200 miles south of the equator in the Pacific Ocean. The climate is tropical with temperatures ranging from 16° to 32°C (60°–90°F). In 1966 about 51 per cent of the population were Christians, 40 per cent Hindus and 8 per cent Muslims. The national flag (proportions 2 by 1) is light blue, with the United Kingdom flag as a canton in the upper hoist. In the fly is Fiji's national shield. The capital is Suva.

Recent History

Fiji voluntarily ceded itself to the United Kingdom in 1874 and remained a British possession until 1970. In 1966 a constitution was introduced which provided for a ministerial form of government, an almost wholly elected Legislative Council and an enlarged franchise. Ratu Sir Kamisese Mara, leader of the multi-racial (but predominantly Fijian) Alliance Party, was appointed Chief Minister in 1967 and on independence (October 10th, 1970) became Prime Minister. His party won the general election of April 1972 and he has continued to hold the office.

Before independence Fiji was troubled by racial tensions. The descendants of Indian workers brought to Fiji in the late nineteenth century had grown to outnumber the native inhabitants but were discriminated against in political representation and land ownership rights. A new electoral system was adopted in 1970 to ensure a racial balance in the legislature and in 1976 a Royal Commission published a report recommending changes designed to remove some racial distinctions while preventing any single racial group from gaining overwhelming political advantage; the Government, however, rejected these recommendations.

At the general election held in March and April 1977 the National Federation Party (NFP), traditionally supported by the Indian population, won 26 of the 52 seats in the House of Representatives but was unable to form a government and subsequently split into two factions. The Alliance Party governed in a caretaker capacity until another election in September, when it was returned with its largest ever majority. While these two main parties profess multi-racial ideas, the Fijian Nationalist Party campaigned on a "Fiji for the Fijians" platform in order to foster nationalist feeling.

Government

The Head of State is the British sovereign, who is represented by an appointed Governor-General. He is required to act in accordance with the advice of government ministers except in certain constitutional functions. The Prime Minister, who heads the Cabinet, is chosen by the House of Representatives.

The House of Representatives is elected for five years by voting on national and communal rolls divided into three categories: Fijian, Indian and General (those ineligible for the first two rolls). Twelve Fijians, 12 Indians and 3 General members are elected on the communal rolls. Ten Fijians, 10 Indians and 5 General members are elected on the national rolls.

The Senate is an appointed Upper House. In this, eight members are appointed by the Great Council of Fijian Chiefs; seven by the Prime Minister; six by the Leader of the Opposition; and one by the Council of Rötuma (Island). Senators serve a six-year term.

Defence

The Royal Fiji Military Forces consist of men in the regular army, the Naval Squadron, the conservation corps and the territorials. The conservation corps was created in 1975 to make use of unemployed labour in construction work.

Economic Affairs

The economy is basically agricultural, with sugar as the main crop. The instability of the international sugar market seriously affected the Fijian economy in the mid-1970s but, as a signatory of the Lomé Convention since 1975, Fiji benefits from the Convention's subsidies and trade provisions. The International Sugar Agreement, in force from January 1978, is also expected to boost the industry. The United Kingdom is Fiji's principal trade partner, taking some 20 per cent of exports in 1976; and Australia, New Zealand, Malaysia and Singapore are also important customers. Tourism is developing with some difficulty but is still the second largest source of foreign exchange earnings, accounting for receipts of \$F76 million in 1976. Next in importance are gold and coconut products. In an effort to diversify the economy and reduce the trade deficit (\$F92 million in 1976), domestic industries such as cement, timber and cigarettes are being encouraged by income tax concessions and export incentive reliefs. The seventh Five-Year Development Plan (1976–80) aims to expand production and develop the infrastructure, and gives priority to agriculture. Despite a period of industrial unrest in 1977, agreement was reached on the need for a policy of wage restraint to combat inflation, which in 1976 fell to 10.8 per cent from the 13.7 per cent recorded in 1975.

Transport and Communications

Fiji lies on the main route between Australia and New Zealand and North America, and is the centre of communications in the southwestern Pacific. The international airport is at Nadi, about 130 miles from Suva. Suva Wharf and Lautoka Wharf were reconstructed in 1962 and 1963. In 1974 Suva handled 466,000 tons of cargo and Lautoka 402,879 tons. There are no main railways but 644 km. of narrow-gauge tracks carry sugar cane to the mills.

Social Welfare

Only government employees have a pension scheme but medical treatment is provided for all for a nominal charge. In 1971 Fiji had 26 hospitals with 1,513 beds (one bed for each 350 of the population). In the same year there were 256 physicians (one for every 2,070 people).

Education

Education is neither free, although it is subsidized by the Government, nor compulsory. In 1976 there were 641 state primary schools with an enrolment of 134,971 pupils

FIJI

and 109 state secondary schools with an enrolment of 28,072 pupils. There are 465 holders of Fiji government scholarships at the University of the South Pacific in Fiji.

Tourism

Scenery, climate and fishing attract visitors to Fiji and tourism is the island's second most important industry. In 1976 there were over 168,000 visitors and receipts were an estimated \$F76 million.

Visas are not required to visit Fiji by nationals or citizens of Commonwealth countries, EEC countries, Austria, Finland, Greece, Iceland, Indonesia, Israel, Japan, the Republic of Korea, Liechtenstein, Norway, the Philippines, Spain, Sweden, Switzerland, Taiwan, Thailand, Tunisia, Turkey, and the U.S.A.

Sport

Rugby and association football are both very popular.

FINANCE

100 cents = 1 Fiji dollar (\$F).

Coins: 1, 2, 5, 10, 20 and 50 cents.

Notes: 1, 2, 5, 10 and 20 dollars.

Exchange rates (December 1977): £1 sterling = \$F1.623; U.S. \$1 = 88.6 Fiji cents.

\$F100 = £61.61 = U.S. \$112.84.

Note: The Fiji dollar was introduced in January 1969, replacing the Fiji pound at the rate of £F1 = \$F2. From November 1967 the exchange rate was £1 sterling = £F1.045 (£F1 = U.S. \$2.2966) so the new rate was £1 sterling = \$F2.09, with the Fiji dollar valued at U.S. \$1.1483 (U.S. \$1 = 87.08 Fiji cents) until August 1971. The link with sterling was maintained and the exchange rate was \$F1 = U.S. \$1.2467 (U.S. \$1 = 80.21 Fiji cents) from December 1971 to June 1972, when the British currency was allowed to "float". The Fiji dollar also "floated", the exchange rate continuing at £1 = \$F2.09 until October 1972. The rate was £1 = \$F1.98 from October 1972 to September 1973; and £1 = \$F1.89 from September 1973 to February 1974. In February 1974 the link with sterling was broken and a new exchange rate of \$F1 = U.S. \$1.25 (U.S. \$1 = 80 Fiji cents) was established. This remained in effect until April 1975, since when the Fiji dollar has been valued in relation to a weighted "basket" of the currencies of the country's main trading partners. The average value of the Fiji dollar was U.S. \$1.213 in 1972; U.S. \$1.260 in 1973; U.S. \$1.244 in 1974; U.S. \$1.215 in 1975; U.S. \$1.108 in 1976.

The Overseas Departments (départements d'outre-mer) are integral parts of the French Republic, each administered by a Prefect, with elected General Councils and with elected representatives in the French National Assembly and Senate of the Republic in Paris. The administrative structure is the same as in other French Departments; however, Overseas Departments have their own Courts of Appeal.

FRENCH GUIANA

French Guiana lies on the coast of South America with Surinam to the west and Brazil to the south and east. The climate is humid, with a season of heavy rains from April to July and another short rainy season in December and January. The capital is Cayenne.

French occupation commenced in the early seventeenth century, and after periods of Dutch and English rule Guiana reverted to France in 1816. She gained departmental status in 1946.

The economy is based on forestry and agriculture; cassava, bananas, maize and other tropical crops are grown for local consumption, while sugar cane is the only cash crop of importance. There are vast timber reserves, which are exploited on a small scale, and important mineral resources, particularly of gold, bauxite and tantalite, from which extractive industries are being developed. Fishing has been increasing in importance since 1965 and is mainly for shrimps, most of which are exported to the U.S.A. The tourist industry is being expanded but facilities are not yet well developed.

GUADELOUPE

Guadeloupe is the most northerly of the Windward Islands in the east Caribbean; Dominica lies to the south, and Antigua and Montserrat to the north-west. Guadeloupe is formed by two large islands, Grande-Terre and Basse-Terre, separated by a narrow sea channel, with a smaller island, Marie-Galante, to the south-east. There are also a number of small dependencies. The capital is the town of Basse-Terre; the other main town and principal commercial centre is Pointe-à-Pitre on Grande-Terre.

Guadeloupe was first occupied by the French in 1635, and has been an integral part of the French Republic since 1815. She gained departmental status in 1946.

The economy is based on sugar cane, which is mainly exported to France, together with its by-products molasses and rum, and smaller amounts of bananas, vanilla and cocoa. As in the other island departments, there is considerable emigration; attempts are being made to create processing industries and to develop the tourist potential of the islands.

MARTINIQUE

Martinique is one of the Windward Islands in the east Caribbean, with Dominica to the north and St. Lucia to the south. The island is dominated by the volcanic peak of Mont Pelée. The population is of mixed origin, including some descendants of immigrants from the former French Indo-China. The capital is Fort-de-France.

Martinique became an integral part of the Republic in 1790 and gained departmental status in 1946.

The economy is agricultural, based on sugar cane and tropical fruits. There is extensive emigration to France and to a lesser extent to French Guiana, but there are also many Frenchmen from the mainland in service as civil servants. A number of tax exemptions are designed to encourage industrial and commercial development.

FRENCH OVERSEAS TERRITORIES

FRENCH POLYNESIA	page 378	MAYOTTE	page 380
FRENCH SOUTHERN AND ANTARCTIC TERRITORIES	380	NEW CALEDONIA	381
		WALLIS AND FUTUNA ISLANDS	383

The Overseas Territories (territoires d'outre-mer) are integral parts of the French Republic, each administered by a Governor, High Commissioner or Superior Administrator appointed by the French Government, a Territorial Assembly elected by universal suffrage and a Council of Government. Certain members of the Assembly sit in the National Assembly and Senate of the Republic in Paris. The Territories have varying degrees of internal autonomy.

Director of Overseas Territories: JEAN CHAUSSADE.

FRENCH POLYNESIA

An Overseas Territory since 1958, French Polynesia consists of the following South Pacific Islands: Iles du Vent (the chief of which is Tahiti), Iles Sous le Vent (which with the Iles du Vent constitute the Society Archipelago), Tuamotu-Gambier Archipelago, Austral Islands, Marquesas Archipelago. The 120 islands cover a wide area lying about two-thirds of the way from the Panama Canal to New Zealand. Copra is the major export. The Territory is administered by a High Commissioner appointed by the French Government.

Since May 1975 there has been an autonomist majority in the Territorial Assembly divided into several factions. The largest and most militant group, led by Francis Sanford, refused to co-operate with the French authorities until concessions had been made and in June 1976 they occupied the Territorial Assembly buildings. In September Sanford was re-elected Deputy to the French National Assembly and the occupation continued. The French Government finally agreed in November to an early dissolution of the Territorial Assembly and the introduction of a new statute for the islands in early 1977.

In February 1977 Francis Sanford informed the French Government in Paris that unless serious negotiations for increased local autonomy were begun, French Polynesia would seek immediate independence from France. Following negotiations in Paris, agreement was reached in March on a revised draft statute. The existing Territorial Assembly was dissolved and the newly-elected Assembly approved the draft statute.

Under the new statute France retains responsibility for foreign affairs, defence, monetary matters and justice, but the powers of the Territorial Government Council were increased, especially in the field of commerce. The French Governor was replaced by a High Commissioner who presides over the Council of Government and is head of the Administration, but has no vote. The Council's elected Vice-President, responsible for domestic affairs, was granted greater powers. An Economic and Social Committee, responsible for all development matters, was also created, and French Polynesia's economic zone has been extended to 200 nautical miles (370 km.) from the coastline.

Nuclear testing on Mururoa Atoll since 1970 has caused local unrest in Tahiti and protests from other Pacific nations.

MAYOTTE

Mayotte is one of the four main islands of the Comoros Archipelago which lie between the East African coast and Madagascar. Until 1975 Mayotte was part of a French Overseas Territory comprising the whole archipelago. In a referendum throughout the islands in December 1974, the Comorans voted overwhelmingly in favour of independence, but on Mayotte the vote was 65 per cent against.

Since the Comoros unilaterally declared independence in July 1975, Mayotte has been administered separately by France. The independent Comoran state claims Mayotte as part of its territory and officially represents it in international organizations, including the United Nations. France is introducing a special status for the island, under which it will be a "collectivité particulière", something

between an overseas territory and an overseas department. The new system of administration is to be fully operative by 1979. For further details of the recent history of the island, see the chapter on the Comoros (p. 237).

The economy of the island is entirely agricultural. Vanilla, ylang-ylang and copra are the main products. The island is dependent on French aid. In 1976 all aid originally intended for the whole archipelago was transferred to Mayotte alone.

STATISTICS

(Separate statistical information on Mayotte is not yet available. The statistics for the Comoros on pages 238 and 239 include Mayotte.)

FRENCH OVERSEAS TERRITORIES

Area: 375 sq. km. **Population:** (1976 estimate) 40,000.

Currency: 100 centimes=1 French franc. Coins: 1, 5, 10, 20 and 50 centimes; 1, 5 and 10 francs. Notes: 5, 10, 50, 100 and 500 francs. Exchange rates (December 1977): £1 sterling=8.84 francs; U.S. \$1=4.83 francs; 100 francs=£11.31=\$20.71.

GOVERNMENT

In a referendum in April 1976, the population of Mayotte voted to renounce the status of an overseas territory. They expressed their desire for departmental status, but this has been rejected by the French Government. The new status of the island, which should be fully operative

Mayotte, New Caledonia

by 1979, will involve the election of a Council with 17 members to assist the Prefect in administering the island. A further referendum may be held at some future date giving the population a choice between departmental status and independence.

Prefect: JEAN-MARIE COUSSIROU.

Senator: MARCEL HENRY.

Head of the Cabinet: M. BOISDAM.

POLITICAL PARTY

Mouvement Populaire Mahorais (M.P.M.): Dzaoudzi; advocates departmental status for Mayotte; Leader MARCEL HENRY.

NEW CALEDONIA

New Caledonia lies in the South Pacific, east of Queensland, Australia. Mining of nickel is the chief economic activity. The Territory is administered by a High Commissioner appointed by the French Government.

New Caledonian demands for a measure of self-government were answered in December 1976 by a new statute for the territory which increased the size of the Council of Government and gave it responsibility for certain internal affairs. This statute was denounced by the majority parties in the Territorial Assembly as inadequate and they refused to co-operate with the French authorities in the administration of the territory.

The elections held for the Territorial Assembly in September 1977 were dominated by the problems of relations with France. Eleven political parties won seats in the Assembly but none obtained a clear majority.

In December 1977 a general strike by nickel and dock workers was in progress; the strikers demanded greater employment control, recognition of trade union liberties and modification of strike legislation.

WALLIS AND FUTUNA ISLANDS

This self-governing French Overseas Territory comprises two groups: the Wallis Islands, including Uvea and 22 islets on the surrounding reef, and, to the southeast, Futuna (or Hooru), comprising the two small islands of Futuna and Alofi. Wallis and Futuna, located north of Fiji and west of Samoa, are inhabited by Polynesians.

A French Protectorate since 1888, the Islands chose by referendum in December 1959 to become an Overseas Territory. In July 1961 they were granted this status. In 1975 talks started on changing the status of the territory to that of an Overseas Department.

Copra, which formerly provided the main cash income for the islands, has been seriously affected by rhinoceros beetle; most monetary income on the island is derived from government employment and remittances sent home by islanders employed in New Caledonia.

Area (sq. km.): Wallis Island 159, Futuna Island and Alofi Island 115, total of all islands 274.

Population (census of March 26th, 1976): 9,192. Wallis Island 6,019 (chief town Mata-Utu), Futuna Island 3,173; Alofi Island uninhabited, about 11,000 Wallisians and Futunians live on New Caledonia and in the New Hebrides.

Agriculture: the principal export crop is copra. Yams, taros, bananas, arrowroot and other food crops are also cultivated.

Livestock (1976) 400 horses, etc., 100 cattle, 5,000 pigs.

Currency: 100 centimes=1 franc de la Communauté française du pacifique (franc CFP or Pacific franc). Exchange rates (December 1977). 1 franc CFP : 5.5 French centimes, £1 sterling : 160.80 francs CFP; U.S. \$1 : 87.77 francs CFP, 1,000 francs CFP : £6.22 \$11.39.

Budget (1977): 131,067,000 francs CFP.

External Trade (1976): *Imports*: 217 million francs CFP; *Exports*: n.a.

Aid from France (francs CFP, FIDES, 1971-1975): local section 273 million; General section 69 million.

GABON

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Gabonese Republic is an equatorial country on the west coast of Africa with Cameroon to the north and the Congo to the south and east. The climate is tropical, with an average temperature of 26°C (79°F) and an annual rainfall of 250 cm. The official language is French but Bantu dialects are widely spoken. About 60 per cent of the population are Christians, mainly Roman Catholics. Most of the others follow animist beliefs. The national flag (proportions 4 by 3) consists of horizontal green, gold and blue stripes. The capital is Libreville.

Recent History

Formerly a province of French Equatorial Africa, Gabon gained internal autonomy in 1957. In 1958 it joined the French Community and attained independence in August 1960. In February 1961, Léon M'Ba was elected the Republic's first President. Shortly before elections called for February 1964, a military *coup d'état*, led by Jean-Hilaire Aubame, a long-standing rival, deposed M'Ba. French intervention restored M'Ba to the Presidency, and elections held in April gave M'Ba's *Bloc démocratique gabonaise* (BDG) a large majority in the National Assembly; during the next two years most of the opposition joined the BDG. In 1967, M'Ba created the post of Vice-President, and when he died in November that year he was succeeded by his deputy, Albert-Bernard Bongo. In March 1968 the *Parti démocratique gabonais* (PDG) was set up and one-party government was formally instituted.

President Bongo has taken a hard line against any form of protest or dissent in the country. At the same time, every effort has been made to attract foreign companies and investors to Gabon. Since July 1972, however, the "Gabonization" of the economy has been undertaken. Foreigners have been replaced by Gabonese in positions of authority and the state has taken a share in the capital of foreign companies. In February 1973 the PDG won all 70 seats in the National Assembly and Bongo was re-elected president with 99 per cent of the votes cast. In April 1975 Bongo abolished the Vice-Presidency, replacing it by a new post of Prime Minister.

Bongo has pursued a policy of close co-operation with France in the fields of economic and foreign affairs. The visit of the French President Giscard d'Estaing in August 1976 reconfirmed this relationship and in 1977 Bongo made his first visit as chairman of the OAU to France.

In 1977 Benin accused Gabon of having aided the airborne mercenary attack on Cotonou in January and announced its intention of boycotting the OAU summit meeting scheduled to meet in Libreville in the summer. President Bongo strongly denied these accusations and the findings of international committees of investigation which implicated both Gabon and Morocco in the raid. Shortly before the meeting 300 Beninois living in Gabon were expelled to Nigeria, to forestall attempts to sabotage it.

In October 1973, under the influence of the Libyan leader, Col. Muammar al-Gaddafi, President Bongo was converted to Islam and changed his name to Omar Bongo. However, relations with Libya soon cooled and President Bongo rarely uses his adoptive name.

Government

The Constitution of 1967 vests executive power in the President, elected by universal adult suffrage for seven years. The President appoints, and presides over, a Council of Ministers. The legislative organ is the unicameral National Assembly of 70 members, also directly elected for a seven-year term. The country is divided into nine administrative regions, each under an appointed Prefect.

Defence

The army consists of one infantry battalion, the air force of one squadron, and there is a small navy. There is also a *gendarmérie nationale*.

Economic Affairs

Well over half of the population of Gabon is engaged in subsistence agriculture, largely untouched by the expansion of the market economy. There is a little commercial agricultural production, the main crops being palm oil, coffee, cocoa and bananas. For many years the economy was largely dependent upon forestry, particularly production of *okoumé*, a wood used in the making of plywood. Despite the expansion of forestry to avail of a favourable world timber market, mineral production has taken over as the leading activity since the late 1960s. Petroleum production, the fifth highest in Africa in 1976, is gradually decreasing, although exploration for new deposits continues. The manganese deposits at Moanda in the south form one of the world's richest sources. There are also plans for the exploitation of major iron ore deposits at Bélinga in the north-east. Other minerals produced are uranium and gold. The development of both forestry and mining is hampered by a lack of transport facilities. The Trans-Gabon railway, which was held up for several years by lack of financial backing, is now under construction and should solve the country's major transport problems. Gabon's manufacturing sector is relatively restricted, though it is being expanded. There is an oil refinery at Port-Gentil, currently being expanded to double its output, which serves the four states of the Customs and Economic Union of Central Africa (UDEAC), and there are important timber-processing plants.

Gabon is attempting to use the wealth created by oil revenues in developing mineral and timber exploitation and associated industries. Gabon became an associate member of the Organization of the Petroleum Exporting Countries (OPEC) in 1973, and a full member in 1975. In September 1976 Gabon withdrew from the Organization Commune Africaine et Mauricienne (OCAM). It was announced that membership of the specialized agencies would be retained but Gabon has since withdrawn from Air Afrique, the organization's multinational airline.

Gabon is an associate member of the EEC and a member of UDEAC.

Transport and Communications

There is a 76 km. cableway and a 296 km. railway line linking the manganese mines at Moanda with the Congo port of Pointe-Noire. Construction of the first stretch of the Trans-Gabon railway, from Owendo to Bououé, was begun in 1974. When completed, the railway will run from Owendo

GABON

to Bélinga in the north and Franceville in the south. There are over 3,000 km. of national roads and about 1,528 km. of regional roads. The widespread forests make air transport very important and there is an airport capable of handling jets at Libreville. The main rivers are navigable only from about 300 km. inland. There are two Atlantic ports at Libreville-Owendo and Port-Gentil.

Social Welfare

There is a national Fund for State Insurance, and a guaranteed minimum wage. In 1969 Gabon had 44 hospital establishments, with 4,995 beds. In 1971 there were 96 physicians. Maternal and infant health is a major priority.

Education

Education is undertaken by state and mission schools. In 1975 there were 734 primary schools with over 121,000 pupils, representing over 95 per cent of children of school age. In addition there are 77 secondary, technical and teacher training schools, and a university in Libreville. Many students go to France for university and technical training.

Tourism

Tourism is being extensively developed with new hotels and several important projects, including a "holiday

Introductory Survey, Statistical Survey

village" near Libreville opened in 1973, reorganization of Pointe-Denis tourist resort, and the promotion of national parks. By 1979 there are expected to be 1,600 hotel rooms in Libreville. Wild animals abound in the forests, and there is excellent hunting.

Public Holidays

1978: May 1st (Labour Day), May 4th (Ascension), May 15th (Whit Monday), August 15th (Assumption), August 17th (Independence Day), November 1st (All Saints'), November 11th (Armistice Day), December 25th (Christmas).

1979: January 1st (New Year's Day), April 16th (Easter Monday).

THE CONSTITUTION

(Promulgated February 1961; revised, February 1967 and April 1975)

Preamble: Upholds the Rights of Man, liberty of conscience and of the person, religious freedom and freedom of education. Sovereignty is vested in the people, who exercise it through their representatives or by means of referenda. There is direct, universal and secret suffrage.

Head of State: The President is elected by direct suffrage for a seven-year term and is eligible for re-election. He is Head of State, of the administration and of the Armed Forces. The President may, after consultation with his Ministers and leaders of the National Assembly, order a referendum to be held. There is a Prime Minister appointed by the President.

Executive Power: Executive power is vested in the President and the Council of Ministers, who are appointed by the President and are responsible to him. The President presides over the Council.

Legislative Power: The National Assembly is elected by direct suffrage for a seven-year term and normally holds two sessions a year. It may be dissolved or prorogued for up to 18 months by the President, after consultation with the Council of Ministers and President of the Assembly. The President may return a Bill to the Assembly for a second reading when it must be passed by a majority of two-thirds of the members. If the President dissolves the Assembly, elections must take place within 40 days.

Judicial Power: The President guarantees the independence of the Judiciary and presides over the Conseil Supérieur de la Magistrature. There is a Supreme Court and a High Court of Justice. The High Court, which is composed of deputies of the National Assembly elected from among themselves, has power to try the President or members of the Government.

SHIPPING AND INLAND WATERWAYS

The most important river is the Ogooué, navigable from Port-Gentil to N'Djolé (320 km) and serving the towns of Lambaré, N'Djolé and Sindara. River traffic, mainly timber, exceeded 408,000 metric tons in 1970.

The two principal ports are Port-Gentil, which handles chiefly petroleum exports, and Owendo, near Libreville, which came into operation in 1974 which handles mainly barge traffic. There is a third port at Mayumba which handles timber exports. Work started in 1977 on increasing

capacity at Port Gentil to 300,000 metric tons per year and at Mayumba on creating facilities for deep-water fishing trawlers. A new timber port was planned for Owendo and a mineral port at Santa Clara for exporting manganese and iron.

THE GAMBIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of The Gambia is a narrow territory around the River Gambia in West Africa, surrounded on three sides by Senegal. The climate is tropical, and away from the river swamps most of the country is savanna bush. The average annual temperature in the capital, Banjul, is 27°C (80°F). English is the official language; the principal vernacular languages are Mandinka, Fula and Wolof. The main religions are Islam and Christianity, with some adherents of animism. The national flag (proportions 3 by 2) has red, blue and green horizontal bands, with two narrow white stripes bordering the centre blue band. Banjul (previously Bathurst) is the capital.

Recent History

In 1962 a new constitution came into effect in the then British colony of The Gambia and, after a general election, the leader of the People's Progressive Party, Dr. (later Sir) Dawda K. Jawara, took office as Premier. Full internal self-government followed in October 1963. On February 18th, 1965, The Gambia became an independent country within the Commonwealth and in April 1970 became a republic with Sir Dawda Jawara as President. He was re-elected when his People's Progressive Party won 28 of the 32 seats in the House of Representatives. President Jawara continued in office following elections held in April 1977, when the People's Progressive Party held 28 seats in the enlarged House.

Political and economic progress has been steady since independence. The Gambia co-operates increasingly with Senegal at a ministerial level in the fields of education, culture, trade and communications, under the aegis of the Senegambian Secretariat, and, although political unification is not immediately envisaged, during 1977 the possibility of eventual unification through economic co-operation became more likely. A more vigorous foreign policy has led to closer relations with the EEC, the U.S.A., the Arab world, the U.S.S.R. and the People's Republic of China.

Government

Legislative power is held by the unicameral House of Representatives, with 43 members: 35 directly elected by universal adult suffrage for five years; four Chiefs' Representatives Members elected by the Chiefs in Assembly; three non-voting nominated members; and the Attorney-General. Executive power is held by the President, the leader of the majority party in the House. He appoints a Vice-President (who is leader of government business in the House) and a Cabinet from elected members of the House.

Defence

There are no armed forces as such, but the police force is over 750 strong and there is a field force of about 300.

Economic Affairs

The economy is based on peasant cultivation of groundnuts which accounts for over 90 per cent of The Gambia's

exports and makes it particularly vulnerable to fluctuations in its harvests and world price changes. Agriculture provides a living for 85 per cent of the population. The country is still not self-sufficient in rice although the acreage under cultivation is increasing, with the People's Republic of China providing technical aid previously given by Taiwan. In 1975 the former offered The Gambia a £7 million interest-free loan for development. Food, machinery and other manufactured goods constitute the country's main import requirements.

During the year to September 1976 The Gambia's external trade was marked by a decline in exports, which fell by 20 per cent of the average of the previous two years, and a continuous rise in imports. The decline was almost entirely due to lower earnings from groundnuts and related products. In the same period The Gambia's balance of payments showed a deficit of 5.6 million SDRs and domestic prices rose by 13 per cent. By September 1977 the G.D.P. was estimated to have increased from 212 million dalasi in 1976 to 257.7 million dalasi and the rate of inflation had fallen.

In August 1977 The Gambia was officially declared a drought area. In western Gambia 60 per cent of cereal crops was destroyed. Various countries and international organizations agreed to provide financial and emergency food aid to help The Gambia's recovery programme.

There have been three development programmes since 1964, concerned mainly with improving The Gambia's infrastructure. A five-year project begun in 1976 includes co-ordinated rural development, an outline for industrial growth and the expansion of education and health facilities. A principal objective of the plan is to reduce the disparity between rural and urban incomes. Provisional estimates indicated, however, that by June 1977 little of the plan would have been implemented during the first two years. There are also proposals for the construction of an oil refinery and for the reopening of the country's zircon and rutile mines.

Transport and Communications

Roads in and near Banjul are bitumenized and this has now been extended to the provinces; 1,068 miles of about 1,858 miles of roads can be used in all seasons, but in outlying parts they may be closed during the rains, from mid-July to early November. Construction of a road linking the capitals of The Gambia, Senegal and Guinea is planned to begin by the end of 1979. There are no railways. However, The Gambia River is the best waterway in Africa. The port of Banjul receives about 300 ships annually, and there are intermittent sailings to and from North Africa, the Mediterranean and the Far East. The port was considerably enlarged in 1974. There is an airport of international standard outside Banjul at Yundum which is being further developed.

Social Welfare

There is a well-equipped modern hospital at Banjul, a small hospital at Bansang in the middle river area, and a network of health centres, dispensaries and maternity and

child welfare clinics throughout the country. The People's Republic of China has agreed to build a hospital.

Education

In 1975/76 there were 96 primary schools with 24,629 pupils and 24 secondary schools with 6,179 pupils, mostly in the Banjul area. Primary education is free but not compulsory; in 1976 the entry age was raised from 6 to 8. Gambia High School at Banjul provides full secondary courses to university entrance, and the Catholic Mission runs secondary schools. There are three centres of post-secondary education. Education is being expanded in rural areas. In 1968 the literacy rate was estimated at around 15 per cent in English and about 20 per cent in Arabic. In 1977 The Gambia introduced Arabic language in all stages of education.

Tourism

Tourism has been a major industry in The Gambia since 1971 and the Government is committed to its further expansion. It is now second only to agriculture in importance. In 1976/77 over 21,000 people visited The Gambia. There is a haven for bird watchers, over 400 species of birds having been recorded.

Visas are not required to visit The Gambia by nationals of Commonwealth countries, EEC countries (except

France), Benin, Finland, Greece, Guinea, Iceland, the Ivory Coast, Liechtenstein, Mali, Mauritania, Norway, San Marino, Senegal, Spain, Sweden, Togo, Tunisia, Turkey and Uruguay.

Sport

Wrestling is the national sport, as well as fishing, sailing, shooting, golf, cricket, and association football.

Public Holidays

1978: May 1st (Labour Day), August 15th (Assumption), September 4th (Id ul Fitr, end of Ramadan), November 11th (Id ul Kadir), December 25th (Christmas), December 26th (Boxing Day).

1979: January 1st (New Year's Day), February 10th (Mouloud, Birth of the Prophet), February 18th (Independence), April 13th-16th (Easter).

Weights and Measures

Imperial weights and measures are used. Importers and traders also use the metric system.

THE CONSTITUTION

The present Constitution came into effect on April 24th, 1970, when The Gambia became a republic.

The President is Head of State and Commander-in-Chief of the armed forces. He holds office by virtue of being the leader of the majority party in the House of Representatives. The President appoints a Vice-President, who is leader of government business in the House, and other Cabinet Ministers from elected members of the House.

The House of Representatives consists of a Speaker and a Deputy Speaker (elected by the House) and 35 Members elected by universal adult suffrage, 4 Chiefs (elected by the Chiefs in Assembly), 3 nominated Members, and the Attorney-General. Parliaments have a five-year term.

TRANSPORT

ROADS

By January 1974 there were about 1,858 miles of roads in The Gambia. Of this, about 1,068 miles were all-weather roads including 190 miles of bituminous surface and 330 miles of laterite gravel surface. The South Bank Trunk Road linking Banjul with the Trans-Gambian Highway is bitumenized as far as Soma where the two roads intersect. Thereafter the South Bank Trunk Road continues to Basse, about 240 miles from Banjul. It was decided in 1977 to upgrade the gravel surface to tarmac, with the aid of a 3.5 million dinar loan from the Kuwaiti Fund for Arab Development. The North Bank Trunk Road connects Barra with Georgetown. In 1977 various international organizations agreed to finance the construction of 360 km. of feeder roads.

SHIPPING

Gambia Ports Authority: runs Banjul port which underwent substantial expansion with a World Bank loan and was completed in 1974; Man. Dir. Capt. BABOU-CARR SALLAH.

Gambia River Development Organization: f. 1976; a joint project with Senegal to develop the river and its basin.

Regular shipping services to Banjul are maintained by **Elder Dempster Agency**. Other British and Scandinavian lines run occasional services. The Gambia is also served by **Nigerian National** and **Black Star Lines**.

A fortnightly river service is maintained between Banjul and Basse, and a ferry between Banjul and Barra is under construction. The Gambia and Senegal agreed in 1978 to construct a barrage across the river.

CIVIL AVIATION

Gambia Airways: P.O.B. 268, Banjul; handling agency only; operated in partnership with British Caledonian Airways, Gambian Government majority shareholding from June 1973; owns no aircraft; Gen. Man. A. G. BATCHILY.

The only airport is at Yundum, 17 miles from Banjul.

FOREIGN AIRLINES

The Gambia is also served by Air Senegal, British Caledonian Airways, Ghana Airways, Nigeria Airways and Sierra Leone Airways.

TOURISM

An estimated 21,000 tourists visited The Gambia in 1976/77.

GHANA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Ghana lies on the west coast of Africa between the Ivory Coast to the West and Togo to the east. It is bordered by Upper Volta to the north. The climate is tropical with temperatures of 21°–32°C (70°–90°F) and rainfall of 80 inches per year on the coast, decreasing inland. English is the official language, but there are eight major national languages. Many people follow traditional beliefs and customs. Christians make up 42 per cent of the population. The national flag (proportions 3 by 2) has three horizontal stripes of red, gold and green, the gold stripe being charged with a five-pointed black star. The capital is Accra.

Recent History

Ghana was formed by a merger of the Gold Coast, a former British colony, and the British-administered part of Togoland, a UN Trust Territory.

In the Gold Coast the 1951 elections were won by the Convention People's Party, led by Dr. Kwame Nkrumah, who became Prime Minister in March 1952. In May 1956, by a UN-supervised plebiscite, British Togoland voted to join the Gold Coast in an independent state. Ghana was duly granted independence, within the Commonwealth, on March 6th, 1957, and Dr. Nkrumah continued in power. The country was proclaimed a republic in July 1960, with Dr. Nkrumah as the first President, and in 1964 became a one-party state.

In February 1966 President Nkrumah was overthrown by a *coup d'état* and a National Liberation Council (NLC) of army and police personnel was established to rule by decree. Civilian government under a new democratic constitution was restored in September 1969, following the electoral victory of Dr. Kofi Busia's Progress Party.

In the wake of increasing economic and political difficulties, the army seized power again in January 1972. The constitution and all political institutions were abolished and replaced by a National Redemption Council (NRC) which, under the chairmanship of Lt.-Col. (later Gen.) Ignatius Acheampong, governed the country for over three years. In October 1975 major government changes took place and supreme legislative and administrative authority was transferred from the NRC to a Supreme Military Council (SMC).

In 1976 Gen. Acheampong put forward plans for a return to civilian rule without political parties, in the form of "union" or "national" government, in which it was envisaged that the military should continue to play a role. Fears that this would amount only to a continuation of military rule, and increasing dissatisfaction with the economic situation and the prevalence of smuggling and profiteering, led to unrest. In May and June 1977 the universities were closed following demonstrations by students over rising food prices. The discontent culminated in a 19-day strike in July by professional bodies, calling for the Government's immediate resignation. In response the Government announced a definite programme for return to civilian government by July 1979, including a new constitution and general elections.

There was also tension between Ghana and Togo in 1977 over Ghana's efforts to eradicate smuggling, and the attempts at secession by the Ewe people in the Volta region, many of whom seek union with Togo. Ghana, while enjoying close relations with several Eastern European countries, pursues a policy of non-alignment in foreign affairs.

Government

Since January 1972 Ghana has been under military rule. The highest governing body is the Supreme Military Council (SMC), a seven-man group with full legislative and administrative authority. The SMC directs the National Redemption Council, comprising military commanders and Commissioners of State with ministerial responsibilities. In October 1977 a report was published whose recommendations will probably form the basis of a new constitution (see under Constitution, p. 412.)

Defence

The defence forces consist of units of the army (15,000), air force (1,400) and navy (1,300). There is a police force of about 9,000 and three Border Guard battalions. The headquarters of the Defence Commission of the Organization of African Unity is in Accra.

Economic Affairs

Ghana is primarily an agricultural country, and cocoa, of which it is the world's largest producer, is by far the most important export. Production has been declining since the early 1970s and estimated output fell from 464,000 metric tons in 1971/72 to 320,000 tons in 1976/77. However, this trend was offset in 1977 by record world prices. Other cash crops include copra, palm oil and kernels, coffee and kola nuts. Under such projects as "Operation Feed Yourself" and the National Reconstruction Corps, the country is attempting to reach self-sufficiency in production of foodstuffs. However, Ghana has suffered in recent years from adverse weather conditions, and in 1977 serious food shortages in the Upper region had to be met by overseas aid and a food relief programme costing 15 million cedis.

The mining and timber industries are next in importance after agriculture, with gold, bauxite, diamonds and hardwoods as major sources of foreign exchange. In 1977 work commenced on the Oppon-Mansi iron and steel project in the Western Region. Industrial development is mainly concerned with processing food and raw materials and light industry. There is considerable state participation in the major sectors of the economy, and a policy of economic indigenization is being pursued. "Operation Feed Your Industries" seeks to reduce the dependence of industry on imported raw materials. Ghana is seeking to develop its energy resources; the Kpong hydro-electric project is under way and in early 1978 the discovery of petroleum was announced.

The economic situation continued to deteriorate in 1977, with the money supply increasing rapidly and inflation generally estimated at 80 per cent. Contributory factors include an artificially high exchange rate, over-reliance on imports, shortages of raw materials and spare parts, lack

of foreign exchange, poor harvests and smuggling. The Government attempted to enforce price controls on essential items, and to combat smuggling and hoarding. In June the basic daily wage was doubled to 4 cedis, and the 1977/78 budget lifted many of the controls on the import, distribution and retailing of raw materials and other vital commodities, and increased export bonuses. A five-year development plan, introduced in 1975, aimed to promote national economic independence, especially in food and investment, and to improve the infrastructure and expand the production base, especially in the agricultural, mining and fishing sectors. Ghana is a member of ECOWAS.

Transport and Communications

The rail network forms a rough triangle linking Accra and Takoradi on the coast with the inland centre of Kumasi; in 1976 the Romanian Government agreed to help modernize the system. Ghana has some 32,000 km. of roads, but only about one-third of the 12,000 km. trunk road network is metalled. The Ghana Highway Authority was set up in 1975 to co-ordinate and administer improvements to both trunk and feeder roads, a priority of the five-year development plan. A project to rehabilitate several hundred miles of road is being financed by the International Development Association and Canada. National air and shipping lines have been formed and a satellite communications station is to be built outside Accra.

Social Welfare

The Government provides hospitals and medical care at nominal rates, and there is a Government pension scheme. The Department of Social Welfare and Community Development and the Department of Rural Development deal with both urban and rural problems including the need to improve literacy, child welfare and factory legislation.

Education

In April 1974 the NRC announced that a new educational structure would be introduced. It consists of an initial phase of six years' primary and three years' junior secondary education to be compulsory and free. A second phase would prepare pupils for "O" level technical and commercial courses. There are three universities. The military regime has stressed the need for education to be geared more closely to the country's practical needs. The illiteracy rate is 65 per cent.

Tourism

Ghana is seeking to develop its tourist trade. The attractions include fine beaches, game reserves, and old trading forts and castles.

Visas are required to visit Ghana by nationals of all countries except the Federal Republic of Germany.

Sport

Ghana's national sport is football. Horse racing, tennis, boxing and athletics are also popular. The Central Organization of Sports was established in 1960 to develop an active participation in sport and athletics.

Public Holidays

1978: July 1st (Republic Day), December 25th-26th (Christmas).

1979: January 1st (New Year's Day), January 13th (National Redemption Day, anniversary of the 1972 coup), March 6th (Independence Day), April 13th-16th (Easter).

FINANCE

100 pesewas = 1 new cedi.

Coins: $\frac{1}{2}$, 1, 2 $\frac{1}{2}$, 5, 10 and 20 pesewas.

Notes: 1, 2, 5 and 10 cedis.

Exchange rates (December 1977): £1 sterling = 2.11 cedis; U.S. \$1 = 1.15 cedis.

100 cedis = £47.48 = \$86.96.

Note: The original cedi was introduced in July 1965, replacing the Ghana pound (£G1 = £1 sterling) at the rate of £G1 = 2.40 cedis (1 cedi = 8s. 4d. sterling). The exchange rate was U.S. \$1 = 85.71 pesewas (1 cedi = \$1.167). This currency was itself replaced in February 1967 by the new cedi, valued at 10 shillings sterling or U.S. \$1.40 (\$1 = 71.43 pesewas), the exchange rate being 1 new cedi = 1.2 old cedis. In July 1967 the new cedi was devalued by 30 per cent to 98 U.S. cents (\$1 = 1.0204 cedis), worth 7 shillings (£1 = 2.857 new cedis) until November 1967 and 8s. 2d. or 40.83 new pence (£1 = 2.449 new cedis) from November 1967 to August 1971. In December 1971 the new cedi was further devalued to 55 U.S. cents (\$1 = 1.8182 new cedis) or 21.11p (£1 = 4.738 new cedis). In February 1972, following the military coup, this devaluation was partially reversed and the new cedi was revalued at 78.125 U.S. cents (\$1 = 1.28 new cedis), worth 29.98p (£1 = 3.335 new cedis) until June 1972. Since February 1973 the exchange rate has been U.S. \$1 = 1.15 new cedis (1 cedi = 86.96 U.S. cents).

THE CONSTITUTION

The Constitution promulgated in August 1969 was abolished in January 1972 following the army *coup d'état*. In July 1977 the Head of State announced a programme for a return to civilian rule, following the report of the Koranteng-Addow *Ad hoc* Committee of Ghanaians' views on the proposed "union" or "national" government. A referendum was planned for March 30th, 1978. A constitution is to be drafted and debated by a Constituent Assembly by March 1979, to be followed by general elections on June 15th. Civilian rule is to be restored on July 1st, 1979.

In October 1977 the *Ad hoc* Committee's proposals included a President with executive powers, elected by universal adult suffrage for not more than two terms of four years each; a Vice-President and unicameral legislature similarly elected; a Cabinet appointed by the President; and a nominated Advisory Council of State, which should include the Chief of Defence Staff and Inspector-General of Police. The report also included provisions for the legal enforcement of human rights, an independent judiciary, an Ombudsman and a Press Commission to guarantee the independence of the state-owned media. Political parties should continue to be banned, and the army, police and professional organizations should have no institutional representation within the Government.

JUDICIAL SYSTEM

The civil law in force in Ghana is based on the Common Law, doctrines of equity and general statutes which were in force in England in 1874, as modified by subsequent Ordinances. Ghanaian customary law is, however, the basis of most personal, domestic and contractual relationships. Criminal law is based on the Criminal Code, enacted at the end of the nineteenth century and dependent on English Criminal Law, and since amended at intervals. The supreme tribunal in Ghana is the Court of Appeal.

The Court of Appeal: The Court of Appeal consists of the Chief Justice and not fewer than five Judges of the Court of Appeal. It has jurisdiction to hear and determine appeals from any judgement, decree or order of the High Court. It sits in Accra.

The High Court: The High Court of Ghana consists of the Chief Justice and not fewer than twelve Puisne Judges

and has an original jurisdiction in all matters, civil and criminal. Trial by jury is practised in criminal cases in Ghana and the Criminal Procedure Code, 1960, provides that all trials on indictment shall be by a jury or with the aid of Assessors.

The Circuit Court: Circuit Courts were created in 1960, and the jurisdiction of a Circuit Court consists of an original jurisdiction in civil matters where the amount involved does not exceed NC4,000. It has also jurisdiction with regard to the guardianship and custody of infants, and original jurisdiction in criminal matters in case of offences other than those where the maximum punishment is death or life imprisonment. Finally it has appellate jurisdiction from decisions of any District Court situated within its circuit.

District Courts: District Magistrates exercise summary jurisdiction throughout the country. In criminal cases

Magistrates have jurisdiction to impose sentences of imprisonment up to one year and fines not exceeding NC500. They also hear civil suits in which the amount involved does not exceed NC1,000.

Juvenile Courts have been set up in Accra, Kumasi, Koforidua, Sekondi, Tamale, Sunyani and Ho. They consist either of three citizens selected from a panel of Juvenile Court Magistrates or of a Stipendiary Magistrate sitting with two of the panel. The public is excluded from proceedings of Juvenile Courts which are empowered to place a child in the care of a relative, probation officer or other suitable person, to negotiate with parents to secure the good behaviour of a child.

Local Courts have both civil and criminal jurisdiction. In civil cases they enjoy exclusive jurisdiction in cases where customary law is involved and in personal suits up to £100. They have limited criminal jurisdiction and cannot impose a fine exceeding £25 or a sentence of

three months imprisonment. However, they have unlimited jurisdiction as to persons of all races living within their areas of jurisdiction. Control is exercised by the Judges of the Circuit and High Court by way of appeals and reviews in accordance with the Courts Act, 1960. Appeals lie either to the Circuit or High Court, depending on the nature of the suit. Whilst in land causes a person aggrieved by any decision may appeal to the High Court, in succession causes he may appeal to the Circuit Court.

Department of Co-operatives: f. 1944 as the Department of Co-operation; controlling body of co-operative societies, responsible for registration, auditing and supervision; headed by a government-appointed Registrar.

Ghana Co-operatives Council: Accra; co-ordinates activities of all co-operative societies; over 100,000 members.

The co-operative movement began in Ghana in 1928 among cocoa farmers, and grew into the largest farmers' organization in the country. In 1944 the Department of Co-operatives, known then as the Department of Co-operation, was established as the controlling body of co-operative societies.

The movement was dissolved by the Nkrumah Government in 1960, but was re-established after the *coup d'état* in 1966. It is now under military leadership. There are 1,261 co-operative societies and 43 co-operative produce marketing unions. The structure of the movement in Ghana is co-operative associations at the top, co-operative unions in a secondary position of seniority in the towns, and village co-operative societies at the base.

The co-operative associations (1974) are:

Ghana Co-operative Credit Association: Accra.

Ghana Co-operative Distillers Association: P.O.B. 3640, Accra; f. 1960.

Ghana Co-operative Fisheries Association: Accra; f. 1967; includes over 200 fish marketing societies; Gen. Sec. WILLIAM BECKMAN.

GRENADA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Grenada is the most southerly of the Windward Islands, in the West Indies. The country also includes some of the small islands known as the Grenadines. The climate is semi-tropical with an average temperature of 23°C (78°F); most of the rainfall occurs between June and December. The majority of the population speak English and belong to Christian churches. The national flag, displaying seven stars and a nutmeg, consists of a diagonally-quartered green and yellow rectangle on a red ground. The capital is St. George's.

Recent History

Grenada was initially colonized by the French but was captured by the British in 1762. Full internal self-government and statehood in association with the United Kingdom were achieved in March 1967. The political life of Grenada has been dominated by Mr. (later Sir) Eric Gairy, who in 1950 founded the Grenada United Labour Party (GULP), with the support of an associated trade union. In 1951 GULP won a majority of the elected seats on the Legislative Council but in 1957 it was defeated by the Grenada National Party, led by Herbert Blaize. Gairy returned to power as Chief Minister in 1961 but was dismissed in 1962, when the constitution was suspended until the end of 1965. GULP won the elections of August 1967 and Gairy became Premier. As a firm advocate of total independence, Gairy made this the central issue in the elections of 1972, in which GULP won 13 of the 15 seats in the House of Assembly.

Following a constitutional conference in London in May 1973, Grenada became an independent nation within the Commonwealth, with Gairy as Prime Minister, on February 7th, 1974. Independence was strongly opposed within the country, resulting in widespread demonstrations and a prolonged general strike. In the elections in December 1976 GULP was returned to power with a reduced majority. Grenada became a member of the UN in September 1974.

Government

Grenada has dominion status within the Commonwealth. The Queen is represented by a Governor-General. Executive power is held by the Cabinet, led by the Prime Minister. Parliament comprises the Senate, made up of 13 Senators appointed by the Governor-General on the advice of the Prime Minister and the Leader of the Opposition, and the 15-member House of Representatives, elected by universal adult suffrage. The Cabinet is responsible to Parliament.

Defence

There is a Defence Force and Grenada Volunteer Constabulary.

Economic Affairs

The economy of Grenada is essentially agricultural and centres on the traditional production of spices, and in particular nutmeg. Nutmeg is the principal export, although bananas, mace, cocoa, sugar, cotton, coffee, coconuts, citrus fruit and minor spices are also significant. The United Kingdom is the principal trading partner. The

development of manufacturing industries has not kept pace with other activities, due mainly to the small size of the local market. After suffering a recession in 1973 and 1974, due to internal unrest and widespread strikes, the economy made a strong recovery in 1975. However, the 1976 trade deficit rose from EC\$26 million in 1975 to EC\$33.2 million. Grenada receives aid from the U.S.A., Canada and U.K. Unemployment is high. The number of tourists fell from 33,490 in 1973 to 14,723 in 1974, owing to the disturbances, but rose again in 1975 and 1976.

In 1975 the Government began an 18-month stabilization programme aimed at a gradual reduction in the current account deficit. Tax provisions in the 1976 budget included new consumption taxes, a 5 per cent stamp duty on all imports, higher licence fees for commercial banks and insurance companies and an increase in the hotel tax. Grenada is a member of the Caribbean Community (CARICOM).

Transport and Communications

There are some 600 miles of roads in Grenada, most of which are suitable for motor traffic. Several foreign shipping lines serve the island and there is an airport 18 miles from St. George's, although this is not fully equipped to cope with the demands of the growing tourist traffic.

Education

Education is free and compulsory between the ages of six and fourteen years. The standard of education is high and is modelled to a large extent on the British pattern. There are 62 primary, 3 junior secondary and 14 secondary schools. Technical Centres have been set up in each parish and there is a Technical and Vocational Institute in St. George's. The Extra Mural Department of the University of the West Indies has a branch in St. George's and there is also a Teachers' Training College.

Tourism

The colonial architecture of the capital and Grand Anse beach are the major tourist attractions. There were 24,551 visitors in 1976.

Sport

Cricket is the chief sport, although tennis, football, horse-racing, golf and water sports are also popular.

Public Holidays

1978: May 1st (Labour Day), May 15th (Whit Monday), May 25th (Corpus Christi), August 7th and 8th (August Bank Holiday), December 25th-27th (Christmas).

THE CONSTITUTION

The Constitution provides for a Governor-General appointed by the Queen and for a bicameral legislature. The Senate consists of 13 Senators, 7 of whom are appointed on the advice of the Prime Minister, 3 on the advice of the Leader of the Opposition and 3 on the advice of the Prime Minister after he has consulted interests which he considers Senators should be selected to represent. The House of Representatives consists of 15 members elected from single-member constituencies on the basis of universal adult suffrage.

The Cabinet consists of a Prime Minister, who must be a member of the House of Representatives, and such other Ministers as the Governor-General may appoint on the advice of the Prime Minister.

There is a Supreme Court, styled the Supreme Court of Grenada and the West Indies Associated States, and in certain cases a further appeal lies to Her Majesty in Council.

GUATEMALA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Guatemala lies in the Central American isthmus, bounded to the north and west by Mexico with Honduras and El Salvador to the east and south. It has a long Pacific coastline and a narrow outlet on to the Caribbean. The climate is tropical in the lowlands with an average temperature of 28°C (83°F) and more temperate in the central highland area, with an average temperature of 20°C (68°F). The official language is Spanish, but Indian dialects are widely spoken. Over 90 per cent of the people are Roman Catholics; there are a few Protestants. The national flag (proportions 3 by 2) consist of vertical stripes of blue, white and blue, the white stripe bearing the national coat of arms. The capital is Guatemala City.

Recent History

Juan José Arevalo, who was President between 1944 and 1950, carried out a series of wide-ranging social reforms and his successor, Col. Jacobo Arbenz Guzmán, continued these programmes, with emphasis on land reform despite strong opposition from land-owners. In 1954 he was overthrown as a result of a coup led by Col. Carlos Castillo Armas, who invaded the country with U.S. assistance. Castillo became President but was assassinated in July 1957. The next elected President, Gen. Miguel Ydigoras Fuentes, took office in March 1958 and ruled until he was deposed by a military coup in 1963. A Constituent Assembly, elected in 1964, produced a new Constitution in 1965. This took effect in 1966, when Presidential and Congressional elections were held. Dr. Julio César Méndez Montenegro was elected President in 1966 and in 1970 the candidate of the Movimiento de Liberación Nacional (MLN), Col. (later Gen.) Carlos Arana Osorio, was elected President after a turbulent campaign. Violence continued during 1970 and a state of emergency was imposed in November. It was lifted in November 1971, and the spate of political murders abated during 1972 and 1973. Amid charges of fraud and claims that the main opposition candidate, Gen. Efraín Ríos Montt, had obtained some 53 per cent of the poll, Gen. Kjell Laugerud García of the MLN was declared President after the elections of March 1974 and took office in July 1974.

Tension continued between extreme right- and left-wing groups in the country. President Laugerud sought to discourage extreme right-wing violence and claims some success, although an Amnesty International report in 1976 stated that 20,000 people had disappeared or had been illegally executed since 1966. Presidential elections were to take place in March 1978.

In February 1976 a series of earthquakes in central Guatemala resulted in 23,000 dead, 77,000 injured and one million homeless. A National Reconstruction Committee was set up to co-ordinate reconstruction and foreign relief aid.

Guatemala remains steadfast in its claims to the neighbouring British dependency of Belize. Although several Central American states supported Guatemala's claim, and despite the sending of the British troops to Belize in 1975 after Guatemala threatened to invade the territory, the

UN backed Belize's right to independence in November 1975. In late 1976 Panama's support of a further UN resolution in favour of an independent Belize led to the severance of diplomatic relations with Guatemala. Negotiations continued throughout 1976 and 1977 but the situation remained unsolved in early 1978.

Government

Guatemala is a Republic comprising 22 departments. Under the 1966 Constitution, legislative power is vested in the unicameral National Congress, with 61 members elected for four years by universal adult suffrage. Executive power is held by the President, also directly elected for four years. He is assisted by a Vice-President and an appointed Cabinet.

Defence

A military bloc alliance exists with El Salvador, Honduras, Nicaragua and Costa Rica. In 1977 armed forces totalled 14,300 of which 13,500 were members of the army and 400 each were members of the navy and air force. There were para-military forces of 3,000.

Economic Affairs

The economy is predominantly agricultural. Guatemala is Central America's second leading coffee producer and in 1976 it received 31 per cent of its total export earnings from coffee. However, the share of coffee production in real G.D.P. has declined in recent years due to the Government's policy of curtailing production in line with international coffee agreements and rising production costs. Other major crops are sugar cane, bananas and cotton. Extensive forests provide timber and chicle. In 1976 agricultural production rose by 7 per cent after two years of depressed production resulting from the effects of bad weather. There was a record crop of basic grains and output gains in sugar cane, banana and livestock production.

The liberal treatment granted to foreign capital in Guatemala has benefited export diversification as it has led to the modernization of the manufacturing sector and the expansion of mining activities. Exports of manufactured goods more than doubled between 1972 and 1977. The main industries are food processing, rubber, textiles, paper and pharmaceuticals. A free zone was established in 1975 at the port of Santo Tomás de Castilla with the aim of promoting industrial and commercial development. The 1976 earthquake caused considerable damage to factory installations, particularly in the textile sector, thus affecting production growth. Commercial quantities of petroleum were discovered in 1974 and 1975, and in 1976 reserves estimated at 27.3 million barrels were discovered in the Rubelsanto area. Production from this field should reach 5,000 barrels per day (b.p.d.) at the end of 1978. Texaco has 60 per cent of the market and operates a 14,000 b.p.d. refinery at Escuintla. It is planned to build a 15,000 b.p.d. pipeline costing U.S. \$30 million to carry oil from Rubelsanto to the port of Livingston on the Gulf of Honduras. The Esminal consortium has invested over 200 million quetzales in exploiting the nickel deposits, estimated at 60 million tons, near Lake Izabal at Chalchoten.

GUATEMALA

El Estor. The \$224 million nickel plant began operating in mid-1977 and is scheduled to produce 11,300 tons of nickel a year. There are also deposits of other minerals in Guatemala.

Despite the February 1976 earthquake, Guatemala experienced a strong economic revival in 1976. The G.D.P. rose by 8 per cent in 1976, compared with only 2 per cent in 1975, and was expected to rise by 11 per cent in 1977. In 1976 the balance of payments registered an overall surplus of \$211.5 million, thanks to high international prices for exports, especially coffee, and the inflow of international and private investment and international aid after the earthquake. Net international reserves rose to a record \$742 million in May 1977. A major problem is inflation, which reached 18 per cent in 1976, caused by shortages of construction materials and the foreign exchange and aid inflows. The Government has established price controls on essential commodities in an effort to reduce this rate. Between mid-1976 and the end of 1977 the Government had invested 300 million quetzales on reconstruction but a further 2,000 million will be required by 1987 to complete the programme. The 1977-79 National Economic Development Plan aims to bring about the comprehensive development of the economy, with marked emphasis on housing, transport, energy, communications and other services.

Guatemala is a member of the Central American Common Market, the OAS, ODECA, SELA and the UPEB.

Transport and Communications

There were 1,828 km. of railways in 1977 and 13,450 km. of roads in 1975. The chief ports are Puerto Barrios, San José, Santo Tomás de Castilla and Champerico. Considerable reconstruction of all services is under way, including new port facilities at Champerico and expansion of other ports. Internal and international flights are provided by one Guatemalan and seven foreign lines. A new international airport is to be built at a cost of 21 million quetzales at Santa Elena Petén.

Social Welfare

Social security is compulsory, all employers with five or more workers being required to enrol with the State Institute of Social Security. Benefits are available to

Introductory Survey, Statistical Survey

registered workers for industrial accidents, sickness, maternity, disability, widowhood and hospitalization.

Education

Elementary education is free and, in urban areas, compulsory between seven and fourteen years of age. Both primary and secondary education last for six years. There are five universities. The current rate of illiteracy is some 50 per cent.

Tourism

The main attractions lie in the mountain regions, with their volcanoes, lakes and mountain villages which remain much the same as in the days of the Maya Empire. The old capital, Antigua, retains the ruins of buildings wrecked in the great earthquake of 1773. The Government is expanding tourist facilities in the Izabal-El Petén region. In 1976 only 407,937 tourists visited Guatemala, compared with 454,436 in 1975, due to the effects of the earthquake.

Visas are required by nationals of all countries except Spain.

Sport

The main sports are football, baseball, swimming and basketball.

Public Holidays

1978: May 1st (Labour Day), June 30th (Anniversary of the Revolution), July 1st (Bank Employees' Day), August 15th (Assumption, Guatemala City only), September 15th (Independence Day), October 12th (Columbus Day), October 20th (Revolution Day), November 1st (All Saints' Day), December 24th, 25th (Christmas).

1979: January 1st (New Years' Day), April 12th-14th (Easter).

Weights and Measures

The metric system is in official use, but old Spanish weights and measures are used in local trade.

100 quetzales = £54.60 = \$100.00.

Note: The quetzal's value is fixed at par with that of the U.S. dollar and this parity has remained in effect despite two devaluations of the dollar, in December 1971 and February 1973. In terms of sterling, the central exchange rate was £1 = 2.40 quetzales from November 1967 to August 1971; and £1 = 2.6057 quetzales from December 1971 to June 1972. The Central American peso, used for transactions within the Central American Common Market, is also at par with the U.S. dollar.

THE CONSTITUTION

The present constitution of Guatemala was decreed on September 15th, 1965, and took effect on July 1st, 1966. The main points are as follows:

Guatemala has a republican representative democratic system of government and power is exercised equally by the legislative, executive and judicial bodies. The official language is Spanish. Suffrage is universal and secret, obligatory for those who can read and write and optional for those who are illiterate. The free formation and growth of political parties whose aims are democratic is guaranteed. To register, parties must have at least 50,000 adherents, of which at least twenty per cent must be literate. There is no discrimination on grounds of race, colour, sex, religion, birth, economic or social position or political opinions.

The State will give protection to capital and private enterprise in order to develop sources of labour and stimulate creative activity.

Monopolies are forbidden and the State will limit any enterprise which might prejudice the development of the community. The right to social security is recognized and it shall be on a national, unitary, obligatory basis.

Constitutional guarantees may be suspended in certain circumstances for up to thirty days (unlimited in the case of war).

CONGRESS

Legislative power is in the hands of Congress, which is made up of deputies elected directly by the people through universal suffrage. Congress meets on June 15th each year and ordinary sessions last four months; extraordinary sessions can be called by the Permanent Commission or the Executive. All Congressional decisions must be taken by absolute majority of the members, except in special cases laid down by law. Deputies are elected for four years; they may be re-elected after a lapse of one session, but only Congress is responsible for all matters concerning the

President and Vice-President and their execution of their offices; for all electoral matters; for all matters concerning the laws of the Republic; for approving the budget and decreeing taxes; for declaring war; for conferring honours, both civil and military; for fixing the coinage and the system of weights and measures; for approving, by two-thirds majority, any international treaty or agreement affecting the law, sovereignty, financial status or security of the country.

PRESIDENT

The President is elected by universal suffrage, by absolute majority for a non-extendable period of four years. Re-election or prolongation of the presidential term of office are punishable by law. The President is responsible for national defence and security, fulfilling the constitution, leading the armed forces, taking any necessary steps in time of national emergency, passing and executing laws, international policy, nominating and removing ministers, officials and diplomats, co-ordinating the actions of Ministers of State. The Vice-President's duties include presiding over Congress and taking part in the discussions of the Council of Ministers.

ARMY

The Guatemalan Army is intended to maintain national independence, sovereignty and honour, territorial integrity and peace within the Republic. It is an indivisible, apolitical, non-deliberating body and is made up of land, sea and air forces. The President of the Republic is General Commander of the Army.

LOCAL ADMINISTRATIVE DIVISIONS

For the purposes of administration the territory of the Republic is divided into departments and these into municipalities, but this division can be modified by Congress to suit the interests and general development of the Nation without loss of municipal autonomy.

JUDICIARY

Justice is exercised exclusively by the Supreme Court of Justice and other tribunals. Administration of Justice is obligatory, free and independent of the other functions of State. The President of the Judiciary, judges and other officials are elected by Congress for four years. The *Supreme Court of Justice* is made up of at least seven judges.

The President of the Judiciary is also President of the Supreme Court. The Supreme Court nominates all other judges. Under the Supreme Court come the Court of Appeal, the Administrative Disputes Tribunal, the Tribunal of Second Instance of Accounts, Jurisdiction Conflicts, First Instance and Military, the Extraordinary Tribunal of Protection. There is a Court of Constitutionality presided over by the President of the Supreme Court.

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Guinea lies on the west coast of Africa with Sierra Leone and Liberia to the south, Senegal to the north and Mali and the Ivory Coast inland to the east. The coastal strip is hot and moist with temperatures ranging from about 17°C (62°F) in the dry season to about 30°C (86°F) in the wet season. The interior is higher and cooler. The official languages are French and one of the eight national languages, pending the introduction of either Soussou or Maninka as the official language. Most of the people are Muslims but some still adhere to traditional animist beliefs. There are a few thousand Roman Catholics. The national flag (proportions 3 by 2) consists of three vertical stripes of red, yellow and green. The capital is Conakry.

Recent History

Formerly a French colony, Guinea became independent on October 2nd, 1958, having voted to sever all ties with France. Under the leadership of President Ahmed Sekou Touré, the country became a single-party state and followed a socialist economic policy. In 1969-70 abortive invasions and attempted coups were reported. In 1970 an invasion by Portuguese and Guinean exiles was repulsed, and there were many arrests. In 1971 Guinea assisted Sierra Leone in the suppression of an attempted coup. During 1972 Sekou Touré made changes in the party structure and improved relations with other countries, but in 1973 he accused the Ivory Coast and Senegal of planning to invade Guinea. In 1975 a war against smugglers was declared and all private trade was forbidden.

Sekou Touré was re-elected without opposition in 1974 but remained suspicious of potential opposition. In 1976 Diallo Telli, the Justice Minister, was arrested and members of the Fulani, his tribe, were dismissed from their posts. His fate is unknown but Sekou Touré claimed in 1977 that Telli's influence was the cause of serious riots by market women in September and the refusal of sections of the army to execute the rioters.

In June 1977 the League for Human Rights reported the existence of several concentration camps in Guinea and published a list of those believed to have died in them. The charges were denied by Sekou Touré, who released 80 political detainees and published a code designed to encourage the return of students, intellectuals and entrepreneurs to Guinea. However, in August Alpha Omar Barry, a former Trade Minister, was arrested for conspiracy, and the ruling Parti démocratique de Guinée issued a demand for a purge to uncover "imperialist agents". In September 70 more political prisoners were released, but in October there was a Cabinet reshuffle and the unveiling of a campaign for "revolutionary violence" to crush opposition. In early 1978 Sekou Touré made strenuous attempts to improve relations with his neighbours, sending women's delegations and inviting sporting fixtures with the Ivory Coast and Senegal; he also announced the future release of all foreigners detained in Guinea.

Government

Under the 1958 Constitution, as amended in 1963, legislative power is vested in the unicameral National Assembly, with 150 members elected by universal adult suffrage for seven years. The Assembly elects a Commission to be its permanent organ. Full executive authority is vested in the President, also directly elected for seven years. He appoints and leads a Cabinet, including a Prime Minister. Guinea has a single political party, the *Parti démocratique de Guinée*, which exercises "sovereign and exclusive control of all sections of national life". The party's directing organ is the Central Committee, 25 members elected for five years at Congress.

National policies are enacted through the National Economic Council. Foreign affairs are conducted by six State Councils. Local government is centrally controlled but each Local Revolutionary Authority possesses wide responsibilities, including defence.

Defence

In 1977 Guinea had an army of 5,000, a navy of 350 and an air force of 500. There was also a People's Militia of about 8,000. The air force is partly equipped by the U.S.S.R. There are believed to be 500 Cuban military personnel advising the forces.

Economic Affairs

More than 80 per cent of the population are engaged in farming, the principal export crops being bananas, palm nuts, pineapples, and coffee, though they contribute less than 5 per cent of total exports. Iron ore, diamonds and bauxite are mined and exported, and there are important reserves of calcium carbide. Bauxite and alumina dominate the export trade and exploitation of the high-grade bauxite deposits in the Boké region, estimated to be among the richest in the world at 500 million tons, is going ahead. Friguia, the bauxite and aluminium producing company, provides more than half of Guinea's foreign earnings. Agreements have been signed with foreign companies to begin exploitation of large iron-ore deposits near the Liberian border. Lack of transport facilities hampers the development of mining. Most areas of Guinean trade and industry have been state-controlled since independence. Mining is now being taken into the state sector. In 1975 the full collectivization of rural production was announced; mechanical equipment was centralized under *Brigades Motorisées de Production* and new techniques were spread by students. Despite economic difficulties, the exploitation of Guinea's rich mineral resources offers good prospects for future development. In 1977 income tax was abolished in order to stimulate productivity.

In 1975 Guinea reached agreement with fourteen other West African countries on forming the Economic Community of West African States (ECOWAS) and signed the Lomé Convention on trading with the EEC. Guinea became a founder-member of the International Bauxite Association in 1974.

Introductory Survey, Statistical Survey

Transport and Communications

The main port is Conakry. Bauxite is exported through Kamsar where a port was opened in 1973. There are rail links between Conakry and Kankan, Kamsar and Sangaredi, and Conakry and the Friguia aluminium factory. New lines are planned to transport iron ore from near the Liberian border to the coast. There is an international airport at Conakry. There are about 28,000 km. of roads, mostly soft-surfaced. A cross-country road runs 895 km. from Conakry to Bamako, the capital of Mali, and an international road crosses Guinea connecting Dakar, capital of Senegal, with Abidjan, capital of the Ivory Coast. A programme of resurfacing was under way in 1978.

Social Welfare

All workers must belong to the National Confederation of Guinean Workers, which is affiliated to the General Union of the Workers of Black Africa. Wages are fixed according to the Government Labour Code. The 48-hour week is in force for industrial workers.

Education

Education is free. There were over 300,000 children at school in 1974. There are three higher educational institutions. The eight national languages have been taught since April 1968, though French remains in use for the time being.

Tourism

Guinea is noted for the beauty of its scenery, especially in the mountains of the Futa Jallon.

Visas are not required to visit Guinea by nationals of Cameroon, Liberia, Morocco and Togo.

Public Holidays

1978: May 1st (Labour Day), September 4th (Id ul Fitr, End of Ramadan), September 28th (Referendum Day), October 2nd (Republic Day), November 1st (All Saints' Day), December 25th (Christmas).

1979: January 1st (New Year), February 10th (Maloud—Prophet's Birthday), April 16th (Easter Monday).

FINANCE

100 cauris (corilles) = 1 syli (sily).

Coins: 50 cauris; 1, 2 and 5 sylis

Notes: 10, 25, 50 and 100 sylis.

Exchange rates (December 1977): £1 sterling = 39.40 sylis; U.S. \$1 = 21.51 sylis.

1,000 sylis = £25.38 = \$46.49.

Note: The official value of the syli is 36 milligrammes of gold. The currency was introduced in October 1972, replacing the Guinea franc (FG) at the rate of 1 syli = 10 francs. In January 1959 the value of the Guinea franc was fixed at 3.6 milligrammes of gold, worth 0.4051 U.S. cent (U.S. \$1 = 246.853 Guinea francs) until August 1971. The Guinea franc was equivalent to 2 French centimes (1 French franc = 50 FG) from January 1960 to August 1969. Between December 1971 and October 1972 the Guinea franc was valued at 0.4398 U.S. cent (\$1 = 227.365 Guinea francs). In terms of sterling, the exchange rate between November 1967 and June 1972 was £1 = 592.447 Guinea francs. After the syli was introduced, it maintained its original value of 4.3982 U.S. cents (\$1 = 22.7365 sylis) until the dollar's devaluation in February 1973, when a new exchange rate of \$1 = 20.65 sylis (1 syli = 4.8426 U.S. cents) was introduced. Since 1975 the currency has been linked to the IMF Special Drawing Right at the rate of 1 SDR = 24.6853 sylis. Some of the figures in this statistical survey are still in terms of Guinea francs.

THE CONSTITUTION

(promulgated November 1958; amended October 1963)

The Constitution was altered and enlarged according to Law No. 1 on October 31st, 1963. The principle of the Republic is "Government of the people by the people for the people".

1. The State is a Democratic Republic.

3. Sovereignty rests in the people, and is exercised by their representatives in the National Assembly.

The National Assembly

4-8. Equal and secret elections for the National Assembly on a national list are held every seven years.

9. The first duty of the Assembly is to pass laws.

10. Representatives enjoy the usual parliamentary immunity.

11. A permanent Commission elected from the National Assembly manages the business of the Assembly between sittings (two per year).

14. The President and the Representatives are responsible for the initiation and formulation of laws.

17. The Representatives are in control of the Budget and expenditure; limited only in that any proposal for an increase in expenditure must be accompanied by a corresponding increase in revenue.

The President

20. The President is Commander-in-Chief of the Armed forces.

21. Executive power is practised solely by the President; the Cabinet is nominated by him and subordinate to him.

22. The President is elected for a period of seven years and can stand for re-election as often as he wishes.

24. The President is responsible to the Assembly, but there are no definite curbs upon the executive.

28. If the Presidency is vacant the Cabinet continues to govern until a new President is elected.

The Judiciary

35. The President guarantees the independence of the judiciary; he also has the power to pardon. The judges are responsible only to the law.

36. The accused has a right to defence.

The Basic Rights and Duties of the Citizen

39. All the inhabitants of the Republic of Guinea have the right to vote.

40-46. The Constitution confers the right of freedom of speech, assembly, coalition, demonstration and conscience upon all citizens; the Press is free, the post is secret, property is inviolable; all citizens have the right to work, go on holiday, to receive social support and education, and to go on strike.

42. It is the duty of all citizens to uphold the Constitution, to defend their country, and to fulfil social responsibilities.

45. Racial discrimination, or regional propaganda is punishable by law.

There are 662 km. of 1 metre gauge track from Conakry to Kankan in the east of the country, crossing the Niger at Kouroussa. A second line, 104 km. long, links Conakry and the aluminium works at Fria. In the west of the country a 136 km. railway has been built to carry bauxite from the Sangaredi mine to the new port of Kamsar. A line links Conakry and Debele, also for the exploitation of bauxite deposits. In 1974 it was announced that work would soon begin on a 1,200 km. Trans-Guinea railway linking Conakry and the iron mines of Nimba and Simandou near the Liberian border, to be completed by 1981, at an estimated cost of \$555 million.

ROADS

There are 28,400 km. of roads and tracks, of which 520 km. are tarred. The main roads are those running along the coast from Sierra Leone to Guinea-Bissau (via Conakry) and from Conakry into the interior, with branches to the frontiers of Senegal, Mali and the Ivory Coast.

In 1976, the World Bank and IDA loaned over \$15 million to repair the road network.

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Guinea-Bissau lies on the west coast of Africa between Senegal to the north and Guinea to the east and south. The climate is tropical although maritime and sahelian influences are felt. The average temperature is 20°C (68°F). The official language is Portuguese, but Crioulo and several dialects are widely spoken. The principal beliefs are animism and Islam. There is a small minority of Catholics and other Christian groups. The flag has horizontal stripes of yellow above green and a red vertical stripe at the hoist with a five-pointed black star at its centre. The capital is Bissau.

Recent History

Guinea-Bissau was settled by the Portuguese in the 15th century. Small nationalist groups began to form in the 1950s and the African Party for Independence in Guinea and Cape Verde (PAIGC) was formed in 1956. Fighting broke out in the early 1960s and by 1972 the PAIGC was in control of two-thirds of the country. In 1973 a National Assembly was elected and the independence of the Republic of Guinea-Bissau was proclaimed in September. The Republic was quickly recognized by more than 90 states. The UN General Assembly recognized Guinea-Bissau as a sovereign state in 1974. After the *coup d'état* in Portugal in April 1974 negotiations took place between the two Governments and the Republic was recognized by Portugal in September 1974. The Government has introduced several measures to regularize relations with Portugal, lay the foundations for a socialist state and enter into friendly relations with other states, in particular in Africa but also with the U.S.S.R. and France. Many thousands of refugees have returned to their homes since independence. The Government is pursuing a policy of decentralization and rural development, and the country has been divided into eight regions which are subdivided into sectors, sections and villages (*tabancas*). In elections held in December 1976 and January 1977 voters chose regional councils from which a new National Assembly was later selected. Although Guinea-Bissau and Cape Verde are constitutionally separate, the PAIGC supervises both states and the eventual aim is unification, although this is not envisaged in the near future. The Third PAIGC Congress in November 1977 determined to continue to develop joint goals and institutions. Guinea-Bissau is a member of the OAU and the UN.

Government

The 1973 Constitution proclaimed the PAIGC, the only permitted political party, to be "the supreme expression of the sovereign will of the people". The supreme organ of state is the National People's Assembly, a legislative body of 150 members (selected from regional councils) who hold office for up to four years. Executive power is held by the State Council, with 15 members elected for three years from deputies to the Assembly. The Council's President is Head of State. Administrative authority is exercised by the Council of State Commissioners, appointed by the Head of State.

Defence

Since the independence of Guinea-Bissau the Republic has had control over its armed forces and all Portuguese military personnel have been withdrawn. It was proposed in 1977 to establish a joint defence committee with Cape Verde.

Economic Affairs

Subsistence agriculture is the mainstay of the economy, engaging 86 per cent of the population. Rice is the staple food. In recent years Guinea-Bissau has become a net importer of rice but, with Chinese assistance, it aims to recover self-sufficiency by 1980. Other important cash crops are groundnuts, coconuts and palm oil. Maize, beans, cassava and sweet potatoes are also grown. Cattle-breeding is important in the interior. The fishing industry is to be expanded with foreign aid, and a refrigerating complex in Bissau is planned. The Government plans to make the country self-sufficient in essential foods, to increase production for export and to diversify away from groundnuts and rice. A sugar refinery will be built with aid from the Netherlands. Co-operative farming methods are being introduced. Industry is being developed, based on the processing of food and raw materials. The Government is encouraging the growth of small industrial units in rural areas in order to provide employment and satisfy consumer demand. The mining sector has still to be developed. Commercially exploitable deposits of bauxite in the Boé area, phosphates and, on a small scale, zinc and copper have been discovered. The planned construction of a dam on the Corrubal river will supply hydro-electric power for the development of the bauxite deposits. An aluminium plant will be built at Saltinho. In August 1975 the People's Assembly adopted several measures, including the nationalization of land, to streamline the economy. The Government has a monopoly over internal and external trade and distribution. The Government's aims are to improve the communications network, to have reached the pre-1960 level of agricultural production by 1977 and create small industrial units to reduce unemployment. In 1976 the Government acquired a majority shareholding in all Portuguese firms operating in Guinea-Bissau, thus breaking the stranglehold of Portuguese monopoly trading companies on the economy. Guinea-Bissau is receiving many foreign loans and credits, notably from Sweden, the Netherlands and the U.S.S.R. Guinea-Bissau is a member of ECOWAS.

Transport and Communications

In 1972 there were 3,570 km. of roads, 420 km. of which were tarred. Foreign aid is being negotiated for an international road to link Guinea-Bissau with the Gambia and Senegal. There is an airport at Bissau with regular services provided by T.A.P. from the Cape Verde Islands and Lisbon. A port is to be constructed at Buba, which will be linked by railway to Boé.

Social Welfare

Medical services are limited due to a severe shortage of facilities. The PAIGC aims to set up one regional hospital

GUINEA-BISSAU

in each of the eight regions. In 1976 only three regions had hospitals, but it was announced in 1977 that three further hospitals would be constructed with U.S. \$2.2 million aid from the EEC. China and Cuba are providing extensive help in these areas.

Education

During the war the PAIGC laid emphasis on improving educational services in the liberated areas. In the school year 1975/76 there were 549 schools providing basic education for almost 85,000 pupils. Mass literacy campaigns have

been launched, but in 1977 the adult illiteracy rate was still 90 per cent.

THE CONSTITUTION

The draft constitution was adopted in 1973 following the declaration of independence made by the PAIGC on September 24th. Some provisions have been subsequently amended.

Chapter I: Fundamental Objectives

1. Guinea-Bissau is a sovereign, democratic, anti-colonialist and anti-imperialist republic fighting for total liberation, for the union of Guinea-Bissau and the Cape Verde archipelago, as well as for the social progress of its people.

3. Its objectives are the total liberation of Guinea-Bissau and Cape Verde from colonialism and their unification in one state according to the people's wishes.

4-6. The PAIGC is the supreme expression of the sovereign will of the people.

7. The State gives particular attention to the People's Revolutionary Armed Forces (FARP).

8. The State plays a fundamental role in the planning of the national economy and the property of the colonialist State will be transformed into national property.

Chapter II: Rights, Liberties and Fundamental Duties

11. The State guarantees fundamental rights in accordance with the principles of the Universal Declaration of Human Rights.

13. All citizens are equal before the law.

16. Men and women have equal rights.

17-19. The Constitution guarantees freedom of expression, of thought, of meeting, of association, of demonstration and of practising a religion, together with the right not to be detained, arrested or condemned other than according to the law in force and also the right to inviolability of domicile and correspondence.

20. The native of Cape Verde benefits from the same rights and is subject to the same duties as the citizen from the State of Guinea-Bissau.

22. Individuals who act against the unity of Guinea-Bissau and Cape Verde or encourage colonialism, imperialism, racism or tribalism will be deprived of their political rights and fundamental individual liberties.

Chapter III: Organization of Political Power

24. Sovereignty rests in the people and is exercised by their representatives in the National People's Assembly and the Regional Councils.

25. Voting is universal and equal and is exercised by direct secret suffrage by any citizen over 15 years of age.

26. Elections in non-liberated areas may be carried out by indirect suffrage.

National People's Assembly

28-35. The National People's Assembly is the supreme organ of State Power. It may discuss policy, modify or nullify measures adopted by other State organs, set up Inquiry Commissions and delegate legislative powers to the Council of State Commissioners. It is elected for a period of up to four years and will meet at least once a year. Representatives enjoy the usual parliamentary immunity.

State Council

36-43. The State Council exercises the function attributed to it by the National People's Assembly and is responsible to this body. It has 15 members elected from the deputies to the Assembly for a three-year term. The President of the State Council represents the State in international relations and is the Supreme Commander of the FARP and presides over the meetings of the Council of State.

Council of State Commissioners

44-48. The Council of State Commissioners is responsible to the National People's Assembly and the State Council. It directs, controls and co-ordinates the activity of all other State Commissariats, Central Services etc., and appoints and dismisses civil servants.

Regional Councils

49-53. The Regional Council is the representative organ of State power comprising elected representatives from the sectors of the Region. It is responsible for public order, defence of the rights of the citizen and the improvement of the community in every way. Resolutions made may be nullified by the State Council. To carry out its resolutions the Regional Council elects a Regional State Committee and Sector State Committees.

Juridical Power

54-56. The right of defence is recognized and guaranteed to the defendant and the accused.

Chapter IV: Constitutional Revision

57-58. The Constitution can be revised only by the National People's Assembly and at the initiative of the State Council or one-third of the deputies. All alterations must be approved by two-thirds of the deputies and the Assembly can decide whether to submit the proposed revision to a popular referendum.

TRADE AND INDUSTRY

Since independence the Government has been actively pursuing a policy of small-scale industrialization to compensate for the almost total lack of manufacturing capacity. It has adopted an elaborate state control programme and in late 1976 acquired 80 per cent of the capital of a Portuguese company, **Ultra Marina**, a large firm specializing in a wide variety of trading, ship-repairing and agricultural processing. The Government has also acquired major interests in the **CICER** brewery and created a

Judicial System, Religion, The Press, Radio, Finance, etc.

joint venture company with the Portuguese concern **SACOR** to sell petroleum products after the construction of new storage facilities. Several small factories were to be built in 1977 and since 1975 three fishing companies have been set up with foreign participation: **Guialp** (with Algeria), **Estrela do Mar** (with the U.S.S.R.) and **Semapesca** (with France). In 1977 an agreement was signed with Portugal to establish a fourth company.

TOURISM

The island of Bubaque is being developed as a tourist resort.

Centro de Informação e Turismo: Caixa Postal 294, Bissau; official Tourism and Information Department.

GUYANA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Co-operative Republic of Guyana lies on the north coast of South America between Venezuela to the west and Surinam to the east, with Brazil to the south. The narrow coastal belt has a moderate climate with a wet season from April to August and a dry season from September to November; inland there are tropical forests and savannah and the dry season extends into February. The average temperature is 27°C (80°F). English is the official language but Hindi, Urdu and Amerindian dialects are also spoken. The principal religions are Christianity, Hinduism and Islam. The national flag (proportions 5 by 3 when flown on land, but 2 by 1 at sea) is green, with a white-bordered yellow triangle (apex at the right-hand edge) on which is superimposed a black-bordered red triangle (apex in the centre). The capital is Georgetown.

Recent History

Guyana was formerly British Guiana, a colony of the United Kingdom. A new constitution, providing for universal adult suffrage, was introduced in 1953. The elections of April 1953 were won by the left-wing People's Progressive Party (PPP), led by Dr. Cheddi Jagan. In October, however, the United Kingdom Government, claiming that a communist dictatorship was threatened, suspended the constitution. An interim administration was appointed. The PPP split in 1955, when some of the members left to form a new party, the People's National Congress (PNC), under the leadership of Forbes Burnham. The PNC draws its support mainly from the African-descended population, while PPP support comes largely from the Indian community. Both parties adhere to Marxist ideology.

A revised constitution was introduced in December 1956 and fresh elections held in August 1957. The PPP won and Dr. Jagan became Chief Minister. Another constitution, providing for internal self-government, was adopted in July 1961. The PPP won the elections in August and Dr. Jagan was appointed Prime Minister in September. Following a constitutional conference in October 1963, the United Kingdom changed the electoral system to provide for proportional representation. The first election under the new system was held in December 1964. The PPP won the largest share of the vote but not a majority. A coalition government was formed by the PNC and the United Force, with Burnham as Prime Minister. This coalition led the colony to independence, as Guyana, on May 26th, 1966.

The PNC won the general elections held in December 1968 and again in July 1973, although the results of the latter were disputed by the opposition parties. In February 1970 Guyana became a Co-operative Republic, and Arthur Chung was elected President in March. In May 1976 the PPP, which had boycotted the National Assembly since 1973, offered the Government its "critical support". However, in August 1977 the PNC rejected the PPP's proposal that a "national patriotic front government" should be formed after the 1978 elections. The PPP-affiliated Guyana Agricultural and General Workers'

Union called a strike shortly afterwards. The sugar industry was brought to a standstill, and the Government drafted troops to restart production and introduced emergency powers.

An extensive area in the west of the country is claimed by Venezuela, but in June 1970 both sides signed the Port of Spain Protocol which was hoped to ease tensions between the countries and lead to the development of common border areas. Guyana hopes eventually to people the disputed area and to develop the rich mineral resources thought to exist there. Guyana's frontier with Surinam is also in dispute.

Government

Legislative power is held by the unicameral National Assembly, with 53 members elected for five years by universal adult suffrage, using proportional representation. The President, a constitutional Head of State, is elected by the Assembly for six years. Executive power is held by the Cabinet, led by the Prime Minister, which is responsible to the Assembly. The Cabinet may include up to four Ministers who are not elected members of the Assembly and such Ministers become non-voting members. Guyana comprises five administrative districts, each the responsibility of a Minister of State.

Defence

The armed forces are combined in a single service consisting of 2,000 men. Para-military forces total 2,250. National Service was established in 1973.

Economic Affairs

The economy is based on agriculture, the chief crops being sugar cane and rice. Citrus fruits and coconuts are also important, and the development of groundnuts, oil palms and a variety of vegetables is being encouraged in an effort to reach self-sufficiency. As part of the programme to "feed, house and clothe" the nation, the development of fisheries, timber and beef production, as well as cotton cultivation, has a high priority. The exploitation of the vast timber resources has been hampered by inadequate transport facilities.

The sugar yield in 1976 reached an estimated 332,000 tons, compared with 300,000 tons in 1975. However, the 1977 yield fell to an estimated 260,000 tons, owing partly to the strike. Rice production in 1976 fell by about 40 per cent from 160,000 tons in 1975 but rose to a record 220,000 tons in 1977. Production of bauxite in 1976 was estimated to have fallen by 50 per cent. In 1976 the balance of payments showed a current deficit of U.S. \$139.6 million and the country's international reserves fell from U.S. \$100.5 million to U.S. \$27.3 million. In February 1977 Guyana extended its import licensing system to apply quantitative restrictions on imports from other CARICOM countries. During 1977 Guyana received increased USAID assistance, signed a co-operation agreement with the U.S.S.R., and entered into negotiations with the IMF.

In November 1976 it was announced that the four-year development plan, due to end in 1976, would be extended

until the end of 1977. During 1977 a new two-part eight-year plan was to be drawn up.

As part of the Government's programme of nationalization of foreign interests in Guyana, the two sugar estate and factory operations of the British-owned Demerara Sugar Company were taken over in 1975. This was followed in 1976 by the nationalization of the interests of the U.K.-based Booker McConnell company for compensation of £10 million, giving Guyana control of virtually the whole industry. The Guyana Sugar Corporation, founded in 1976, signed a four-year marketing agreement with Booker McConnell, but there are plans to build a sugar refinery locally in the future.

By the end of 1974 the whole bauxite industry, which accounted for nearly 50 per cent of total export earnings in 1973, had been nationalized. In 1977 the Guyana Bauxite Corporation (Guybau) and Berbice Mining Enterprises merged to form Guyana Mines Ltd. (Guymine). There are plans to build a local aluminium smelter by the mid-1980s in co-operation with Jamaica and Trinidad and Tobago. However, this depends on the success of financing a hydro-electric scheme in the Upper Mazaruni district. Construction of a road to allow access to the district started in 1976, but halted in 1977 owing to lack of funds. The only foreign economic interests still operating in 1976 were five commercial banks and several insurance companies, and the Government has announced its intention to nationalize these concerns.

Guyana is a founder member of the Caribbean Common Market (CARICOM) and the International Bauxite Association. In January 1977 Guyana presented an application for "formal association" with the Council for Mutual Economic Assistance (CMEA).

Transport and Communication

The coastal strip has a well developed road system. In the whole country there are more than 5,000 miles of paved and good weather roads and trails. Long-distance buses link the principal towns, villages and sugar estates. Communication with the interior is still chiefly by river, the main rivers being the Mazaruni, the Cuyuni, the Essequibo, the Demerara and the Berbice. There are airstrips at the more important settlements in the interior and an international airport at Timehri, 23 miles (37 km.) outside Georgetown.

Social Welfare

In recent years improved water supplies, anti-tuberculosis campaigns and the control of malaria have steadily improved general health. A National Insurance scheme, compulsory for most workers and employers, was established in 1969, and has since been extended to cover self-employed people.

Education

Education is free and compulsory between 5 and 14. The estimated literacy rate is 85 per cent. In 1976 the Government took over all church and private schools. In 1977 Guyana had 804 primary and 73 secondary schools. Children receive secondary education either in a general secondary school for five years or stay on at primary school for a further three years. The total number of pupils in all schools was about 252,000 in 1977. There are also 11 technical, vocational, special and higher educational institutions. These include the University of Guyana and the Cyril Potter College of Education, a Teacher Training Centre, in Turkeyen, and the Government Technical Institute and a College of Education for the training of secondary school teachers in Georgetown.

Tourism

Guyana does little to encourage tourism despite the beautiful scenery in the interior of the country. Tours to the interior, especially to see the famous Kaieteur falls (741 ft.), may be arranged. In 1970 24,887 tourists visited Guyana.

Visas are not required to visit Guyana by nationals of Belgium, Denmark, Finland, France, Greece, Iceland, Italy, Liechtenstein, Luxembourg, Netherlands, Norway, San Marino, Spain, Sweden, Switzerland, Tunisia, Turkey, the United Kingdom and Commonwealth countries, the U.S.A. and Uruguay.

Sport

Cricket is very popular, as are hockey, basketball, table tennis, lawn tennis, football, boxing, motor-racing and cycling.

Public Holidays

1978: May 1st (Labour Day), July 3rd (Caribbean Day), August 7th (Freedom Day), October 31st (Deeparali, Hindu), December 25th-26th (Christmas).

1979: January 1st (New Year's Day), February 23rd (Republic Day), April 13th (Good Friday), April 16th (Easter Monday).

In addition, the Muslim festivals of Eid-ul-Ahaz (towards the end of the year) and Youman Naubi (in the first half of the year) are celebrated. These festivals are dependent on sightings of the moon and their precise dates are not known until two months before they take place.

Weights and Measures

Imperial weights and measures are used.

Note: The Guyana dollar was introduced in November 1965, replacing (at par) the West Indian dollar. The prevailing exchange rate was £1 = 4.80 dollars and this remained in effect until August 1971. From November 1967 the rate was U.S. \$1 = \$G2.00 and this relationship was retained until June 1972, despite the devaluation of the U.S. dollar in December 1971, when the sterling exchange rate became £1 = \$G5.2114. When the British currency was "floated" in June 1972 the Guyana dollar's link with U.S. currency was severed and it "floated" (in line with sterling) until October 1975, when a new exchange rate of U.S. \$1 = \$G2.55 was established. The average rates (Guyana dollars per U.S. dollar) were: 2.087 in 1972; 2.127 in 1973; 2.229 in 1974; 2.355 in 1975.

THE CONSTITUTION

Guyana is a sovereign democratic state, and became a republic within the Commonwealth on February 23rd, 1970. The President, a constitutional Head of State, is elected by the National Assembly.

The executive body consists of a Cabinet, presided over by the Prime Minister, which is collectively responsible to the legislature. The National Assembly, which has a term of five years, contains 53 members elected by a system of

proportional representation. Adult suffrage is universal.

Impartial commissions exist for the judiciary, the public service and the police service, and incorporated in the constitution are safeguards to protect the rights to equality, personal freedom and property of all individuals and minority groups. An Ombudsman is appointed, after consultation between Prime Minister and leader of the Opposition, to hold office for four years.

JUDICIAL SYSTEM

The Judicature of Guyana comprises the Supreme Court of Judicature, which consists of a Court of Appeal and a High Court (both of which are superior courts of record), and a number of Courts of Summary Jurisdiction.

The Court of Appeal consists of the Chancellor as President, the Chief Justice, and such number of Justices of Appeal as may be prescribed by Parliament. This Court came into operation in June 1966.

The High Court of the Supreme Court consists of the Chief Justice as President of the Court and nine Puisne Judges. Its jurisdiction is both original and appellate. It has criminal jurisdiction in matters brought before it on indictment. A person convicted by the Court has a right of appeal to the Guyana Court of Appeal. The High Court of the Supreme Court has unlimited jurisdiction in civil matters and exclusive jurisdiction in probate, divorce and

admiralty and certain other matters. Under certain circumstances, appeal in civil matters lies either to the Full Court of the High Court of the Supreme Court, which is composed of not less than two judges, or to the Guyana Court of Appeal.

A magistrate has jurisdiction to determine claims where the amount involved does not exceed \$250. Appeal lies to the Full Court.

Chancellor: Hon. J. O. F. HAYNES.

Chief Justice: Hon. Sir H. O. S. BOLLERS.

Appeal Court Judges: Hons. P. A. CUMMINGS, V. E. CRANE, R. H. LUCKHOO, K. S. MASSIAH, D. JHAPPAN, M. GEORGE (acting).

HAITI

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Haiti occupies the west of the island of Hispaniola in the West Indies (the Dominican Republic occupies the rest of the island). Cuba, to the west, is less than 80 km. away. The climate is tropical but the mountains and fresh sea winds mitigate the heat. Temperatures vary little with the seasons, the average in Port-au-Prince being about 27°C (80°F). May to November is the rainy season. The official language is French but a Creole dialect is generally spoken. Roman Catholicism is the official religion, and voodoo is the folk religion. The national flag (proportions 2 by 1) has equal vertical bands of black and red, with a white rectangular panel, containing the coat of arms, in the centre. The capital is Port-au-Prince.

Recent History

A military coup in 1950 led to the present Constitution. There were further risings in 1956 and 1957 when Dr. François Duvalier was elected President. In May 1963 Dr. Duvalier's term of office was extended for a further six years, but in 1964 his tenure was changed to life Presidency. There were several abortive attempts to overthrow the regime until Dr. Duvalier's death. In January 1971 the President's son, Jean-Claude, was appointed as his successor. This was subsequently ratified almost unanimously by referendum and, on his father's death in April, Jean-Claude Duvalier became President for life. Since the President took office, a number of political prisoners have been released through an amnesty. Relations with other countries, which deteriorated seriously under the elder Duvalier, have improved considerably since 1971, leading to a marked increase in foreign aid, particularly from the U.S.A., Canada, France, the Federal Republic of Germany and the international development agencies. Haiti is a member of the Organization of American States.

Government

The President has absolute power, holds office for life and may nominate his successor. He governs with the assistance of an appointed Council of Ministers. The unicameral legislative chamber has 58 members elected for six years by universal adult suffrage. There are nine *Départements*.

Defence

Haiti has a defence force with a total strength of about 6,550, including two companies of commando-type troops known as the *Léopards*. The army of about 6,000 men serves also as a gendarmerie. The navy has about 300 men, and the air force about 250. There is also a militia, the National Security Volunteers of some 7,000 men.

Economic Affairs

Haiti is a predominantly agricultural country, with over 80 per cent of the working population on the land. Coffee, Haiti's principal export, has suffered from poor yields in recent years. Efforts are being made to increase agricultural productivity through the improvement of power, transportation and irrigation. However, problems caused by deforestation and soil erosion will be difficult to solve. A hydro-electric plant at Péligre, which became opera-

tional in July 1971, now has a capacity of 45,000 kW. Coffee accounts for about 40 per cent of Haiti's export earnings, followed by light industrial products, bauxite, essential oils and sugar. The economy declined under the late Dr. Duvalier. Industrial investment by United States companies, attracted by low taxes and cheap labour, is beginning to grow again. Transformation industries are an important part of the economy, and currently include the assembly of sophisticated electronic equipment. Tourism and the construction industry are also principal areas of growth. Soap, cloth, cement, cigarettes, drinks, flour and shoes are among locally produced articles. Trade is largely with the United States, although the EEC is now a significant trade partner. In 1976 the balance of payments position improved, but in 1977 the continuing drought and soil erosion resulted in famine and the breakdown of essential services. The north-west was declared an emergency area. International aid was received, including generators from the U.S.A. to enable industries to restart production.

Transport and Communications

Two main infrastructure projects are being financed by the World Bank and the Interamerican Development Bank respectively to provide all-weather roads from Port-au-Prince to the north (Cap Haïtien) and to the south (Les Cayes). A third major road, to Jacmel, is being financed by France. The only railway is run by the Haitian American Sugar Company. There are regular freight services to the U.S.A., Caribbean ports, Latin America, the Far East and Europe. An internal air service, Haiti Air Inter, is managed by Turks and Caicos Airways, and foreign lines provide international services.

Social Welfare

Industrial and commercial workers are provided with free health care.

Education

Education is free and is provided by the State, the Roman Catholic Church and missionary churches in nursery schools, elementary schools, secondary schools, including 21 *lycées*, and the State University. Education is compulsory between the ages of 6 and 12 years, but a large majority of children do not attend school due to lack of facilities and staff. Basic adult education in Creole dialect is being undertaken in rural areas, where 90 per cent of the peasants are illiterate, by an organization for fighting illiteracy, ONAAC (Office national d'alphabétisation et d'action communautaire).

Tourism

Haiti's bays, beaches, mountains, folklore and primitive art are of interest to tourists. Another attraction is the magnificent 150-year-old citadel and palace of King Henri Christophe. Tourism is Haiti's second largest source of foreign exchange. In 1976 there were 282,520 foreign visitors compared with 209,000 in 1974. The majority of tourists come from the U.S.A.

HAITI

Visas to visit Haiti are not required by nationals of the U.S.A., the United Kingdom and most other European countries.

Sport

The most popular games are football and volleyball. Sailing and skin diving are also popular with tourists.

Public Holidays

1978: May 1st (Labour Day), May 4th (Ascension Day), May 18th (Flag Day), May 22nd (National Sovereignty), June 22nd (President's Day), August 15th (Assumption Day), October 24th (UN Day), November 1st (All Saints' Day), November 2nd (All Souls' Day), November 18th (Army Day), December 5th (Discovery Day), December 25th (Christmas Day).

Introductory Survey, Statistical Survey

1979: January 1st (National Day), January 2nd (Heroes of Independence), February 27th (Shrove Tuesday), April 13th-16th (Easter), April 14th (Pan American Day).

Weights and Measures

Officially the metric system is in force but many United States measures are also used.

Currency and Exchange Rates

100 centimes = 1 gourde.

Exchange rates (December 1977):

£1 sterling = 9.16 gourdes;

U.S. \$1 = 5.00 gourdes.

Coins: 5, 10, 20 and 50 centimes.

Notes: 1, 2, 5, 10, 50, 100, 250 and 500 gourdes (U.S. currency notes also circulate).

Exchange rates (December 1977): £1 sterling=9.16 gourdes; U.S. \$1=5.00 gourdes.

100 gourdes=£10.92=\$20.00.

Note: The exchange rate is fixed at U.S. \$1=5.00 gourdes (1 gourde=20 U.S. cents) and this has remained in effect despite two devaluations of the U.S. dollar, in December 1971 and February 1973. The gourde's relationship to sterling is based on the pound-dollar rate. The central exchange rate was £1=12.00 gourdes from November 1967 to August 1971 and £1=13.0286 gourdes from December 1971 to June 1972.

HONDURAS

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Honduras lies in the middle of the Central American isthmus. It has a long northern coastline on the Caribbean and a narrow southern outlet to the Pacific. Its neighbours are Guatemala to the west, El Salvador to the south-west and Nicaragua to the south-east. The climate ranges from temperate in the mountainous regions to tropical in the lowlands. The rainy season is from May to November. The national language is Spanish. Roman Catholicism is the predominant faith. The national flag (proportions 3 by 2) has three horizontal stripes of blue, white and blue, with five blue stars, arranged in a diagonal cross, in the centre of the white band. The capital is Tegucigalpa.

Recent History

In 1963 the Liberal President, Dr. Ramón Villeda Morales, was deposed after a coup led by the armed forces. Colonel (later Gen.) Oswaldo López Arellano became Head of State, and the constitution was suspended. In 1965 a new constitution was promulgated and Gen. López became constitutional President for 6 years.

Presidential elections took place in 1971, in which Ramón Ernesto Cruz Uclés, the National Party candidate, was elected. After the presidential inauguration, the arrangement by which the two main political parties enjoyed equal representation in the Congress came under increasing strain. Popular discontent over government austerity measures and peasant unrest over delayed land reforms, culminated in a bloodless coup led by the former President, Gen. López Arellano, in December 1972. A group of young army officers, in favour of social reform, took control of the Supreme Council of the Armed Forces and in March 1974 replaced President López Arellano as Commander-in-Chief of the Army with Col. Juan Melgar Castro. The President's position became weakened by his apparent inability to cope with the reconstruction of the country after hurricane damage in September 1974. Following accusations of alleged bribery by United Brands and his refusal to allow examination of his bank accounts, President López Arellano was overthrown by the army in April 1975 and replaced by Col. (later Gen.) Melgar Castro. Although the new Government pledged its support for agrarian reform, it failed to implement it immediately and violent clashes between peasants and landowners occurred when the UNC (National Peasants' Union) tried to accelerate the land distribution programme. In 1976 President Melgar Castro announced that the army would stay in power until 1979 and postponed the 1977 elections until then. A National Advisory Council was established in 1977 to advise the Government on policy and to draft a statute for the election of a constituent assembly.

There has been long-standing animosity between Honduras and El Salvador, caused by the increasing numbers of Salvadorian immigrants entering Honduras, which developed into armed conflict in 1969. Despite a ceasefire arranged by the OAS and the creation of a demilitarized zone on the common border under the San José agreement of 1970, many border incidents occurred and official con-

tacts remained broken until 1976, when the two countries signed a document aimed at resolving the conflict. In October it was agreed to put the dispute in the hands of a mediator.

Government

Honduras has been under military rule since December 1972. Government is by decree. The Congress of Deputies was suspended in 1972, but there are plans to hold elections in 1979.

Defence

Military service is voluntary. Active service lasts eight months, with subsequent reserve training. In 1977 the armed forces totalled 14,200, of which 13,000 were in the army and 1,200 in the air force. Para-military forces numbered 3,000 men. Defence expenditure in 1977 was 5,050 million lempiras.

Economic Affairs

Honduras is principally an agricultural country. Bananas, coffee, timber, meat, beans and sugar account for 70 per cent of all exports. Coffee replaced bananas as the leading export in 1975. Between 1973 and 1975 the value of agricultural output declined, owing to bad weather, the lack of storage and processing facilities and uncertainty caused by the Agrarian Reform Programme. As a result, Honduras became a net importer of staple crops, such as maize, sorghum and beans, in 1975. However, because of much improved grain, banana, coffee and meat production, the agricultural sector grew by 9.5 per cent in 1976. The banana crop was only 10 per cent lower than pre-1974 levels.

Forests cover nearly 45 per cent of the land area and wood is the third largest export. A U.S. \$415 million forestry project at Olancho, involving the construction of three sawmills and a pulp and paper plant, should greatly increase lumber exports by 1983. There are deposits of silver, gold, copper, lead, zinc and low-grade iron ore.

There has been some attempt to diversify the economy. Industry is still on a small scale but is being developed, particularly in the San Pedro Sula area. In 1975 a free trade zone was established at Puerto Cortés in an attempt to stimulate industry. Honduras has been a member of the Central American Common Market since it was formed in 1960. It remains the poorest member country, even after substantial growth during the 1960s. Trade with El Salvador was broken off after the war in 1969 and serious disagreement on policy in the CACM led Honduras to suspend its trading pact with all the CACM countries in December 1970. In September 1974 Hurricane Fifi caused severe damage, estimated at U.S. \$900 million, to crops and industries on the north coast. About 70 per cent of the banana crop was lost, resulting in large trade deficits in 1974 and 1975. A five-year redevelopment programme costing \$1,000 million was announced in 1975. Priority is given to infrastructural improvements and the development of new industries. In January 1975 a new agrarian reform law was passed, aiming at the distribution of 600,000 hectares of land to 100,000 families by 1980. However, the

new law has become a deterrent to agricultural production by prohibiting the leasing of land and causing farmers to be more cautious in their investments.

The rate of economic growth slowed in 1974 and 1975 to 1.5 and 0.7 per cent, owing to hurricane damage, severe droughts and the effects of the world recession. However, increased agricultural production helped to produce an average growth rate of 7.5 per cent in 1976 and 1977, the highest rate for 20 years. The balance of payments surplus in 1977 was estimated at \$70 million, almost twice that for 1976, due mainly to the inflow of foreign exchange from coffee earnings. The rate of inflation fell from 8 per cent in 1975 to 5 per cent in 1976 but rose again to 11 per cent in 1977.

The 1978-82 Development Plan envisages public investment expenditure of \$1,000 million. Its objectives are to improve electricity supplies and general infrastructure, and to encourage the productive use of domestic natural resources in the form of projects with good export potential. Sixty per cent of planned expenditure is to be invested in the development of energy, transport and communications, including the 300 MW El Cajón hydro-electric project to be completed by 1985, which will absorb 60 per cent of investment in the energy sector. The remaining 40 per cent is to be invested in agriculture and forestry, including the Olanchito forest industries project, and support for the extensive land reform programme. Honduras is a member of the OAS, SELA, UPEB, ODECA and IADB.

Transport and Communications

In 1976 there were 1,735 km. of railways, located entirely in the north and used mainly to carry bananas to the ports. In 1976 there were 9,154 km. of roads. There are international airports at Tegucigalpa, La Ceiba and San Pedro Sula.

Social Welfare

There is a state social security system in operation; it provides benefits for sickness, maternity, orphans, unemployment, accidents and professional sickness, and also family and old age allowances. A Labour Code affords guarantees for employees.

Education

Education is free and compulsory from seven to twelve. In 1976 there were 4,698 primary schools and 177 secondary and technical schools. There is an autonomous national university in Tegucigalpa. In 1976 the literacy rate was 47 per cent.

Tourism

The ruins of Copán, second largest city of the old Mayan Empire, attract tourists and archaeologists. Lake Yojoa, near San Pedro Sula, and Trujillo Bay provide fishing and boating, and there is bathing on the Bay Islands and along the beaches of the Northern coast. A tourist complex, costing 50 million lempiras, is to be built in the San Pedro Sula-Tela area. In 1976 183,137 tourists visited Honduras.

All tourists holding a tourist card may enter Honduras.

Sport

Football and basketball are the most popular sports in Honduras, although softball, baseball and bowling are becoming increasingly popular.

Public Holidays

1978: May 1st (Labour Day), September 15th (Independence Day), October 3rd (Morazán Day), October 12th (Discovery Day), October 21st (Army Day), December 25th (Christmas).

1979: January 1st (New Year's Day), April 12th-16th (Easter), April 14th (Pan American Day).

Weights and Measures

The metric system is in general use. The old Spanish measures are used locally.

Currency and Exchange Rates

100 centavos = 1 lempira.

Exchange rates (December 1977):

THE CONSTITUTION

Note: The Constitution has been only partly in force since December 1972; government is at present by decree.

A Constitution was passed by the Constituent National Assembly on June 5th, 1965.

The following are some of its main points:

Honduras is constituted as a democratic Republic. All Hondurans over the age of 18 are citizens.

The Suffrage and Political Parties: The vote is direct and secret. Any political party which proclaims or practises doctrines contrary to the democratic spirit is forbidden. A National Electoral Council will be set up at the end of each Presidential term. Its general function will be to supervise all elections and to register political parties. A proportional system of voting will be adopted for the election of Municipal Corporations.

Individual Rights and Guarantees: The right to life is declared inviolable; the death penalty is abolished. The Constitution recognizes the right of *habeas corpus* and arrests may be made only by judicial order. Remand for interrogation may not last for more than six days, and no-one may be held *incommunicado* for more than twenty-four hours. The Constitution recognizes the rights of free expression of thought and opinion, the free circulation of information, of peaceful, unarmed association, of free movement within and out of the country, of political asylum and of religious and educational freedom. Civil marriage and divorce are recognized.

Workers' Welfare: All have a right to work. Day work shall not exceed eight hours a day or forty-four hours a week; night work shall not exceed six hours a night or thirty-six hours a week. Equal pay shall be given for equal work. The legality of trades unions and the right to strike are recognized.

Education: The State is responsible for education, which shall be free, lay, and, in the primary stage, compulsory. Private education is liable to State inspection and regulation.

Legislative Power: Deputies are obliged to vote, for or against, on any measure at the discussion of which they are

present. Congress has power to grant amnesties to political prisoners; approve or disapprove of the actions of the Executive; declare part or the whole of the Republic subject to a state of siege; declare war; approve or withhold approval of treaties; withhold approval of the accounts of public expenditure when these exceed the sums fixed in the Budget; decree, interpret, repeal and amend laws, and pass legislation fixing the rate of exchange or stabilizing the national currency. Congress may suspend certain guarantees in all or part of the Republic for sixty days in case of grave danger from civil or foreign war, epidemics or any other calamity. Deputies are elected in the proportion of one deputy and one substitute for every 30,000 inhabitants, or fraction over 15,000. Congress may amend the basis in the light of increasing population.

Executive Power: The Executive Power is exercised by the President of the Republic, who is elected for a period of six years, beginning on June 6th, by a simple majority of the people. No President may serve two terms in succession.

Judicial Power: The Judiciary consists of the Supreme Court, the Courts of Appeal and various lesser tribunals. The seven judges and five substitute judges of the Supreme Court are elected by Congress for a period of six years. The Supreme Court can declare laws unconstitutional, and can censure the misconduct of ministers or officials when Congress has declared there is a case to answer.

The Armed Forces: The armed forces are declared by the Constitution to be essentially professional and non-political. The President exercises his power through a Commander-in-Chief who is designated for a period of six years by Congress, which alone, by a two-thirds majority, may dismiss him. Military service is obligatory.

Local Administration: The country is divided into eighteen departments for purposes of local administration, and these are subdivided into autonomous municipalities; the functions of local offices shall be only economic and administrative.

THE GOVERNMENT

Head of State: Gen. JUAN ALBERTO MELGAR CASTRO.

INDIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Union of India forms a natural sub-continent with the Himalayas to the north and is flanked by the Arabian Sea and the Bay of Bengal. Its neighbours are China and Nepal to the north, Pakistan to the north-west and Burma to the east. Bangladesh is surrounded by Indian territory except for a short frontier with Burma in the east. The climate ranges from temperate to tropical with an average summer temperature over the plains of approximately 27°C (85°F). There are heavy monsoons in June and July and rainfall varies widely. The official language is Hindi, and English is used as an associate language for many official purposes. Sixteen regional languages are also recognized in the Constitution, and many others are widely spoken. About 83 per cent of the population are Hindu and 11 per cent Muslim. There are also Christians, Sikhs, Buddhists, Jains and other minorities. The national flag (proportions 3 by 2) consists of horizontal stripes of saffron, white and green with the Dharma Chakra (Wheel of the Law) in blue on the white stripe. The capital is New Delhi.

Recent History

India became independent in August 1947, when Britain's Indian Empire was partitioned on religious lines between India and Pakistan. Sectarian violence, the movement of 12 million refugees, the integration of the former princely states into the Indian federal structure and a dispute over Kashmir presented major problems for the new nation. Their settlement, and the adoption of a republican constitution in January 1950, were followed by a period of some 12 years in which Indian affairs were dominated by the first Prime Minister, Jawaharlal Nehru.

India's occupation of Goa in 1961 and the Chinese attack of 1962 adversely affected Nehru's prestige in May 1964, and he was succeeded as Prime Minister by Lal Bahadur Shastri, who died in 1966 at Tashkent, U.S.S.R., where he had agreed on a peaceful settlement of the Kashmir dispute which had brought about a short war with Pakistan. Nehru's daughter, Mrs. Indira Gandhi, then became Prime Minister.

Border incidents in 1971 led to a 12-day war between India and Pakistan. The Indian army rapidly occupied East Pakistan, which India recognized as the independent state of Bangladesh. In 1972 India and Pakistan reached an agreement on their ceasefire line in Kashmir and the return of prisoners of war. Diplomatic relations with Pakistan were re-established in 1976.

In 1973 food shortages, student grievances and the lack of effective State governments provoked violent disorders in many States. Separatist movements were active in Nagaland, Mizoram and Andhra Pradesh, and political murders by Naxalites (Maoists) continued in West Bengal. In 1974 there was a mass movement of protest in Gujarat, against corruption in the Government and the ruling Congress Party, which was believed to be the cause of high food prices, and presidential rule was imposed. Jayaprakash Narayan began a crusade against corruption, calling for electoral law reform and the revocation of the Maintenance of Internal Security Act (MISA), which gave the Government almost unlimited powers of detention.

Mrs. Gandhi had been accused of electoral malpractice in the 1971 elections and, after years of court hearings, she was declared guilty in June 1975 and barred from holding elective office for six years. Later that month, under the threat of a widespread campaign of civil disobedience to force her out of office, Mrs. Gandhi declared a state of emergency, ordered the arrest of over 900 political opponents and introduced strict censorship. In August retrospective legislation nullified the Prime Minister's convictions and in November the Supreme Court cleared her of electoral malpractice on appeal. In December 1975 it was announced that the state of emergency would continue and general elections would be postponed until 1977. In August 1976 Parliament passed a bill amending MISA, giving the Government power to hold political prisoners without charges for two years instead of one. A Constitution Amendment Bill, greatly limiting the authority of the courts and barring the Supreme Court from hearing petitions challenging amendments of the Constitution, was also passed in 1976. In March 1977 general elections took place, resulting in a victory for the Janata (People's) Party, which was formed from an alliance of four non-communist parties, chaired by Morarji Desai, who became India's new Prime Minister.

The new Government began slowly to dismantle the apparatus established during the 21-month emergency rule, and a commission of inquiry into the alleged excesses of the Gandhi regime during that period was established. Former aides of Mrs. Gandhi and the former Defence Minister were charged with corruption and misappropriation of political funds. Mrs. Gandhi was also arrested, detained and subsequently released.

During late 1977 Mrs. Gandhi attempted unsuccessfully to oust Brahmananda Reddy and regain her position as President of the Congress Party. These attempts culminated in January 1978 with a split in the Congress Party and the formation of a new political group, led by Mrs. Gandhi, and also called the Congress Party. The leadership struggle within the Congress Party served to strengthen the position of the Janata Party, which was formed from disparate groups. The Communist Party of India (Marxist), which had been allied to the Janata Party in the elections, became increasingly important in 1977, gaining control in West Bengal and Tripura.

The Janata Government embarked on a policy of improving relations with all neighbouring countries. Discussions between India and Nepal in December 1977 were expected to lead to an agreement to co-operate over economic, trade and transit matters. A 25-year-old dispute was brought to an end in 1977 when India signed an agreement with Bangladesh over the sharing of the Ganges waters. India has also shown an interest in normalizing relations with the People's Republic of China, leaving the border question to be resolved at a later date.

India maintains close relations with both super-powers. The U.S.S.R. is a major contributor of economic and military assistance to India and in 1973 a 15-year accord was concluded between the two countries. Whilst there are close ties between the U.S.A. and India in economic and

scientific affairs, tensions arose in 1977 over India's refusal to sign the Nuclear Non-Proliferation Treaty or to accept safeguards and international inspections of atomic facilities.

Government

India is a federal republic. Legislative power is vested in Parliament, consisting of the President and two Houses. The Council of States (*Rajya Sabha*) has 243 members, including 231 indirectly elected by the State Assemblies for six years (one-third retiring every two years) and 12 nominated by the President for six years. The House of the People (*Lok Sabha*) has 542 members elected by universal adult suffrage for five years (subject to dissolution). The President is a constitutional Head of State elected for five years by an electoral college comprising elected members of both Houses of Parliament and the State legislatures. He exercises executive power on the advice of the Council of Ministers, which is responsible to Parliament. The President appoints the Prime Minister and, on the latter's recommendation, other Ministers.

India contains 22 self-governing States, each with a Governor, appointed by the President for five years, a legislature elected for five years and a Council of Ministers headed by the Chief Minister. Andhra Pradesh, Bihar, Jammu and Kashmir, Maharashtra, Karnataka, Tamil Nadu and Uttar Pradesh have bicameral legislatures, the other 15 State legislatures being unicameral. Each state has its own legislative, executive and judicial machinery corresponding to that of the Union.

The Constitution sets out three lists of subjects for legislation. Defence, foreign affairs, transport and communications, currency and coinage, customs and export duties and the higher courts of justice are all Union subjects; public health and forests are State subjects; and the third group of subjects, the Concurrent List, contains topics such as trade and industry, economic and social planning, social security and prices, on which both Union and States may legislate. In the event of the failure of constitutional government in a State, presidential rule can be imposed by the Union. There are also nine Union Territories, administered by Chief Commissioners, Lieutenant-Governors or Administrators appointed by the President.

Defence

In 1977 India had armed forces of 1,096,000: an army of 950,000, a navy of 46,000 and an air force of 100,000. Military service has been voluntary, but under the amended Constitution it will become the fundamental duty of every citizen to do national service when called upon. The defence budget for 1977/78 is 30,420 million rupees.

Economic Affairs

Some 70 per cent of the working population is employed in agriculture, which accounts for almost half the national income. The major part of the sown area is taken up by cereals, the staple crops. Extensive plantations produce tea, rubber and coffee, while cotton, jute, sugar, oilseeds, tobacco and other cash crops are also grown. Crops are frequently damaged by drought and floods. Since 1973/76 improved irrigation, the increased use of chemical fertilizers and the introduction of high-yield strains of rice and wheat, as well as favourable monsoons, have led to record harvests. India's total food-grain harvest in 1977/78 is expected to be between 118 and 121 million metric tons.

The Government has been able to set up a 23 million-ton "buffer stock" of food-grains.

India has large reserves of iron ore in Bihar and Orissa, as well as bauxite, titanium ore, manganese, rare metals and mica. India achieved a record output of iron ore during 1976/77. Inshore deposits of petroleum have been found in Assam, Gujarat and Nagaland, and five off-shore oilfields have been discovered in the Western continental shelf off the Maharashtra coast. The first of these, "Bombay High", began commercial production in 1976 and is expected to produce 10 million metric tons annually from 1980. India has a surplus oil refining capacity and is negotiating with foreign oil companies for processing their crude oil. Foreign exchange thus earned will be used for further oil exploration. A new petrochemical complex is to be built in West Bengal. Nationalization of the oil industry was completed in 1977. Meanwhile a 10-year plan for the development of coal production has been formulated.

India is the tenth major industrial power in the world, although manufacturing contributed only 15.0 per cent of G.D.P. in 1974/75. The principal industries, many of which are in the public sector, are processing agricultural products, iron and steel works, heavy electrical and machine tools, chemicals and textiles. Industrial production has fallen since April 1977, mainly due to labour troubles and power shortages.

Exports trebled between 1972 and 1977, mainly due to a growth in the sale of manufactures. This helped the balance of trade, which showed a surplus of \$81 million in 1977, but worsened income distribution. Increased export earnings, in conjunction with remittances from Indians abroad, which reached a new peak in September 1977, have led to a steady increase in foreign exchange reserves, to approximately U.S. \$3,500 million in January 1978. India receives a considerable amount of aid through international organizations such as the IMF, the World Bank and, in 1977 for the first time, OPEC. Foreign investment in India is limited.

In 1977 the Janata Government abolished five-year plans in favour of "rolling" plans which are to be adjusted annually to take into account unexpected events such as droughts. The new policy aims at an annual economic growth rate of 7 per cent by promoting agriculture, which will receive 40 per cent of public sector resources for investment, and decentralizing the economy. No new capital-intensive enterprises will be allowed to be established for goods which can be produced by "cottage", village or small-scale industries.

Transport and Communications

There are about 60,600 km. of railway track and over 8,000 km. of navigable waterways, of which 2,500 km. are open to power-driven craft. There are over 1.2 million km. of road, including about 30,000 km. of national highways connecting the main towns. The Indian Airlines Corporation provides internal air transport and also serves India's immediate neighbours. The Air India Corporation serves more than 25 countries throughout the world.

Social Welfare

Health programmes are primarily the responsibility of the State Governments, but the Union Government provides finance for improvements in public health services.

INDIA

Introductory Survey, Statistical Survey

The structure of the health system is based on the primary health centres, of which there were 2,073 in urban districts and 5,314 in rural districts in 1975. In 1975 there were 15,235 hospitals with 388,804 beds. The doctor/population ratio, which was 1 : 5,150 in 1968, improved to 1 : 4,200 in 1974. A vigorous birth control programme, launched in April 1976, resulted in 8 million sterilizations taking place. This was followed by a public reaction against the forced sterilizations, and between March and September 1977 only 346,000 sterilizations were performed.

Education

Education is primarily the responsibility of the individual State Governments. Elementary education to the age of 14 is theoretically compulsory in all States except Nagaland and Himachal Pradesh. Lower primary education for the age group 6-11 is free in all the States. Upper primary education for children aged 11-14 is free in 12 States. In 1975 82.7 per cent of the 6-11 age group and 36 per cent of the 11-14 age group were enrolled. Over 20 per cent of the 14-17 age group were enrolled for secondary education. There are 120 universities, 212 medical colleges, 1,572 teacher training institutes and over 3,000 other colleges (1975). At the 1971 census male literacy was 39 per cent and female literacy 19 per cent.

Tourism

The tourist attractions of India include its scenery, its forts, palaces and temples and its rich variety of wild life. Tourist infrastructure has recently been expanded by the provision of more luxury hotels and means of transport. In 1976 there were 533,951 foreign visitors to India.

Visas: Citizens of Commonwealth countries do not require visas to visit India, with the exception of citizens of Sri Lanka, Commonwealth citizens of Chinese origin, and missionaries.

Sport

The most popular sports in India are hockey, cricket, football, tennis and badminton.

Public Holidays

The public holidays observed in India vary locally. The dates given below apply to Delhi. As religious feasts depend on astronomical observations, holidays are usually declared at the beginning of the year in which they are to fall. It is not possible, therefore, to indicate more than the month in which some of the following holidays will fall.

1978: May 22nd (Buddha Purnima), July 7th (Rath Yatra), August 15th (Independence Day), August 25th (Janmastami), September 5th (Id ul Fitr, end of Ramadan), September 14th (Onam), October 2nd (Mahatma Gandhi's Birthday), October 8th-11th (Durga Puja-Dussehra), October 31st (Diwali), November 12th (Id-uz-Zuha), November 14th (Guru Nanak Jayanti), December 11th (Muharram), December 25th-26th (Christmas).

1979: January 14th (Pongal), January 26th (Republic Day), March (Holi), April (Ramnavani), April 13th (Vaisakhi).

Weights and Measures

The metric system has been introduced although both imperial and traditional Indian weights and measures continue in use:

1 tola = 11.66 grammes

1 seer = 933.1 grammes

1 maund = 37.32 kg.

1 lakh = (1,00,000) = 100,000

1 crore = (1,00,00,000) = 10,000,000

Currency and Exchange Rates

100 paise = 1 Indian rupee.

Exchange rates (December 1977):

£1 sterling = 15.91 rupees;

U.S. \$1 = 8.69 rupees.

FINANCE

100 paisa (singular, paise) = 1 Indian rupee.

Coins: 1, 2, 3, 5, 10, 20, 25 and 50 paisa; 1 rupee.

Notes: 1, 2, 5, 10, 20, 50 and 100 rupees.

Exchange rates (December 1977): £1 sterling = 15.91 rupees; U.S. \$1 = 8.69 rupees.

100 Indian rupees = £6.28 = \$11.51.

Note: Between September 1949 and June 1966 the Indian rupee had a par value of 21 U.S. cents (U.S. \$1 = 4.7619 rupees). From June 1966 to December 1971 the exchange rate was \$1 = 7.50 rupees (1 rupee = 13.33 U.S. cents). In terms of sterling, the rate between November 1967 and August 1971 was £1 = 18.00 rupees. In December 1971 a new central exchange rate of £1 = 18.9677 rupees was established. Until the "floating" of the pound in June 1972 this was equivalent to a rate of U.S. \$1 = 7.279 rupees. Until September 1975 the Indian authorities maintained the exchange rate against sterling, thus allowing the rupee to "float" in relation to other currencies. Since September 1975 the rupee has been pegged to a "basket" of currencies of India's principal trading partners. The average market rates (rupees per U.S. dollar) were: 7.594 in 1972; 7.742 in 1973; 8.102 in 1974; 8.376 in 1975; 8.960 in 1976.

THE CONSTITUTION

The Constitution of India, adopted by the Constituent Assembly in November 1949, was inaugurated on January 26th, 1950. The Preamble declares that the People of India solemnly resolve to constitute a Sovereign Democratic Republic and to secure to all its citizens justice, liberty, equality and fraternity. There are 397 articles and 9 schedules, which form a comprehensive document.

Union of States. The Union of India comprises 22 states and 9 Union Territories. There are provisions for the formation and admission of new states.

The Constitution confers citizenship on a threefold basis of birth, descent, and residence. Provisions are made for refugees who have migrated from Pakistan and for persons of Indian origin residing abroad.

Fundamental Rights and Directive Principles. The rights of the citizen contained in Part III of the Constitution are declared fundamental and enforceable in law. "Untouchability" is abolished and its practice in any form is a punishable offence. The Directive Principles of State Policy provide a code intended to ensure promotion of the economic, social and educational welfare of the State in future legislation.

The President is the head of the Union, exercising all executive powers on the advice of ministers responsible to Parliament. He is elected by an electoral college consisting

of elected members of both Houses of Parliament and the Legislatures of the States. The President holds office for a term of five years and is eligible for re-election. He may be impeached for violation of the Constitution. The Vice-President is the *ex-officio* Chairman of the Upper House and is elected by a joint sitting of both Houses of Parliament.

The Parliament of the Union consists of the President and two Houses: the Rajya Sabha (Upper House) and the Lok Sabha (House of the People). The Rajya Sabha consists of not more than 250 members, of whom 12 are nominated by the President. One-third of its members retire every two years. Elections are indirect, each state's legislative quota being elected by the members of the state's legislative assembly. The Lok Sabha consists of not more than 545 members elected by adult franchise; not more than 20 represent the Union Territories.

Government of the States. The governmental machinery of states closely resembles that of the Union. Each of these states has a governor at its head appointed by the President for a term of five years to exercise executive power on the advice of a Council of Ministers. The state's legislatures consist of the Governor and either one house (legislative assembly) or two houses (legislative assembly and legislative council). The term of the assembly is but the council is not subject to dissolution.

Language. The Constitution provides that the official language of the Union shall be Hindi. (The English language will continue to be an associate language for many official purposes.)

Legislation—Federal System. The Constitution provides that bills, other than money bills, can be introduced in either House. To become law, they must be passed by both Houses and receive the assent of the President. In financial affairs, the authority of the Lower House is final. The various subjects of legislation are enumerated on three lists in the seventh schedule of the Constitution: the Union List, containing nearly 100 entries, including external affairs, defence, communications, and atomic energy; the State List, containing 65 entries, including local government, police, public health, education; and the Concurrent List, with over 40 entries, including criminal law, marriage and divorce, labour welfare. The Constitution vests residuary authority in the Centre. All matters not enumerated in the Concurrent or State Lists will be deemed to be included in the Union List, and in the event of conflict between Union and State Law on any subject enumerated in the Concurrent List the Union Law will prevail. In time of emergency Parliament may even exercise powers otherwise exclusively vested in the states. Under Article 356, "If the President on receipt of a report from the Government of a State or otherwise is satisfied that a situation has arisen in which the government of the State cannot be carried on in accordance with the provisions of this Constitution, the President may by Proclamation: (a) assume to himself all or any of the functions of the Government of the State and all or any of the powers of the Governor or any body or authority in the State other than the Legislature of the State; (b) declare that the powers of the Legislature of the State shall be exercisable by or under the authority of Parliament; (c) make such incidental provisions as appear to the President to be necessary": provided that none of the powers of a High Court be assumed by the President or suspended in any way. Unless such a Proclamation is approved by both Houses of Parliament, it ceases to operate after two months. A Proclamation so approved ceases to operate after six months, unless renewed by Parliament. Its renewal cannot be extended beyond a total period of three years. An independent judiciary exists to define and interpret the Constitution and to resolve constitutional disputes arising between states, or between a state and the Government of India.

Other Provisions of the Constitution deal with the administration of tribal areas, relations between the Union and States, inter-state trade and finance.

Amendments. The Constitution is flexible in character, and a simple process of amendment has been adopted. For amendment of provisions concerning the Supreme Courts and the High Courts, the distribution of legislative powers between the Union and the States, the representation of the States in Parliament, etc., the amendment must be passed by both Houses of Parliament and must further be ratified by the legislatures of not less than half the States. In other cases no reference to the State legislatures is necessary.

Numerous amendments were adopted in August 1975, following the declaration of a state of emergency in June. The Constitution (39th Amendment) Bill laid down that the President's reasons for proclaiming an emergency may not be challenged in any court. Under the 40th Amendment Bill, 38 existing laws may not be challenged before any court on the ground of violation of fundamental rights. Thus detainees under the Maintenance of Internal Security Act could not be told the grounds of their detention and were forbidden bail and any claim to liberty through natural or common law. The Constitution (41st Amendment) Bill provided that the President, Prime Minister and State governors should be immune from criminal prosecution for life and from civil prosecution during their term of office.

In December 1976 a 59-clause Constitution (44th Amendment) Bill came into force. Some of the provisions of the Bill are that the Indian Democratic Republic shall be named a "Democratic Secular and Socialist Republic"; that the President "shall act in accordance with" the advice given to him by the Prime Minister and Cabinet, and, acting at the Prime Minister's direction, shall be empowered for two years to amend the Constitution by executive order, in any way beneficial to the enforcement of the whole; that the term of the Lok Sabha and of the State Assemblies shall be extended from five to six years; that there shall be no limitation on the constituent power of Parliament to amend the Constitution, and that India's Supreme Court shall be barred from hearing petitions challenging Constitutional amendments; that strikes shall be forbidden in the public services and the Union Government have the power to deploy police or other forces under its own superintendence and control in any State. Directive Principles are given precedence over Fundamental Rights; ten basic duties of citizens are listed, including the duty to "defend the country and render national service when called upon to do so".

The Janata Party Government, which came into power in March 1977, promised to amend the Constitution during the year, so as to "restore the balance between the people and Parliament, Parliament and the judiciary, the judiciary and the executive, the states and the centre, and the citizen and the Government that the founding fathers of the Constitution had worked out". In December 1977, 10 of the 57 clauses inserted under the emergency rule were annulled, restoring some powers of judicial review to the courts. A provision empowering the Government to declare individuals or parties anti-national was deleted and some fundamental rights were restored to their position in the original Constitution. Among the provisions left unchanged is a specific ban on judicial review of Constitutional amendments and a section subordinating fundamental human rights to economic and social goals.

The Panchayat Raj scheme, which is designed to decentralize the powers of the Central and State Governments, has been extensively introduced. This scheme is based on the Panchayat (Village Council) and the Gram Sabha (Village Parliament) and envisages the gradual transference of local government from State to local authority. Revenue and internal security will remain State responsibilities at present.

JUDICIAL SYSTEM

Note: The Constitution (44th Amendment) Bill, which came into force in December 1976, barred the Supreme Court from hearing petitions challenging constitutional amendments and took away the power of the lower courts to review the constitutional validity of other legislation. The Janata Government promised to restore their powers to the courts (*see* under The Constitution).

THE SUPREME COURT

The Supreme Court exercises exclusive jurisdiction in any dispute between the Union and the States (although there are certain restrictions where an acceding state is involved). It has appellate jurisdiction over any judgment, decree or order of the High Court where that Court certifies that either a substantial question of law or the interpretation of the Constitution is involved.

Provision is made for the appointment by the Chief Justice of India of judges of High Courts as *ad hoc* judges at sittings of the Supreme Court for specified periods, and for the attendance of retired judges at sittings of the Supreme Court. The Supreme Court has advisory jurisdiction in respect of questions which may be referred to it by the President for opinion. The Supreme Court is also empowered to hear appeals against a sentence of death passed by a State High Court, in reversal of an order of acquittal by a lower court, and in a case in which a High Court has granted a certificate of fitness.

The Supreme Court also hears appeals which are certified by High Courts to be fit for appeal, subject to rules made by the Court. Parliament may, by law, confer on the Supreme Court any further powers of appeal.

HIGH COURTS

The High Courts are the Courts of Appeal from the lower courts, and their decisions are final except in cases where appeal lies to the Supreme Court.

Trial by jury is the rule in original criminal cases before the High Court, but juries are not employed in civil suits.

LOWER COURTS

Provision is made in the Code for Criminal Procedure for the constitution of lower criminal courts called Courts of Session and Courts of Magistrates. The Courts of Session are competent to try all persons duly committed for trial, and inflict any punishment authorized by the law.

Appeals can be made from a single judge's decision in the High Court, sitting as a court of original criminal jurisdiction, to a bench of not fewer than two judges of the same Court sitting as a Court of Appeal. The President and the local government concerned exercise the prerogative of mercy.

The constitution of inferior civil courts is determined by regulations within each state.

THE PRESS

Freedom of the Press was guaranteed under articles 13 and 19 of the Constitution. A measure giving the Press the privilege of publishing true reports of the proceedings of Parliament without being exposed to any civil or criminal action was popularly known as the "Feroz Gandhi Act". That privilege was withdrawn when Mrs. Indira Gandhi's Government declared a state of emergency in June 1975 and article 19 of the Constitution, which guaranteed the right to freedom of speech and expression, was suspended. For the first time since independence pre-censorship was imposed on all Indian newspapers and magazines and on the reports of foreign correspondents. In order to facilitate censorship of all news, a merger of the two English language agencies with the two Hindi ones was enforced in January 1975, and *Samachar*, the state news agency, was established. However, pre-censorship was declared illegal by the courts in September 1975, and censorship of foreign correspondents ended in September 1976, but the Prevention of Publication of Objectionable Matter Act, passed by Parliament in early 1976, still greatly restricted press freedom. Following the defeat of Mrs. Gandhi's Government in the 1977 elections, the new Lok Sabha in April 1977 approved a bill to restore the privileges of the "Feroz Gandhi Act" to the Press. This effectively revoked the Prevention of Publication of Objectionable Matter Act.

In November 1977 the Government of India decided to disband *Samachar* and to allow the four original agencies to start up again. A commission was established to examine whether the failure of the Press to stand up to the Government during the emergency period, was "an institutional or a professional failure".

The growth of a thriving Press has been made difficult by cultural barriers caused by religious, caste and lan-

guage differences. Consequently the English Press, with its appeal to the educated middle-class urban readership throughout the States, retained its dominance. The English metropolitan dailies, such as the *Times of India* (published in three cities), *Indian Express* (published in seven cities) and the *Statesman* (published in two cities), are some of the widest circulating and most influential newspapers. Though there are more papers in Hindi, the total circulation of the English Press is the greater.

The main Indian language dailies, such as the *Navbharat Times* (Hindi), *Malayala Manorama* (Malayalam), the *Jugantar* (Bengali), and the *Hindu*, also appeal to the urban reader, but by paying little attention to rural affairs they fail to cater for the increasingly literate provincial population who know no English. Most Indian papers have a relatively small circulation.

The more popular weekly periodicals range from the cultural Tamil publications *Kumudam*, *Kalki* and *Ananda Vikatan* to the sensationalist English *Blitz*, *Filmfare*, *Sports and Pastime* and *Women's Own Weekly* are leading magazines. The main monthly periodicals are the *Reader's Digest* and the Hindi religious publication *Kalyan*.

The majority of publications in India are under individual ownership, whilst newspapers owned by public and private limited companies claim the largest part of the total circulation. The most powerful groups own most of the large English dailies and frequently have considerable private commercial and industrial holdings. Three of the major groups are as follows:

Times of India Group (controlled by the JAIN and DALMIA families): dailies: the *Times of India*, *Economic Times*, the *Evening News of India* (Bombay), the Hindi

Navbharat Times, the *Maharashtra Times* (Bombay); periodicals: the *Illustrated Weekly of India*, the Hindi weeklies *Dharmayug* and *Dinaman*, the fortnightly *Femina* and *Filmfare* and the Hindi monthlies *Parag* and *Sarika*, etc.

Indian Express Group (controlled by the GOENKA family): dailies: the *Indian Express*, the Marathi *Loksatta*, the Tamil *Dinamani*, the Telugu *Andhra Prabha*, the Kannada *Kannada Prabha* and the English *Financial Express*; periodicals: the English weeklies the *Sunday Standard* and *Screen* and the Telugu *Andhra Prabha Illustrated Weekly*.

Hindustan Times Group (controlled by the BIRLA family): dailies: the *Hindustan Times* (Delhi), the *Hindustan Times Evening News*, the *Hindustan Times Kanpur Supplement*, the *Leader* (Allahabad), the *Searchlight* (Patna), *Pradeep* (Patna), the Hindi *Hindustan* (Delhi) and *Bharat* (Allahabad); periodicals: the weeklies the *Overseas Hindustan Times*, the *Eastern Economist*, the Hindi *Saptahik Hindustan* (Delhi) and the Hindi monthly *Nandan* (New Delhi).

RADIO AND TELEVISION

RADIO

All India Radio (AIR): Akashvani Bhavan, Parliament St., New Delhi 110001; broadcasting in India is controlled by the Ministry of Information and Broadcasting. The service is financed from the grants voted by Parliament annually; Dir.-Gen. P. C. CHATTERJI.

A comprehensive development plan has been evolved and in 1977 there were 73 broadcasting stations in the whole of India. There are at present regional stations operating from the following centres:

East: Agartala, Aijal Tezu, Aizawal, Calcutta, Cuttack, Dibrugarh, Gauhati, Imphal, Jaipur, Kohima, Kurseong, Pasighat, Port Blair, Sambalpur, Shillong, Silchar, Siliguri and Tawang.

North: Ajmer, Aligarh, Allahabad, Bhagalpur, Bhopal, Bikaner, Chandigarh, Delhi, Gorakhpur, Gwalior, Indore, Jabalpur, Jaipur, Jodhpur, Jullundur, Kanpur, Lucknow, Mathura, Patna, Ranchi, Raipur, Rampur, Simla, Udaipur and Varanasi.

South: Alleppey, Bangalore, Bhadravathi, Coimbatore, Cuddapah, Dhawar, Gulbarga, Hyderabad, Kozhikode (Calicut), Madras, Pondicherry, Tiruchi, Tirunelveli, Trivandrum, Vijayawada and Vishakhapatnam.

West: Ahmedabad, Bhuj, Bombay, Nagpur, Parbhani, Pune (Poona), Rajkot, Sangli and Vadodara (Baroda).

Radio Kashmir broadcasts from Jammu, Leh and Srinagar.

Broadcasting is particularly important in India owing to the difficulty of reaching the vast masses of the people by any medium other than the spoken word. To enable AIR to reach rural areas, listening is arranged by means of community sets installed for public use in a large number of villages. AIR network is equipped with a total of 143 transmitters (medium and shortwave) and covers all the important linguistic areas in the country.

The News Services Division, centralized in New Delhi, is one of the largest news organizations in the world. It has 29 regional news units, which broadcast 101 bulletins daily in 19 languages and 34 dialects. Seventy-one bulletins in

19 languages are broadcast in the Home Services and 61 bulletins in 25 languages in the External Services.

In 1975 there were 14,908,097 radio licences issued.

TELEVISION

Calcutta: began transmitting in 1975 using relay stations at Durgapur, Asansol, Midnapur and Khargapur.

Gulbarga: Commissioned in 1977.

Hyderabad: Commissioned in 1977.

Jaipur: began transmissions in 1977.

Lucknow: began broadcasting in 1975; a relay transmitter at Kanpur has extended the range of Lucknow's transmissions.

Madras: Commissioned in 1975.

Muzaffarpur: Commissioned in 1977.

Sambalpur: Commissioned in 1977.

Srinagar: commenced broadcasting three days a week from 1973 in Urdu and Kashmiri.

Commercial television started in India in 1976. It has been forecast that most of the population will be covered by radio and television by 1979.

In 1975/76 350,000 television sets were in operation.

INDONESIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Indonesia consists of a group of over 3,000 islands between South-East Asia and Australia and stretching from the Malayan peninsula to New Guinea. The principal islands are Java, Sumatera, Kalimantan (Borneo), Sulawesi (Celebes), Irian Jaya (West New Guinea), the Moluccas and Timor. The climate is tropical with an average temperature of 26°C (80°F) and heavy rainfall during most seasons. The official language is Bahasa Indonesian but more than 200 languages and dialects are spoken. About 94 per cent of the population are Muslims, 5 per cent Christian and the remainder are either Hindu or Buddhist. The national flag (proportions 5 by 3) has two horizontal bands of red and white. The capital is Jakarta on the island of Java.

Recent History

Except for East Timor (*see below*), Indonesia was formerly the Netherlands East Indies. During the Second World War the territory was occupied by Japanese forces from March 1942. In August 1945, after the Japanese surrender, a group of nationalists proclaimed the independence of Indonesia, with Dr. Sukarno as President. The Netherlands transferred sovereignty in December 1949. West New Guinea (now Irian Jaya) remained under Dutch control until 1962 but, following a brief period of UN administration, was transferred to Indonesia in May 1963.

Dr. Sukarno established himself as virtual dictator, following a policy of extreme nationalism. Inflation, widespread corruption and Sukarno's Marxist tendencies led to opposition from students, the army and Muslim groups. Military commanders, led by Gen. Suharto, assumed emergency executive powers in March 1966. The President handed all power to Suharto in February 1967. In March the People's Consultative Assembly removed Sukarno from office and named Gen. Suharto as acting President. He became Prime Minister in October 1967 and, after being elected by the Assembly, was inaugurated as President in March 1968.

Under Suharto's "New Order", real power passed from the parliament and cabinet to a small group of army officers and to *Kopkamtib*, the chief security organization. Left-wing movements were suppressed, and a liberal economic policy adopted. In 1974 the President announced steps to combat corruption and return power to the constitutional organs of government.

While Suharto remained firmly in power in 1976 and 1977, there was evidence of dissatisfaction with the regime and a number of plots against Suharto were suppressed. In May 1977 there was a rebellion in Irian Jaya, said to have been organized by the Movement for the Liberation of Papua, which seeks independence from Indonesia. However, general elections held in May gave *Golkar*, the organization representing the Government, a majority.

In 1977 an estimated 55,000 political prisoners, arrested in 1965 after an abortive communist coup, were still in detention without trial, but in August the Government undertook to release 20,000 detainees by 1978.

Following the outbreak of civil war in Portuguese Timor in August 1975, the Government supplied the pro-Indonesian factions in the province with military and economic aid. After the unilateral declaration of independence by the Revolutionary Front for an Independent Eastern Timor (FRETILIN), Indonesian troops intervened directly and established control in the region in December 1975, setting up a provisional government. In May 1976 the newly convened East Timor People's Representative Council resolved to integrate with Indonesia, and in July the Indonesian Government formally declared its acceptance of East Timor as the 27th province of Indonesia. Resistance to Indonesian rule continued in 1977 and in August the Government announced a general amnesty for all FRETILIN supporters in an attempt to end the struggle. The UN has condemned Indonesian intervention in East Timor and does not recognize its absorption by Indonesia, not considering the Representative Council to have truly reflected the views of the majority of the people of East Timor.

Indonesia's foreign relations under Suharto have been conducted according to the principle of non-alignment although it maintains close relations with the West. Indonesia is a member of ASEAN.

Government

The highest authority of the state is the People's Consultative Assembly, with 920 members who serve for five years. The Assembly includes 460 members of the House of Representatives, the country's legislative organ. The House has 100 appointed members and 360 directly elected representatives. The remaining 460 seats of the Assembly are allocated to Government appointees, delegates of regional assemblies and to representatives of parties and groups in proportion to their elected seats in the House.

Executive power rests with the President, elected for five years by the Assembly. He governs with the assistance of an appointed Cabinet, responsible to him.

Defence

The armed forces were combined as a single force in 1966 and placed under the single administration of the Ministry of Defence and Security in 1967. Military service is selective. In 1977 total strength was 247,000 men: army 180,000, navy 39,000 and air force 28,000. There was also a Police Mobile Brigade of 12,000 and about 100,000 militia. Defence spending for 1977/78 was 560,000 million rupiahs (U.S. \$1,350 million).

Economic Affairs

The economy is predominantly agricultural. In 1975 agriculture provided around 33 per cent of the G.D.P. and in 1973 employed 60 per cent of the labour force. The staple crop is rice, while rubber, oil palm, copra, sugar cane and coffee are among the cash crops grown. In 1976 production of paddy rice was 23 million tons. However, this remained short of domestic requirements and in 1977 rice had to be imported.

Two-thirds of Indonesia's land area is covered by forest and timber production is an important section of the economy. Output of industrial logs rose from 4.9 million cubic metres in 1967 to 26.3 million cubic metres in 1973, falling to 16.4 million cubic metres in 1975. In 1976 lumber exports were worth U.S. \$782 million.

Indonesia's principal mineral resource is petroleum, of which it produced about 550.3 million barrels in 1976. Revenue from crude oil exports, U.S. \$1,382.5 million in 1973, reached U.S. \$5,453.8 million in 1976. There are also deposits of tin, bauxite, nickel, copper and coal which are mined.

Manufacturing has developed slowly, contributing 8.7 per cent of the G.N.P. in 1973. Under the first five-year plan, Repelita I (1970-74), emphasis was placed on the development of an infrastructure of power and communications to provide the basis for foreign investment and the development of industry. The plan targets, to increase productive capacity by 90 per cent over the plan period, were largely met and in some cases exceeded. Repelita II (1975-79) aims to increase employment opportunities and to create a more equitable distribution of wealth. An average annual growth rate of 7.5 per cent in the plan period was projected, and it is aimed to increase industry's share of the G.D.P. Real growth in 1976 was estimated to be 7 per cent.

Repelita I and II have been financed largely by foreign aid, from the IMF, the Asian Development Bank, the World Bank and the Intergovernmental Group for Indonesia (IGGI). This placed the Indonesian Government under a heavy debt repayment burden, amounting to U.S. \$7,000 million in 1973. The Government increased its debts further when it took over the management of the state oil corporation, Pertamina, after it became clear that it had over-reached its credit during 1975. As a result, many of the projects planned under Repelita II had to be postponed. However by the end of 1977 most of the short-term debts of Pertamina had been paid and it was hoped to return to the development targets laid out in the plan.

In 1977, partly as a result of an attempt by the Government in 1976 to increase its revenue from oil by revising the contracts of the foreign oil companies operating in Indonesia, there was a fall off in foreign investment which seriously affected the oil exploration programme. In 1977 new investment procedures were introduced in order to counteract this trend.

Indonesia has a healthy trade balance, with a surplus amounting to U.S. \$2,874 million in 1976. Its major trading partner is Japan, trade with which accounted for 36 per cent of imports and 49 per cent of exports in 1975. Indonesia's main imports are machinery, fertilizers and iron and steel. Inflation, which reached nearly 50 per cent in 1973/74, fell to 14 per cent in 1976.

Transport and Communications

Inter-island shipping is in the hands of state and private shipping lines and there are many small craft. There are railways on Java, Madura and Sumatera totalling 7,891

km. (1974). In Java there are adequate roads but on most of the other islands traffic is by jungle track and river boat. In 1975 there were about 85,000 km. of roads, of which over one-quarter were surfaced. Domestic air services link the major cities and international services are provided by the state airline, P.N. Garuda Indonesia Airways, and many foreign lines.

Social Welfare

There is a limited state welfare service providing old-age pensions and medical care for government workers. In 1974 there were an estimated 680 hospitals and 6,221 doctors.

Education

In 1975 over 14 million pupils between 7 and 12 years were enrolled in primary schools. An eight-year compulsory education programme will be extended throughout the whole country by 1980. There are 28 state and 21 private universities. In 1971 the average illiteracy rate among people aged 10 and over was 40.4 per cent (males 29.2 per cent, females 51.0 per cent).

Tourism

Tourism is based mainly on the islands of Java and Bali. Java is famous for mountains and volcanoes and for Buddhist and Hindu temples. Bali, the only remaining Hindu area in South-East Asia, is renowned for traditional dancing and religious festivals. In 1976, 435,000 foreign tourists visited Indonesia, an increase of 19 per cent over 1975.

Visas are required by all visitors.

Sport

Organized sports include football, basketball, badminton and athletics. Cock-fighting is popular, particularly in Bali.

Public Holidays

1978: May 4th (Ascension), July 3rd (Mi'ra Nabi Muhammad, ascension of the Prophet), August 17th (Independence Day), September 4th and 5th (Id ul Fitr, end of Ramadan), November 11th (Id ul Adha), December 2nd (Moslem New Year), December 25th (Christmas Day).

1979: January 1st (New Year's Day), April 13th (Good Friday).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 sen = 1 rupiah.

Exchange rates (December 1977):

Exports: £1 sterling = 685.0 rupiahs;
U.S. \$1 = 374.0 rupiahs.

Imports: £1 sterling = 760.1 rupiahs;
U.S. \$1 = 415.0 rupiahs.

THE CONSTITUTION

Indonesia has had three Constitutions, all provisional: August 1945, February 1950 and August 1950. In July 1959, the constitution of 1945 was re-enacted by Presidential decree:

GENERAL PRINCIPLES

The 1945 Constitution consists of 37 articles, 4 transitional clauses and 2 additional provisions, and is preceded by a preamble. The preamble contains an indictment of all forms of colonialism, an account of Indonesia's struggle for independence, the declaration of that independence and a statement of fundamental aims and principles. Indonesia's National Independence, according to the text of the preamble, has the state form of a Republic, with sovereignty residing in the People, and is based upon the *Pancasila*:

1. Belief in One Supreme God.
2. Just and Civilized Humanity.
3. Nationalism; the Unity of Indonesia.
4. Democracy; guided by the wisdom of unanimity arising from deliberations (*musjawarah*) and mutual assistance (*gotong royong*).
5. Social Justice; equality of political rights, equality of the rights of citizenship, social equality, cultural equality.

THE STATE ORGANS

Majelis Permusyawaratan Rakyat—MPR (*People's Consultative Assembly*).

Sovereignty is in the hands of the People and is exercised in full by the People's Consultative Assembly as the embodiment of the whole Indonesian People. The Consultative Assembly is the highest authority of the State, and is to be distinguished from the legislative body proper (Dewan Perwakilan Rakyat, *see below*) which is incorporated within the Consultative Assembly. The Consultative Assembly is composed of all members of the Dewan, augmented by delegates from the regions and representatives of the functional groups in society (farmers, workers, businessmen, the clergy, intelligentsia, armed forces, students, etc.). The Assembly sits at least once every five years, and its primary competence is to determine the Constitution and the broad lines of the policy of the State and the Government. It also elects the President and Vice-President, who are responsible for implementing that policy. All decisions are taken unanimously in keeping with the traditions of *musjawarah*.

Members are to be chosen by national elections. Following the dissolution of the elected Assembly in 1960 and pending general elections, the People's Consultative Assembly exercises the authority laid down in the 1945 Constitution.

The President

The highest executive of the Government, the President, holds office for a term of five years and may be re-elected. As Mandatory of the MPR he must execute the policy of the State according to the Decrees determined by the MPR during its Fourth General and Special Sessions. In conducting the administration of the State, authority and responsibility are concentrated in the President. The Ministers of State are his assistants and are responsible only to him.

Dewan Perwakilan Rakyat—DPR (*House of Representatives*)

The legislative branch of the State, the House of Representatives, sits at least once a year. Every statute requires the approval of the DPR. Members of the House of Representatives have the right to submit draft bills which require ratification by the President, who has the right of veto. In times of emergency the President may enact ordinances which have the force of law, but such Ordinances must be ratified by the House of Representatives during the following session or be revoked.

Dewan Pertimbangan Agung—DPA (*Supreme Advisory Council*)

The DPA is an advisory body assisting the President who chooses its members from political parties, functional groups and groups of prominent persons.

Mahkamah Agung (*Supreme Court*)

The judicial branch of the State, the Supreme Court and the other courts of law are independent of the Executive in exercising their judicial powers.

Badan Pemeriksa Keuangan (*State Comptrolling Body*)

Controls the accountability of public finance, enjoys investigatory powers and is independent of the Executive. Its findings are presented to the DPR.

JUDICIAL SYSTEM

Supreme Court. The final court of appeal (cassation).

High Courts in Jakarta, Surabaya, Medan, Ujungpandang (Makassar), Banda Aceh, Padang, Palembang, Bandung, Semarang, Banjarmasin, Manado, Denpasar, Ambon and Jayapura deal with appeals from the District Courts.

District Courts deal with marriage, divorce and reconciliation.

Chairman of the Supreme Court: Prof. OEMAR-SENADJI.

There is one codified criminal law for the whole of Indonesia. Europeans are subject to the Code of Civil Law published in the State Gazette in 1847. For Indonesians the civil law is the uncodified customary law (*Hukum Adat*) which varies from region to region. Alien orientals (i.e. Arabs, Indians, etc.) and Chinese are subject to certain parts of the Code of Civil Law and the Code of Commerce. The work of codifying this law has started but in view of the great complexity and diversity of customary law it may be expected to take a considerable time to achieve.

INSURANCE

Regulations have been introduced to limit the number of foreign companies licensed to operate to 12. In February 1974 a statement was issued by the Ministry of Finance emphasizing the need to form bigger units among the domestic companies, advising foreign companies to co-operate with domestic companies in joint ventures, and forbidding foreign investment in the life insurance sector. In July 1976 the Government ruled that foreign non-life insurance companies should conduct business through local companies. In 1976 there were 62 domestic insurance companies including 12 life insurance companies, 3 re-insurance companies, and 4 social insurance bodies.
